**APPENDIX A TO PART 1200 –
CERTIFICATION AND ASSURANCES
FOR HIGHWAY SAFETY GRANTS (23 U.S.C. CHAPTER 4)**

State: Missouri

Fiscal Year: 2016

Each fiscal year the State must sign these Certifications and Assurances that it complies with all requirements including applicable Federal statutes and regulations that are in effect during the grant period. (Requirements that also apply to subrecipients are noted under the applicable caption.)

In my capacity as the Governor's Representative for Highway Safety, I hereby provide the following certifications and assurances:

GENERAL REQUIREMENTS

To the best of my personal knowledge, the information submitted in the Highway Safety Plan in support of the State's application for Section 402 and Section 405 grants is accurate and complete. (Incomplete or incorrect information may result in the disapproval of the Highway Safety Plan.)

The Governor is the responsible official for the administration of the State highway safety program through a State highway safety agency that has adequate powers and is suitably equipped and organized (as evidenced by appropriate oversight procedures governing such areas as procurement, financial administration, and the use, management, and disposition of equipment) to carry out the program. (23 U.S.C. 402(b)(1)(A))

The State will comply with applicable statutes and regulations, including but not limited to:

- 23 U.S.C. Chapter 4 - Highway Safety Act of 1966, as amended
- 49 CFR Part 18 - Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments
- 23 CFR Part 1200 – Uniform Procedures for State Highway Safety Grant Programs

The State has submitted appropriate documentation for review to the single point of contact designated by the Governor to review Federal programs, as required by Executive Order 12372 (Intergovernmental Review of Federal Programs).

FEDERAL FUNDING ACCOUNTABILITY AND TRANSPARENCY ACT (FFATA)

The State will comply with FFATA guidance, OMB Guidance on FFATA Subaward and Executive Compensation Reporting, August 27, 2010, (https://www.fsrs.gov/documents/OMB_Guidance_on_FFATA_Subaward_and_Executive_Compensation_Reporting_08272010.pdf) by reporting to FSRS.gov for each sub-grant awarded:

- Name of the entity receiving the award;
- Amount of the award;

- Information on the award including transaction type, funding agency, the North American Industry Classification System code or Catalog of Federal Domestic Assistance number (where applicable), program source;
- Location of the entity receiving the award and the primary location of performance under the award, including the city, State, congressional district, and country; and an award title descriptive of the purpose of each funding action;
- A unique identifier (DUNS);
- The names and total compensation of the five most highly compensated officers of the entity if:
 - (i) the entity in the preceding fiscal year received—
 - (I) 80 percent or more of its annual gross revenues in Federal awards;
 - (II) \$25,000,000 or more in annual gross revenues from Federal awards; and
 - (ii) the public does not have access to information about the compensation of the senior executives of the entity through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986;
- Other relevant information specified by OMB guidance.

NONDISCRIMINATION

(applies to subrecipients as well as States)

The State highway safety agency will comply with all Federal statutes and implementing regulations relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (Pub. L. 88-352), which prohibits discrimination on the basis of race, color or national origin (and 49 CFR Part 21); (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. 1681-1683 and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), and the Americans with Disabilities Act of 1990 (Pub. L. 101-336), as amended (42 U.S.C. 12101, et seq.), which prohibits discrimination on the basis of disabilities (and 49 CFR Part 27); (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. 6101-6107), which prohibits discrimination on the basis of age; (e) the Civil Rights Restoration Act of 1987 (Pub. L. 100-259), which requires Federal-aid recipients and all subrecipients to prevent discrimination and ensure nondiscrimination in all of their programs and activities; (f) the Drug Abuse Office and Treatment Act of 1972 (Pub. L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (g) the comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (Pub. L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (h) Sections 523 and 527 of the Public Health Service Act of 1912, as amended (42 U.S.C. 290dd-3 and 290ee-3), relating to confidentiality of alcohol and drug abuse patient records; (i) Title VIII of the Civil Rights Act of 1968, as amended (42 U.S.C. 3601, et seq.), relating to nondiscrimination in the sale, rental or financing of housing; (j) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (k) the requirements of any other nondiscrimination statute(s) which may apply to the application.

THE DRUG-FREE WORKPLACE ACT OF 1988(41 USC 8103)

The State will provide a drug-free workplace by:

- Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;
- Establishing a drug-free awareness program to inform employees about:
 - The dangers of drug abuse in the workplace.
 - The grantee's policy of maintaining a drug-free workplace.
 - Any available drug counseling, rehabilitation, and employee assistance programs.
 - The penalties that may be imposed upon employees for drug violations occurring in the workplace.
 - Making it a requirement that each employee engaged in the performance of the grant be given a copy of the statement required by paragraph (a).
- Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will –
 - Abide by the terms of the statement.
 - Notify the employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five days after such conviction.
- Notifying the agency within ten days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction.
- Taking one of the following actions, within 30 days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted –
 - Taking appropriate personnel action against such an employee, up to and including termination.
 - Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency.
- Making a good faith effort to continue to maintain a drug-free workplace through implementation of all of the paragraphs above.

BUY AMERICA ACT

(applies to subrecipients as well as States)

The State will comply with the provisions of the Buy America Act (49 U.S.C. 5323(j)), which contains the following requirements:

Only steel, iron and manufactured products produced in the United States may be purchased with Federal funds unless the Secretary of Transportation determines that such domestic purchases would be inconsistent with the public interest, that such materials are not reasonably available and of a satisfactory quality, or that inclusion of domestic materials will increase the cost of the overall project contract by more than 25 percent. Clear justification for the purchase of non-

domestic items must be in the form of a waiver request submitted to and approved by the Secretary of Transportation.

POLITICAL ACTIVITY (HATCH ACT)
(applies to subrecipients as well as States)

The State will comply with provisions of the Hatch Act (5 U.S.C. 1501-1508) which limits the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

CERTIFICATION REGARDING FEDERAL LOBBYING
(applies to subrecipients as well as States)

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.
2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.
3. The undersigned shall require that the language of this certification be included in the award documents for all sub-award at all tiers (including subcontracts, subgrants, and contracts under grant, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

RESTRICTION ON STATE LOBBYING

(applies to subrecipients as well as States)

None of the funds under this program will be used for any activity specifically designed to urge or influence a State or local legislator to favor or oppose the adoption of any specific legislative proposal pending before any State or local legislative body. Such activities include both direct and indirect (e.g., "grassroots") lobbying activities, with one exception. This does not preclude a State official whose salary is supported with NHTSA funds from engaging in direct communications with State or local legislative officials, in accordance with customary State practice, even if such communications urge legislative officials to favor or oppose the adoption of a specific pending legislative proposal.

CERTIFICATION REGARDING DEBARMENT AND SUSPENSION

(applies to subrecipients as well as States)

Instructions for Primary Certification

1. By signing and submitting this proposal, the prospective primary participant is providing the certification set out below.
2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. The prospective participant shall submit an explanation of why it cannot provide the certification set out below. The certification or explanation will be considered in connection with the department or agency's determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when the department or agency determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency may terminate this transaction for cause or default.
4. The prospective primary participant shall provide immediate written notice to the department or agency to which this proposal is submitted if at any time the prospective primary participant learns its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
5. The terms *covered transaction*, *debarred*, *suspended*, *ineligible*, *lower tier covered transaction*, *participant*, *person*, *primary covered transaction*, *principal*, *proposal*, and *voluntarily excluded*, as used in this clause, have the meaning set out in the Definitions and coverage sections of 49 CFR Part 29. You may contact the department or agency to which this proposal is being submitted for assistance in obtaining a copy of those regulations.

6. The prospective primary participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under 48 CFR Part 9, subpart 9.4, debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency entering into this transaction.

7. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transaction," provided by the department or agency entering into this covered transaction, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not proposed for debarment under 48 CFR Part 9, subpart 9.4, debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the list of Parties Excluded from Federal Procurement and Non-procurement Programs.

9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is proposed for debarment under 48 CFR Part 9, subpart 9.4, suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency may terminate this transaction for cause or default.

Certification Regarding Debarment, Suspension, and Other Responsibility Matters-Primary Covered Transactions

(1) The prospective primary participant certifies to the best of its knowledge and belief, that its principals:

- (a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any Federal department or agency;
- (b) Have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of record, making false statements, or receiving stolen property;

- (c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or Local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and
- (d) Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State, or local) terminated for cause or default.

(2) Where the prospective primary participant is unable to certify to any of the Statements in this certification, such prospective participant shall attach an explanation to this proposal.

Instructions for Lower Tier Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.
2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.
3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
4. The terms *covered transaction*, *debarred*, *suspended*, *ineligible*, *lower tier covered transaction*, *participant*, *person*, *primary covered transaction*, *principal*, *proposal*, and *voluntarily excluded*, as used in this clause, have the meanings set out in the Definition and Coverage sections of 49 CFR Part 29. You may contact the person to whom this proposal is submitted for assistance in obtaining a copy of those regulations.
5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under 48 CFR Part 9, subpart 9.4, debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.
6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion -- Lower Tier Covered Transaction," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions. (See below)
7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not proposed for debarment under 48 CFR Part 9, subpart 9.4, debarred, suspended, ineligible, or voluntarily excluded from the covered

transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the List of Parties Excluded from Federal Procurement and Non-procurement Programs.

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is proposed for debarment under 48 CFR Part 9, subpart 9.4, suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion -- Lower Tier Covered Transactions:

1. The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

2. Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

POLICY ON SEAT BELT USE

In accordance with Executive Order 13043, Increasing Seat Belt Use in the United States, dated April 16, 1997, the Grantee is encouraged to adopt and enforce on-the-job seat belt use policies and programs for its employees when operating company-owned, rented, or personally-owned vehicles. The National Highway Traffic Safety Administration (NHTSA) is responsible for providing leadership and guidance in support of this Presidential initiative. For information on how to implement such a program, or statistics on the potential benefits and cost-savings to your company or organization, please visit the Buckle Up America section on NHTSA's website at www.nhtsa.dot.gov. Additional resources are available from the Network of Employers for Traffic Safety (NETS), a public-private partnership headquartered in the Washington, D.C. metropolitan area, and dedicated to improving the traffic safety practices of employers and employees. NETS is prepared to provide technical assistance, a simple, user-friendly program kit, and an award for achieving the President's goal of 90 percent seat belt use. NETS can be contacted at 1 (888) 221-0045 or visit its website at www.trafficsafety.org.

POLICY ON BANNING TEXT MESSAGING WHILE DRIVING

In accordance with Executive Order 13513, Federal Leadership On Reducing Text Messaging While Driving, and DOT Order 3902.10, Text Messaging While Driving, States are encouraged to adopt and enforce workplace safety policies to decrease crashes caused by distracted driving, including policies to ban text messaging while driving company-owned or -rented vehicles, Government-owned, leased or rented vehicles, or privately-owned when on official Government business or when performing any work on or behalf of the Government. States are also encouraged to conduct workplace safety initiatives in a manner commensurate with the size of the business, such as establishment of new rules and programs or re-evaluation of existing programs to prohibit text messaging while driving, and education, awareness, and other outreach to employees about the safety risks associated with texting while driving.

ENVIRONMENTAL IMPACT

The Governor's Representative for Highway Safety has reviewed the State's Fiscal Year highway safety planning document and hereby declares that no significant environmental impact will result from implementing this Highway Safety Plan. If, under a future revision, this Plan is modified in a manner that could result in a significant environmental impact and trigger the need for an environmental review, this office is prepared to take the action necessary to comply with the National Environmental Policy Act of 1969 (42 U.S.C. 4321, et seq.) and the implementing regulations of the Council on Environmental Quality (40 CFR Parts 1500-1517).

SECTION 402 REQUIREMENTS

The political subdivisions of this State are authorized, as part of the State highway safety program, to carry out within their jurisdictions local highway safety programs which have been approved by the Governor and are in accordance with the uniform guidelines promulgated by the Secretary of Transportation. (23 U.S.C. 402(b)(1)(B))

At least 40 percent (or 95 percent, as applicable) of all Federal funds apportioned to this State under 23 U.S.C. 402 for this fiscal year will be expended by or for the benefit of the political subdivision of the State in carrying out local highway safety programs (23 U.S.C. 402(b)(1)(C), 402(h)(2)), unless this requirement is waived in writing.

The State's highway safety program provides adequate and reasonable access for the safe and convenient movement of physically handicapped persons, including those in wheelchairs, across curbs constructed or replaced on or after July 1, 1976, at all pedestrian crosswalks. (23 U.S.C. 402(b)(1)(D))

The State will provide for an evidenced-based traffic safety enforcement program to prevent traffic violations, crashes, and crash fatalities and injuries in areas most at risk for such incidents. (23 U.S.C. 402(b)(1)(E))

The State will implement activities in support of national highway safety goals to reduce motor vehicle related fatalities that also reflect the primary data-related crash factors within the State as identified by the State highway safety planning process, including:

- Participation in the National high-visibility law enforcement mobilizations;
- Sustained enforcement of statutes addressing impaired driving, occupant protection, and driving in excess of posted speed limits;
- An annual statewide seat belt use survey in accordance with 23 CFR Part 1340 for the measurement of State seat belt use rates;
- Development of statewide data systems to provide timely and effective data analysis to support allocation of highway safety resources;
- Coordination of Highway Safety Plan, data collection, and information systems with the State strategic highway safety plan, as defined in 23 U.S.C. 148(a).

(23 U.S.C. 402(b)(1)(F))

The State will actively encourage all relevant law enforcement agencies in the State to follow the guidelines established for vehicular pursuits issued by the International Association of Chiefs of Police that are currently in effect. (23 U.S.C. 402(j))

The State will not expend Section 402 funds to carry out a program to purchase, operate, or maintain an automated traffic enforcement system. (23 U.S.C. 402(c)(4))

I understand that failure to comply with applicable Federal statutes and regulations may subject State officials to civil or criminal penalties and/or place the State in a high risk grantee status in accordance with 49 CFR 18.12.

I sign these Certifications and Assurances based on personal knowledge, after appropriate inquiry, and I understand that the Government will rely on these representations in awarding grant funds.

MISSOURI'S HIGHWAY SAFETY PLAN (HSP) AND PERFORMANCE PLAN

Supporting Background – Missouri's Blueprint to SAVE MORE LIVES

In 2003, Missouri participated with the American Association of State Highway Transportation Officials (AASHTO) in a national effort to reduce the preventable tragedies associated with traffic crashes. Utilizing a partnership approach, the state's Strategic Highway Safety Plan (SHSP), Missouri's Blueprint for Safer Roadways, was developed that outlined opportunities to reduce fatalities and serious injuries on Missouri's roads. The goal established in the Blueprint was set at 1,000 or fewer fatalities by 2008. That goal was reached one year early, with a year-end fatality total for 2007 of 992, as well as in 2008 with 960 fatalities. The second SHSP, *Missouri's Blueprint to ARRIVE ALIVE*, was unveiled at the semi-annual Blueprint Confer-

ence in October 2008. The new goal was set to reduce traffic fatalities to 850 or fewer by 2012. That goal was reached two years early with 821 fatalities in 2010. In 2011 the fatality total was 786. Not only did we achieve the 2008 goal but also attained the lowest number of people lost in roadway related fatalities in Missouri since 1947.

Missouri's third Strategic Highway Safety Plan, *Missouri Blueprint to SAVE MORE LIVES*, was rolled out in October of 2012 at the Blueprint Conference. The new target for this document is 700 or fewer fatalities by 2016. The document challenges all of us to not only focus on this target, but also concentrate on a higher vision and move Toward Zero Roadway Deaths. In 2013, Missouri experienced another significant fatality reduction to 757.

Year	Fatalities	Serious Injuries
2007	992	7,744
2008	960	6,932
2009	878	6,540
2010	821	6,096
2011	786	5,643
2012	826	5,506
2013	757	4,939
2007-2009 Total	2,830	21,216
2008-2010 Total	2,659	19,568
2009-2011 Total	2,485	18,278
2010-2012 Total	2,433	17,244
2011-2013 Total	2,369	16,088

CORE OUTCOME MEASURES

C-1) Traffic Fatalities

To decrease traffic fatalities from the expected 2012 calendar base year of 850 to 700 by December 31, 2016.

C-2) Serious Traffic Injuries

To decrease serious traffic injuries from the 2012 calendar base year of 5,506 to 4,534 by December 31, 2016.

C-3) Fatalities/VMT

To decrease fatalities/VMT from the expected 2012 calendar base year of 1.2 to 1.0 by December 31, 2016.

C-4) Unrestrained Passenger Vehicle Occupant Fatalities

To decrease unrestrained passenger vehicle occupant fatalities in all seating positions from the 2012 calendar base year of 396 to 326 by December 31, 2016.

C-5) Alcohol-Impaired Driving Fatalities

To decrease alcohol impaired driving fatalities from the 2012 calendar base year of 280 to 230 by December 31, 2016.

C-6) Speeding Related Fatalities

To decrease speeding-related fatalities from the 2012 calendar base year of 313 to 258 by December 31, 2016.

C-7) Motorcyclist Fatalities

To decrease motorcyclist fatalities from the 2012 calendar base year of 102 to 84 by December 31, 2016.

C-8) Unhelmeted Motorcyclist Fatalities

To decrease unhelmeted motorcyclist fatalities from the 2012 calendar base year of 26 to 21 by December 31, 2016.

C-9) Drivers Age 20 or Younger Involved in Fatal Crashes

To decrease drivers age 20 or younger involved fatalities from the 2012 calendar base year of 135 to 111 by December 31, 2016.

C-10) Pedestrian Fatalities

To decrease pedestrian fatalities from the 2012 calendar base year of 86 to 71 by December 31, 2016.

C-11) Bicyclist Fatalities

To decrease bicyclist fatalities from the 2012 calendar base year of 6 to 4 by December 31, 2016.

CORE BEHAVIOR MEASURE

B-1) Observed Belt Usage

To increase statewide observed seat belt use of front seat outboard occupants in passenger vehicles 1% annually from the 2013 calendar base year average usage rate of 80% to 83% by December 31, 2016.

ACTIVITY MEASURES

A-1) Number of Seat Belt Citations Issued

To increase the number of seat belt citations and warnings issued during grant funded enforcement activities by .25 percent annually from the 2011-2103 calendar base year average of 35,256 to 35,520 by December 31, 2016.

A-2) Number of Impaired Driving Arrests

To increase the number of substance-impaired driving arrests made during grant funded enforcement activities by .25 percent annually from the 2011-2103 calendar base year average of 7,975 to 8,035 by December 31, 2016.

A-3) Number of Speeding Citations Issued

To increase the number of speeding citations and warnings issued during grant funded enforcement activities by .25 percent annually from the 2011-2103 calendar base year average of 120,588 to 121,907 by December 31, 2016.

Through extensive data analysis, current research findings, and best practices, strategies were identified that must be implemented in order to make significant progress toward reaching the projected goal of 700 or fewer fatalities by 2016. Key strategies in the Blueprint to SAVE MORE LIVES were identified and called the "Necessary Nine":

1. Increase Safety Belt Use

- Pass a primary safety belt law
- Increase the number of local communities with primary safety belt ordinances
- Increase the fine for non-use of a safety belt under the current law

2. Expand the Installation of Rumble Strips/Stripes

- Increase the number of miles of edgeline and centerline rumble strips/strips

3. Increase Efforts to Reduce the Number of Substance-Impaired Vehicle Drivers and Motorcycle Operators

- Increase the number of sobriety checkpoints
- Expand the use of ignition interlocks
- Increase the number of DWI courts

4. Improve Intersection Safety

- Increase the use of Innovative Intersection Solutions (J-turns, Roundabouts)
- Expand the use of technology
- Increase targeted enforcement
- Increase pedestrian safety features

5. Improve Curve Safety

- Increase the use of curve alignment signs
- Increase curve recognition with pavement marking
- Increase pavement friction

6. Change Traffic Safety Culture

- Develop focused public education
- Expand outreach efforts

7. Improve Roadway Shoulders

- Increase the miles of shoulders
- Reduce pavement edge drop-offs through maintenance

8. Increase Enforcement Efforts

- Focus on high crash corridors
- Target high impact work zones

9. Expand and Improve Roadway Visibility

- Ensure all roadway signs meet acceptable retro reflectivity
- Expand the use of delineation
- Expand the use of centerlines and edgelines and ensure the markings meet acceptable retroreflectivity

Emphasis/Focus Areas

Six key Emphasis Areas and 25 Focus Areas were identified within the Blueprint

Emphasis Area I / Serious Crash Types

Focus Areas

- o Run-Off-Road Crashes
- o Horizontal Curve Crashes
- o Intersection Crashes
- o Collisions with Trees and Utility Poles
- o Head-On Crashes

Emphasis Area II / High-Risk Drivers and Unrestrained Occupants

Focus Areas

- o Aggressive Drivers
- o Unrestrained Drivers and Occupants
- o Distracted and Drowsy Drivers
- o Young Drivers (15 through 20 years of age)
- o Substance-Impaired Drivers
- o Unlicensed, Revoked or Suspended Drivers

Emphasis Area III / Special Vehicles

Focus Areas

- o Commercial Motor Vehicles (CMVs)
- o All-Terrain Vehicles (ATVs)
- o School Buses/School Bus Signals

Emphasis Area IV / Vulnerable Roadway Users

Focus Areas

- o Older Drivers (65 years of age or older)
- o Motorcyclists
- o Pedestrians
- o Bicyclists

Emphasis Area V / Special Roadway Environments

Focus Areas

- o Nighttime Driving
- o Work Zones
- o Highway / Rail Crossings
- o Traffic Incident Management Areas

Emphasis Areas VI / Data and Data System Improvements

Focus Areas

- o Data Collection
- o Data Accessibility
- o System Linkage

Strategies were developed for each of these focus areas that incorporated the 4 E's – education, enforcement, engineering, and emergency response as well as technology and public policy. Many of these are also included in the Highway Safety Plan (HSP).

Statewide Targets, Performance Measures & Benchmarks

Justification and Explanation for Setting Performance Measures and Benchmark for the Fatality Reduction Goal

Historically, Missouri's Strategic Highway Safety Plans have set fatality reduction goals. In the 2012 plan, an interim fatality reduction goal of 700 or fewer fatalities was established for 2016. The 2012 fatality reduction goal of 850 was used as the baseline number. The interim years (2013, 2014, 2015 and 2016) were calculated using a trend line starting from the 850 baseline. The yearly goals are listed below.

Target #1: To reduce fatalities to:

- 850 by 2012
- 813 by 2013
- 775 by 2014
- 738 by 2015
- 700 by 2016

Performance Measures:

- Number of statewide fatalities
- Fatality rate per 100M VMT

Benchmarks:

- Expected 2012 fatalities = 850 (757 in 2013)
- Expected 2012 fatality rate per 100M VMT = 1.2 (1.1 in 2013)

Throughout the remainder of the document, the fatality reduction goals were calculated in the following manner. The percent of contribution of the various crash types was applied to the 2012 baseline of 850 fatalities. From that point, the interim years' fatality goals (2013, 2014, 2015, and 2016) were calculated using a trend line aimed at reaching the 700 or fewer fatalities by 2016. Fatality reduction goals were calculated for the following crash types:

- Aggressive driving related fatalities
- Speed-related fatalities
- Fatalities involving drivers with a .08 BAC or greater
- Fatalities involving alcohol-impaired drivers under the age of 21 years old
- Unrestrained passenger vehicle occupant fatalities
- Fatalities involving drivers age 15 through 20
- Fatalities involving older drivers
- Motorcyclist fatalities
- Un-helmeted or non-DOT compliant helmeted

motorcyclist fatalities

- Fatalities involving motorcycle operators who are not licensed or improperly licensed
- Fatalities resulting from crashes involving school buses or school bus signals
- Pedestrian fatalities
- Bicyclist fatalities

Justification and Explanation for Setting Performance Measures and Benchmark for the Serious Injury Reduction Goal

A serious Injury reduction goal was not established in Missouri's 2012 Strategic Highway Safety Plan. As a result, the 2012 actual serious injury number was established as the benchmark. From the 2012 number, the same fatality reduction trend line was used to calculate interim yearly serious injury reduction goals from 2013 through 2016.

Target #2: To reduce serious injuries to:

- 5,266 by 2013
- 5,020 by 2014
- 4,781 by 2015
- 4,534 by 2016

Performance Measure:

- Number of serious injuries

Benchmark:

- 2012 serious injuries = 5,506 (4,939 in 2013)

Throughout the remainder of the document, the following serious injury reduction goals were calculated in the following manner. The percent of contribution of the various crash types was applied to the 2012 baseline of 5,506 serious injuries. From that point, the interim years' serious injury goals (2013, 2014, 2015 and 2016) were calculated using a trend line aimed at reaching the 4,534 or fewer serious injuries by 2016. Serious injury goals were set for the following areas:

- Serious injuries involving drivers age 15 through 20
- Serious injuries involving older drivers
- Serious injuries resulting from crashes involving school buses or school bus signals

() Information in parenthesis is actual data for the respective year listed.

Targets by Region

The Missouri Coalition for Roadway Safety has seen varied success from each of the seven regions in reducing fatalities on our roadways. While some regions have seen greater success than others in regards to percentage reduction, each has done a tremendous job in making our roads safer for the traveling public.

In order for the Coalition to reach the target of 700 or fewer by the end of 2016, each region will need to continue efforts in all disciplines. By the end of 2016, the state will have seen a roadway fatality reduction of 44 percent since 2005. More importantly, each region will have to reduce the roadway fatalities by over 40 percent in order for the state to reach the target. The fatality number established for each region was determined from the previous eight years starting with 2005 (eight-year average). This method was preferred in order to minimize the fluctuations realized by each region.

Fatalities by Region

Reduction per Region (2013-2016 estimated)

Year	NW	NE	KC	CD	SL	SW	SE	Total
2005	85	93	203	188	238	257	193	1,257
2006	56	63	150	190	205	260	172	1,096
2007	52	71	162	175	206	173	153	992
2008	59	62	171	155	195	179	139	960
2009	57	49	155	133	170	165	149	878
2010	32	66	145	101	175	167	135	821
2011	48	50	122	120	162	154	130	786
2012	46	58	161	123	171	143	124	826
2013	46	55	135	126	162	160	128	813
2014	44	52	129	121	155	152	122	775
2015	42	50	123	115	147	145	116	738
2016	40	47	117	109	140	138	110	700

Safety Plan Integration

Missouri's target of 700 or fewer fatalities has been integrated into all key planning documents that include: State Highway Safety Strategic Plan, Missouri's Blueprint to Save More Lives; the Commercial Vehicle Safety Plan (CVSP); and the Highway Safety Plan and Performance Plan (HSP). The fatality reduction goal is also included in the Highway Safety Improvement Program (HSIP) Annual Report along with fatalities, fatality rates and serious injuries. Every effort will be made to establish evidence based strategies that will guide Missouri to meet this target.

Blueprint Implementation

The Blueprint is a collective effort of the Missouri Coalition for Roadway Safety (MCRS) and safety professionals throughout the state. The MCRS leads the charge to implement the Blueprint and encourage safety partners to focus their activities and programs in support of the "Necessary Nine" and subsequent emphasis areas, focus areas, and strategies. The state is divided into seven (7) regional coalitions that develop annual safety plans. These coalitions meet on a regular basis to discuss their

concerns, review how their countermeasures are working, and consider ways to improve their efforts. Approximately \$2 million of state road funds are dedicated to this effort.

The Blueprint is an overarching strategic highway safety plan for the State of Missouri while the state's Section 402 Highway Safety Plan serves as one of the implementation components in support of the Blueprint efforts.

HSP and Performance Plan Overview

Under the Highway Safety Act of 1966, the National Highway Traffic Safety Administration (NHTSA) provides grants and technical assistance to states and communities. Section 402 of the Act requires each state to have a highway safety program to reduce traffic crashes and deaths, injuries and property damage. Section 402 grant funds are apportioned to the states based on the ratio of state population to the national population (75%) and state public road mileage to the total national public road mileage (25%).

Section 402 funds must be used to support the state's performance plan (which contains performance goals based on the traffic safety problems identified by the state) and the HSP. These plans provide for the implementation of a program that addresses a wide range of highway safety problems related to human factors and the roadway environment and that contributes to the reduction of crashes and resulting deaths and injuries.

The strategies outlined within the HSP and Performance Plan will be implemented in an attempt to reach the overarching statewide Blueprint target of 700 or fewer fatalities by 2016.

Performance Measures

Performance measures enable the state to track progress, from a specific baseline, toward meeting an interim target. In August 2008, the US Department of Transportation released a document, DOT HS 811 025, that outlines a minimum set of performance measures to be used by states and federal agencies in the development and implementation of behavioral highway safety plans and programs. An expert panel from the National Highway Traffic Safety Administration, State Highway Safety Offices, academic and research organizations, and other key groups developed these performance measures, which were agreed upon by NHTSA and the Governors Highway Safety Association.

The initial minimum set contains 15 measures: 11 core outcome measures, 1 core behavior measure; and 3 activity measures.

These 15 measures cover the major areas common to state highway safety plans and use existing data systems. Beginning with the 2010 Highway Safety Plans and Annual Reports, states set goals for and report progress on each of the 11 core outcome and behavior measures annually. The following page outlines the 15 performance measures which will be identified within their respective program areas:

The Blueprint serves as a roadmap for the State's Highway Safety Plan

The "Necessary Nine" provides direction for the HSP

The goal determines our interim fatality reduction target

1. Fatalities (actual)
2. Fatality rate per 100M VMT (statewide; urban; rural)
3. Number of serious (disabling) injuries
4. Number of fatalities involving drivers or motorcycle operators with .08 BAC or above
5. Number of unrestrained passenger vehicle occupant fatalities
6. Number of speeding-related fatalities
7. Number of motorcyclist fatalities
8. Number of un-helmeted motorcyclist fatalities
9. Number of drivers age 20 or younger involved in fatal crashes
10. Number of pedestrian fatalities
11. Number of bicycle fatalities
12. Percent observed belt use for passenger vehicles – front seat outboard occupants
13. Number of seat belt citations issued during grant-funded enforcement activities
14. Number of impaired driving arrests made during grant-funded enforcement activities
15. Number of speeding citations issued during grant-funded enforcement activities

Benchmarks

Our benchmarks will serve as points of reference by which we are able to measure our progress. These benchmarks are not totally reliant upon the programs implemented by the highway safety office, however. They are often highly dependent upon existing public policy and the motoring public's adherence to traffic laws and safe driving habits.

The Statewide Goals, Performance Measures, and Benchmarks are "expectations" based upon the targets established in Missouri's Blueprint to ARRIVE ALLIVE (850 or fewer fatalities by 2012) and Missouri's Blueprint to SAVE MORE LIVES (700 or fewer fatalities by 2016).

Best Practices Countermeasures

The highway safety office makes every attempt to ensure that effective countermeasure efforts are incorporated into the strategies of the Plan by employing the following methods:

1. Utilizing proven countermeasures identified within the latest update of Countermeasures That Work: A Highway Safety Countermeasure Guide for State Highway Safety Offices, US DOT, NHTSA;
2. Utilizing countermeasures identified in NCHRP report 622 publication (Effectiveness of Highway Safety Countermeasures)

3. Evaluating traffic crash data to determine crash types, target populations and geographic locations in order to most effectively implement countermeasure efforts;
4. Participating in national law enforcement mobilizations that combine blanket enforcement and saturated media during established timeframes and in targeted traffic corridors;
5. Participating in state, regional, and national training opportunities in order to gain insight into proven programs that can be replicated in Missouri; and
6. Reviewing highway safety research studies from Transportation Research Board, NHTSA, FHWA, FMCSA, Insurance Institute for Highway Safety, AAA Foundation, etc. to guide the inclusion of various strategies in the Plan.

No highway safety office can work in a vacuum without communication, cooperation and coordination with our safety partners. This partnership approach allows us to expand our resources, generate diverse ideas, and incorporate new concepts and projects into our Highway Safety Plan. A sampling of the myriad of safety partners include:

American Automobile Association
 American Association of Retired Persons
 Blueprint Regional Coalitions (7 – Northwest, Northeast, Kansas City, Central, St. Louis, Southwest, Southeast)
 Cape Girardeau Safe Communities Program
 City/County Engineers
 County Health Departments
 East-West Gateway Coordinating Council
 Emergency Nurses Association
 Federal Highway Administration
 Federal Motor Carrier Safety Administration
 Institutions of Higher Education
 Law Enforcement Traffic Safety Advisory Council
 Law Enforcement Training Academies
 Local Technical Assistance Program
 Mercy Hospital
 Metropolitan Planning Organizations
 Mid-American Regional Council
 MO Association of Insurance Agents
 MO Automobile Dealers Association
 MO Coalition for Roadway Safety
 MO Department of Health & Senior Services
 MO Department of Labor and Industrial Relations

MO Department of Mental Health
 MO Department of Public Safety
 MO Department of Revenue
 MO Division of Alcohol and Drug Abuse
 MO Division of Alcohol and Tobacco Control
 MO Head Injury Advisory Council
 MO Injury and Violence Prevention Advisory Committee
 MO Trucking Association
 MO Office of Prosecution Services
 MO Police Chiefs Association
 MO Safety Center
 MO Sheriffs Association
 MO State Highway Patrol
 MO Youth/Adult Alliance
 Mothers Against Drunk Driving
 Motorcycle Safety Task Force
 National Highway Traffic Safety Admin. Region 7
 Office of State Courts Administrator
 Operation Impact
 Operation Lifesaver
 Partners in Prevention
 Regional Planning Commissions
 Safe Kids Coalitions
 Safety & Health Council of MO and KS
 State Farm Insurance
 Think First Missouri
 Traffic Safety Alliance of the Ozarks

In addition to these highway safety partners, each Blueprint regional coalition has an extensive base of regional partners.

Planning, Programming and Implementation Timeframes

The state's highway safety program, as explained earlier, is a federal grant program. The federal fiscal year runs from October 1 through September 30.

The table on the following page represents the timeframes within which the agency must operate in order to meet our federal requirements. The timeframes also provide a quick overview of when grant applications, program reports, and annual reports are due. This information provides our grantees and the general public a clearer picture of our internal process.

Some dates are firm—those established by the federal government for submitting our HSP, annual report, and supplemental grant applications. Some of the dates established by the Highway Safety Office are more fluid; they may be revised in order to allow the agency to function more efficiently.

The following table sets the timeframes for the basic Section 402/405 Highway Safety Program and the annual report.

Planning, Programming and Implementation Timeframes Highway Safety Plan and Annual Report

ACTIVITY	OCT	NOV	DEC	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP
Data collection & analysis, problem identification, internal planning and input solicitation for new fiscal year				1								
Mail out requests for project proposals for new fiscal year			1									
Contract and equipment monitoring by HS staff	ONGOING											
Grantee reimbursement vouchers	VOUCHERS ARE PROCESSED MULTIPLE TIMES PER MONTH											
Conduct regional grant application training sessions				5-9								
Grant applications due to HS						2						
Grant applications review & budget meetings							6-10					
Contracts written and reviewed internally									10			
HSP & Performance Plan/405 grants due to NIITSA									30			
Mail grantee award and denial letters										1		
Regional contract award workshops w/grantees											24-28	
Verify that soft match letters are on file												1
Program income submissions from grantees	31						30					
Federal fiscal year ends (contract ending date)												30
All funds must be obligated for new fiscal year												30
Federal fiscal year begins (contract start date)	1											
Mail letters requesting year-end reports												30
Year end reports due from grantees		13										
Compile & print annual report			15									
Annual report & final cost summary due			31									
Audit checkout (within 90 days of fiscal year end)			31									
Require submission of program income documentation	31						30					

Grant Application Process

The Highway Safety Office hosts grant application workshops each spring for potential grantees. These workshops are held in five strategic regional locations (Cape Girardeau, Chesterfield, Jefferson City, Springfield, and Lee's Summit) so that no participant has to travel terribly far in order to attend. They are usually scheduled during January.

Workshop participants are provided a packet explaining the highway safety grant program, the types of projects eligible for award, and an overview of statewide statistical traffic crash data. Potential grantees

are given instruction on how to retrieve traffic crash data for analysis through the Missouri State Highway Patrol's web site.

The purpose of the highway safety program and the statewide goal are discussed to help the potential grantees

understand how their efforts are imperative in order to impact the fatality reduction goal. Program areas are identified and the Highway Safety Grant Management System (GMS) and on-line reporting systems are reviewed. These seminars are used as an opportunity to share any new contract conditions, application process changes, or legislative changes that may impact the grant programs. The grant application deadline for the 2016 fiscal year was March 1, 2015.

Internal Grants Management System

In late 2001, the Highway Safety Office began work with the Regional Justice Information Service (REJIS) to develop the first-of-its-kind on-line grants management system. The system allows grantees to electronically submit applications. This information feeds into a system that builds databases for managing the highway

safety grants (budgets, grantee lists, inventory, vouchering, reporting data, disbursement reports, etc.). The system went live for the 2003 grant application cycle. Since that time, the Highway Safety Office has continued to work with REJIS to refine the system in order to make it more user friendly for the grantees, in addition to being more functional and robust for the Highway Safety Office. An extensive rewrite took place to coincide with the 2010 grant cycle. The system was refined so that the processes of application submission, contract development, enforcement reporting, and voucher-

ing are now entirely web-based. Three additional programs were also added to the system: Safe Routes to School; Work Zones; and the Motor Carrier Safety Assistance Program. In 2010 the Safe Routes to School program was transferred to another division of MoDOT, therefore, this section of the GMS was not further developed. Additional reporting components have been developed including a training section. The Highway Safety Office will continue to maintain and improve the GMS and is currently working toward an entirely paperless grant process.

Grant Selection Process

The Highway Safety program staff reviews the applications relative to their specific areas of expertise. During this preliminary review, they assess the applications to determine their relevancy toward meeting the highway safety goals. Applicants are contacted if clarification is needed. In essence, a case is prepared to present to management and the remaining program staff members to support whether the application should be funded in full, in part, or denied.

Fatal and serious injury crash rankings are performed for all cities, counties, and the unincorporated areas in the state. These rankings are conducted for the problem areas of alcohol, speed, young drinking drivers, distracted, unbelted, under 21 years of age and older

drivers. These rankings are also used in determining the overall severity of the problem for each respective location. Fatal and serious injury county, city, and unincorporated county rank orders are located on pages 43-76 of this report. Ranking by problem area can be found on the Missouri State Highway Patrol's on-line State Traffic Accident Records System (STARS) located at https://www.mshp.dps.missouri.gov/MSHPWeb/SAC/stars_index.html

Law enforcement applications are assessed to determine their rankings by the type of project they are choosing to conduct. While the highest-ranking locals are given priority because of the potential impact of their project, other considerations are taken into account. For instance, a lower-ranking city may be given a project because the county in which they reside ranks high or they may fall within a dangerous corridor. Some communities are given a project in order to participate in the national mobilizations while others are given consideration because the Highway Safety Office has determined a need exists to garner traffic safety minded agencies within a particular geographic location. An additional consideration may be their participation in multi-jurisdictional law enforcement task forces.

An internal team of highway safety program staff review all grant applications. Several days are set aside to review the applications and hear both supporting arguments and issues of concern. The reviewers take many factors into consideration when assessing these applications:

- Does the project fall within the national priority program areas (alcohol and other drug countermeasures; police traffic services; occupant protection; traffic records; emergency medical services; speed; motorcycle, pedestrian, or bicycle safety)?
- Does the project address the key emphasis areas identified within the Blueprint and does it have the ability to impact statewide traffic crash fatalities and serious injuries?
- Does the problem identification sufficiently document problem locations, crash statistics, targeted populations, demonstrated need, and the impact this project would have on traffic safety problems in their community?

- Have "best practices" countermeasures been proposed in order to make a positive impact on the identified problem?
- Will this project provide continuity of effort in a particular geographic region (such as multi-jurisdiction enforcement) or in a particular program area (occupant protection)?
- Will the activity serve as a "foundational project" that satisfies criteria for additional federal funding (e.g., safety belt observational survey)?
- Does the project alleviate, eliminate or correct a problem that was identified in a federally conducted assessment of a highway safety priority program area?
- Will the project satisfy or help satisfy federal goals for regional highway safety issues?
- Are innovative countermeasures proposed and, if so, is there an effective evaluation component included?
- Are any local in-kind resources proposed to match the federal grant efforts?
- Does the applicant propose developing partnerships (e.g., working with service organizations, health agencies, and/or insurance companies; conducting multi-jurisdiction enforcement efforts) in order to expand their resources and enhance their outcomes?
- Is the local government or administration supportive of this proposed activity?
- If equipment is requested, will the equipment support a project or enforcement activity; does the agency have the ability to provide a local match for part of the equipment purchase?
- Is there sufficient funding in the budget to support all or part of this application?

- Has the sub recipients risk of noncompliance with federal statutes, regulations, and the terms and conditions of the sub award been considered for such factors as:

*The sub recipient's prior experience with the same or similar sub awards;

*The results of previous audits including whether or not the sub recipient receives a Single Audit in accordance with Subpart F-Audit Requirements of this part, and the extent to which the same or similar sub-award has been audited as a major program;

*Whether the sub recipient has new personnel or new or substantially changed systems; and

*The extent and results of federal awarding agency monitoring

The applications are discussed at length using a risk assessment checklist to ensure consistency and to determine whether the agency should be funded, the level of funding, which grant funding source should support the project, and whether the activity is a state or local benefit (40 percent of funds must be expended toward

local benefit). A key reference document is *Countermeasures that Work: A Highway Safety Countermeasure Guide for State Highway Safety Offices* to assure we support

research-based strategies. Other considerations for research-based strategies are Transportation Research Board research and reports, other DOT funded research and university-based research.

When equipment is required, the grantee agency is requested to provide a local match. If the local match is unavailable, those applications are reviewed on a case-by-case basis to determine whether this agency can provide full support.

During the meeting, this information is continually updated into the Highway Safety Office's grant management system so that real-time information is immediately available. By the end of the meeting, there is a complete listing of the approved projects that will best support the mission and work toward reaching the Blueprint's target of 700 or fewer fatalities by 2016.

Grantee Compliance Requirements

COMPLIANCE

Any agency receiving a Highway Safety grant must comply with the following statutes or rules:

Nondiscrimination — CFR Chapter 50 prohibits discrimination on the basis of race, color, religion, sex or national origin including DBE and Segregated Facilities.

Hatch Act – Pursuant to United States Code Sections 1501-1508, employees who are paid in whole or in part with federal funds are prohibited from participating in certain partisan political activities including, but not limited to, being candidates for elective office.

Federal Funding Accountability & Transparency Act - Grantees must disclose detailed information about their operations including the name and location of the entity, amount of award, transaction type, unique identifier, names and the total compensation of the five most highly compensated officers of the entity if certain parameters are met. The state then compiles this information for all grantees and facilitates the disclosure of this information to the federal government and the public.

ASSESSMENT
BASED ON
NEED

APPROVAL/
DENY

NOTIFICATION

Buy America Act – The state will comply with the provisions of the Buy America Act (49 U.S.C. 5323 (j)), which contains the following requirements:

Only steel, iron and manufactured products produced in the United States may be purchased with federal funds unless the Secretary of Transportation determines that such domestic purchases would be inconsistent with the public interest, that such materials are not reasonably available and of a satisfactory quality, or that inclusion of domestic materials will increase the cost of the overall project contract by more than 25 percent. Clear justification for the purchase of non-domestic items must be in the form of a waiver request submitted to and approved by the Secretary of Transportation.

The Drug-Free Workplace Act of 1988 – The state will provide a drug-free workplace according to 41 U.S.C. 8103 by notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace. The state will also establish a drug-free awareness program; notify employees of the requirements of the workplace and conviction of such offense and the actions to be taken.

Certification Regarding Federal Lobbying

Restriction of State Lobbying - Certifies no federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with the awarding of any federal contract. None of the funds under the programs will be used for any activity specifically designed to urge or influence a state or local legislator to favor or oppose the adoption of any specific legislative proposal pending before any state or local legislative body.

Certification Regarding Debarment and Suspension and Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transactions – Certifying that the agency and its principals are presently not debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from participation in the transaction by any federal department or agency.

Any law enforcement agency receiving a Highway Safety grant must also comply with the following statutes or rules:

Peace Officer Standards and Training Certification (P.O.S.T.) — Pursuant to RSMo 590.100-590.180 all peace officers in the State of Missouri are required to be certified by the Department of Public Safety

Statewide Traffic Analysis Reporting (STARS) – Pursuant to RSMo 43.250, law enforcement agencies must file accident reports with the Missouri State Highway Patrol

Uniform Crime Reporting — Pursuant to RSMo 43.505, all law enforcement agencies shall submit crime incident reports to the Department of Public Safety on the forms or in the format prescribed by DPS, as shall any other crime incident information that may be required by DPS.

Racial Profiling — Pursuant to RSMo 590.650, each law enforcement agency shall compile the data described in Subsection 2 of Section 590.650 for the calendar year into a report to the Attorney General and submit the report to the AG no later than March first of the following calendar year.

LOCAL ORDINANCES AND POLICIES

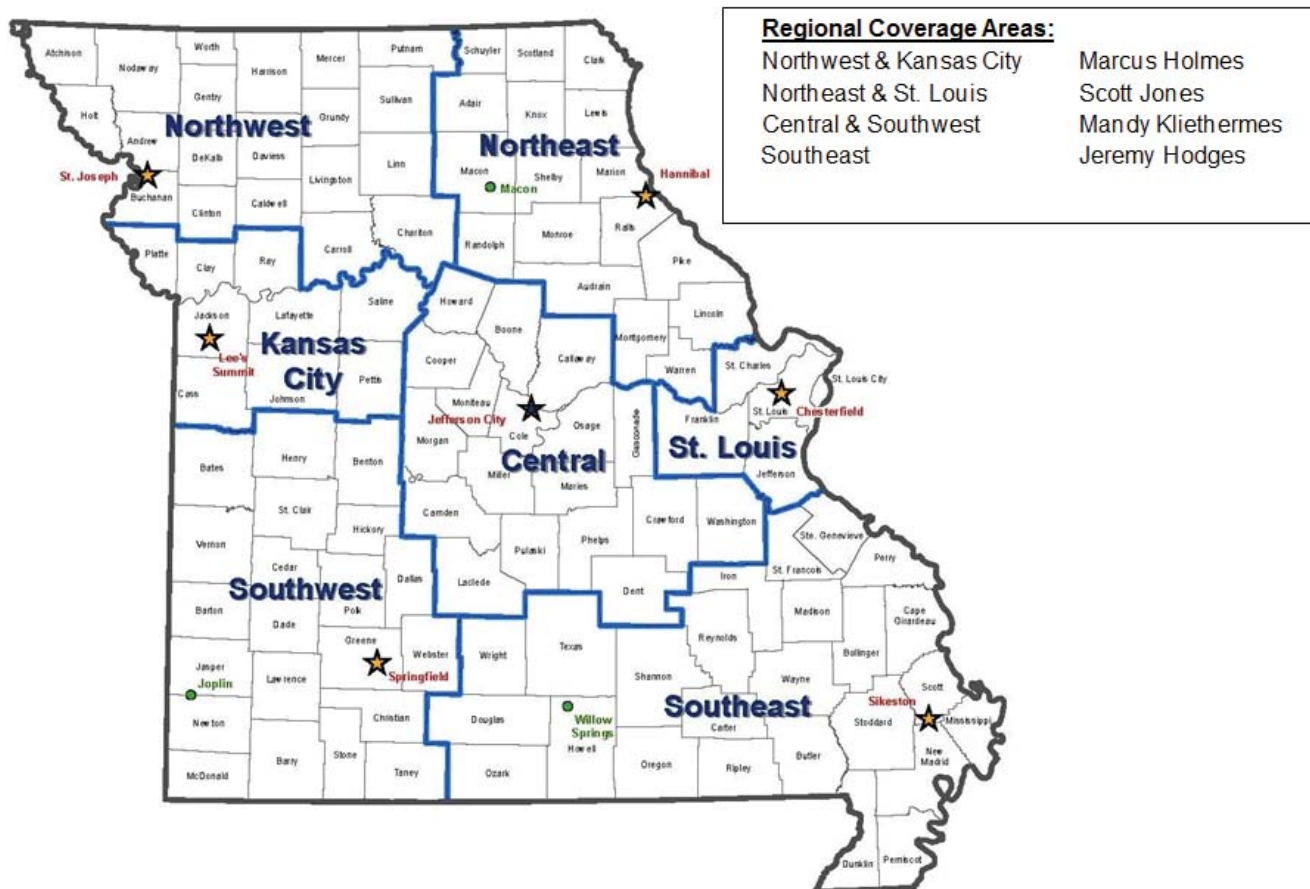

Agencies are encouraged to adopt, if possible:

- **Model Traffic Ordinance**—RSMo 300.00—Rules governing traffic administration and regulation
- **Child Restraints**—RSMo 307.179—Passenger restraint system required for children birth through age seven years (Primary Offense)
- **Seat Belts**—RSMo 307.178—Seat belts required for passenger cars
- **Primary Seat Belt** – A model ordinance allowing primary enforcement of a seat belt violation.
- **Open Container**—A model ordinance prohibiting the possession of an open container of alcoholic beverages in a motor vehicle.
- **Law enforcement vehicular pursuit training** Title 23, USC, Chapter 4 402a(j)—A state shall actively encourage all relevant law enforcement agencies in such state to follow the guidelines established for vehicular pursuits issued by the International Association of Chiefs of Police that are in effect on the date of enactment of this subsection or as revised and in effect after such date as determined by the secretary.

EVIDENCE-BASED TRAFFIC SAFETY ENFORCEMENT (E-Be) PROGRAM

The Highway Safety Office has four law enforcement program managers that cover specific regions of the state. Below is a map that outlines the areas of responsibility for each program manager. These managers are responsible for the statewide coordination of state, county, and local law enforcement projects. The evidence-based traffic safety enforcement program is focused on preventing traffic violations, crashes, and crash fatalities and injuries in areas of most risk for such incidents. It involves an array of enforcement activities throughout the fiscal year.

This section includes: Problem Identification, Implementation Plan and Performance Measures.

Problem Identification Process

- Fatal and serious injury crash rankings are performed for all cities, counties, and the unincorporated areas in the state. These rankings are conducted for the problem areas of alcohol, speed, young drinking drivers, distracted, unbelted, under 21 years of age and older drivers. These rankings are also used in determining the overall severity of the problem for each respective location. Fatal and serious injury county, city, and unincorporated county rank orders are located on pages 43-76 of this report. Ranking by problem area can be found on the Missouri State Highway Patrol's on-line State Traffic Accident System located at https://www.mshp.dps.missouri.gov/MSHPWeb/SAC/stars_index.html

Implementation Plan

- **Grant Application Selection**
 - o Grant application workshops are held for potential grantees in five locations around the state. The purpose of the highway safety program and statewide goal are discussed at each workshop to help grantees understand how their efforts are imperative in order to impact the fatality and serious injury problem on Missouri highways.
 - o Law Enforcement (LE) program management staff participate in each workshop and offer assistance to agencies interested in submitting a grant.
 - o Once grantees submit their applications into the Highway Safety Office Grant Management System, law enforcement program management staff reviews each application for their fatality / serious injury rankings. During this review, LE program managers assess the applications to determine their relevancy toward meeting the highway safety goals.
 - o The LE program management team reviews their respective applications and, in spring, a grant application review meeting is held for all grant applications. The LE staff share supporting arguments and issues of concern recommending either to fully fund, partially fund or deny the LE applications. The reviewers take many factors into consideration when assessing these applications. A list of considerations are located on page 23-24 of the HSP.

- o Once LE grant award decisions are made that best support the mission and work toward reaching the Blueprint's target of 700 or fewer fatalities by 2016, grant award meetings are held in the fall at five locations around the state. LE program managers provide a copy of the award, review grantee compliance requirements, address any questions and concerns, and network with any new and continuing grantees.

- **Mobilizations**

- o The Law Enforcement Traffic Safety Advisory Council identifies quarterly substance-impaired driving and occupant protection mobilization dates for each fiscal year. The LE program management staff aggressively seeks participation in these mobilizations as well as the NHTSA required Drive Sober or Get Pulled Over and the Click It or Ticket mobilizations. Efforts are also made to encourage participation in the distracted driving month emphasis area enforcement activities and techniques.

- **DWI/Traffic Unit**

- o A key enforcement technique used is to team with a city or county law enforcement agency to financially support DWI/Traffic Units. We have a total of 10 units. The mission of these units is to focus on substance-impaired drivers/high risk drivers and they are charged with aggressively enforcing DWI and hazardous moving violations. Below is a list of the full-time DWI Units:

*Joplin Police Department
Greene County Sheriff's Office
Boone County Sheriff's Office
Columbia Police Department
Jackson County Sheriff's Office
Jefferson County Sheriff's Office
Franklin County Sheriff's Office
St. Louis County Police Department
Creve Coeur Police Department
Platte County Sheriff's Office*

- **Law Enforcement Task Forces/Councils**
 - o Multiple city/county LE agencies meet on a regular basis to plan and coordinate key enforcement activities. Several agencies have a shortage of personnel to conduct sobriety checkpoints and other enforcement initiatives. The task force concept provides the opportunity to pool resources to conduct more manpower intensive activities such as sobriety checkpoints or corridor projects. It also provides a forum for the LE officers to network and share traffic issues or concerns. Below is a list of the multijurisdictional task forces operating in Missouri:

Southwest DWI Task Force (12 Agencies)

Northwest DWI Task Force (2 Agencies)

Jackson County Traffic Safety Task Force (11 Agencies)

Cass County STEP DWI Task Force (7 Agencies)

Clay/Platte County DWI Task Force (13 Agencies)

St. Louis Regional Traffic Safety Council (50 Agencies)

St. Charles County DWI Task Force (7 Agencies)

Central Ozarks Regional DWI Task Force (14 Agencies)

Southeast Missouri DWI Task Force (12 Agencies)

*Law Enforcement Traffic Safety Advisory Council
(20 Agencies)*

West Central Traffic Task Force (7 Agencies)

- **Sobriety Checkpoints**
 - o In 2009 an effort was made to increase the number of sobriety checkpoints held each year. Since that time approximately 500 checkpoints are held each year.

- **Communication Component**
 - o There is a communication plan developed with each mobilization. These plans vary depending on the available funding and involve press releases, paid media, social media, and earned media. Sample pre- and post- press releases are sent to LE departments choosing to participate in various law enforcement initiatives/mobilizations. In the case of sobriety checkpoints, these releases are required and help make the general deterrent strategy more effective.

- **Continuous Follow-Up and Adjustment**
 - o Program management staff reviews the results of various law enforcement initiatives/mobilizations. State, local and county LE agencies are encouraged to review their results and area crash data on a regular basis. Based upon these reviews, adjustments are made to operational plans to improve the activity's effectiveness.

Performance Measures

- o To monitor law enforcement participation in the NHTSA and LETSAC mobilizations, the Traffic and Highway Safety Division has three performance measures in their division tracker. These measures identify the number of participating agencies, number of hours worked, number of sobriety checkpoints, and the type and number of citation and warning tickets. The 2013-2014 annual results are located at the end of the section.

- o There are a number of measures listed throughout the HSP designed to track the progress of our law enforcement activities. The most important outcome involves a reduction in the number of fatalities and serious injuries occurring by crash type. The following is a list of other measures:

- Number of speeding citations/warnings issued during grant-funded enforcement activities and mobilizations
- Number of impaired driving arrests made during grant-funded enforcement activities and mobilizations
- Number of safety belt citations issued during grant-funded enforcement activities and mobilizations

Keep Customers and Ourselves Safe

Number of Law Enforcement Agencies Participating and their Citation Results for the National "Click It or Ticket" and "Drive Sober or Get Pulled Over" Campaigns

Result Driver: Bill Whitfield, Highway Safety Director

Measurement Driver: Scott Jones, Senior System Management Specialist

Purpose of the Measure:

This measure tracks both the participation and enforcement results of law enforcement activity in the national "Click It or Ticket" safety belt campaign and the "Drive Sober or Get Pulled Over" impaired driving campaign. The National Highway Traffic Safety Administration strongly encourages Missouri's law enforcement participation in these campaigns. Public information and education coupled with strong law enforcement support has proven to be effective in modifying driver behavior.

Measurement and Data Collection:

The Highway Safety Office subcontracts with the Missouri Safety Center to provide mini-grants to law enforcement agencies in the form of overtime. The enforcement overtime is used to target impaired drivers and unbuckled vehicle occupants. The law enforcement agencies report their enforcement statistics to the Highway Safety Office via an online reporting system.

Improvement Status:

Beginning in 2009 all agencies that worked the Drive Sober or Get Pulled Over campaign and four other statewide DWI campaigns were included in a drawing for a fully equipped DWI enforcement vehicle. This and other avenues of promotion by the Highway Safety Office have helped increase participation in all statewide campaigns.

Vacancies in the Highway Safety Office led to a modest decrease in Click It or Ticket activity for 2012. While participation picked up in 2013, it dropped again in 2014. The participation and activity for the Drive Sober or Get Pulled Over campaign stayed fairly level for 2010 - 2013, but tapered off in 2014, in large part to unrest in the St. Louis/Ferguson area occurring during the peak of this campaign.

Citations/Warnings Issued During the Click It or Ticket Safety Belt Campaign

Year	2010	2011	2012	2013	2014
Participating Agencies	182	202	113	178	150
Hours Worked	11,031	15,722	6,079	9,011	7,365

Keep Customers and Ourselves Safe

Number of Citations and Warnings Issued by Law Enforcement Officers Working Highway Safety Overtime Projects

Result Driver: Bill Whitfield, Highway Safety Director

Measurement Driver: Scott Jones, Senior System Management Specialist

Purpose of the Measure:

This measure tracks annual trends in law enforcement activity conducted during contracted overtime enforcement projects each federal fiscal year. Law enforcement agencies are awarded overtime enforcement grants to conduct high visibility enforcement of traffic laws. Focused law enforcement efforts attempt to modify driver behavior and ultimately reduce traffic crashes in their jurisdiction.

Measurement and Data Collection:

Law enforcement agencies receiving grant funds are required to submit monthly or quarterly reports showing their enforcement efforts. These activity reports are used to demonstrate the amount of effort being conducted in a particular focus area. The enforcement and crash data can help us determine if the project is having an impact. The number of citations issued can vary depending on the time of the year, ongoing campaigns, calls for service, and department strengths.

Improvement Status:

The Traffic and Highway Safety Division continues to encourage all law enforcement to participate and report activity for all enforcement efforts. The graphs below show the citations and warnings written each federal fiscal year by law enforcement agencies working in an overtime basis with grants funded by the Traffic and Highway Safety Division.

Number of Citations and Warnings Issued by Law Enforcement - Overtime Projects

Year	2010	2011	2012	2013	2014
Total Number of Stops	306,252	301,027	264,639	263,741	270,538

Keep Customers and Ourselves Safe

Number of Citations Issued by Law Enforcement Officers Working Highway Safety Mobilizations

Result Driver: Bill Whitfield, Highway Safety Director

Measurement Driver: Marcus Holmes, Intermediate System Management Specialist

Purpose of the Measure:

This measure tracks annual trends in law enforcement activity conducted during mobilization efforts throughout the year. Eleven mobilization campaigns are conducted throughout the year targeting occupant restraint and impaired driving violations. Public information and education coupled with strong law enforcement support has proven to be effective in modifying driver behavior and ultimately reduces traffic crashes.

Measurement and Data Collection:

Law enforcement agencies utilize funding provided by the University of Central Missouri - Missouri Safety Center or provide manpower at their own expense. Enforcement data from the participating agencies is collected through a web-based reporting site. These activity reports are used to demonstrate the amount of effort being conducted in a particular focus area.

Improvement Status:

Citations increase during National and State recognized campaigns. These include "Youth Seat Belt Enforcement" in March, "Click It or Ticket" in May/June, and "Drive Sober or Get Pulled Over" in August/September. The Traffic and Highway Safety Division continues to encourage all law enforcement to participate and report activity for these campaigns whether funded or not. The graph below shows the citations written each year by participating law enforcement agencies.

Number of Citations Issued by Law Enforcement During Mobilizations

Year	2010	2011	2012	2013	2014
Total Number of Stops	154,210	143,262	121,483	104,765	88,126

STATEWIDE CRASH ANALYSIS

Making the roadway traffic system less hazardous requires understanding the system as a whole – understanding the interaction between its elements (vehicles, roads, road users and their physical, social and economic environments) and identifying where there is potential for intervention. This integrated approach more effectively addresses our traffic safety problems.

Problem Identification

Problem identification involves the study of the relationship between collisions and the characteristics of people using the roadways, types and numbers of vehicles on the roads, miles traveled, and roadway engineering.

Most motor vehicle crashes have multiple causes. Experts and studies have identified three categories of factors that contribute to crashes – human, roadway environment, and vehicle factors. Human factors involve the driver's actions (speeding and violating traffic laws, etc.) or condition (effects of alcohol or drugs, inattention, decision errors, age, etc.). Roadway environment factors include the design of the roadway, roadside hazards, and roadway conditions. Vehicle factors include any failures in the vehicle or its design. Human factors are generally seen as contributing most often to crashes at 93 percent, followed by roadway environment at 33 percent, and finally the vehicle at 13 percent (US General Accounting Office, GAO-03-436, Research Continues on a Variety of Factors that Contribute to Motor Vehicle Crashes, March 2003).

In March 2015, an attitudinal survey was conducted on 2,502 adult Missouri drivers to capture their current attitudes and awareness of specific items concerning highway safety such as seat belt usage, speeding issues, cell phone use while driving and alcohol impaired driving.

Since this plan is directed toward modifying behavior so that safety will be the accepted norm, it stands to reason that we must identify and categorize those individuals who are making unsafe decisions and/or who are causing traffic crashes. It will be obvious to the reader that this document references targeted audiences or populations. The term "target audience" infers a population group that is overrepresented in a particular type of crash (e.g., drinking drivers) or is underrepresented in using safety devices (e.g., un-helmeted motorcyclists or unrestrained occupants). This terminology is in no way meant to profile certain populations by age, gender, race, or nationality. Rather, this is an accepted term to identify specific population groups that must be reached with our messages and our enforcement efforts if we are to reduce traffic crashes, prevent injuries and save lives.

Research has shown that the number of crashes at a particular site can vary widely from year to year, even if there are no changes in traffic or in the layout of the road. Since a single year's data is subject to considerable statistical variation; three years is generally regarded as a practical minimum period for which a fairly reliable annual average rate can be calculated. The FY 2016 Highway Safety Plan references crash statistics for 2011 through 2013.

In the 3-year period 2011-2013, a total of 2,369 people died on Missouri's roadways while another 16,088 suffered serious injuries. A fatality is recorded when a victim dies within 30 days of the crash date from injuries sustained in the crash. A serious injury is recorded

when a victim observed at the scene has sustained injuries that prevent them from walking, driving, or continuing activities the person was capable of performing before the crash. While we recognize that many crashes result simply in property damage, only fatal and serious injury crashes have been targeted because they are more costly in human suffering, social and economic terms.

The first series of graphs on the following pages present a long-term depiction of death and serious injury rates covering the 21-year period 1993 through 2013. The second series of graphs address only the three-year period, 2011-2013. The final graphs show the three-year moving average for fatalities and serious injuries starting with 2005-2007.

Year	Fatalities	Serious Injuries	Miles Traveled ¹	Fatality ² Rate	Serious Injury Rate ³
2011	786	5,643	68,790,000,000	1.1	8.2
2012	826	5,506	68,403,000,000	1.2	8.0
2013	757	4,939	69,328,000,000	1.1	7.1

¹ Miles traveled were obtained from the Missouri Department of Transportation - Planning (not an official number)

² Number of fatalities per 100 million miles of vehicle travel

³ Number of serious injuries per 100 million miles of vehicle travel

State of Missouri - Traffic Safety Statistics Fatality Rates

State of Missouri - Traffic Safety Statistics Serious Injury Rates

3-Year Average Fatalities

Current Traffic Crash Data: 2011-2013

Although overall fatalities and the death rate reflect a positive reduction, it should not be a cause for complacency. A substantial number of people continue to be killed and seriously injured on Missouri roadways and most of these traffic crashes are preventable. In 2011-2013, of the 419,680 traffic crashes, 2,161 resulted in fatalities and 12,762 resulted in serious injuries. These fatal and serious injury crashes resulted in 2,369 deaths and 16,088 serious injuries.

A substantial number of persons killed or injured in Missouri's 2011-2013 traffic crashes were drivers and passengers of motorized vehicles. Of the fatalities, 67.4% were drivers and 19.7% were passengers; of those seriously injured, 65.5% were drivers and 25.6% were passengers.

2011-2013 Missouri Fatalities & Serious Injuries

Persons Killed = 2,369

Persons Seriously Injured = 16,088

Note: OTHER = drivers/passengers on farm implements, motorized bicycles, other transport devices, construction equipment and unknown vehicle body types

Data Collection

Data is the cornerstone of this plan, and is essential for diagnosing crash problems and monitoring efforts to solve traffic safety problems. We must identify the demographics of the roadway users involved in crashes, what behaviors or actions led to their crashes, and the conditions under which the crashes occurred. Data collection and analysis is dynamic throughout the year.

When data is effectively used to identify repeating patterns in the dynamic interaction of people, pavement, vehicles, traffic, and other conditions, there is increased potential for successful mitigation. From this comes a reduction in the number and severity of crashes, ultimately resulting in fewer fatalities and serious injuries.

The Missouri State Highway Patrol serves as the central repository for all traffic crash data in the state. The Safety Section of MoDOT's Traffic and Highway Safety Division analyzes that data to compile statistics on fatalities and serious injuries. Three years' worth of crash statistics are compiled to provide a more representative sampling, thereby more effectively normalizing the data. Missouri uses comprehensive data sources which include: STARS and Traffic Management System (TMS).

Collisions are analyzed to identify:

- Occurrence – time of day, day of week, month of year, holidays and/or special events
- Roadways – urban versus rural, design, signage,

traffic volume, work zones, visibility factors, location within high crash corridors

Roadway users – age, gender, vehicle users versus pedestrians

Safety devices – used/not used (safety belts, child safety seats, DOT compliant motorcycle helmets)

Causation factors –

Primary: aggressive driving, impaired by alcohol and/or other drugs, distracted or fatigued, speeding or driving too fast for conditions, red light running

Secondary: run off the road, head-on, horizontal curves, collisions with trees or utility poles, unsignalized intersections

Vehicles – type (e.g., passenger vehicles, motorcycles, pickup trucks)

Contributing Factors

Analysis of our statewide traffic crash data was based on the six emphasis areas and their focus areas as defined in the *Missouri's Blueprint to SAVE MORE LIVES*:

Emphasis Area I – Serious Crash Types

Emphasis Area II – High-Risk Drivers and Unrestrained Occupants

Emphasis Area III – Special Vehicles

Emphasis Area IV – Vulnerable Roadway Users

Emphasis Area V – Special Roadway Environments

Emphasis Area VI – Data and Data System Improvements

Urban versus Rural Crash Experience

Traffic crashes are not evenly distributed on Missouri roadways. As expected, crashes occur in large numbers in the densely populated urban areas (population of 5,000 or more) of the state. Since such a large portion of Missouri's overall population is in the rural areas (under 5,000 population or unincorporated area), the greater number of crashes occurs in those areas. Of the 14,923 fatal and serious injury crashes in 2011-2013, 52.0% occurred in an urban community while 48.0% occurred in a rural area. The rural areas of the state take on even greater significance when examining only fatal traffic crashes. In 2011-2013 fatal traffic crashes, 41.8% occurred in an urban area of the state while 58.2% occurred in a rural area.

Note: This summary of traffic crashes represents only those crashes that occurred on Missouri's highway system, including all public roadways. The information is a summary of the crash reports submitted to the Missouri State Highway Patrol. This publication is possible only through the conscientious reporting efforts of Missouri law enforcement agencies. These statistics are compiled pursuant to federal law, 23 USC Section 152.

PUBLIC INFORMATION AND EDUCATION

Background

From 2005-2013, due to the combined efforts of highway safety advocates in the Missouri Coalition for Roadway Safety, 2,940 lives have been saved on Missouri roadways, a decrease of 39.8 percent. The coalition credits a combination of law enforcement, educational efforts, emergency medical services, engineering enhancements and public policy as the successful formula for saving lives. However, the historic four “E’s” of safety must be expanded to include Evaluation and Everyone. Measuring success by Evaluation of performance measures holds each of us accountable for its success. In turn, addressing the need to change traffic safety culture challenges each person to make personal responsibility for their behavior as a roadway user and includes Everyone.

The Missouri Coalition for Roadway Safety set a new fatality reduction goal of 700 or fewer by 2016 at its Blueprint to SAVE MORE LIVES 2012 fall conference. This goal reflects the overall vision to continuously move Missouri toward zero deaths.

While our roads are safer than they have been in many years, there are still too many senseless crashes and deaths happening every year. We are committed to further reducing the number of traffic crashes in Missouri, so we must work even harder to reach those remaining people who haven’t gotten the message that:

- Seat belts save lives;
- Drinking and driving are a deadly mix;
- Distracted drivers are dangerous drivers; and
- Parents and caregivers must secure children in size-and age-appropriate car seats that are properly installed.

**Drinking Tonight?
Choose Your Ride.**

This is accomplished by developing highly visible, catchy campaigns that are coupled with strong enforcement efforts. We rely on our traffic safety partners to be active participants in these campaigns. Some of the most effective campaigns have been the national law enforcement mobilization efforts such as “Click It or Ticket” and “Drive Sober or Get Pulled Over.” People heard about the mobilizations in the media, and drivers were aware that the risk of apprehension was high. These campaigns have proven their ability to not only heighten awareness, but also to ultimately make positive behavioral changes. In order to continue to raise awareness and change driving attitudes and behaviors, the safe driving messages need to be perpetuated through traditional media vehicles (TV, radio, print, outdoor, digital) as well as through social media throughout the year. Social media has become a key part of the highway safety campaigns, increasing awareness and conversation about safe driving, complementing PSA distributions and helping to spread campaign messages virally. Social media efforts will

continue through mainstream platforms such as Facebook and Twitter, Instagram and Vine. Dynamic Message Boards (DMS) statewide help promote campaign awareness by alerting the traveling public to enforcement efforts.

The Public Information Subcommittee of the Missouri Coalition

for Roadway Safety (MCRS) has been instrumental in increasing public education and information on traffic safety issues. The subcommittee develops an annual statewide media plan; has identified ARRIVE ALIVE as the overarching message for the coalition's public information activities; and manages the saveMOLives.com website to grab people's attention and convey safety information in the best way possible. The site features eye-catching graphics, intriguing videos, news and information, driving tips and advice on how to Arrive Alive at your destination.

The Traffic and Highway Safety Division has added a tool to combat fatalities and serious injuries on our roadways. This tool is a driver survey that reflects drivers' views on a variety of highway safety issues including seat belt usage, speeding, cell phone use, and impaired driving. Heartland Market Research conducted this research project that reached 2,514 adult Missouri drivers in April of 2014. People were surveyed from all of the 114 counties as well as the independent city of St. Louis. Residents from 671 different zip codes are represented. The standard phone survey practice of alternatively asking for either the oldest or youngest adult was not employed. Instead, the calling center was given specific goals for each age group and gender within various geographic areas to ensure the most representative sample possible.

The purpose of this survey was to capture current attitudes and awareness of highway safety issues. These findings will be used to design and implement public information and law enforcement campaigns that effectively deter drivers from engaging in unsafe driving behaviors. In addition, better understanding driver attitudes on highway safety issues will also aide in public policy and legislative decisions. The research was designed so that in addition to providing a statewide result, statistically useful information was also available at the district level. Special emphasis was placed on ensuring that the sample reflected Missouri's geographic, age, and gender diversity.

The results of this driver survey showed that drivers perceive their driving abilities and habits to be better than citation numbers and what accident rates reflect. For example, 84.6 percent of the sample in the driver survey claim to always use their seat belt but the most recent safety belt survey (2014) showed that only 79 percent of drivers observed were actually belted. In 2014 those least likely to wear seat belts were males, 50

years of age and older, whose primary vehicle was a pickup truck. In 2013 those least likely to wear seat belts were males, between the ages of 18 and 29, whose primary vehicle was a pickup truck or other type of truck.

Also, drivers' perception of law enforcement efforts was revealed. Those who were the least likely to wear seat belts were the most likely to be aware of seat belt enforcement publicity, but were the least likely to receive a ticket if they did not wear their seat belt. Those who lived in very rural areas were also less likely to always buckle up than those living in other communities. Fifty-seven percent of the drivers surveyed prefer to keep Missouri's seat belt law a secondary law, slightly higher, but similar to the findings from recent years. Fifty-one percent preferred to leave the penalty for violating the law unchanged (\$10). Out of the minority who favored increasing the fine, 35 percent thought the fine should range from \$25 to \$49, and 23 percent thought the fine should range from \$50 to \$74. Thirty-six percent thought people who did not wear their seat belt would only rarely get a ticket, while 47 percent thought people would be caught at least half of the time. The vast majority of the respondents, 81 percent, were not aware of any publicity concerning seat belt enforcement.

Over 87 percent of Missouri drivers stated they rarely or never talk on a cell phone while driving, and over 98 percent stated they rarely or never text on a cell phone while driving. Ninety-three percent of Missouri drivers favored some type of restriction on how people could use cell phones while driving, 32 percent favored banning all cellphone use by drivers and 61 percent wanted to ensure drivers could still use cell phones for talking while seeing the need for some restrictions. In 2014 men age 65 and older were the least likely to talk on a cell phone while driving, and females between age 30-39 were the most likely group to talk on a cell phone while driving, with 22 percent of this segment stating they do so 50 percent of the time or more. In 2013 women 65 and older were the least likely to talk on a cell phone while driving.

The largest perceived risk of being ticketed or arrested was associated with driving while impaired; 70 percent of those surveys expected people who drove after drinking would be arrested at least half of the time. Ninety percent of Missouri drivers stated that they had not driven a vehicle within two hours of consuming an alcoholic beverage any time in the last 60 days. In 2014 those most likely to drive under the influence of alcohol were males 65 years of age and older. Men were much more likely to drive after drinking than women. Drivers of motorcycles were more likely to drive under the influence than drivers of vehicles, followed by drivers of pickup trucks. In 2013 those most likely to drive under the influence of alcohol were males 50 to 64 years of age and older. Approximately half of Missouri drivers were aware of recent publicity regarding enforcement.

The full executive summary of this report is attached in Appendix A of the Highway Safety Plan.

GOAL:

Promote Missouri's traffic safety issues to improve understanding and increase compliance with state traffic laws, thereby reducing fatalities and serious injuries

Performance Measure:

- Traffic crash statistics relevant to target audiences
- Campaign messages:
 - * Target audiences reached
 - * News clippings
 - * Venues utilized
 - * Total spots aired
 - * Total impressions/reach

- Increase in safety devices used:
 - * Statewide safety belt use rate
 - * Teen safety belt use rate
 - * Commercial vehicle safety belt use rate **
 - * Child safety seat and/or booster seat use rate **
 - * Motorcycle helmet usage rate **
- Pieces of traffic safety materials distributed

Benchmarks:

- 2012 fatalities - 826 (757 in 2013)
- Increase in safety devices used:
 - * Statewide safety belt use rate
80% in 2013 (79% in 2014)
 - * Teen safety belt use rate
67% in 2013 (67% in 2014)
 - * Commercial vehicle safety belt use rate**
80.6% in 2010 (81% in 2014)
 - * Child safety seat and/or booster seat use rate**
91% in 2009 (91% in 2014)
 - * Motorcycle helmet usage rate**
99.2% in 2005
- Pieces of traffic safety materials distributed through on-line ordering system
209,000 in 2013 (239,860 in 2014)

** Surveys not conducted annually.

() Information in parenthesis is actual data for the respective year listed.

Campaign Media Source and Impressions (2013-2014)

STRATEGIES

1. Serve as the point of contact for the media and the general public to field questions, conduct interviews, and provide information
2. Conduct an attitude and awareness survey. The survey will contain questions on occupant protection, substance-impaired driving, speeding, and distracted driving (cell phone/texting)
3. Organize and/or participate in press events and work with media outlets across the state to promote highway safety initiatives
4. Encourage the media to participate in campaigns by publicizing our messages
5. Publicize the services and resources of the Highway Safety Office to the general public through our web sites at www.saveMOLives.com, in workshops, at conferences/exhibits, and through social media channels.
6. Develop, update and disseminate public information/promotional/educational materials and websites
7. Develop and promote materials/campaigns to reach specific audiences (e.g., high risk drivers, vulnerable roadway users, substance-impaired drivers, mature drivers)
8. Actively participate in the Missouri Coalition for Roadway Safety (MCRS) Public Information Subcommittee in order to increase coordination, communication and cooperation among safety advocates statewide
9. Promote and incorporate the ARRIVE ALIVE theme and logo developed by the MCRS
10. Work with the MCRS regional coalitions to appropriately target their messages and develop programs to meet their needs
11. Develop strategies to work with partners—both traditional and nontraditional—in order to reach wider audiences and maximize resources
12. Solicit public information activity reports from law enforcement partners and district coalitions
13. Work with the Motor Carrier Safety Assistance Program, Missouri Motorcycle Safety Education Program, and others to promote joint traffic safety awareness campaigns when possible
14. Give presentations and provide training to community groups, schools, etc. as available
15. Serve on federal, state, and regional committees/boards in order to broaden opportunities to promote traffic safety issues
16. Promote law enforcement mobilization efforts: Click It or Ticket safety belt campaign; Drive Sober or Get Pulled Over alcohol campaign; quarterly occupant protection and substance-impaired driving mobilizations; youth seat belt enforcement campaign
17. Purchase paid advertising to support traffic safety campaigns (e.g., occupant protection and substance-impaired driving)
18. Support and promote MoDOT's construction work zone public awareness campaign
19. Promote Saved by the Belt and Battle of the Belt programs
20. Promote the Seat Belt Convincer, Rollover Simulator, and SIDNE educational programs to assure the units are used to reach as many people as possible.
21. Participate in the Missouri State Fair to educate the public on traffic safety issues and any modifications to traffic safety laws
22. Promote the cellular phone ICE program (In Case of Emergency) which is designed to assist first responders in rapidly identifying a crash victim's emergency contacts
23. Promote Commercial Motor Vehicle Awareness through public awareness campaigns geared primarily toward passenger vehicle drivers, then CMV drivers.

AGGRESSIVE DRIVERS

Background

The causes of aggressive driving are complex. However, three factors in particular are linked to aggressive driving: 1) lack of responsible driving behavior; 2) reduced levels of traffic enforcement; and 3) increased congestion and travel in our urban areas. One researcher has suggested that, "A driving behavior is aggressive if it is deliberate, likely to increase the risk of collision and is motivated by impatience, annoyance, hostility and/or an attempt to save time."

Aggressive driving is a serious problem on Missouri's roadways and has contributed substantially to traffic crashes, especially crashes resulting in death. Aggressive drivers are defined within Missouri's Blueprint to SAVE MORE LIVES as, "drivers of motorized vehicles who committed one or more of the following violations which contributed to the cause of a traffic crash: speeding; driving too fast for conditions; and/or following too close."

Aggressive drivers not only put their own lives at risk, but the lives of others as well. Of the 959 people killed, 67.4% were the aggressive driver and the other 32.6% were some other party in the incident. Of the 5,617 seriously injured, slightly more than one-half (53.2%) were the aggressive drivers and nearly one-half (46.8%) being some other person involved.

Speeding (too fast for conditions or exceeding the posted limit) is a large part of the aggressive driving problem. In 2002, NHTSA conducted a national telephone survey of over 4,000 drivers which verified that speeding is a pervasive behavior with most drivers—51% indicated they drive 10 mph over the posted speed on the interstates and 34% responded that they drive 10 mph faster than most other vehicles. According to an April 2009 report by the AAA Foundation for Traffic Safety, aggressive driving actions "were reported in 56 percent of fatal crashes from 2003 through 2007, with excessive speed being the number one factor."

2011-2013 Missouri Aggressive Driver Involved Fatalities & Serious Injuries

Type Of Circumstance (by Crash Severity¹)

Circumstance	Fatalities - 1,026	Serious Injuries - 6,071
Exceeding speed limit	39.1%	20.1%
Too fast for conditions	56.6%	61.8%
Following too close	4.3%	18.1%

¹ Percentage of 2011-2013 aggressive driving related fatalities and serious injuries by type of aggressive driving behavior involved. For instance, in aggressive driving related fatalities, 39.1% involved a motorized vehicle-driver exceeding the speed limit. NOTE: Multiple aggressive driving factors can be related to a single fatality or serious injury.

In 2011-2013, there were 419,680 traffic crashes in Missouri – 15.3% involved speeding. Correlating with the national data, Missouri's problem is also more significant when examining fatal crashes—of the **2,161 fatal crashes, 38.3% involved drivers who were speeding.**

GOAL #1:

To decrease aggressive driving-related fatalities to 270 by 2016:

2013	2014	2015
314	299	288

Performance Measure:

- Number of aggressive driving-related fatalities

Benchmark:

- 2012 aggressive driving-related fatalities - 328 (308 in 2013)

GOAL #2:

To decrease speed-related fatalities to 258 by 2016:

2013	2014	2015
299	285	272

Performance Measure:

- Number of speed-related fatalities

Benchmark:

- 2012 speed-related fatalities - 313 (302 in 2013)

GOAL #3:

To increase speed-related citations and warnings made during grant-funded enforcement activities and mobilizations by .25 percent annually based on a three-year rolling average of grant years 2011, 2012, 2013 - 120,588

2012-2014	2013-2015	2014-2016
121,300	121,603	121,907

Performance Measure:

- Number of speeding citations and warnings issued during grant-funded enforcement activities and mobilizations

Benchmark:

- 2011-2013 speeding citations and warnings issued during grant-funded enforcement activities and mobilizations - 120,588 (118,907 - 2012-2014 three-year rolling average)

() Information in parenthesis is actual data for the respective year listed.

STRATEGIES

1. Continue funding speed/hazardous moving violation enforcement overtime grants with local law enforcement and the Highway Patrol
2. Encourage law enforcement agencies to target aggressive drivers when working statewide DWI and occupant protection mobilization campaigns
3. Continue implementing targeted corridor projects (Travel Safe Zones) and Selective Traffic Enforcement Programs (STEPS) and High Enforcement Action Teams (HEAT) conducted by law enforcement agencies
4. Continue to strategize with law enforcement and training academy partners to develop enforcement/awareness countermeasures and share their concepts and programs
5. Fund enforcement efforts in construction/work zones in the MoDOT districts and enhance the enforcement with public awareness campaigns
6. Continue the use of speed monitoring devices (radars) and changeable message signs
7. Expand efforts to educate roadway users on the dangers of aggressive driving and the rules of the road
8. Encourage the local regional coalitions of the Missouri Coalition for Roadway Safety to fund and promote enforcement.
9. Educate roadway users on the dangers of aggressive driving and rules of the road.
10. Use pre- and post- enforcement operation news releases to educate the public about enforcement efforts.

ALCOHOL AND OTHER DRUGS

Background

It is impossible to predict how alcohol will affect a person on any given occasion. Every drink influences both the body and mind and has a profound impact on the physical and mental skills needed to drive a motor vehicle. One drink could have serious consequences.

Alcohol and other drugs contribute substantially to traffic crashes on Missouri's roads, particularly those resulting in death or serious injury. In the 2011-2013 period, 419,680 traffic crashes occurred in the state. Of those, 0.5% resulted in a fatality and 3.0% involved someone being seriously injured. During the same time period, there were 20,061 traffic crashes where one or more drivers and/or pedestrians were

under the influence of intoxicants and in the opinion of the investigating officer their intoxicated condition was a contributing factor to the crash. In these crashes where drivers or pedestrians were impaired by alcohol or other drugs, 717 people were killed and another 2,644 were seriously injured. It also is important to note that substance-impaired driving is under-reported as a contributing factor in traffic crashes. This under-reporting is due to drivers experiencing injuries sustained from crashes without being tested for blood alcohol content. Also, some forms of drug impairment may not be apparent to officers on the scene. As a result, it is an even greater problem than these statistics would indicate. In addition, 87.7% of substance-impaired drivers killed also failed to wear a safety belt further compounding the problem of substance-impaired driving.

2011-2013 Missouri Alcohol and Other Drug Related Fatalities & Serious Injuries

A common misconception is that substance-impaired drivers are primarily injuring and killing themselves. While that is often true, a substantial number of people killed and seriously injured in these crashes were not intoxicated by alcohol or other drugs. Their actions in these incidents probably did not contribute

to the cause of the collision. Of the 717 people killed in alcohol and other drug-related traffic crashes, 69% were the substance-impaired driver/pedestrian and 31% were some other involved party. Of the 2,644 seriously injured, 61.4% were the substance-impaired drivers/pedestrians while 38.6% were other persons in the incidents.

2011-2013 Missouri Alcohol and Other Drug Related Fatalities & Serious Injuries (Person Involvement)

Young Alcohol Impaired Drivers (Under Age 21)

Youth make up a significant proportion of alcohol-impaired drivers causing traffic crashes on Missouri roadways. Of the 17,313 alcohol-impaired drivers involved in traffic crashes during 2011-2013, 10.6% were under the age of 21 (in known cases). This is especially significant when you consider it is illegal for someone under 21 to possess or consume alcohol in Missouri.

In 2011-2013, a total of 553 alcohol-impaired drivers were involved in crashes where one or more persons were killed. In known cases, 11.6% of these drivers were under the age of 21. A total of 79 persons were killed in traffic crashes involving these young alcohol-impaired drivers. Of those persons killed, 54.4% were the underage alcohol-impaired driver and 45.6% were some other party in the crash.

2011-2013 Missouri Alcohol and Other Drug Related Fatalities & Serious Injuries (By Age)

NOTE: The data for persons killed and seriously injured involving an substance-impaired driver by age does not include data for those crashes where the pedestrian was the impaired party. Also, one substance-impaired related crash has the potential of consisting of substance-impaired driver younger than 21 and one 21 or older. In these cases, the persons killed and seriously injured will be counted in each chart shown above.

GOAL #1:

To decrease fatalities involving drivers with .08 BAC or greater to 230 by 2016:

2013	2014	2015
267	255	243

Performance Measure:

- Number of fatalities involving drivers with .08 BAC or greater

Benchmark:

- 2012 fatalities involving drivers with .08 BAC or greater - 280 (248 in 2013)

GOAL #2:

To increase substance-impaired driving arrests made during grant funded enforcement activities and mobilizations by .25 percent annually based on a three-year rolling average of grant years 2011, 2012, 2013 = 7,975

2014	2015	2016
7,995	8,015	8,035

**Performance Measure:**

- Number of substance-impaired driving arrests made during grant-funded enforcement activities and mobilizations

Benchmark:

- 2011-2013 substance-impaired driving arrests made during grant-funded enforcement activities and mobilizations - 7,975 (DWI)
(7,054 - 2012-2014 three-year rolling average)

GOAL #3:

To decrease fatalities involving alcohol-impaired drivers under the age of 21 years to 14 by 2016:

2013	2014	2015
16	15	15

Performance Measure:

- Number of fatalities involving alcohol-impaired drivers under the age of 21 years

Benchmark:

- 2012 fatalities involving alcohol-impaired drivers under the age of 21 years - 17 (28 for 2013)

() Information in parenthesis is actual data for the respective year listed.

STRATEGIES

Public Information and Education

1. Educate the public on the dangers of driving after drinking or using other drugs through public awareness campaigns such as Drive Sober or Get Pulled Over, through quarterly impaired driving mobilizations, and through the distribution of educational materials at traffic safety workshops, health and safety fairs, displays, on the website, and through public service announcements
2. Incorporate impaired driving educational programs into school systems and businesses
3. Continue statewide designated driver programs which stress alternatives to drinking and driving (CHEERS designated driver program)
4. Educate large numbers of alcohol servers in intervention techniques utilizing the Server Training program conducted by the Division of Alcohol and Tobacco Control and through the SMART Web-based server training program; continue to expand and promote the programs
5. Provide support for the MCRS Impaired Driving Subcommittee to address impaired driving crashes and underage impaired driving
6. Incorporate toxicology into Impaired Driving Subcommittee efforts
7. Checkpoint news releases mention that specially trained drug detection officers will be working the overtime enforcement effort and/or sobriety checkpoint
8. Encourage law enforcement and prosecutors to report the type(s) of drug involvement suspected in crashes to the media
9. Include drug arrest details in after-action enforcement reports to the media
10. Implement, as appropriate, recommendations identified in the 2008 Statewide Impaired Driving Assessment
11. Work with the MCRS Impaired Driving Subcommittee to implement strategies outlined in the Impaired Driving Strategic Plan
12. Continue support for youth and young adult prevention and education programs including Team Spirit Leadership Conference; Team Spirit Reunion; Think First Programs (School Assembly Programs, Elementary School Curriculum, Young Traffic Offenders Program); university level Partners in Prevention; local community educational programs; and Missouri Safe and Sober

13. Revise and reprint impaired driving educational materials as needed; expand partnerships to encourage use of these materials in their publications
14. Develop campaigns/materials to reach targeted high-risk groups
15. Participate in interagency committees to share ideas, avoid duplication of efforts, and maximize resources (MCRS and the MCRS Impaired Driving Subcommittee, Missouri Youth/Adult Alliance, Partners in Prevention)
16. Support local efforts to reduce drinking and driving – especially underage drinking – by providing technical assistance to develop programs such as DWI docudramas or *Every 15 Minutes*, loaning them collateral materials to enhance their efforts (fatal vision goggles, videos, community program guides), and providing speakers
17. Provide Drug Impairment Training for Educational Professionals across the state
18. Organize and/or participate in press events and work with media outlets across the state to promote highway safety initiatives

Enforcement

1. Provide funding for alcohol saturation enforcement teams, DWI Task Forces, sobriety checkpoints, quarterly impaired driving mobilizations, overtime salaries for Breath Alcohol Testing (BAT) van operations, and maintenance for BAT vans
2. Provide equipment to enhance enforcement efforts and appropriate training to ensure effective use of this equipment (e.g., breath alcohol testing instruments; enforcement vehicles; digital in-car video cameras; and sobriety checkpoint supplies)
3. Provide training on detection and apprehension of impaired drivers (e.g., standardized field sobriety testing (SFST), sobriety checkpoint supervisor training, courtroom testimony, drug recognition experts (DRE), ARIDE, and DWI crash investigation techniques)
4. Ensure access to DRE and/or ARIDE trained officers at sobriety checkpoints
5. Provide motivational and educational speakers for law enforcement personnel during training events such as the annual Law Enforcement Traffic Safety Advisory Council (LETSAAC) conference
6. Provide supplies, support, and training for DREs and the DRE recertification training to ensure continuity of the program
7. Support a state SFST/DRE coordinator who will work in cooperation with the Impaired Driving Sub-

committee of the MCRS and the DRE/SFST Advisory Committee in order to maintain standardization of the program

8. Support projects designed to prevent underage alcohol purchase, apprehend minors attempting to purchase alcohol, and provide a physical enforcement/intervention presence (e.g., Server Training, Party Patrol, Underage Drinking LE Training, selective enforcement, compliance checks, and special events)

9. Incorporate, as appropriate, recommendations identified in the 2008 Impaired Driving Assessment

10. Increase participation in statewide multi-jurisdiction mobilization enforcement efforts

11. Support selective enforcement efforts to address young drinking drivers by funding statewide underage drinking enforcement projects and training

12. Support DWI traffic units with local law enforcement agencies

13. Update administrative rules for the ignition interlock program as needed to insure that DWI offenders cannot operate a vehicle while intoxicated

Prosecution/Adjudication

1. Provide training for judges, prosecutors and law enforcement personnel on local/national

DWI issues utilizing the expertise of the Missouri Office of Prosecution Services, Department of Revenue, Office of State Courts Administrator, the National Traffic Law Center and the National Drug Court Institute

2. Provide continued funding for the statewide Traffic Safety Resource Prosecutor whose job it is to provide training and technical support for prosecutors in Missouri

3. Continue to provide funding for the MADD Court Monitoring project in selected counties and municipalities in order to increase conviction rates

4. Provide National Drug Court Institute training to DWI court teams from across the state

5. Incorporate topics on toxicology in law enforcement and prosecutor trainings

6. Provide equipment and training to enhance the DWI Tracking System (DWITS)

7. Provide motivational speakers for judicial personnel during training events such as their annual municipal judges and court clerks conference

8. Provide an integrated system, a web link and/or specifications to local law enforcement agencies that will allow them to access the DWITS and enter DWI arrest information that can be tracked through prosecution and sentencing

9. Continue expansion of DWI courts throughout the state

10. Provide funding for an additional transportation attorney at the Missouri Department of Revenue to provide legal representation for alcohol-related license appeals to Missouri appellate courts

11. Provide funding for a paralegal position in the legal counsel's office at the Missouri Department of Revenue whose dedicated function will be to serve as the ignition interlock coordinator

12. Work with local jurisdictions across the State to implement no-refusal policies for BAC testing

13. Work with local jurisdictions across the State to implement electronic warrant systems in order to reduce the amount of time it takes for law enforcement officers to obtain a warrant in DWI cases

14. Provide specimen kits to coroners and medical examiners in order to obtain BAC test results in fatal crashes

Technology

1. Continue to provide DWITS enhancements: design specifications for program linkages; develop reports as needed by the users; conduct training for users of the system

2. Support the efforts of the Missouri Safety Center Breath Alcohol Instrument Training and Repair Laboratory to calibrate and repair breath test instruments in order to improve their reliability, and reassign instruments as needed
3. Work with the Missouri Safety Center and the Missouri State Highway Patrol to purchase and place new breath testing technology around the state
4. Seek ways to expedite processing of DWI offenders
5. Improve the process of tracking DWI offenders who have been sanctioned to install ignition interlock devices
6. Monitor ignition interlock manufacturers/installers for adherence to the Breath Alcohol Ignition Interlock Device Program guidelines and administrative rules

Open Container (Section 154 Open Container Transfer Funds)

The open container transfer provision was initially authorized under TEA-21 and reauthorized under SAFETEA-LU and MAP-21. The provision requires states to pass and enforce a qualifying open container law or be subject to a 3% transfer of their federal aid highway funds until FY 2012 when it decreased to 2.5%. These funds were required to be diverted to either alcohol countermeasure safety programs (within the Highway

Safety Office) or be utilized for qualifying hazard elimination projects. Some of the alcohol countermeasures identified within this plan are supported by Section 154 transfer funds. The remainder of the funding has been retained for hazard elimination efforts.

Historically Missouri has focused on the prevention of crossover fatalities through the installation of 3-strand median guard cable on major roadways – one of the most serious types of crashes occurring in Missouri. Because of our efforts using the Open Container Transfer funds to install the median guard cable, we have almost eliminated crossover fatalities on our divided roadways. Currently safety engineering efforts using this funding source involve the installation of rumble stripes focused on keeping vehicles on the roadway, systematically addressing horizontal curve crash locations, and the systematic improvement to numerous intersections with both low-cost and higher-cost initiatives.

OCCUPANT RESTRAINTS

Background

Traffic crashes are the leading cause of death in the United States. It is well recognized that one of the best means of defense in a crash is to be protected by a safety belt or a child safety seat. Increasing safety belt use has tremendous potential for saving lives, preventing injuries, and reducing the economic costs associated with traffic crashes. For many years, motor vehicle manufacturers have been required to install safety belts in their vehicles, so the vast majority of vehicles on the roads today have these types of safety devices installed. The overwhelming percentage of people killed on Missouri roads or seriously injured in 2011-2013, in all probability, had a safety belt available for use (except for pedestrians, bicyclists, and motorcyclists):

- 2,369 killed – 76.5% had a safety belt available;
- 16,088 seriously injured – 79.1% had a safety belt available.

A substantial number of occupants killed in 2011-2013 Missouri traffic crashes were not wearing safety belts or in a child restraint compared to those injured and not injured. In fatal crashes where safety belt usage was known, 67.7% of the people who died were not restrained. Of those seriously injured, 36.4% were not restrained. Conversely, of those not injured, 690,270 were wearing a safety belt or in a child restraint.

Safety belt use dramatically reduces a person's chance of being killed or seriously injured in a traffic crash. Of the drivers involved in 2011-2013 crashes, 1 in 2 was injured when they failed to wear their safety belt, however, when they were wearing a safety belt, their chances of being injured in the crash were 1 in 8. When examining driver deaths, the differences are much more significant. Drivers had a 1 in 29.6 chance of being killed if they were not wearing a safety belt; but that chance dropped dramatically to only 1 in 1,402 if the driver was wearing a safety belt.

2011-2013 Vehicle Occupant Traffic Fatalities and Serious Injuries By Restraint Usage

**Data includes Child Safety Seats*

63.4% of 2013 vehicle occupants killed were unrestrained!

Ejections

The possibility of death and serious injury dramatically increases in cases where the person is ejected from the vehicle at the time of the crash. One of the benefits of being restrained is it increases the probability of the person staying in the vehicle and being protected by the vehicle passenger compartment. In known cases of those occupants killed who were totally ejected from the vehicle, 92.1% were not restrained and of those partially ejected, 82.7% were not restrained. Of the occupants killed who were not ejected from their vehicles, 47% were not wearing their safety belts or in a child restraint.

2011-2013 Vehicle Occupant Traffic Fatalities and Serious Injuries By Restraint Usage

Safety Belt Usage Among High School Students

While 67.7% of the dead occupants were not restrained, lack of safety belt use becomes even more significant when we segregate young people. When just looking at young people between the ages of 15 through 20, 77.4% of those who died were not buckled up.

The Office of Highway Safety had long been concerned with the lack of safety belt usage among young drivers and passengers. Unfortunately, in the past, there was no survey data to provide an established use rate for this age group. In 2003, parameters were developed to conduct an observational safety belt use survey for teens. It was determined that the most effective way to reach this very targeted age group was to survey specific high schools throughout the state.

Several guiding principles served as the underlying basis for the sampling plan:

1. The individual public high school would be the basic sample unit at which safety belt usage observations would be made.
2. The safety belt usage rates of high school students would be computed for each of the seven MoDOT regions in the state.
3. The number of schools selected from each MoDOT region would be proportionate to the number of

schools in that region in comparison to the state total of 496 public high schools.

4. The high schools within each region would be selected in their descending order of student enrollment to maximize the number of high school students from each MoDOT region.

One hundred-fifty high schools were selected for the survey in 92 counties (80 percent of the 115 counties in Missouri). Observational data were collected in April, Monday through Friday. Two instruments were used to collect the data. One instrument focused on the vehicle and the driver, while the other targeted the front safety outboard passenger and other occupants in the vehicle. A detailed report of all findings is available on file at the Office of Highway Safety.

Results of the high school surveys reflected mostly modest increases until a 5 percent jump in usage in 2010. The usage rate has been very stagnant since 2010, fluctuating between 66 and 67 percent.

- 2006 – 58 percent
- 2007 – 61 percent
- 2008 – 62 percent
- 2009 – 61 percent
- 2010 – 66 percent
- 2011 – 67 percent
- 2012 – 66 percent
- 2013 – 67 percent
- 2014 – 67 percent

Very Young Passengers

While Missouri must continue to promote the use of safety belts, particular attention must be paid to increasing the use of restraint devices for transporting young children. According to the National Highway Traffic Safety Administration (NHTSA), approximately 7,500 lives have been saved by the proper use of child restraints during the past 20 years. Yet, motor vehicle crashes still remain the number one killer of children ages 4 to 14 in America. The reason? Too often it is the improper or non-use of child safety seats and booster seats.

Children Birth through Age Three – Child Safety Seats

In 2011-2013, 14 children under the age of 4 were killed in a motor vehicle; 21.4% were not using any type of restraint device (in known cases). Another 100 were seriously injured. In known cases, 28% were not in any restraint device and 2% were in an adult safety belt.

2011-2013 Vehicle Occupant Traffic Fatalities and Serious Injuries By Restraint Device - Children Under Age 4

Children Under Age 4 Killed

14

Children Under Age 4 Seriously Injured

100

Children Age 4 through 7 – Booster Seats

Research indicates that when children are graduated to a safety belt too soon, they are much more likely to suffer serious injuries in a crash due to “safety belt syndrome.” Therefore, during the 2006 legislative session, Missouri’s child passenger restraint law was strengthened to require children ages 4 through 7 (unless they are 4’9” tall or weigh more than 80 pounds) to be secured in a booster seat (or child safety seat if appropriate for their height and weight). The law became effective August 28, leaving only four months in 2006 to capture data on booster seat usage. Given that it takes

up to six months before the general public is aware of a new law and has put it into practice, booster seat usage for 2006 was not evaluated. We did, however, begin analyzing crash data on this age group beginning in 2007 to determine whether we observe a trend that is indicative of a reduction in deaths and serious injuries.

In 2011-2013, 10 children, 4 through 7 years of age, were killed in a motor vehicle; in known cases, 30% were not using any type of restraint device. Another 171 children within this age group were seriously injured – 19.9% were not secured in any type of restraint device, 30.4% were in a child restraint, and 21.6% were in an adult safety belt.

2011-2013 Vehicle Occupant Traffic Fatalities and Serious Injuries By Restraint Device - Children Age 4-7

Children Age 4-7 Killed
10

Children Age 4-7 Seriously Injured
171

GOAL #1:

To increase statewide safety belt usage by 1% annually to:

2014	2015	2016
81%	82%	83%

Performance Measure:

- Statewide percent observed belt use for passenger vehicles (front seat outboard occupants)

Benchmark:

- 2013 statewide safety belt usage - 80% (79% in 2014)

GOAL #2:

To reduce unrestrained passenger vehicle occupant fatalities to 326 by 2016:

2013	2014	2015
379	361	344

Performance Measure:

- Number of unrestrained passenger vehicle occupant fatalities

Benchmark:

- 2012 unrestrained passenger vehicle occupant fatalities - 396 (334 in 2013)

GOAL #3:

To increase safety belt related citations and warnings made during grant funded enforcement activities and mobilizations by .25 percent annually based on a three-year rolling average of grant years 2011, 2012, 2013 = 35,256

2012-2014	2013-2015	2014-2016
35,344	35,432	35,520

Performance Measure:

- Number of safety belt citations and warnings issued during grant funded enforcement activities and mobilizations

Benchmark:

- 2011-2013 safety belt citations and warnings issued during grant funded enforcement and mobilizations - 35,256 (33,759 - 2012-2014 three -year rolling average)

GOAL #4:

To increase teen safety belt usage by 1% annually to:

2014	2015	2016
68%	69%	70%

Performance Measure:

- Percent observed belt use for teen front seat outboard occupants

Benchmark:

- 2013 statewide safety belt usage - 67% (67% in 2014)

GOAL #5:

To increase safety belt usage of commercial motor vehicle (CMV) drivers by 1% during surveys conducted biennially to:

2014	2016
82%	83%

Performance Measure:

- Percent observed safety belt use for CMV drivers

Benchmark:

- 2012 CMV driver safety belt usage - 81% (81% in 2014)

GOAL #6:

To increase child safety seat usage by 1% annually to:

2014	2015	2016
92%	93%	94%

Performance Measure:

- Percent observed child safety seat use

Benchmark:

- 2013 child safety seat usage rate - 91% (91% in 2014)

GOAL #7:

To maintain an adequate base of certified Child Passenger Safety Technicians throughout the state to fall within the following range:

- 800-1,000 with representation in each of the seven blueprint regional coalitions

Performance Measure:

- Number of certified Child Passenger Safety Technicians in the statewide database maintained by the Highway Safety Office

Benchmark:

- Certified Technicians as of February 2014 - 989 (1,053 in December 2014)

GOAL #8:

To maintain an adequate base of certified Child Passenger Safety Instructors throughout the state to fall within the following range:

- 30-40 with representation in each of the seven blueprint regional coalitions

Performance Measure:

- Number of certified Child Passenger Safety Instructors in the statewide database maintained by the Highway Safety Office

Benchmark:

- Certified instructors as of February 2014 - 38 (38 in December 2014)

GOAL #9:

To maintain an adequate base of Missouri inspection stations (that are listed on the NHTSA website) throughout the state to fall within the following range:

- 125 – 200 with representation in each of the seven blueprint regional coalitions

Performance Measure:

- Number of Missouri inspection stations in a statewide database maintained by the Highway Safety Office

Benchmark:

- Inspection stations in Missouri as of February 2014 - 198 (198 in December 2014)

() Information in parenthesis is actual data for the respective year(s) listed.

STRATEGIES

Child Passengers

1. Produce, promote and distribute educational materials addressing: the proper installation of child safety seats and booster seat use
2. Maintain a state CPS Advisory Committee and implement their recommendations where appropriate
3. Conduct six Certified Child Passenger Safety Technician classes statewide
4. Certify an additional CPS Instructor each year
5. Maintain a statewide computer list-serve of CPS technicians and instructors
6. Support child safety seat checkup events and educational programs through local law enforcement agencies, fire departments, Safe Communities, hospitals and health care agencies, safety organizations such as Safe Kids, and the Traffic and Highway Safety Division
7. Work with partners and with the media to garner support for annual CPS Week in September
8. When funding is available, provide child safety seats/booster seats and supplies to inspection stations for distribution to low income families (note: inspection stations must meet guidelines established by Missouri's CPS Advisory Committee and must be listed on the NHTSA Web site <http://www.nhtsa.dot.gov/people/injury/childps/CPSFittingStations/CPSinspection.htm>)
9. Develop educational pieces to heighten awareness concerning the life-saving and economic benefits derived from enhanced child safety seat laws
10. Conduct Child Restraint Observational Survey every other year
11. Conduct annual CPS enforcement and public awareness campaign during National CPS Week

Teen Passengers/Drivers

1. Conduct annual teen statewide safety belt enforcement and public awareness campaign in March followed by the teen observational safety belt survey in April
2. Conduct youth safety belt selective traffic enforcement efforts statewide coupled with press releases, radio spots, and materials targeting young drivers
3. Promote the youth campaigns; modify or enhance campaigns as needed to keep a fresh approach

for the teen audience

4. Develop youth safety belt public awareness materials with input from young drivers
5. Educate youth on the importance of safety belts through programs such as Team Spirit Youth Traffic Safety Leadership Training Program & Reunion, Think First, Battle of the Belt/It Only Takes One, and the Young Traffic Offenders Program
6. Implement new Parent Program geared toward educating the parents of teen drivers on the important role they play in the early driving years

General Occupant Protection

1. Conduct NHTSA-approved statewide observational safety belt survey every year, in May/June (pre, peak, and post surveys in conjunction with enforcement mobilizations and public awareness campaigns)
2. Produce, promote and distribute educational materials addressing: occupant protection laws; importance of wearing safety belts all the time and air bag safety
3. Promote the Saved by the Belt survivor program; maintain a database of survivors to contact those who are willing to speak publicly about their life-saving experience
4. Conduct annual Click It or Ticket selective traffic enforcement wave during May/June, augmented with collateral public information and awareness efforts such as press releases, observational surveys, and educational programs utilizing the Click It or Ticket safety belt campaign message
5. Compliment annual Click It or Ticket campaign with quarterly occupant protection enforcement days, augmented with collateral public information and awareness efforts, namely through press releases.
6. Conduct paid media efforts and work toward continual increases in earned media efforts
7. Develop educational pieces to heighten awareness concerning the life-saving and economic benefits derived from primary safety belt laws
8. Continue funding traffic occupant protection strategies training to law enforcement agencies throughout the state.
9. Provide motivational and educational speakers for law enforcement personnel during training events such as the annual Law Enforcement Traffic Safety Advisory Council (LETSAC) conference

OCCUPANT RESTRAINTS

Who

2011-2013 Fatalities by Age:

Age	Fatalities	Percent of Total Fatalities
0-9	8	0.72%
10-19	166	14.95%
20-29	307	27.66%
30-39	171	15.41%
40-49	155	13.96%
50-59	147	13.24%
60-69	80	7.21%
>=70	76	6.85%
Total	1110	100.00%

Unrestrained Occupants includes drivers and passengers of vehicles subject to the seat belt law.

What

2011-2013 Unrestrained Occupant Fatalities by Occupant Vehicle Types:

Vehicle Type	Unrestrained Occupant Fatalities	Percent of Total Fatalities
Passenger Car	562	50.63%
SUV	189	17.03%
Van	58	5.23%
Pick Up	278	25.05%
Large Trucks	23	2.07%
Total	1110	100.00%

Where

2011-2013 Fatalities by Roadway Designation:

Roadway Desg.	Fatalities	Percent of Total Fatalities
Interstates	100	9.01%
US Numbered Routes	160	14.41%
MO Lettered Routes	276	24.86%
MO Numbered Routes	253	22.79%
Loop (Interstate only)	3	0.27%
Business	1	0.09%
City Street	141	12.70%

2011-2013 Fatalities by Time of Day:

Time	Fatalities	Percent of Total Fatalities
Midnight - 5:59 am	292	26.31%
6:00 am - 11:59 am	213	19.19%
Noon - 5:59 pm	316	28.47%
6:00 pm - 11:59 pm	289	26.04%
Total	1110	100.00%

Why - See Appendix A on page 40.

DISTRACTED DRIVERS

Background

Distracted driving is a voluntary diversion of the driver's attention from activities critical to safe driving. There are four types of driver distraction; visual, auditory, manual, and cognitive. There is a growing body of evidence which suggests driver distractions, both inside the vehicle and the road environment, is becoming increasingly large contributors to road trauma.

It is estimated that drivers engage in a secondary task between one-quarter and one-half of the time they drive. In recent surveys, about two-thirds of all drivers reported using a cell phone while driving. In daytime observational studies, 7 to 10 percent of all drivers were using a cell phone. Based on a study by Virginia Tech Transportation Institute, a risk for being involved in a critical incident is 23 times greater if the driver texts while driving.

On January 1, 2012, Missouri's law enforcement officers began using a revised crash report which includes additional data elements that address distracted driving. This more detailed report will provide data that can be used to more accurately assess the magnitude of this high-risk behavior. From 2011-2013, 13.8 percent of Missouri fatal traffic crashes involved at least one distracted driver. About 37 percent of the distracted drivers involved in fatal crashes in the last three years were between 15 and 30 years of age.

2011-2013 Statewide Fatalities & Serious Injuries Vs. Number of Distracted Driver Involved

GOAL #1:

To decrease fatalities involving distracted drivers to 70 by 2016:

2013	2014	2015
81	78	74

Performance Measure:

- Number of distracted driving-related fatalities

Benchmark:

- 2012 distracted driving-related fatalities - 85 (74 in 2013)

STRATEGIES

1. Continue to expand public information campaigns to educate the roadway user on the dangers of distracted driving
2. Encourage companies to strengthen distracted driving policies and consequences for those who text and drive, use cell phones and other electronic devices while driving
3. Seek opportunities to give distracted driving presentations at businesses, schools, and community organizations

GOAL #2:

To decrease serious injuries involving distracted drivers to 674 by 2016:

2013	2014	2015
783	747	711

Performance Measure:

- Number of distracted driving-related serious injuries

Benchmark:

- 2012 distracted driving-related serious injuries - 819 (722 in 2013)

() Information in parenthesis is actual data for the respective year listed.

organizations

4. Enact legislation to restrict texting for all drivers
5. Expand GDL law to ban cell phone use by beginner drivers
6. Work with safety advocates and partners to implement countermeasures to reduce crashes involving distracted drivers

Who

Age	Fatalities	Percent of Total Fatalities

YOUNG DRIVERS

Background

Young drivers are categorized as those ages 15 through 20 years. These young drivers are substantially over-involved in Missouri traffic crashes. In 2013, 16.0% of all fatal crashes involved a young driver of a motor vehicle; this is particularly significant since young drivers comprised only 7.8% of the licensed driver population in Missouri.

Of all 2011-2013 fatal and serious injury crashes in Missouri, 20.5% involved a young driver of a motor vehicle. In 2011-2013, 396 persons were killed and 3,487 were seriously injured in traffic crashes involving a young driver of a motor vehicle

2011-2013 Statewide Fatalities & Serious Injuries Vs. Number of Young Drivers Involved

NOTE: data for persons killed and seriously injured involving a young driver does not include young drivers of ATVs, bicycles, farm implements, construction equipment, other vehicles and unknown vehicle body types.

Several factors work together to make this age group so susceptible to crashes:

- Inexperience:** All young drivers start out with very little knowledge or understanding of the complexities of driving a motor vehicle. Like any other skill, learning to drive well takes a lot of time. Technical ability, good judgment and experience are all needed to properly make the many continuous decisions—small and large—that add up to safe driving. This is confirmed by the larger percentage of single-vehicle fatal crashes involving young drivers where the vehicle frequently leaves the road and overturns or hits a stationary object like a tree or pole.
- Risk-taking behavior and immaturity:** Adolescent impulsiveness is a natural behavior, but it results in poor driving judgment and participation in high-risk behaviors such as speeding, inattention, impairment and failing to wear a safety belt. Peer pressure also often encourages risk taking. In general a smaller percentage of young drivers in Missouri wear their safety belts compared to other drivers (teen safety belt usage rate for 2013 was 67 percent compared to the overall usage rate of 80 percent).
- Greater risk exposure:** Young drivers often drive at night with other friends in the vehicle. During night driving, reaction time is slower since the driver can only see as far as the headlights allow. More teen fatal crashes occur when passengers—usually other teenagers—are in the car than do crashes involving

other drivers. Driving with young, exuberant passengers usually poses a situation of distraction from the driving task. There are many other distractions in vehicles including the loud music and cell phones; all of which are factors that increase crash risk.

The top 5 contributing circumstances attributable to young drivers of motor vehicles involved in 2011-2013 fatal and serious injury crashes were:

1. Driving Too Fast for Conditions
2. Distracted / Inattentive
3. Failed to Yield
4. Improper Lane Usage / Change
5. Speed Exceeded Limit

Young Drinking Drivers

When analyzing statistics involving young drinking drivers, it is all the more important for us to keep in mind that drinking alcohol is an illegal behavior for those under 21 years of age. Missouri has a “zero tolerance” law for people under 21 that sets their illegal blood alcohol content level at .02 percent (considerably lower than the .08 BAC level for adults).

In 2011-2013, there were 2,237 drivers whose consumption of alcohol contributed to the cause of a fatal or serious injury crash. In known cases, 244 (10.9%) of the drinking drivers were under the legal drinking age of 21.

In 2011-2013, a total of 553 drinking drivers were involved in crashes where one or more people were killed. In known cases, 64 (11.6%) of those drinking drivers were under the legal drinking age of 21.

In 2011-2013, 607 (25.6%) of the fatalities and 2,250 (14.0%) of the serious injuries involved a drinking driver. Of these, 79 (13.0%) of the fatalities and 274 (12.2%) of the serious injuries involved an underage drinking driver.

In 2011-2013, 368 young drivers were involved in 360 fatal traffic crashes where 406 people died. In those crashes, 64 or 17.4% of the young drivers were drinking and driving. In other words, one of every 6 young drivers involved in fatal crashes was drinking alcohol and their intoxicated condition contributed to the cause of the crash.

GOAL #1:

To decrease fatalities involving drivers age 15 through 20 to 111 by 2016:

2013	2014	2015
129	123	117

Performance Measure:

- Number of fatalities involving drivers age 15 through 20

Benchmark:

- 2012 fatalities involving drivers age 15 through 20 - 135 (120 in 2013)

GOAL #2:

To decrease serious injuries involving drivers age 15 through 20 to 1,038 by 2016:

2013	2014	2015
1,206	1,150	1,095

Performance Measure:

- Number of people seriously injured involving drivers age 15 through 20

Benchmark:

- 2012 serious injuries involving drivers age 15 through 20 - 1,261 (1,050 in 2013)

() Information in parenthesis is actual data for the respective year listed.

STRATEGIES

1. Continue support for youth prevention and education programs to include Team Spirit Youth Traffic Safety Leadership Training Program and Reunion; Battle of the Belt/It Only Takes One, ThinkFirst Programs (school assemblies, Traffic Offenders Program and the corporate program); Every15 Minutes; DWI docu dramas; CHEERS university-based designated driver program, Safe Communities programs throughout the state and statewide Battle of the Belt/It Only Takes One campaign
2. Continue statewide distribution of Road Wise: Parent/Teen Safe Driving Guide through DOR licensing offices and Highway Patrol driver examination stations and upon request
3. Seek out and continually assess young driver educational programs to determine the best and most cost-effective way to reach the largest number of parents and teens
4. Continue to update, as needed, materials and

web/social media information on young, high-risk drivers; develop materials that are especially appealing to young drivers

5. Include information on the graduated driver license (GDL) law in materials, on the web/social media sites and within presentations
6. Support projects designed to prevent under-age alcohol purchase, educate law enforcement and the public about underage drinking, apprehend minors attempting to purchase alcohol and adults purchasing alcohol for minors, and provide a physical enforcement/intervention presence (e.g., Server Training, SMART on-line server training, underage drinking law enforcement training, compliance checks and multi-jurisdiction enforcement teams)
7. Conduct an annual safety belt survey of young drivers and their passengers and conduct annual law enforcement mobilizations and public awareness campaigns targeting lack of safety belt use at high schools
8. Conduct an annual law enforcement campaign focused on underage drinking and driving
9. Provide funding to support college/university prevention programs (Partners in Prevention, CHEERS Designated Driver program, SMART online server training and START online student alcohol awareness training) that focus on the development and implementation of UMC's Drive Safe. Drive Smart campaign
10. Encourage strict enforcement of Missouri laws targeting young drivers (e.g., Graduated Driver License, Zero Tolerance, Abuse and Lose)
11. Promote the saveMOlives website and social marketing sites that appeal to youth (Facebook, Twitter, etc.)
12. Provide support for the Missouri Coalition for Roadway Safety Substance-Impaired Driving Subcommittee to address underage substance-impaired driving
13. Implement, if possible, recommendations identified in the 2009 Statewide Underage Substance-Impaired Driving Strategic Advance
14. Develop campaigns/materials to reach targeted high-risk groups
15. Promote the seat belt and youth alcohol campaigns; modify or enhance campaigns as needed to keep a fresh approach for the teen audience

OLDER DRIVERS 65 YEARS OF AGE AND OVER

Background

Our population is aging and older adult drivers are increasing their exposure (miles driven/year) on the highways. According to the U.S. Census Bureau, Missouri ranked 16th nationally in 2010 with 15% of the population age 65 or older. By the year 2030 it is estimated that over 20% of the population in Missouri will be age 65 or older. That means approximately one in five people will be 65 or older.

Being able to go where we want and when we want is important to our quality of life. Personal mobility is often inextricably linked to the ability to drive a car. However, as we age our ability to drive a motor vehicle may be compromised by changes in vision, attention, perception, memory, decision-making, reaction time and aspects of physical fitness and performance.

A wide variety of age-related decreases in physical and mental abilities can contribute to decreased driving ability, as implied by reports that elderly drivers drive less as

they age, while collisions per mile driven increase. Drivers 65 and older who are injured in automobile crashes are more likely than younger drivers to die from their injuries. Accordingly, several reports have noted that per mile driven, older drivers experience higher crash fatality rates than all other drivers except teen-age drivers. Studies have shown that a driver 70 or over is about three times as likely as someone 35-54 years old to sustain a fatal injury in a crash.

In March of 2015, there were 808,536 people licensed in Missouri who were age 65 or over. They accounted for 18.3% of the 4,426,742 persons licensed in Missouri.

Of all 2011-2013 fatal and serious injury crashes in Missouri, 14.7% involved an older driver of a motor vehicle. In 2011-2013, 421 persons were killed and 2,275 were seriously injured in Missouri traffic crashes involving an older driver of a motor vehicle.

2011-2013 Statewide Fatalities & Serious Injuries Vs. Number of Older Drivers Involved

GOAL #1:

To decrease fatalities involving older drivers to 117 by 2016:

2013	2014	2015
136	129	123

Performance Measure:

- Number of fatalities occurring in crashes involving older drivers

Benchmark:

- 2012 fatalities involving older drivers - 142 (151 in 2013)

GOAL #2:

To decrease serious injuries involving older drivers to 632 by 2016:

2013	2014	2015
732	698	665

Performance Measure:

- Number of serious injuries occurring in crashes involving older drivers

Benchmark:

- 2012 serious injuries involving older drivers - 768 (707 in 2013)

() Information in parenthesis is actual data for the respective year listed.

STRATEGIES

- Work with safety advocates and partners to assess and implement countermeasures to reduce crashes involving older drivers identified in the SHSP Missouri's Blueprint to Save More Lives
- Maintain a database of partners that have an interest in older driver issues; keep these partners apprised of new developments and materials in this field
- Develop and distribute public informational materials to assist older drivers and their families
- Provide educational programs to community groups and the public
- Train law enforcement personnel to identify signs of impairment specific to older drivers
- Identify and promote self-assessment tools to enable older drivers to check their own driving abilities
- Improve the process for reporting unsafe or medically unfit drivers (revisions of forms, internal processes, and needed training)
- Work with the Subcommittee on Elder Mobility and Safety under the Missouri Coalition for Roadway Safety to address older driver safety
- Develop a package of office-based screening tools that can be used by healthcare providers and agencies involved in licensing decisions
- Develop and implement a training program for local driver license offices that will assist in recognition of medically unfit drivers

OLDER DRIVERS 65 YEARS OF AGE AND OVER

Who

2011-2013 Fatalities by Age:

Age	Fatalities	Percent of Total Fatalities
0-9	2	0.48%

6:00 am - 11:59 am	135	32.07%
Noon - 5:59 pm	186	44.18%
6:00 pm - 11:59 pm	80	19.00%
Total	421	100.00%

Why - See Appendix A on page 40.

COMMERCIAL MOTOR VEHICLES

Background

Large trucks have blind spots – identified as No Zones – around the front, back and sides of the truck, which make it difficult for the driver to see. It is critically important that other drivers stay out of the No Zone of a commercial vehicle. Because most commercial motor vehicles (CMVs) are large transport devices that are much heavier than the normal vehicle population, they cause greater amounts of personal injury and severity to the occupants of vehicles with which they collide. When analyzing the types of persons killed or injured in CMV crashes, the great majority were not the occupants of the commercial motor vehicle.

Commercial motor vehicles are involved in a substantial number of traffic crashes in Missouri, especially those resulting in the death of one or more persons. In 2011–2013, there were 419,680 traffic crashes in the state. In these crashes, 35,528 (8.5%) involved at least one commercial motor vehicle. Of the 2,161 fatal crashes, however, 295 (13.7%) involved at least one commercial motor vehicle.

Of those killed in 2011–2013 CMV crashes, 63 (19.0%) were CMV occupants and 268 (81.0%) were other parties in the incident. When examining serious injuries, 375 (29.7%) were CMV occupants while 886 (70.3%) were some other party.

2011-2013 Statewide Fatalities & Serious Injuries Commercial Motor Vehicle Involved

The Motor Carrier Safety Assistance Program (MCSAP) is a federal grant program that provides financial assistance to states to reduce the number and severity of accidents and hazardous materials incidents involving commercial motor vehicles. The goal of the MCSAP is to reduce CMV involved crashes, fatalities, and injuries through consistent, uniform and effective CMV safety programs. Investing grant monies in appropriate safety programs will increase the likelihood that safety defects, driver deficiencies, and unsafe motor carrier

practices will be detected and corrected before they become contributing factors to crashes. The Traffic and Highway Safety Division administers MCSAP, but the MCSAP program operates under a separate federal grant.

Goals, benchmarks and strategies are outlined within the Commercial Vehicle Safety Plan (CVSP), which is submitted to the Federal Motor Carrier Safety Administration.

MOTORCYCLE CRASHES

Background

A responsible motorcyclist must think about the consequences of their riding behavior in traffic and accept personal responsibility for the results of their decisions and actions, as well as develop good skills and judgment. The motorcyclist must consider their personal margin of safety or margin for error – how much extra time and space they need given their skill level.

Likewise, the general motoring public must be aware of their surroundings while driving and share the road with motorcyclists. A significant number of motorcycle crashes involve another vehicle.

Although motorcycle traffic crashes do not occur with great frequency in Missouri, they usually result in deaths or serious injuries at a considerably greater rate than other traffic crashes. This reality makes helmet use imperative. In 2008, Missouri ranked 19th in helmet use nationwide (ranking is based on an overall percentage of motorcyclists wearing their helmets).

Of the 419,680 traffic crashes in 2011-2013, 0.5% resulted in a fatality and 3.0% involved someone being seriously injured in the incident. During the same period, there were 7,494 traffic crashes involving motorcycles. In these incidents, 250 (3.3%) resulted in a fatality and 1,758 (23.5%) resulted in someone being seriously injured in the crash. These figures demonstrate the overrepresentation of motorcycles in fatal and serious injury crashes.

An area of particular concern is the number of unlicensed and improperly licensed motorcyclists involved in crashes. Between 2011-2013, 23.4% of the 7,494 motorcycle involved traffic crashes involved an unlicensed or improperly licensed motorcycle driver. In fatal crashes, 41.2% involved an unlicensed or improperly licensed motorcycle driver, while 28.0% of the serious injury crashes involved an unlicensed or improperly licensed motorcycle driver.

2011-2013 Statewide Motorcycle Involved Crashes 7,494

In most instances, motorcycle drivers and/or their passengers are the ones killed and seriously injured when they are involved in a traffic crash. Of the 259 people killed in motorcycle-involved crashes (2011-2013), 255 (98.5%) were motorcycle riders and 4 (1.5%) were some other person in the incident. Of the 1,913 seriously injured (2011-2013), 1,877 (98.1%) were the motorcycle riders while only 36 (1.9%) were some other person in the incident.

2011-2013 Statewide Fatalities & Serious Injuries Motorcycle Involved

A significant number of motorcyclists and their passengers killed and seriously injured in Missouri traffic crashes are middle age. Of those killed, 42.7% were between the ages of 41-60 and 45% of those seriously injured were in this age group.

2011-2013 Statewide Motorcycle Drivers and Passengers Killed and Seriously Injured in Missouri Traffic Crashes (Age by Personal Injury Severity)

Age	KILLED			SERIOUSLY INJURED			TOTAL	
	Number	%	Unhelmeted /Non-Compliant Helmet	Number	%	Unhelmeted /Non-Compliant Helmet	Number	%
00 - 20	12	4.7%	1	144	7.7%	38	156	7.3%
21 - 40	107	42.0%	23	696	37.1%	123	803	37.7%
41 - 60	109	42.7%	25	845	45.0%	124	954	44.7%
61 and Over	27	10.6%	2	190	10.1%	20	217	10.2%
Unknown age	0	0.0%	0	2	0.1%	1	2	0.1%
Total	255	100.0%	51	1,877	100.0%	306	2,132	100.0%

4 motorcyclists who were killed had an unknown helmet useage.

75 motorcyclists who were seriously injured had an unknown helmet usage.

GOAL #1:

To decrease motorcyclist fatalities to 84 by 2016:

2013	2014	2015
98	93	89

Performance Measure:

- Number of motorcyclist fatalities

Benchmark:

- Number of 2012 motorcyclist fatalities = 102 (72 in 2013)

GOAL #2:

To decrease un-helmeted or non-DOT-compliant helmeted motorcyclist fatalities to 21 by 2016 (does not include fatalities where helmet use was "unknown"):

2013	2014	2015
25	24	22

Performance Measure:

- Number of un-helmeted or non-DOT compliant helmeted motorcyclist fatalities (only those fatalities where helmet use was known)

Benchmark:

- Number of 2012 un-helmeted or non-DOT-

STRATEGIES

compliant helmeted motorcyclist fatalities = 26
(21 in 2013)

GOAL #3:

To decrease fatalities involving motorcycle operators who are not licensed or improperly licensed to 40 by 2016:

2013	2014	2015
46	43	41

Performance Measure:

- Number of fatalities involving motorcycle operators with no license or improperly licensed

Benchmark:

- 2012 fatalities involving a motorcycle operator with no license or improperly licensed = 48
(24 in 2013)

1. Continue support for the Missouri Motorcycle Safety Program administered by the Missouri Safety Center at University of Central Missouri
2. Continue to provide motorcycle rider education statewide in order to train 4500+ riders annually
3. Conduct RiderCoach (Instructor) Preparation courses as needed in order to train and expand the base of certified motorcycle RiderCoaches to meet demand
4. Actively participate in the Motorcycle Safety Subcommittee of the Missouri Coalition for Roadway Safety
5. Implement, where possible, strategies in the Missouri Motorcycle Strategic Safety Plan 2012-2016
6. Create and distribute Missouri helmet law cards to law enforcement statewide on detecting non-compliant helmets
7. Continue working with numerous grass-roots motorcycle safety groups in promoting the "Watch for Motorcycles" message throughout the state

6:00 pm - 11:59 pm	89	34.90%
Total	255	100.00%

Why - See Appendix A on page 40.

CRASHES INVOLVING SCHOOL BUSES

Background

Although school buses provide one of the safest modes of transportation, there are still school bus related injuries and, unfortunately, some fatalities every year. Some of these are due to crashes with other vehicles while others are due to the school bus striking a pedestrian or bicyclist. The responsibility borne by school bus drivers is considerable.

A vehicle must meet safety standards that are appropriate for its size and type because different types of vehicles perform differently in a crash. For example, because a large school bus is heavier than most other vehicles, its weight can protect its occupants from crash forces better than a light vehicle such as a passenger car. The passive protection engineered into large school buses, combined with other factors such

as weight, provides passenger protection similar to that provided by safety devices in passenger cars. Both types of vehicles protect children from harm but in different ways. Many school buses throughout Missouri are now equipped with 3-point safety belts. This safety enhancement, when properly used, provides additional protection in the event of a crash.

School buses are not involved in a large number of traffic crashes in Missouri. Of all 2011-2013 Missouri traffic crashes, 0.7% involved a school bus or school bus signal. In 92.3% of the school bus crashes, a school bus was directly involved in the crash and in 7.7% of the crashes, no school bus was directly involved but a school bus signal was involved.

2011-2013 Statewide School Bus/School Bus Signal Crashes
(By Severity)

2011-2013 Statewide School Bus/School Bus Signal Crashes
(Involvement Type)

Of the seven persons killed during 2011-2013 in crashes involving school buses, no bus occupants were killed, one was a pedestrian and six were some other person in the incident. Of the 53 persons seriously injured, 16 were occupants of the school bus, one was a pedestrian and 36 were some other person in the incident.

2011-2013 Statewide School Bus/School Bus Signal Involved Fatalities by Location of Persons Killed

2011-2013 Statewide School Bus/School Bus Signal Involved Serious Injuries by Location of Persons Seriously Injured

A significant number of persons killed or seriously injured in crashes involving school buses are young.

	IN BUS		PEDESTRIAN		IN OTHER VEHICLE	
Age	Killed	Serious Injuries	Killed	Serious Injuries	Killed	Serious Injuries
0-4	0	1	0	0	0	0
5-8	0	1	1	0	0	0
9-20	0	7	0	1	1	6
21+	0	7	0	0	5	30
Unknown	0	0	0	0	0	0
Total	0	16	1	1	6	36

GOAL #1:

To decrease or maintain fatalities involving school buses or school bus signals to 2 by 2016:

2013	2014	2015
3	3	2

Performance Measure:

- Number of fatalities occurring in crashes involving school buses or school bus signals

Benchmark:

- 2012 fatalities occurring in crashes involving school buses or school bus signals = 3
(3 in 2013)

GOAL #2:

To decrease serious injuries involving school buses or school bus signals to 12 by 2016:

2013	2014	2015
14	14	13

Performance Measure:

- Number of serious injuries occurring in crashes involving school buses or school bus signals

Benchmark:

- 2012 serious injuries occurring in crashes involving school buses or school bus signals = 15
(19 in 2013)

STRATEGIES

1. Support and implement, if feasible, recommendations made by the 2005 Governor's School Bus Task Force
2. Continue to serve on any state school bus safety committees
3. Expand current public awareness materials to address seat belts on school buses, compartmentalization of school buses, general safety issues regarding riding a school bus, safety around the loading zones and sharing the road with school buses

2011-2013 Fatalities by Age:

VULNERABLE ROADWAY USERS

Background

Many Missourians rely on non-motorized means of transportation such as walking and bicycling. Both of these modes have the ability to provide physical and health benefits, but they also have the potential for serious or fatal injuries in the event of a crash. Crashes involving pedestrians and bicyclists do not occur in extremely large numbers (1.0% and 0.5% of all crashes, respectively) but when a pedestrian or bicyclist is involved in a traffic crash, the potential for harm is much greater.

Pedestrians and bicyclists alike need to understand that they have primary responsibility for their own safety; however, the motoring public also has a responsibility to share the road in a safe manner with these vulnerable road users. This is especially true since many pedestrians and bicyclists are children who often lack the knowledge or skills to interact safely in traffic.

PEDESTRIANS

For the period 2011-2013, there were 234 fatal pedestrian-involved crashes and 807 serious injury pedestrian-involved crashes. During that three-year period, of the 239 persons killed in pedestrian involved crashes, 236 (98.7%) were the pedestrians. Of the 840 seriously injured in pedestrian involved crashes, 807 (96.1%) were the pedestrians.

2011-2013 Statewide Pedestrian Involved Traffic Crashes (Person Involvement)

BICYCLISTS

For the period 2011-2013, there were 11 fatal bicycle-involved crashes and 212 serious injury bicycle-involved crashes. For that same three-year period, of the 11 persons killed in bicycle-involved crashes, all were the bicyclists. Of the 215 persons seriously injured in bicycle-involved crashes, 212 (98.6%) were the bicyclists.

2011-2013 Statewide Bicycle Involved Traffic Crashes

(Person Involvement)

GOAL #1:

To decrease pedestrian fatalities to 71 by 2016:

2013	2014	2015
82	78	75

Performance Measure:

- Number of pedestrian fatalities

Benchmark:

- 2012 pedestrian fatalities = 86 (75 in 2013)

GOAL #2:

To decrease or maintain bicyclist fatalities to 4 by 2016:

2013	2014	2015
6	5	5

Performance Measure:

- Number of bicyclist fatalities

Benchmark:

- 2012 bicyclist fatalities = 6 (4 in 2013)

STRATEGIES

- Educate the motoring public on sharing the road safely with pedestrians and bicyclists
- Educate pedestrians and bicyclists on safely interacting with motor vehicles
- Purchase helmets for distribution at exhibits and for school/local safety awareness programs
- Promote bicycle safety events/awareness programs at the local level utilizing the Safe Communities programs and the Missouri Coalition for Roadway Safety regional coalitions

ENGINEERING SERVICES & DATA COLLECTION

ENGINEERING SERVICES

Traffic engineering is a vital component of the traffic safety countermeasure picture. The techniques engineers use to design roads certainly affect the safety of motorists. Engineering approaches offer two basic types of countermeasures against drivers committing hazardous moving violations: highway design and traffic engineering. With highway design, the roads can be redesigned to add capacity or accommodate increased traffic. Highway design can also mitigate the injury consequences for motorists who come into contact with aggressive, impaired, or distracted drivers. Effective traffic engineering offers a way to accommodate increased traffic flow, or at least get it under control, without building new roads.

One of the most successful examples of an engineering solution to mitigate cross-median crashes (one of our most deadly crashes on the interstates), has been the installation of the median guard cable. Since the state-wide installation effort began in 2003, over 800 miles of guard cable have been installed across the state. In-house studies have shown over a 98 percent reduction in cross-median crashes where median guard cable has been installed.

TRAFFIC ENGINEERING ASSISTANCE PROGRAM (TEAP)

It is often necessary for cities and counties to obtain the services of private consulting engineering firms in order to aid them in correcting operational problems on their streets and highways. Correction of these problems can require detailed assessment of traffic crash analysis, traffic counts, speed surveys, minor origin and destination studies, non-rapid transit studies, parking supply and demand studies, capacity analysis, lighting analysis and design, traffic control devices (inventory and layout), or traffic signal progression analysis and design. Most cities and counties do not have the personnel with expertise in these areas to perform the necessary analysis. (This is not a complete list of the studies a traffic engineering consultant may be called upon to perform.) This is a support problem where methods of correcting a particular situation must first be examined and determined before they can be implemented or evaluated for effectiveness. In order to provide assistance in this area, the Highway Safety Office allocates funding for consultants to perform this service for the local jurisdictions.

TRAINING

Support is also provided for traffic engineering forums and technology transfer to enhance the ability of the local communities to develop crash countermeasures. This is accomplished through training workshops and conferences funded through MoDOT.

An instructional program on traffic practices and crash countermeasure development will be offered to local law enforcement and traffic engineers. This program provides them 15 hours of professional development. Participants receive training on pinpointing typical traffic problems, recognizing roadway and signing defects, and identifying solutions for high-crash locations.

DATA COLLECTION

Each state has developed, to varying degrees, systems for the collection, maintenance and analysis of traffic safety data. Motor vehicle crash data tells us about the characteristics of the crash and the vehicles and persons involved. Crash data elements describe the date, time, location, harmful events, type of crash, weather, and contributing circumstances. Vehicle data elements describe the vehicle in terms of the make, year, type, role, actions, direction, impact, sequence of events, and damaged areas. Person data elements describe all persons involved by age, sex, injury status, and type. Additional information describing the vehicle number, seating position, use of safety equipment, driver status information, non-motorist status, alcohol/drug involvement, and EMS transport status is collected when relevant to the occupants involved.

STARS MAINTENANCE AND TRAFFIC SAFETY COMPENDIUM

The traffic safety program supports maintenance of the Statewide Traffic Accident Reporting System (STARS), which is the repository for all crash statistics. The Missouri State Highway Patrol started electronically filing crash reports in 2007. Approximately 44% of crash reports are now entered electronically into the STARS system. Revision of the crash report form has been completed with training provided annually. The form

became effective on January 1, 2012. The Traffic Safety Compendium is compiled from statistics collected in STARS and is available in .pdf format. Without this vital component, it would be difficult to develop a comprehensive plan based on consistently reported crash data especially as it relates to contributing circumstances that caused the crash. This crash information is shared with MoDOT's Traffic and Highway Safety Division.

LAW ENFORCEMENT TRAFFIC SOFTWARE (LETS)

This web-based computerized system for collection and comprehensive management of traffic data provides on-line information concerning traffic activities and needs for local law enforcement agencies. LETS allows agencies to track crash occurrences, deploy enforcement efforts, design crash countermeasure programs, and develop customized reports. The LETS software also allows agencies to electronically transfer crash data to the STARS database.

SELECTION OF TRAFFIC RECORDS COORDINATING COMMITTEE (TRCC) PROJECTS

The TRCC plays a role in the creation, approval and evaluation of the data improvement projects. The TRCC consists in developing initial project proposals as well as discusses the proposals openly in the TRCC monthly meetings. The TRCC through the discussion of proposed projects, prioritize the projects and determine the funding sources. Once the project begins, the TRCC provides additional guidance on the projects activities.

Projects are selected based on recommendations from the most current assessments and their ability to meet six characteristics: timeliness, accuracy, integration, uniformity, accessibility and completeness.

These projects are evaluated on an annual basis to ensure they are in compliance with project milestones and their ability to improve the states traffic records data systems.

GOAL #1:

To assure there is a robust traffic data system available to assist all data users in development of appropriate traffic safety countermeasures

Performance Measure:

- Percent of all crash reports filed electronically through LETS into the STARS system.
- Ability to track positive or negative trends in traffic crashes by target populations, geographic location, driver subgroups, and causation factors

Benchmark:

- In 2009, local law enforcement agencies began electronically submitting crash reports through LETS.

GOAL #2:

To provide adequate training on an annual basis that will support and enhance the ability of state and local agencies in developing accident countermeasures

Performance Measure:

- Continue partnership with Mid America Regional Council to conduct road safety audits with law enforcement

Benchmark:

- Conduct one road safety audit with law enforcement

BENCHMARKS:

- Provide consultant assistance to local communities for traffic engineering assessments
- Provide consultant assistance to local communities for bridge engineering assessments
- Provide training for engineering professionals at workshops and the Annual Traffic Conference (number of attendees depends upon conference costs which is based on location and travel constraints)
- Provide an effective, efficient software system for capturing local law enforcement crash data
- Provide an effective, efficient web-based highway safety grants management system

STRATEGIES

- Encode all crash reports into the STARS system, ensuring accuracy and efficiency, and provide equipment to support STARS maintenance
- Utilize statistics gathered from STARS to assist MoDOT's Traffic and Highway Safety Division and local communities in developing problem identification
- Provide expertise and funding to assure communities are in compliance with uniform traffic codes and that the bridges within their jurisdictions are upgraded in terms of their safety
- Provide training to assure state and local engineers are kept abreast of current technology
- Continue LETS software improvement and training – train users on accessing and utilizing LETS system, log users into the system, and provide help desk through REJIS
- Continue to serve on the Traffic Records Coordinating Committee and assist in the redevelopment of the Missouri Traffic Records Strategic Plan
- Continue to emphasize linkage capability within the traffic records data systems to generate merged records for analytic purposes.
- Implement recommendations of the 2011 Traffic Records Assessment into the statewide strategic plan (as required in Section 405C implementing guidelines)
- Continually refine and enhance Missouri's data collection and analysis systems in order to produce tables and reports that provide standardized exposure data for use in developing traffic safety countermeasure programs
- Promote use of the online law enforcement mobilization reporting system
- Collaborate with the Missouri State Highway Patrol to assure that Missouri's traffic crash report form complies with 2008 revised MMUCC standards.
- Maintain and improve, as needed, a totally web-based Highway Safety grants management system working in conjunction with the Highway Safety Office, REJIS, and MoDOT's Information Technology Division
- Continue to procure enhanced broadband wireless services for Missouri State Highway Patrol cars through a wireless service provider, to allow for seamless, continuous, and complete transmissions of racial profiling data

15. Supplementary Notes The investigation was conducted in cooperation with the U. S. Department of Transportation, Federal Highway Administration.			
16. Abstract Missouri drivers were surveyed to capture their current attitudes and awareness of specific items concerning highway safety such as seat belt usage, speeding issues, cell phone use while driving, and alcohol impaired driving. The results are presented for the entire state, and by district (stratified), and weighted proportionally to the region distribution in terms of geographic, gender, and age distributions. Results are also compared to that of previous years.

Executive Summary

Highway Safety Findings

This research project surveyed 2,502 adult Missouri drivers in March 2015 to capture their current attitudes and awareness of specific items concerning highway safety such as seat belt usage, speeding issues, cell phone use while driving, and alcohol impaired driving. The research was designed so that in addition to providing a statewide result, statistically useful information was also available at the district level.

Special emphasis was placed on ensuring that the sample reflected Missouri's geographic, age, and gender diversity. People were surveyed from 113 counties as well as the independent city of St. Louis. Residents from 620 different zip codes are represented. The typical market research survey practice of alternatively asking for either the oldest or youngest adult was not employed. Instead, the calling center was given specific goals for each age group and gender within various geographic areas to ensure the most representative sample possible.

Seat Belt Findings

83.1% of Missouri drivers claimed to always use their seat belts, statistically identical to the results from the previous four years. In 2015 those least likely to wear seat belts when driving or riding in a car, van, sport utility vehicle, or pick up were males of at least 50 years of age who primarily drove either a motorcycle or a pick up. Those who lived in areas classified as relatively urbanized were most likely to wear their seat belts whereas those who lived in either very rural location or in very urban areas such as St. Louis were less likely to wear seat belts.

A majority (54.6%) of the respondents prefer to keep Missouri's seat belt law a secondary law, similar to the findings from recent years. Likewise, a slight majority (51.6%) preferred to leave the penalty for violating the law unchanged. All responses were statistically identical to those from the previous year. Out of the minority who favored increasing the fine, a plurality (44.0%) thought the fine should range from \$25 to \$49. The second largest group (20.0%) thought the fine should range from \$50 to \$74. These were also the two largest groups the last five years out of the minority who wished to increase the fine.

The vast majority of the respondents (82.4%) were not aware of any publicity concerning seat belt law enforcement. While statistically similar to the previous year, this continued a downward trend in awareness since 2010. There may be several reasons for this trend. First of all, people have many more options for their free time, making it much more difficult to reach them. People have access to more video and audio options than ever before, many of which are now available directly over the internet making local advertising very challenging. Secondly, this research measures the statewide perception on the issues being discussed. However, MoDOT may spend its marketing efforts targeting citizens at special risk. If so, any report of the statewide results will underestimate the effectiveness of publicity efforts as the responses from the citizens not being targeted make up a significant portion of the overall measure captured by this research. Finally, the timing of this research makes the current survey methodology a poor instrument for measuring the effectiveness of MoDOT's seat belt safety awareness campaign which last took place in May 2014, approximately 10 months before respondents were surveyed.

Speeding Findings

72.4% of Missouri drivers stated they never or rarely drive more than 35 mph when the speed limit is 30 mph less than the 86.8% of Missouri drivers who stated they never or rarely drive more than 75 mph when the speed limit is 70 mph on local roads. Both findings were similar to those found in 2014.

In 2015, females between 18 to 29 were more likely to speed on roads with speed limits of 30 mph compared to other groups. Women between 30 and 49 and men between 30 and 64 were more likely to speed on roads with speed limits of 70 mph. All age and gender segments were more likely to speed on roads with a 30 mph speed limit than roads with a 70 mph speed limit. In a change from last year, this was not true of motorcyclists. While they remain the group most likely to speed on roads with a speed limit of 70 mph, this year motorcyclists stated they were less likely to speed on roads with speed limits of 30 mph than drivers of other vehicles. It is important to understand that the sample size of motorcyclists is very small, thus there is likely to be greater variation from year to year in this group. In keeping with the findings since 2010, there was no correlation between speeding and any publicity about relevant law enforcement activities; nor was there any correlation between speeding and the respondent's perception of the chance of being caught.

The majority (73.3%) of Missouri drivers were unaware of any recent publicity regarding speed enforcement. This was virtually identical to the findings from the previous two years. Two-thirds (66.6%) of Missouri drivers thought their chances of receiving a ticket if they speed were at least fifty percent. This was also similar to the findings since 2011.

Cell Phone Findings

88.4% of Missouri drivers stated they rarely or never talk on a cell phone while driving. 11.2% of Missourians talk at least half of the time they drive. 99.1% of Missouri drivers stated they rarely or never text on a cell phone while driving. These numbers are statistically identical to the findings from last year.

92.5% of Missouri drivers favored some type of restriction on how people could use cell phones while driving. 29.9% favored banning all cell phone use by drivers, while a majority (62.6%) wanted to ensure drivers could still use cell phones for talking while seeing the need for some restrictions. These results were similar to previous findings and continue a downward trend in the number of people who support a complete ban on cell phone use while driving.

In 2015 women 65 and older were the least likely to drive while talking on a cell phone whereas females from 30 to 49 were the most likely group to talk on a cellular phone while driving. However, at just under 18% (17.9% for women 30 to 39 and 17.8% for women 40 to 49), this is significantly lower than the measures recorded in previous years. Self-reported texting while driving also continued to decline. In 2015, males 40 to 49 were the most likely age/gender segment to text while driving and only 2% of this group said they did so at least 50% of their driving time.

DUI Findings

89.4% of Missouri drivers stated that they had not driven a vehicle within two hours of consuming an alcoholic beverage anytime in the last sixty days. This is similar to last year's findings. 8.1% of Missouri drivers admitted to having done so at least once in the last sixty days. Another 2.5% refused to answer the question.

Heartland Market Research concluded that approximately 10.6% of Missouri drivers have driven under the influence of alcohol in the last sixty days. Considering the margin of error, this is similar to the findings that have been measured most years of this study (11.5% in 2010, 18.7% in 2011, 8.3% in 2012, 12.7% in 2013, and 9.3% in 2014). Out of those who admitted to drinking before driving, the average driver did so about three times in the last sixty days (average of 3.1 times). This is the lowest amount recorded since Heartland became involved with this research in 2010. It compares to an average of 3.6 times in 2014 and 2013, 5.5 times in 2012, 6.2 times in 2011, and an average of 5.2 times in 2010.

Similar to last year, in 2015 males 65 years of age and older were most likely to drive under the influence of alcohol, closely followed by males 40 to 49 years of age. For every age category, women were less likely to drive under the influence of alcohol than males. Motorcyclists and pickup truck drivers were more likely to drive under the influence than drivers of other vehicles. Drivers of other types of trucks, closely followed by van/minivan drivers, were least likely to drive under the influence. Drivers residing in highly urbanized areas were more likely to drive after consuming alcohol than residents of less populated areas. While awareness of DUI enforcement was not correlated with stated behavior, the expectation of being ticketed reduced the likelihood of DUI behavior similar to the results in 2014, 2013, and 2011.

Approximately half (47.2%) of Missouri drivers were aware of recent publicity regarding DUI enforcement. This was similar to the findings of the previous years. The timing of this survey made these results intriguing. Before 2013, this survey has been conducted in the summer (typically in June). In 2013 the survey was conducted in March, in 2014 the survey was conducted in April, and in 2015 the survey was conducted in March. Results were quite consistent despite the variation in timing.

Recommended Improvements for This Research Program

This survey instrument used in this study is remarkably accurate. As detailed within, the self-reported behavior for seat belt usage from this research was compared to an observational study. The difference between the two studies was approximately the combined margin of error of the two efforts. However, while this comparison supports the accuracy of the research methodology, current practice is not well suited for determining the effectiveness of MoDOT's various public safety campaigns. For example, MoDOT conducts most of its "Click It or Ticket" outreach in May compared to offering multiple campaigns about DUI throughout the year. Since the current survey asks about consumer awareness for the last 30 to 60 days, it is not surprising that awareness of DUI enforcement (47.2%) is much higher than awareness of seat belt enforcement (17.5%). Thus in the case of the seat belt enforcement awareness question, the better a person recalls when a campaign was conducted, the more likely the person is to answer no and give the impression that the campaign was ineffective.

Recommendation 1: The three enforcement awareness questions should be reworded to be internally consistent and cover a longer period of time. Specifically, these questions should ask about the last six months instead of the current 60 days for one question and 30 days for two questions. In addition, they questions should be more specific where feasible (e.g., instead of simply asking about seat belt law enforcement, include “Click It or Ticket” in the question).

The three awareness questions cover seat belt enforcement, speeding enforcement, and DUI enforcement. Chronologically, MoDOT uses two different tactics to publicize seat belt enforcement and DUI enforcement. MoDOT currently makes an annual effort to publicize “Click It or Ticket” in May for seat belt enforcement compared with several campaigns throughout the year for DUI enforcement (“Drive Sober or Get Pulled Over” in March and August/September along with the “Choose Your Ride” in November/December).

Recommendation 2: Ideally, MoDOT split the current sample size into thirds and conduct the survey three times throughout the year (e.g., February, June, and October). The cost of conducting three smaller surveys would be similar to one larger survey and this would also allow MoDOT to track awareness of the three enforcement efforts throughout the year. Alternatively, MoDOT could keep the survey as an annual survey, but move it to June.

Other Recommendations for MoDOT

Recommendation 3: MoDOT spends a large portion of their seat belt enforcement money on campaigns aimed at teenagers under 18. While this survey does an excellent job of measuring current attitudes and behaviors of adult drivers, it is not designed for – and specifically excludes – teenagers under 18. MoDOT may wish to commission a survey to measure the effectiveness of seat belt enforcement efforts aimed at this age group.

Recommendation 4: In the six years Heartland has been conducting this survey, public awareness of DUI enforcement campaigns has been much higher – often more than double – than public awareness of seat belt enforcement. Even when the survey was being asked in June, there was a very large difference. While other factors probably also influence this difference, it suggests that the tactic of publicizing enforcement activities multiple times a year is more effective than an annual effort. MoDOT should evaluate the feasibility of publicizing seat belt enforcement campaigns three times a year similar to the DUI enforcement campaigns.

Introduction

The Missouri Department of Transportation (MoDOT) desired to know more regarding attitudes and awareness concerning impaired driving, seat belt use, and speeding from Missouri adults. Following standard practice, MoDOT requested bids from qualified research organizations by posting a request for proposals on their public website. Heartland Market Research LLC was selected from this competitive process as having the best research proposal and was awarded the research contract. The research was conducted during March 2015 using a phone survey instrument.

Objective

The primary objective of this research project was to survey adult Missouri drivers to capture their current attitudes and awareness of specific items concerning highway safety such as seat belt usage, speeding, cell phone use while driving, and alcohol impaired driving while minimizing the margin of error. The research was designed so that in addition to providing a statewide result, statistically useful information was also available at the district level. Special emphasis was placed on ensuring that the sample reflected Missouri's geographic, age, and gender diversity.

Technical Approach

The survey questions were provided by MoDOT and were similar to the questions used in the 2010 and 2011 Highway Safety studies and identical to the questions asked in 2012, 2013, and 2014. In 2012 additional questions were added pertaining to cell phone and texting usage while driving and these were also employed in 2013, 2014, and 2015.

Starting on March 9 and ending on March 29, 2015, Quancor Virtual Sales and Marketing (QVSM) placed 139,473 calls in the State of Missouri. During this process, they reached 5,369 persons, of whom 2,502 completed the survey. The operators were instructed to mention MoDOT only if the respondent asked who had commissioned the survey. A copy of the operator script appears in Appendix B.

Special efforts were made to make the phone survey as representative as possible, especially in terms of the research objectives (geographic, gender, and age). People were surveyed from 113 counties as well as the independent city of St. Louis. Residents from 620 different zip codes are represented. The typical phone survey practice of alternatively asking for either the oldest or youngest adult was not employed. Instead, the calling center was given specific goals for each age group and gender within various geographic areas to ensure the most representative sample possible within the constraints of the project.

The survey results were weighted proportionally to the actual population in terms of geographic, gender, and age distributions. Information from 2010 Census was used for this purpose as this was the most recent complete information available. The weighted results from the three previous phone surveys are also shown for comparative purposes and this information was taken from the 2012 Highway Safety Driver Survey report. All years compared utilized the exact same weights from the 2010 Census.

Results and Discussion (Evaluation)

In surveying, it is usually not reasonable to survey everyone in the population of interest. Therefore, a portion of the population is surveyed and this portion is called the sample. Since the sample is usually much smaller than the population of interest, the mean of the population may vary from the mean of the sample. The expected error depends upon the size of the sample and the desired level of confidence. As the sample size increases, the margin of error decreases. The general formula for computing the margin of error at the 95% level of confidence is .98 divided by the square root of the sample size. The following table shows the margin of error for the most recent Highway Safety surveys.

Table 1: Survey Margin of Error

	2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
Responses	3,010	1,207	2,616	2,510	2,513	2,502
Margin of Error	1.79%	2.82%	1.92%	1.96%	1.95%	1.96%

Thus with an overall sample size of 2,502 we can be 95% certain that the sample mean is within 1.96% of the population mean. Thus if 17.48% of our sample is aware of any recent publicity concerning seat belt law enforcement, we can be 95% certain that between 15.5% and 19.4% of the adult driving population in Missouri would actually be aware of any recent publicity. These statistics assume honest answers by the respondents. Research has shown that people tend to answer surveys honestly unless the answer is perceived to have an appropriate answer. For example, most people believe that wearing seatbelts is the socially correct thing to do, so the answer to the seat belt question may be slightly inflated. Likewise, most people believe that driving under the influence of alcohol is socially incorrect, so the answers to these questions may be slightly deflated. In these cases, the most important factor is to look for statistically significant changes from year to year.

The results from the previous four surveys are provided along with this year's survey so that changes over time may also be reviewed. When comparing surveys, the margins of error are cumulative. Therefore, we can be 95% confident there has been a significant change in the attitudes of Missourian from 2014 to 2015 if the survey results differ by more than 3.91%.

The statewide results have been weighted proportionally to the actual population in terms of geographic, gender, and age distributions.

Readers should not use this research to draw conclusions about the behavior of those who primarily drove motorcycles. While the sample size is quite adequate for drivers of other vehicles, only eight respondents stated that their primary vehicle was a motorcycle. This is to be expected in a survey that represents the general public given that only a small percentage of the US population rides motorcycles. Further, out of the entire population of motorcycle riders, many of them may have another vehicle they drive more often than their bike.

Seat Belt Usage

Depending upon their opinions, respondents answered five to six questions pertaining to their behavior and thoughts concerning seat belts.

Question 1: *How often do you use seat belts when you drive or ride in a car, van, sport utility vehicle or pick up?*

In 2015, 83.1% of Missouri drivers claimed to always use their seat belts, statistically identical to the results from the previous four years. This is slightly higher than the 75% average observed seat belt use Pickrell and Ye (2008) documented for states with secondary enforcement laws. It is also remarkably close to the 78.8% observed rate for Missouri in an extensive study commissioned by MoDOT for the period from June 2 to June 15 2014. The 2014 study was based on total of 90,015 vehicles and 117,297 vehicle occupants observed across twenty roadway segments in each of 28 survey counties for a total of 560 observed sites. The margin of error for the observed studies was 2.5% so the combined margin of error of the two studies was about 4.5%. In other words, the difference between the two studies is about the expected margin of error. The fact that the 2014 observed seatbelt rate and the self-reported rates from 2010 to 2015 are so close shows the reliability of the self-report method – at least when it comes to reporting seat-belt usage.

Table 2: Statewide Seatbelt Usage

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
How often do you use seat belts when you drive or ride in a car, van, sport utility vehicle, or pick up?	Always	82.0%	84.1%	84.2%	82.7%	84.6%	83.1%
	Most of the time	9.2%	7.7%	8.6%	9.6%	9.7%	9.6%
	Half of the time	3.2%	3.4%	3.0%	2.9%	1.8%	2.7%
	Rarely	2.4%	2.6%	1.9%	2.5%	1.7%	2.1%
	Never	3.1%	2.1%	2.1%	2.1%	2.2%	2.4%
	Refused	0.1%	0.1%	0.2%	0.2%	0.1%	0.2%

Similar to other years, males were less likely to wear seat belts than females in 2015. Those least likely to wear seat belts when driving or riding in a car, van, sport utility vehicle, or pick up were males of at least 50 years of age who primarily drove either a motorcycle or a pick up. Those who lived in areas classified as relatively urbanized were most likely to wear their seat belts whereas those who lived in either very rural location or in very urban areas such as St. Louis were less likely to wear seat belts.

In 2014 those least likely to wear seat belts were males, 50 years of age and older, whose primary vehicle was a pickup truck. Similar to previous findings, those who were the least likely to wear seat belts were also the least likely to believe that people would receive a ticket if they did not wear their seat belt. Also similar to previous years, those who lived in very rural areas were also less likely to always buckle up than those living in other communities.

In 2013 those least likely to wear seat belts were males, between the ages of 18 and 29, whose primary vehicle was a pickup truck or other type of truck. As was also the case last year, those who were the least likely to wear seat belts were the most likely to be aware of seat belt enforcement publicity, but were the least likely to believe that people would receive a ticket if they did not wear their seat belt. Also similar to last year, those who lived in very rural areas were also less likely to always buckle up than those living in other communities.

In 2012 those least likely to wear seat belts were males, between the ages of 50 and 64, whose primary vehicle was a pickup truck or a motorcycle. In 2012 those who were the least likely to wear seat belts were the most likely to be aware of seat belt enforcement publicity, but were also the least likely to believe that people would receive a ticket if they did not wear their seat belt. This was a change from the findings from the previous two years. Those who lived in very rural areas were also less likely to buckle up than those living in other communities.

In 2011 the results were similar with one major difference. While those least likely to wear seat belts were still males between the ages of 30 and 64 who drive a pickup truck, those who drove some other type of truck wear their seat belts “always” or “most of the time”. In 2011, there was no correlation between seat belt usage and any publicity about law enforcement activities. While smaller than the 2010 impact, those with a higher expectation of receiving a ticket if they did not wear their seat belt were more likely to wear one.

In 2010 those least likely to wear seat belts were males, between the ages of 30 and 64, who drove some type of truck (e.g, either a pickup truck or “other type of truck”). There was no correlation between seat belt usage and any publicity about law enforcement activities; however, those more likely to think they would receive a ticket for not wearing a seat belt were more likely to comply with the law.

Question 2: *Do you favor keeping Missouri's seat belt law as a "secondary law"—where you can only be pulled over or ticketed if you are observed committing another violation; or do you favor changing Missouri's seat belt law to a "primary law"—where you can be pulled over or ticketed if the officer clearly observes you are not wearing your seat belt?*

A majority (54.6%) of the respondents prefer to keep Missouri's seat belt law a secondary law, similar to the findings from recent years.

Table 3: Secondary vs. Primary Law

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
Do you favor keeping Missouri's seat belt law as a "secondary law" - where you can only be pulled over or ticketed if you are observed committing another violation; or do you favor changing Missouri's seat belt law to a "primary law" - where you can be pulled over or ticketed if the officer clearly observes you are not wearing your seat belt?	Keep "secondary law"	54.7%	51.4%	51.0%	52.5%	57.0%	54.6%
	Change to "primary law"	41.1%	38.5%	41.2%	36.7%	36.1%	39.0%
	No Opinion/ Refused	4.2%	10.0%	7.8%	10.8%	6.8%	6.5%

Question 3: *Currently, the fine for violating Missouri's seat belt law is \$10. Would you support an increase in the fine associated with this violation?*

A slight majority (51.6%) preferred to leave the penalty for violating the law unchanged. All responses were statistically identical to those from the previous year.

Table 4: Statewide Support for Increasing Fine for Violating Seat Belt Law

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
Currently, the fine for violating Missouri's seat belt law is \$10. Would you support an increase in the fine associated with this violation?	Yes	46.6%	45.8%	43.7%	44.3%	45.3%	45.9%
	No	51.7%	50.1%	52.9%	51.9%	51.2%	51.6%
	No Opinion / Refused	1.8%	4.1%	3.4%	3.8%	3.5%	2.5%

Question 3b: *In your opinion, what should the fine associated with violating Missouri's seat belt law be?*

Question 3b was only asked of 1,079 respondents who supported an increase in the fine associated with not wearing a seatbelt (Question 3). Since the number of respondents for this question is smaller than for the other questions, the margin of error is slightly larger (3.0%).

Out of the minority who favored increasing the fine, a plurality (44.0%) thought the fine should range from \$25 to \$49. The second largest group (20.0%) thought the fine should range from \$50 to \$74. These were also the two largest groups the last five years out of the minority who wished to increase the fine.

Table 5: Respondent Input on Increasing Fine

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
In your opinion, what should the fine associated with violating Missouri's seat belt law be?	Under \$25	14.1%	17.0%	14.5%	17.3%	15.7%	17.3%
	\$25 to \$49	38.8%	31.0%	35.6%	36.5%	35.6%	44.0%
	\$50 to \$74	25.9%	21.6%	24.5%	22.9%	23.4%	20.0%
	\$75 to \$100	12.9%	16.1%	13.6%	12.2%	14.0%	10.9%
	Over \$100	6.7%	11.8%	8.9%	8.7%	9.3%	6.2%
	No Opinion/Refused	1.6%	2.5%	2.9%	2.4%	2.0%	1.6%
	Margin of Error	2.7%	4.5%	3.0%	3.0%	3.0%	3.0%

Question 4: *In the past 60 days, have you read, seen or heard anything about seat belt law enforcement by police?*

The vast majority of the respondents (82.4%) were not aware of any publicity concerning seat belt law enforcement. While statistically similar to the previous year, this continued a downward trend in awareness since 2010. There may be several reasons for this trend. First of all, people have many more options for their free time, making it much more difficult to reach them. People have access to more video and audio options than ever before, many of which are now available directly over the internet making local advertising very challenging. Secondly, this research measures the statewide perception on the issues being discussed. However, MoDOT may spend its marketing efforts targeting citizens at special risk. If so, any report of the statewide results will underestimate the effectiveness of publicity efforts as the responses from the citizens not being targeted make up a significant portion of the overall measure for this research.

Table 6: Seat Belt Law Enforcement Publicity Awareness

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
In the past 60 days, have you read, seen, or heard anything about seat belt law enforcement by police?	Yes	31.7%	29.0%	26.5%	20.9%	17.7%	17.5%
	No	68.1%	70.3%	73.2%	78.7%	81.5%	82.4%
	No Opinion / Refused	0.2%	0.7%	0.2%	0.4%	0.8%	0.1%

Question 5: *What do you think the chances are of getting a ticket if you don't wear your safety belt?*

Opinions varied greatly on this issue, but a plurality (35.1%) thought people who did not wear their seat belt would only rarely get a ticket. 47.6% of the respondents thought people would be caught at least half of the time.

The number of people who thought someone would always get a ticket for not wearing a seatbelt was similar to the findings since 2012.

Table 7: Perceived Chance of Obtaining Ticket for Violating Seat Belt Laws

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
What do you think the chances are of getting a ticket if you don't wear your seat belt?	Always	12.4%	7.6%	12.9%	12.4%	10.6%	13.6%
	Most of the time	16.2%	15.0%	15.1%	15.9%	15.9%	15.3%
	Half of the time	21.4%	20.5%	19.7%	16.5%	20.5%	18.7%
	Rarely	37.4%	40.8%	36.4%	35.2%	36.3%	35.1%
	Never	10.0%	7.1%	8.5%	10.5%	10.0%	9.9%
	No Opinion/Refused	2.6%	9.0%	7.4%	9.6%	6.7%	7.4%

Speeding Issues

Missouri drivers answered four questions concerning speeding.

Question 6: *On a local road with a speed limit of 30 mph, how often do you drive faster than 35 mph?*

72.4% of Missouri drivers stated they never or rarely drive more than 35 mph when the speed limit is 30 mph, similar to the findings from recent years.

Table 8: Speeding in 30 MPH Zones

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
On a local road with a speed limit of 30 mph, how often do you travel faster than 35 mph?	Always	4.3%	4.2%	4.2%	3.9%	3.3%	2.5%
	Most of the time	9.8%	8.0%	9.5%	10.5%	10.8%	10.4%
	Half of the time	13.0%	15.1%	14.9%	12.4%	12.7%	13.3%
	Rarely	44.7%	43.8%	39.0%	39.5%	48.3%	44.7%
	Never	27.7%	28.2%	31.2%	32.3%	24.4%	27.6%
	Refused	0.5%	0.7%	1.3%	1.4%	0.5%	1.4%

Question 7: *On a local road with a speed limit of 70 mph, how often do you drive faster than 75 mph?*

86.8% of Missouri drivers stated they never or rarely drive more than 75 mph when the speed limit is 70 mph on local roads.

Table 9: Speeding in 70 MPH Zones

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
On a local road with a speed limit of 70 mph, how often do you driver faster than 75 mph?	Always	2.6%	1.8%	2.2%	1.9%	1.3%	1.6%
	Most of the time	3.5%	3.4%	4.0%	4.0%	3.7%	4.4%
	Half of the time	7.2%	9.6%	8.5%	5.9%	6.5%	6.9%
	Rarely	32.3%	38.0%	32.7%	31.2%	39.2%	37.6%
	Never	54.2%	46.2%	51.7%	56.4%	48.9%	49.1%
	Refused	0.2%	1.0%	0.9%	0.6%	0.3%	0.3%

In 2015, females between 18 to 29 were more likely to speed on roads with speed limits of 30 mph compared to other groups. Women between 30 and 49 and men between 30 and 64 were more likely to speed on roads with speed limits of 70 mph. All age and gender segments were more likely to speed on roads with a 30 mph speed limit than roads with a 70 mph speed limit. In a change from last year, this was not true of motorcyclists. While they remain the group most likely to speed on roads with a speed limit of 70 mph, this year motorcyclists stated they were less likely to speed on roads with speed limits of 30 mph than drivers of other vehicles. It is important to understand that the sample size of motorcyclists is very small, thus there is likely to be greater variation from year to year in this group. In keeping with the findings since 2010, there was no correlation between speeding and any publicity about relevant law enforcement activities; nor was there any correlation between speeding and the respondent's perception of the chance of being caught.

In 2014, men between 40 to 49 years of age were more likely to speed than other groups on local roads with speed limits of 30 mph while men 30 to 39 were more likely to speed on faster roads with speed limits of 70 mph. Similar to last year, women 65 and older were the least likely to speed under both 30 and 70 mph limits. Also similar to last year, all segments were more likely to speed on local roads with a speed limit of 30 mph than on local roads with speed limits of 70 mph. Motorcyclists continue to be the most prevalent speeders on roads with speed limits of 30 mph and this year reported being the most likely to speed on roads with speed limits of 70 miles per hour. In keeping with the findings since 2010, there was no correlation between speeding and any publicity about relevant law enforcement activities; nor was there any correlation between speeding and the respondent's perception of the chance of being caught.

In 2013, women between 30 to 39 years of age were more likely to speed than other groups on both local roads with speed limits of 30 mph and faster roads with speed limits of 70 mph. Similar to last year, women 65 and older were the least likely to speed under both 30 and 70 mph limits. Motorcyclists continue to be the most prevalent speeders on roads with speed limits of 30 mph. As has been the case in the past, truck (non-pickup) drivers were the least likely to speed on roads with speed limits of 30 mph, but the most likely to speed on local roads with speed limits of 70 mph. There was no correlation between speeding and any publicity about relevant law enforcement activities; nor was there any correlation between speeding and the respondent's perception of the chance of being caught.

In 2012, people between 18 to 29 years of age and males 40 to 49 years of age were most likely to speed on local roads with a speed limit of 30 mph. On roads with speed limits of 70 mph, males between 18 to 49 and females between 30 to 39 were more likely to speed than other groups. Women 65 and older were the least likely to speed under both 30 and 70 mph limits. All segments were more likely to speed on local roads with a speed limit of 30 mph than on local roads with speed limits of 70 mph. Motorcyclists and drivers of other types of trucks (not pickups) were the outlying cases for speeding, but their behavior was the inverse of each other. Motorcyclists said they were the most likely to speed on local roads with speed limits of 30 mph, but the least likely to speed on roads where the speed limit was 70 mph. Truck (non-pickup) drivers were the least likely to speed on roads with speed limits of 30 mph, but the most likely to speed on local roads with speed limits of 70 mph. As was the case in the last two years, there was no correlation between awareness of speed enforcement by police and speeding behavior nor between speeding and the respondent's perception of the chance of being caught.

In 2011 the results were similar but varied slightly. Those most likely to speed were anyone between 18 to 29, males 40 to 49, and females 65 and older. Those who stated they drove an “other type of truck” were more likely to speed than drivers of other vehicles followed by motorcyclists. Just like 2010, there was no correlation between speeding and any publicity about relevant law enforcement activities; nor was there any correlation between speeding and the respondent’s perception of the chance of being caught.

In 2010 those most likely to speed were either males between 18 to 29 years of age or females between 40 to 49 years of age. Motorcycle drivers were much more likely to speed than other drivers, followed by those who stated they drove an “other type of truck” (i.e., a truck that was neither a pickup truck, a SUV, nor a crossover). There was no correlation between speeding and any publicity about relevant law enforcement activities; nor was there any correlation between speeding and the respondent’s perception of the chance of being caught.

Question 8: *In the past 30 days, have you read, seen or heard anything about speed enforcement by police?*

The majority (73.3%) of Missouri drivers were unaware of any recent publicity regarding speed enforcement. This was virtually identical to the findings from last year.

Table 10: Speeding Enforcement Publicity Awareness

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
In the past 30 days, have you read, seen or heard anything about speed enforcement by police?	Yes	37.4%	31.4%	34.6%	28.0%	28.1%	26.2%
	No	62.4%	67.9%	65.0%	71.6%	71.5%	73.3%
	No Opinion / Refused	0.2%	0.7%	0.4%	0.4%	0.5%	0.4%

Question 9: *What do you think the chances are of getting a ticket if you drive over the speed limit?*

Two-thirds (66.6%) of Missouri drivers thought their chances of receiving a ticket if they speed were at least fifty percent. This was also similar to the findings since 2011.

Table 11: Perceived Chance of Obtaining Ticket for Speeding

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
What do you think the chances are of getting a ticket if you drive over the speed limit?	Always	11.3%	8.5%	10.2%	9.9%	7.3%	8.1%
	Most of the time	27.4%	26.4%	26.3%	27.3%	27.5%	22.9%
	Half of the time	35.3%	32.8%	30.9%	31.4%	35.6%	35.6%
	Rarely	21.4%	24.2%	26.3%	23.0%	25.1%	27.1%
	Never	3.4%	4.5%	3.6%	4.3%	2.8%	3.6%
	No Opinion/Refused	1.3%	3.5%	2.7%	4.1%	1.6%	2.7%

Cell Phone Use While Driving

Respondents were asked three questions about cell phone use while driving. The first two questions were added in 2012.

Question 10: *How often do you talk on a hand-held cellular phone while driving a car, van, sport utility vehicle, or pick-up?*

88.4% of Missouri drivers stated they rarely or never talk on a cell phone while driving. 11.2% of Missourians talk at least half of the time they drive.

Table 12: Frequency of Talking while Driving

		2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
How often do you talk on a hand-held cellular phone while driving a car, van, sport utility vehicle, or pick-up?	Always	1.0%	1.0%	0.7%	0.7%
	Most of the Time	2.6%	3.5%	1.8%	2.2%
	Half of the Time	9.8%	8.1%	9.7%	8.4%
	Rarely	44.4%	39.0%	44.0%	43.4%
	Never	41.8%	47.9%	43.5%	45.0%
	No Opinion/Refused	0.3%	0.5%	0.5%	0.4%

Question 11: *How often do you use a hand-held cellular phone for texting while driving a car, van, sport utility vehicle, or pick-up?*

99.1% of Missouri drivers stated they rarely or never text on a cell phone while driving.

Table 13: Frequency of Texting while Driving

		2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
How often do you use a hand-held cellular phone for texting while driving a car, van, sport utility vehicle, or pick-up?	Always	0.4%	0.0%	0.1%	0.1%
	Most of the Time	0.4%	0.2%	0.1%	0.1%
	Half of the Time	1.5%	0.8%	0.5%	0.5%
	Rarely	11.0%	7.6%	9.6%	8.9%
	Never	86.3%	91.2%	89.1%	90.3%
	No Opinion/Refused	0.4%	0.3%	0.6%	0.2%

Question 12: *Many states have passed laws which restrict or ban cellular phone use, including texting, while driving. What level of restrictions would you support regarding cellular phone usage while driving?*

92.5% of Missouri drivers favored some type of restriction on how people could use cell phones while driving. 29.9% favored banning all cell phone use by drivers, while a majority (62.6%) wanted to ensure drivers could still use cell phones for talking while seeing the need for some restrictions. These results were similar to previous findings.

Table 14: Statewide Opinions Regarding Cell Phone Restrictions

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
Many states have passed laws which restrict or ban cellular phone use, including texting, while driving. What level of restrictions would you support regarding cellular phone usage while driving?	Full Restrictions - No Cellular Phone Use Allowed	39.3%	34.2%	34.0%	28.9%	32.5%	29.9%
	Ban on Texting While Driving, Phone Use Allowed	24.7%	30.8%	22.8%	21.2%	18.8%	17.9%
	Ban on Texting While Driving, Hands-Free Phone Device Allowed	20.1%	16.4%	16.8%	14.2%	19.1%	17.0%
	Hands-Free Phone Device Use Only	12.8%	14.0%	19.7%	26.8%	23.2%	27.7%
	No Restrictions	2.4%	3.6%	4.4%	5.6%	3.8%	4.4%
	No Opinion / Refused	0.7%	1.0%	2.4%	3.1%	2.5%	3.1%

In 2015 women 65 and older were the least likely to drive while talking on a cell phone whereas females from 30 to 49 were the most likely group to talk on a cellular phone while driving. However, at just under 18% (17.9% for women 30 to 39 and 17.8% for women 40 to 49), this is significantly lower than the measures recorded in previous years. Self-reported texting while driving also continued to decline. In 2015, males 40 to 49 were the most likely age/gender segment to text while driving and only 2% of this group said they did so at least 50% of their driving time.

In 2014 men 65 and older were the least likely to talk on a cell phone while driving. As has been the case since this question was first asked, females between 30 to 39 were the most likely group to talk on a cell phone while driving with 22.3% of this segment stating they do so fifty percent of the time or more.

In 2013 women 65 and older were the least likely to talk on a cell phone while driving. Females between 30 to 39 continue to be the most likely group to talk on a cell phone while driving with 24.3% of this segment stating they do so fifty percent of the time or more. This segment was also most likely to text while driving, but only 3.4% texted at least half the time they were driving.

In 2012 females between 30 to 39 years of age were much more likely to talk on a cell phone while driving than other groups with 27.8% of this segment stating that they do so at least half of the time they are driving. People between 18 to 29 were more likely to text while driving than other segments, but only about 4% of this segment texted at least half the time they were driving.

Alcohol Impaired Driving

Missouri drivers were asked three questions regarding alcohol impaired driving. When these questions were first asked in 2010, the researchers were concerned that people might not answer these questions honestly considering the legal and ethical implications of driving under the influence. However, the survey operators had the consistent impression that people were either answering these questions honestly or simply refusing to answer the question. The same calling center has been used since the 2010 survey and the call center operators have had similar impressions every year they have conducted the surveys.

Question 13: *In the past 60 days, how many times have you driven a motor vehicle within two (2) hours after drinking alcoholic beverages?*

89.4% of Missouri drivers stated that they had not driven a vehicle within two hours of consuming an alcoholic beverage anytime in the last sixty days. This is similar to last year's findings. 8.1% of Missouri drivers admitted to having done so at least once in the last sixty days. Another 2.5% refused to answer the question.

Researchers usually hesitate to draw conclusions from refusals, but after considering the implications for self-incrimination and the impressions of the survey operators, Heartland Market Research concluded that approximately 10.6% of Missouri drivers have driven under the influence of alcohol in the last sixty days. Considering the margin of error, this is similar to the findings that have been measured most years of this study (11.5% in 2010, 18.7% in 2011, 8.3% in 2012, 12.7% in 2013, and 9.3% in 2014).

Out of those who admitted to drinking before driving, the average driver did so about three times in the last sixty days (average of 3.1 times). This is the lowest amount recorded since Heartland became involved with this research in 2010. It compares to an average of 3.6 times in 2014 and 2013, 5.5 times in 2012, 6.2 times in 2011, and an average of 5.2 times in 2010.

Table 15: Statewide Drinking Behavior before Driving

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
In the past 60 days, how many times have you driven a vehicle within two (2) hours after drinking alcoholic beverages?	0	88.20%	81.30%	91.70%	87.30%	90.71%	89.41%
	1	3.20%	4.60%	2.50%	2.20%	2.57%	2.68%
	2	3.00%	1.80%	2.10%	2.60%	2.18%	2.49%
	3	0.80%	1.10%	0.40%	0.70%	0.62%	0.89%
	4	0.60%	2.20%	0.30%	0.60%	0.36%	0.75%

	16	0.00%	0.00%	0.00%	0.00%	0.00%	0.10%
	20	0.10%	0.00%	0.00%	0.00%	0.03%	0.14%
	24	0.10%	0.00%	0.00%	0.00%	0.00%	0.00%
	25	0.00%	0.00%	0.00%	0.10%	0.01%	0.00%
	30	0.10%	0.40%	0.00%	0.00%	0.00%	0.02%
	60	0.20%	0.10%	0.30%	0.10%	0.09%	0.00%
	Refused	2.20%	7.30%	1.50%	5.50%	2.58%	2.52%

Similar to last year, in 2015 males 65 years of age and older were most likely to drive under the influence of alcohol, closely followed by males 40 to 49 years of age. For every age category, women were less likely to drive under the influence of alcohol than males. Motorcyclists and pickup truck drivers were more likely to drive under the influence than drivers of other vehicles. Drivers of other types of trucks, closely followed by van/minivan drivers, were least likely to drive under the influence. Drivers residing in highly urbanized areas were more likely to drive after consuming alcohol than residents of less populated areas. While awareness of DUI enforcement was not correlated with stated behavior, the expectation of being ticketed reduced the likelihood of DUI behavior similar to the results in 2014, 2013, and 2011.

In 2014 those most likely to drive under the influence of alcohol were males of 65 years of age and older. Men were much more likely to drive after drinking than women. As was the case for the two previous years, men 18 to 29 stated they drove after drinking less than the other male segments, but this group was still more likely to drive under the influence than women 18 to 29 (the female age range most likely to drink and drive). Drivers of motorcycles were more likely to drive under the influence than drivers of other vehicles followed by drivers of pickup trucks. Drivers of vans or minivans were the least likely to drive after drinking. Those who lived in highly urbanized areas were most likely to drive under the influence of alcohol compared to residents of other areas. While awareness of DUI enforcement was not correlated with stated behavior, the expectation of being ticketed reduced the likelihood of DUI behavior similar to the results in 2013 and 2011.

In 2013 those most likely to drive under the influence of alcohol were males 50 to 64 years of age and older. Men were much more likely to drive after drinking than women. As was the case in 2012, men 18 to 29 stated they drove after drinking less than the other male segments, but this group was still more likely to drive under the influence than women 30 to 39 (the female age range most likely to drive and drive). Drivers of pickup trucks were more likely to drive under the influence than drivers of other vehicles followed by drivers of SUVs/crossovers. In a change from the previous year, drivers of other types of truck were the least likely to drive after drinking. While awareness of DUI enforcement was not correlated with stated behavior, the expectation of being ticketed reduced the likelihood of driving under the influence.

In 2012 those most likely to drive under the influence of alcohol were males 40 years of age and older. Men were much more likely to drive after drinking than women. Men 18 to 29 stated they drove after drinking less than the other male segments, but this group was still more likely to drive under the influence than women 30 to 39 (the female age range most likely to drive and drive). Drivers of motorcycles, SUVs, and all types of trucks were more likely to drive under the influence than drivers of other vehicles. Neither awareness of DUI enforcement nor expectations of being ticketed was correlated with drinking and driving behavior.

In 2011 those most likely to drive under the influence of alcohol were again males between 50 to 64 years of age. Males 18 to 29 and females 30 to 39 were also more likely to drive under the influence than other segments. Similar to 2010, neither motorcyclists nor drivers of “other type of truck” stated they had consumed alcohol within two hours of driving, but this year some of the motorcyclists refused to answer the question. While awareness of DUI enforcement was not correlated with stated behavior, in 2011 the expectation of being ticketed reduced the likelihood of driving under the influence.

In 2010 those most likely to drive under the influence of alcohol were males between 50 to 64 years of age. Unlike other risky behavior measured in this survey, drivers of motorcycles and those who stated they drove an “other type of truck” were the least likely to drink before driving. According to the research, not a single motorcycle driver or “other” truck driver stated they had consumed alcohol within two hours of driving.

Question 14: *In the past 30 days, have you read, seen or heard anything about alcohol impaired driving (or drunk driving) enforcement by police?*

Approximately half (47.2%) of Missouri drivers were aware of recent publicity regarding DUI enforcement. This was similar to the findings of the previous years. The timing of this survey made these results intriguing. Before 2013, this survey has been conducted in the summer (typically in June). In 2013 the survey was conducted in March, in 2014 the survey was conducted in April, and in 2015 the survey was conducted in March. Results were quite consistent despite the variation in timing.

Table 16: DUI Enforcement Publicity Awareness

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
In the past 30 days, have you read, seen or heard anything about alcohol impaired driving (or drunk driving) enforcement by police?	Yes	54.9%	48.4%	49.9%	52.0%	50.6%	47.2%
	No	44.8%	50.6%	49.3%	47.1%	48.8%	52.1%
	No Opinion / Refused	0.3%	1.0%	0.8%	0.9%	0.5%	0.7%

Question 15: *What do you think the chances are of someone getting arrested if they drive after drinking?*

69.0% of the respondents expected people who drove after drinking would be arrested at least half of the time, statistically identical to that of the previous measurements.

Table 17: Perceived Chance of Arrest after DUI

		2010 Phone Survey	2011 Phone Survey	2012 Phone Survey	2013 Phone Survey	2014 Phone Survey	2015 Phone Survey
What do you think the chances are of someone getting arrested if they drive after drinking?	Always	16.6%	14.1%	16.9%	17.4%	13.0%	13.4%
	Most of the time	21.5%	22.9%	21.9%	24.3%	23.4%	21.3%
	Half of the time	34.2%	32.1%	32.5%	30.5%	34.4%	34.3%
	Rarely	24.6%	27.4%	24.4%	23.0%	25.8%	26.6%
	Never	1.2%	0.7%	1.7%	0.7%	0.8%	1.1%
	No Opinion/Refused	2.0%	2.8%	2.7%	4.1%	2.6%	3.4%

Principal Investigator and Project Members

Heartland Market Research LLC

Gentry, Lance	<p>Principal Investigator: The Principal Investigator (PI) had the primary responsibility for achieving the objectives of the project, while also ensuring the project complied with the financial, administrative, and legal constraints associated with the project contract. General responsibilities of the PI included the following:</p> <ul style="list-style-type: none"> • Complete the project as documented in the contract (e.g., weight and analyze results, write reports, manage subcontractor, etc.) or make changes to the plan as needed to ensure all work is completed in accordance with the research goals and objectives within the original proposal • Fulfill the project's financial plan as presented in the funded proposal or make changes to the plan as needed to ensure all work is completed within the original budget • Report project progress to MoDOT to ensure sponsor is kept aware of key activities and benchmarks • Keep records of all project related expenses
---------------	---

Quancor Virtual Sales and Marketing

Korn, Marie	President and CEO: Responsible for overall operations of the company. On this project she helped program caller scripts and ensured that QVSM's Operations staff had all the tools they need to complete all jobs and exceed the project goals.
Korn, Steve	Vice-President of Sales: Responsible for ensuring how QVSM's telemarketing merges in with the rest of QVSM's clients' marketing efforts to achieve their sales and marketing goals. Duties also included contacting Heartland Market Research about any issues regarding this project and was day-to-day contact regarding the progress of survey.
Bitter, Tammy	Operations Manager: Responsible for the day-to-day operations for QVSM.
Doddy, Terry	Traffic Manager: Ensured survey calls were run at the best times to maximize their results. This included watching what days agents called, what times of day they run and which agents made the calls.
Ying, Darral	Quality Manager: Responsible for QVSM's Quality Assurance staff.

2014 Statewide Safety Belt Survey conducted June 2 – June 15, 2014 for MoDOT

Appendix A: Work Plan

Given the objectives of this project, Heartland proposed a phone survey of Missouri drivers. MoDOT notified Heartland that their proposal was the best of those submitted on February 25 and provided a contract to Heartland on February 27. Heartland immediately notified Quancor Virtual Sales and Marketing (QVSM) that the project was underway.

After Heartland received the contract from MoDOT, Quancor Virtual Sales and Marketing immediately started programming the final version of the survey into their call center system. Next their callers and their management team were trained on the new scripts. Each caller was thoroughly tested on the scripts before they were permitted to make any live calls.

Quancor Virtual Sales and Marketing started surveying people on March 9, 2015. All survey answers were recorded and stored for 30 days in case MoDOT wanted to review any of the phone interviews. Quancor Virtual Sales and Marketing delivered 2,502 completed surveys to Heartland on March 31, 2015. Heartland organized the data and provided top line (unweighted) results to MoDOT on April 1, 2015. Heartland analyzed the data and wrote a draft report for MoDOT. In accordance with MoDOT guidelines, the report was written using their Research Report Template to ensure a consistent format with other technical reports.

Heartland provided MoDOT with an initial report on April 24, 2015. MoDOT reviewed the document and provide feedback on the report to Heartland on May 5. Heartland then delivered the final report to MoDOT on May 5.

Table 18: Timeline for 2015 Surveys

Schedule of Events	Completion
MoDOT awarded the contract to Heartland	February 27
QVSM programs survey into call center system and tests program	March 6
QVSM conducts regional stratified survey starting March 9	March 31
QVSM provides all data to Heartland	March 31
Heartland provides top line results to MoDOT	April 1
Heartland analyzes data and provides draft report to MoDOT	April 24
MoDOT provides Heartland with feedback on draft report	May 5
Heartland completes final report and provides to MoDOT	May 5

Appendix B: Survey Script

Phone Survey Script

Hello, this is (RepName) calling on behalf of Heartland Market Research. We are conducting a brief survey about transportation issues facing people in Missouri. We are not selling anything, this number was selected at random, and no personal information will be gathered. This means your answers will be completely anonymous – we are just interested in the overall opinion of Missouri drivers.

- a. Are you a licensed Missouri driver?
 - a. Yes
 - b. No [end interview]
- b. What is your age?
 - a. 18-29 years old
 - b. 30-39 years old
 - c. 40-49 years old
 - d. 50-64 years old
 - e. 65+ years old

[If the respondent is under 18 years old, ask respondent if anyone over the age of 18 is available, if not, end interview]
- c. Are you male or female?
 - a. Male
 - b. Female
- d. What is your ethnicity?
 - a. American Indian or Alaska Native
 - b. Asian
 - c. Black or African American
 - d. Hispanic or Latino
 - e. Native Hawaiian or Other Pacific Islander
 - f. White

[Respondent may select multiple categories]
- e. Is the vehicle you drive most often a:
 - a. Car
 - b. Van or Minivan
 - c. Motorcycle
 - d. Sport Utility Vehicle or Crossover
 - e. Pickup Truck
 - f. Other type of truck
- f. In what county do you currently live?
 - a. _____ county name
- g. What is your home zip code:
 - a. _____ zip code

- h. What is your household income?
 - a. Under \$30,000
 - b. \$30,000 – \$49,999
 - c. \$50,000 – \$69,999
 - d. \$70,000 or greater
 - e. I prefer not to answer [do not ask, only use if respondent volunteers this answer]

- 1. How often do you use seat belts when you drive or ride in a car, van, sport utility vehicle or pick up?
 - a. Always
 - b. Most of the Time
 - c. Half of the Time
 - d. Rarely
 - e. Never

- 2. Do you favor keeping Missouri's seat belt law as a "secondary law"—where you can only be pulled over or ticketed if you are observed committing another violation; or do you favor changing Missouri's seat belt law to a "primary law"—where you can be pulled over or ticketed if the officer clearly observes you are not wearing your seat belt?
 - a. Keep “secondary law”
 - b. Change to “primary law”

- 3. Currently, the fine for violating Missouri's seat belt law is \$10. Would you support an increase in the fine associated with this violation?
 - a. Yes [Skip to Question 3b]
 - b. No [Skip to Question 4]

- 3b. In your opinion, what should the fine associated with violating Missouri's seat belt law be?
 - a. Under \$25
 - b. \$25 - \$49
 - c. \$50 - \$74
 - d. \$75 - \$100
 - e. Over \$100

- 4. In the past 60 days, have you read, seen or heard anything about seat belt law enforcement by police?
 - a. Yes
 - b. No

5. What do you think the chances are of getting a ticket if you don't wear your safety belt?
 - a. Always
 - b. Most of the Time
 - c. Half of the Time
 - d. Rarely
 - e. Never
6. On a local road with a speed limit of 30 mph, how often do you drive faster than 35 mph?
 - a. Always
 - b. Most of the Time
 - c. Half of the Time
 - d. Rarely
 - e. Never
7. On a local road with a speed limit of 70 mph, how often do you drive faster than 75 mph?
 - a. Always
 - b. Most of the Time
 - c. Half of the Time
 - d. Rarely
 - e. Never
8. In the past 30 days, have you read, seen or heard anything about speed enforcement by police?
 - a. Yes
 - b. No
9. What do you think the chances are of getting a ticket if you drive over the speed limit?
 - a. Always
 - b. Most of the Time
 - c. Half of the Time
 - d. Rarely
 - e. Never
10. How often do you talk on a hand-held cellular phone while driving a car, van, sport utility vehicle, or pick-up?
 - a. Always
 - b. Most of the Time
 - c. Half of the Time
 - d. Rarely
 - e. Never

11. How often do you use a hand-held cellular phone for texting while driving a car, van, sport utility vehicle, or pick-up?
 - a. Always
 - b. Most of the Time
 - c. Half of the Time
 - d. Rarely
 - e. Never

12. Many states have passed laws which restrict or ban cellular phone use, including texting, while driving. What level of restrictions would you support regarding cellular phone usage while driving?
 - a. Full Restrictions – No Cellular Phone Use Allowed
 - b. Ban on Texting While Driving, Phone Use Allowed
 - c. Ban on Texting While Driving, Hands-Free Phone Device Allowed
 - d. Hands-Free Phone Device Use Only
 - e. No Restrictions

13. In the past 60 days, how many times have you driven a motor vehicle within two (2) hours after drinking alcoholic beverages?
 - a. _____ (number) times

14. In the past 30 days, have you read, seen or heard anything about alcohol impaired driving (or drunk driving) enforcement by police?
 - a. Yes
 - b. No

15. What do you think the chances are of someone getting arrested if they drive after drinking?
 - a. Always
 - b. Most of the Time
 - c. Half of the Time
 - d. Rarely
 - e. Never

Thank you very much. Have a great day/night.

Appendix C: Additional Findings: Crosstabs of Interest

The survey results in the main report were weighted proportionally to the actual population in terms of geographic, gender, and age distributions. In this appendix, the results are presented by various variables of interest, such as by district and are unweighted.

The crosstabs that the researchers thought would be of most interest to MoDOT are presented in this appendix (all research questions by district and all research questions by category of residence). Heartland Market Research will gladly provide additional crosstabs upon request.

Research Questions by District

Since the sample size for each district is smaller than the overall survey, the respective margin of error is greater. Margins of error are cumulative, so in order for a change from 2014 to 2015 to be statistically significant, it must be greater than the sum of the district's margin of error for these years. For example, for the St. Louis District, any change from 2014 to 2015 must be greater than 10.4% (5.2% + 5.2%) in order to be 95% certain it is truly a change in opinion or behavior.

Table 19: Margin of Error by District

Location	2010	2011	2012	2013	2014	2015
NW	4.5%	7.0%	5.2%	5.2%	5.2%	5.2%
NE	5.0%	7.9%	5.2%	5.2%	5.2%	5.1%
KC	5.4%	9.1%	5.1%	5.2%	5.2%	5.2%
CD	4.9%	7.5%	5.1%	5.2%	5.2%	5.2%
SL	5.7%	9.1%	5.0%	5.2%	5.2%	5.2%
SW	4.2%	6.7%	5.0%	5.1%	5.2%	5.2%
SE	4.1%	6.4%	5.0%	5.2%	5.1%	5.2%
State	1.8%	2.8%	1.9%	2.0%	2.0%	2.0%

Table 20: District by Question 1**Districts * How often do you use seat belts when you drive or ride in a car, van, sport utility vehicle, or pick up? Crosstabulation**

			How often do you use seat belts when you drive or ride in a car, van, sport utility vehicle, or pick up?						
			Always	Most of the time	Half of the time	Rarely	Never	No Opinion/Refused	
Districts	NW	Count	262	63	12	15	10	0	362

Research Questions by Rural/Urban

Differences between rural and urban communities often show themselves in various research projects. These differences in community are so common that the Nielsen Company has used the US Census data to develop four distinct categories of residence: Highly Urbanized, Relatively Urbanized, Relatively Rural, and Very Rural.

The highly urbanized responses come from the St. Louis area and a few counties adjacent to it. The relatively urbanized responses come from the Kansas City area and a few counties adjacent to it. The rest of the state falls in the categories of relatively rural or very rural. The following table may make this more apparent.

Table 36: District by Nielson Community Type

It is important to note that some of Nielsen's classifications may not be intuitive for Missourians. For example, most people in Missouri would probably consider Springfield and Jefferson City to be relatively urbanized, but these areas are classified as relatively rural by Nielsen.

The percentages in these tables are by column (not by row as has been the case for most of the tables in this document). This allows readers to quickly see how people in each Nielsen Community answered the research questions.

ACKNOWLEDGEMENTS

The assessment team would like to acknowledge and thank the Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS) Director Leanna Depue and Program Administrator Bill Whitfield for their support, level of effort, and commitment to occupant protection in Missouri. Special thanks goes to Occupant Protection Coordinator Scott Jones for his exemplary support in developing the assessment agenda, administering the questionnaires, compiling briefing materials, and providing logistical support to the team.

The team would also like to acknowledge the hard work and dedication of the Missouri Coalition for Roadway Safety, staff representatives from OHS, MoDOT, the Missouri State Highway Patrol (MSHP), local law enforcement (Boone County Sheriff's Office, Creve Coeur Police Department, Joplin Police Department, Kansas City Metro Police Department, St. Louis County Police Department and Willow Springs Police Department), Lincoln County Health Department, Missouri Safety Center, Missouri Safe Kids, ThinkFirst Missouri and others, many of whom volunteered their time to share their knowledge and expertise during the assessment. Thanks to everyone committed to *Saving Mo Lives* on Missouri roadways.

This assessment could not have been conducted without the guidance and involvement from the National Highway Traffic Safety Administration's regional and headquarters staff: Susan DeCourcy, Janice Hartwill-Miller, Amy Schick and Laura Dunn; and support from their supervisors, Region 7 Administrator Chris Murphy and Occupant Protection Division Chief Maria Vegega. Special thanks also goes to Laura Nichols, who served as the administrative consultant for this assessment.

ASSESSMENT BACKGROUND

The purpose of the Occupant Protection Program Assessment is to provide the State of Missouri with a comprehensive review of its occupant protection program by identifying strengths, accomplishments, and challenges. In addition to using data and other resources, this report provides valuable insights for occupant protection program planning.

The assessment process provides a systematic approach for measuring progress by following the format of the *Uniform Guidelines for State Highway Safety Programs, Guideline No. 20, Occupant Protection* (November 2006). These guidelines offer direction to states in formulating their plans for highway safety efforts that are supported with 23 U.S.C. Section 402 (State and Community Highway Safety), 23 U.S.C. Section 405(b) (Occupant Protection) and other grant funds. The guidelines provide a framework for developing a balanced highway safety program and serve as a tool with which states can assess the effectiveness of their own programs.

All states, in cooperation with their political subdivisions, should have a comprehensive occupant protection program that educates and motivates its citizens to use available motor vehicle occupant protection systems. A combination of use requirements, aggressive enforcement, public information, education, and incentives is necessary to achieve lasting increases in occupant protection usage, which will prevent fatalities and decrease the number and severity of injuries.

The National Highway Traffic Safety Administration (NHTSA) staff facilitated the Occupant Protection Program Assessment. Working with the Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS), NHTSA recommended a team of five individuals with proven expertise in various aspects of occupant protection program development, implementation, and evaluation. Efforts were made to select a team that reflected the needs and interests expressed by OHS.

The assessment consisted of a thorough review of state-provided occupant protection program briefing materials and interviews with state and community-level program directors, coordinators, advocates, law enforcement personnel, and OHS staff. The conclusions drawn by the assessment team were based primarily upon the facts and information provided in the briefing materials and by the various experts who made presentations to the team.

Following completion of the interviews on Wednesday, April 2, 2014, the team convened to review and analyze the information presented. On Friday, April 4, 2014, the team briefed OHS and other invited guests on its findings and discussed major points and recommendations.

The assessment team noted that many occupant protection and general traffic safety activities are conducted throughout Missouri. It is not the intent of this report to thoroughly document all of these successes, nor to give credit to the large number of individuals at all levels who are dedicated to traffic safety. By its very nature, the report focuses on areas where further improvements can be made. Please consider this report as constructive criticism. It is an attempt to provide assistance at all levels for improvement, which is consistent with the overall goals of assessments.

This report is a consensus report. The recommendations provided are based on the unique characteristics of Missouri and what the assessment team members believe Missouri, its political subdivisions, and partners can do to improve the reach and effectiveness of the occupant protection program.

Missouri conducted a NHTSA occupant protection assessment in 2009. In addition to utilizing this current assessment report for occupant protection planning, the team strongly encourages OHS to continue using the 2009 assessment recommendations. Some recommendations from the previous assessment are now reinforced in this document to highlight their importance and reinforce that their implementation is key to improving Missouri's occupant protection program.

This Occupant Protection Program Assessment Report is not a NHTSA document and it belongs to OHS. Missouri is strongly encouraged to use the assessment report as the basis for making program improvements, assessing legislative priorities, providing additional training opportunities, evaluating funding priorities, and shaping future strategic highway safety plans.

EXECUTIVE SUMMARY

The state of Missouri, in cooperation with the National Highway Traffic Safety Administration (NHTSA), initiated an Occupant Protection Program Assessment. During the February 14, 2014 pre-assessment conference call, the Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS) asked the team of independent experts to identify practical strategies that a secondary enforcement law state can utilize to increase overall seat belt usage, strategies to increase teen seat belt use, and innovative enforcement approaches. Particular attention was given to these areas.

Recommendations from this assessment are intended to guide OHS toward improvements in program management; regulations, legislation and policy; law enforcement; communication; occupant protection for children; outreach; and data and evaluation.

OHS, the Missouri Coalition for Roadway Safety, and other dedicated partners are committed to improving highway safety. By 2016, Missouri is committed to having 700 or fewer traffic fatalities on its roadways.

OHS guides Missouri's overall highway safety program, identifies the most critical statewide traffic safety needs, awards and monitors highway safety grants, and coordinates high visibility enforcement mobilizations such as Click It or Ticket/Click It for Life. OHS takes a thorough approach in assessing the state's occupant protection challenges that run the gamut, from decreasing the overall number of crashes (fatal, injury and property damage only) to reducing unrestrained fatality crashes and increasing observed seat belt use rates. OHS relies heavily on performance management and observational surveys to assess program efficacy.

Since 2005, Missouri has seen a 40 percent reduction in motor vehicle fatalities. In 2013, 757 people were killed in traffic crashes, the lowest number since 1945. Despite this noteworthy progress, Missouri has struggled to see meaningful increases in its seat belt use rate over the past ten years, ranging from 76 percent in 2004 to 80.1 percent in 2013. Missouri's teen seat belt usage rate stands at 67 percent. In 2013, sixty-three percent of all vehicle occupants fatally injured were unbelted and nearly 8 out of 10 vehicle occupants age 15-25 died unrestrained.

With 33,000 miles of state-owned and maintained roadways, Missouri's state road system is the 7th largest in the country. Roughly 75 percent of fatalities occur on the major state-owned roads. The "off (county/city) system" consists of 96,000 road miles. Similar to national trends, Missouri seat belt use compliance in rural areas is generally lower than more populated areas. Young men, pickup truck drivers and minorities are also less likely to buckle up.

Missouri, known as the "Show-Me State", has highly varied geography and is the 21st largest and the 18th most populous of the 50 United States. According to the 2010 U.S. Census, more than six million people live in Missouri with over half of Missourians residing within the St. Louis and Kansas City metropolitan areas.

Recently, MoDOT underwent significant staffing reductions. OHS was not immune to these reductions. Despite the staffing downsize, OHS manages more than 400 contracts with a \$3.4 million contracted budget in FY 2014 for occupant protection.

The state of Missouri has a secondary enforcement seat belt law for adults in the front seat of passenger vehicles. There is no seat belt law for adult rear seat occupants. With little political will at the state level, largely due to freedom of choice concerns, Missouri's prospect of upgrading to primary enforcement at the current time is bleak. To Missouri's credit, the state leads the way in enacting local primary enforcement seat belt law ordinances. Currently 21 percent of Missouri's population is covered by 39 local primary belt ordinances. This offers a unique opportunity to mitigate secondary law enforcement challenges and reduce serious injuries and fatalities on Missouri's roadways.

While there are a number of dedicated CPS professionals in Missouri, opportunity exists to better reach children between the ages of 8 and 18.

With 114 counties and more than 600 law enforcement agencies in the state, OHS has three staff liaisons that work to recruit and maintain enforcement agencies to participate in year round and/or mini-grant opportunities. Given the diversity of Missouri's police departments, ranging from larger metropolitan departments which are very traffic-minded to smaller sheriffs' offices that opt not to enforce traffic safety, opportunity exists to educate more law enforcement personnel on the importance of buckling up.

Further opportunity exists to refine the target audiences and educate minority and higher-risk groups through traditional and non-traditional communication mediums.

Despite Missouri's many challenges, OHS staff and those interviewed as part of this assessment are dedicated to improving highway safety for all Missourians. Each person brings his or her own unique expertise and experience that should be leveraged to the fullest capacity.

Using occupant protection is the single most effective habit Missourians can do to protect themselves in a crash and *Arrive Alive*. Based on the fundamental elements of the *Uniform Guidelines for State Highway Safety Programs for Occupant Protection*, this assessment report identifies Missouri's strengths and challenges and provides recommendations for the major occupant protection program areas.

KEY RECOMMENDATIONS

*(Note: Key Recommendations are **BOLDED** in each individual section)*

- **Task regional coalitions and the Occupant Protection Subcommittee of the Missouri Coalition for Roadway Safety with the creation, development, and implementation of new initiatives in occupant protection.**
- **Develop the will for political change through grassroots community advocacy, leveraging influential organizations, and generating visible public and private support.**
- **Establish a Law Enforcement Liaison (LEL) program. The position(s) should be staffed by former law enforcement personnel who have the ability to garner the support of law enforcement executives to work toward the highway safety goals of OHS. The LELs should also be able to coordinate and facilitate training programs to better inform the law enforcement community about highway safety concerns, practices and procedures.**
- **Enforcement of occupant protection laws needs to be emphasized on a year-round basis. Law enforcement agencies should make enforcement of these laws a priority of their patrol personnel on a daily basis.**
- **Conduct a Child Occupant Protection Observational Survey for the entire 0 to 18 year old spectrum for a baseline.**
- **Conduct an annual Child Passenger Safety (CPS) conference/summit to update technicians, provide opportunities for re-certification and CEUs, and foster networking opportunities.**
- **Explore alternative funding sources to purchase child safety seats for distribution programs.**
- **Establish strong partnerships with organizations such as the statewide Parent Teacher Association (PTA) or local PTAs and the state or local chapters of American Academy of Pediatricians (AAP) to distribute occupant protection education materials to parents.**
- **Establish new partnerships with large employers in the state to distribute occupant protection safety education materials. Provide large employers with model seat belt use policies to implement for employees.**
- **Create partnerships and implement occupant protection programs with faith-based organizations.**
- **Use surveys/questionnaires to track message retention and behavior changes after public information and education campaigns are conducted.**

KEY RECOMMENDATIONS (continued)

- Use evidence-based research to raise support among the general population, legislators and other community leaders for primary enforcement laws.
- **Evaluate the effectiveness of local primary ordinances across the state of Missouri.**
- Do more in-depth analyses of unbelted fatalities and disabling injury crashes occurring at nighttime.
- Ensure that evaluation results are an integral part of program planning and problem identification. Evaluate the effectiveness of all current occupant protection programs including inputs and results.

1. PROGRAM MANAGEMENT

GUIDELINE:

Each state should have centralized program planning, implementation and coordination to achieve and sustain high rates of seat belt use. Evaluation is also important for determining progress and ultimate success of occupant protection programs.

- *Provide leadership, training and technical assistance to other State agencies and local occupant protection programs and projects;*
- *Establish and convene an occupant protection advisory task force or coalition to organize and generate broad-based support for programs. The coalition should include agencies and organizations that are representative of the State's demographic composition and critical to the implementation of occupant protection initiatives;*
- *Integrate occupant protection programs into community/corridor traffic safety and other injury prevention programs; and*
- *Evaluate the effectiveness of the State's occupant protection program.*

1A. STRENGTHS

- The Missouri Occupant Protection Program is administered by the Office of Highway Safety (OHS) in the Traffic and Highway Safety Division of the Missouri Department of Transportation (MoDOT) with highly experienced and dedicated traffic safety professionals.
- The Missouri Coalition for Roadway Safety (MCRS) serves as the state traffic safety coalition for goal-setting, planning, and coordination. The MCRS is composed of an executive committee, ten state-level subcommittees, and seven regional coalitions.
- Regional coalitions are composed of a variety of traffic safety professionals, volunteers, and advocates. Participants report that satisfaction in and effectiveness of the coalitions are high to very high.
- The Executive Committee of the MCRS provides the leadership for Missouri's Strategic Highway Safety Plan (SHSP), entitled *Missouri's Blueprint to Save More Lives*.
- The SHSP identifies the vision, mission, and goal for traffic safety in Missouri:
 - Vision: Continuously Moving Missouri toward Zero Deaths
 - Goal: 700 or Fewer Fatalities by 2016
 - Mission: To make travel on Missouri's roadways safer through a partnership of committed local, state, federal, public and private organizations.
- "Increasing Safety Belt Use" is among the nine strategies in the SHSP to reduce traffic injuries and fatalities. The SHSP also incorporates "Unrestrained Drivers and Occupants" as

a focus area. A comprehensive core of strategies for this focus area includes education, enforcement, engineering, and public policy.

- Six identified and measurable performance measures are tracked to determine the progress of occupant protection programs.
- The State has selected a goal to increase statewide seat belt usage by two percentage points annually such that an 87 percent rate is achieved by 2015.
- OHS includes a designated Occupant Protection Coordinator. The Coordinator is an experienced grant manager and traffic safety leader.
- The Executive Committee of the MCRS approved the establishment of a statewide Occupant Protection Subcommittee. The subcommittee will be chaired by the State Occupant Protection Coordinator within OHS. It is planned to be implemented by July 1, 2014.
- In FY 2014, OHS planned to develop a multi-year strategic plan for occupant protection in conjunction with an Occupant Protection Summit. The goal is to complete this plan by July 1, 2014.
- OHS is working with the Centers for Disease Control and Prevention (CDC) to support the strategic planning process. CDC is interviewing various persons in the state, to be followed by a workshop, and concluding with a report with recommendations and results.
- According to the 2014 Highway Safety Program Cost Summary (June 2013), a significant amount of funds has been planned to support occupant protection efforts. These include, but aren't limited to:

2014 Planned Occupant Protection Funds		
Federal Fund Source	Amount	State/local
Section 402 (OP)	\$ 870,149	
MAP-21 (Section 405b)	\$ 900,000	\$ 225,000
Section 2011	\$ 504,462	\$ 264,500
TOTAL	\$ 2,274,611	\$ 489,500

[These amounts do not include, for example, Community Traffic Safety projects (\$208,130), Safe Communities projects (\$179,287), and Child Restraint projects (\$80,000).]

- Additional resources are available to local projects through the regional MCRS coalitions. The regional coalitions develop traffic safety plans and manage state funds for projects to implement those plans. These projects for enforcement, public information and education supplement and support state programs and campaigns.
- The state occupant protection program takes a comprehensive approach that combines program management, legislative and policy efforts, law enforcement, public information and education, child passenger safety, and program evaluation.

- Based on crash data and observational surveys, identified primary target groups for occupant protection include teens, rural drivers and passengers, young males, and pickup truck drivers.
- In support of the grant application process, OHS conducts regional workshops for existing and potential grantees. Packets and information that include instructions and traffic crash data are provided to attendees.
- OHS developed and implemented a grants management system that now provides web-based processes for grant application submissions, contract development, enforcement reporting, and vouchering. Users consider this system to be easy to use and helpful. Additional components are in development for reporting and training.
- Project selection is based on multiple factors to help determine the potential for project success. *Countermeasures That Work: A Highway Safety Countermeasure Guide for State Highway Safety Offices* (NHTSA) serves as a reference document for project development and selection.
- Project ideas come from a variety of sources such as sharing with other states, research reports, and meetings and events such as the national Lifesavers traffic safety conference.
- Consolidation of the administration of Click It or Ticket mini-grants with the Missouri Safety Center eases the time spent on basic grant management tasks by OHS staff for this program while maintaining quality control and oversight.

1B. CHALLENGES

- In 2012, OHS was reduced by six full time employees (FTEs) as part of an overall 19 percent staff reduction for MoDOT.
- The designated occupant protection coordinator does not spend 100 percent of staff time on occupant protection but also carries significant responsibility in law enforcement coordination and grant management.
- The designated child passenger safety coordinator spends up to 20 percent of time on activities other than occupant protection.
- Successful projects have operated in pockets of the State for several years but have not expanded statewide. These projects, such as Battle of the Belts in various high schools, are time and personnel intensive. With limited staff at the state and regional level, it is difficult to grow these types of programs.
- Due to programming constraints, it is difficult to create, develop, and implement new initiatives that could energize the public and the highway safety community.

- While there are numerous meetings and traffic safety conferences, there has not been a state conference that focuses specifically and solely on occupant protection programs and issues.
- Different funding streams result in multiple applications and grants to the same grantee. Grant program complexity may mean additional staff time for all involved.

1C. RECOMMENDATIONS

- Incorporate recommendations from this assessment and the Centers for Disease Control and Prevention (CDC) initiative in developing the State's comprehensive occupant protection strategic plan.
- Conduct a functional job analysis for an occupant protection coordinator to determine what tasks are essential to Office of Highway Safety (OHS); contract, grant, or transfer functions to create a full-time occupant protection coordinator position within OHS.
- Expand identified, successful projects statewide.
- **Task regional coalitions and the Occupant Protection Subcommittee of the Missouri Coalition for Roadway Safety with the creation, development, and implementation of new initiatives in occupant protection.**
- Conduct a state conference for current and new partners in occupant protection; use this conference to gain renewed commitment to occupant protection programs and policies.
- Continue to simplify and streamline grant management processes.
- Continue development and increase use of the online grants management system.

2. LEGISLATION/REGULATION AND POLICY

GUIDELINE:

Each state should enact and vigorously enforce primary enforcement occupant protection use laws. Each state should develop public information programs to provide clear guidance to the motoring public concerning motor vehicle occupant protection systems. This legal framework should include:

- *Legislation permitting primary enforcement that requires all motor vehicle occupants to use systems provided by the vehicle manufacturer;*
- *Legislation permitting primary enforcement that requires that children birth to 16 years old (or the State's driving age) be properly restrained in an appropriate child restraint system (i.e., certified by the manufacturer to meet all applicable Federal safety standards) or seat belt;*
- *Legislation permitting primary enforcement that requires children under 13 years old to be properly restrained in the rear seat (unless all available rear seats are occupied by younger children);*
- *Graduated Driver Licensing (GDL) laws that include three stages of licensure, and that place restrictions and sanctions on high-risk driving situations for novice drivers (i.e., nighttime driving restrictions, passenger restrictions, zero tolerance, required seat belt use);*
- *Regulations requiring employees and contractors at all levels of government to wear seat belts when traveling on official business;*
- *Official policies requiring that organizations receiving Federal highway safety program grant funds develop and enforce an employee seat belt use policy; and*

Outreach to state insurance commissioners to encourage them to persuade insurers to offer incentives to policyholders who use seat belts and child restraints. Insurance commissioners are likely to have significant influence with insurers that write policies in

2A. STRENGTHS

- Missouri was among the first states to adopt a seat belt law, implementing secondary enforcement legislation in 1985.
- There are committed, dedicated and persistent safety advocates in the State, including the top leadership of the Missouri Department of Transportation, who continue to promote occupant protection and support policy initiatives. For example, the former president of the St. Louis Area Police Chiefs Association was instrumental in obtaining a primary enforcement ordinance for the city of Creve Coeur.
- Thirty-eight cities and one county have passed local ordinances which permit traditional (i.e., primary) enforcement. These ordinances cover over 1 million people, 21 percent of

Missouri's population. The safety advantages and cost savings of implementing primary enforcement have been persuasive in the passage of these ordinances.

- Factual information regarding state law and the potential of primary enforcement and a higher fine is provided to the public and to state legislators.
- Significant planning documents, such as *Missouri's Blueprint to Save More Lives*, have reiterated the safety community's commitment to upgrade state and local requirements by designating key strategies to:
 - enact a primary safety belt law.
 - expand the number of local primary safety belt ordinances.
- Occupant protection legislation covers all drivers and front seat passengers (Section 307.178 RSMo), persons less than eighteen years of age operating or riding in a truck (Section 307.178 RSMo), and a child less than sixteen years of age (Section 307.179 RSMo).
- Under designated circumstances, failure to wear a safety belt may be admitted in a case to mitigate damages.
- The State's child passenger safety law (Section 307.179 RSMo) requires use of an appropriate child passenger safety system which meets federal standards for:
 - Children less than four years of age, regardless of weight, and
 - Children weighing less than 40 pounds, regardless of age.
- Section 307.179 RSMo requires use of an appropriate restraint system or booster seat which meets federal standards for children at least four years of age but less than eight years of age who also weigh at least 40 pounds but less than 80 pounds and who are also less than four feet nine inches tall.
- Section 307.179 RSMo requires use of a vehicle safety belt or appropriate booster seat which meets federal standards for children at least 80 pounds or more than four feet nine inches tall.
- Violation of subsections of Section 307.179 RSMo for children less than or equal to 80 pounds or less than or equal to four feet nine inches tall may result in a fine of up to \$50 plus court costs.
- Lincoln County, Missouri, has an ordinance prohibiting the sale of used car seats. This is the only ordinance of its kind in the country.
- The Highway and Transportation Commission is charged with implementing a program to educate and ensure compliance with the State's occupant protection laws.

- Missouri law (Section 304.665 RSMo) prohibits a person under 18 years old from riding in the unenclosed bed of a truck with a licensed gross weight of less than 12,000 pounds.
- Under Missouri's graduated driver licensing (GDL) provisions (Section 302.178 RSMo):
 - An intermediate driver's license requires that the driver and all passengers wear seat belts at all times.
 - Some limited restrictions are made on permissible nighttime driving. An intermediate driver's license holder is prohibited from driving between the hours of 1:00 a.m. and 5:00 a.m. unless accompanied by a legally-designated individual unless the travel is to or from school or educational program or activity, a regular place of employment or in emergency situations as defined by regulation. (See also "Challenges" below.)
 - For the first six months of an intermediate driver's license, there may be only one passenger under the age of 19 who is not a member of the holder's immediate family. After the first six months, there may be no more than three passengers under 19 years of age who are not members of the holder's immediate family.
- State of Missouri Administrative Policy (SP-4, Revised May 15, 2008) requires that all occupants of state vehicles or private vehicles operated on state business "shall use safety restraints where equipped".
- According to the Missouri Department of Transportation Employee Handbook (September 2013), employees are required to use seat belts when driving or riding in a department vehicle.
- The Office of Highway Safety (OHS) requires all grantees to have an employee seat belt policy.
- Research specific to Missouri - *Evaluation of a County Enforcement Program with a Primary Seat Belt Ordinance: St. Louis County, Missouri* (NHTSA 2010) and *Estimated Minimum Savings to the Medicaid Budget in Missouri by Implementing a Primary Seat Belt Law* (NHTSA 2007) - has documented the advantages of primary enforcement in lives saved, injuries prevented, and cost savings.
- Federal commercial motor vehicle regulation (§392.16: Use of seat belts) requires that a commercial motor vehicle which has a seat belt assembly installed at the driver's seat shall not be driven unless the driver has properly restrained himself/herself with the seat belt assembly.
This regulation is supported by the Commercial Motor Vehicle Safety Program which provides funds for inspection, enforcement, and education.
- OHS is developing the *Primary Safety Belt Ordinance Toolkit* to assist local governments in adopting primary seat belt ordinances. The toolkit includes a model primary seat belt ordinance, crash data, maps, and seat belt survey results.

2B. CHALLENGES

- Since first passed in 1985, Missouri has been unable to upgrade its seat belt law to allow for standard enforcement. Therefore, despite the fact that failure to wear a seat belt is illegal, law enforcement is unable to appropriately and adequately enforce the law.
- The political climate and belief in the primacy of personal freedom have not been conducive to passing upgrades to the State's occupant protection laws. According to the Highway Drivers Survey (Missouri Department of Transportation 2012), about half of respondents wish to keep the seat belt law as secondary (51 percent) and prefer to keep the penalty as is (52.9 percent).
- There has not been sufficient, influential support from certain individual leaders, such as some state and local elected officials and powerful professional and business organizations, to achieve legislative change.
- Missouri's occupant protection legislation does not meet the following requirements of Moving Ahead for Progress in the 21st Century Act (MAP-21) Section 405(b) grant program and increase occupant protection:
 - The State must provide for imposition of a fine of not less than \$25 per unrestrained occupant. Missouri's seat belt law (Section 307.178 RSMo) provides for a fine not to exceed \$10. Section 307.179 (2) (4) RSMo, requiring use of a seat belt or booster seat for children at least 80 pounds or more than four feet nine inches tall, also provides for a fine not to exceed \$10. A \$10 fine is the lowest in the country and is generally considered insufficient to influence those who fail to wear a seat belt.
 - There must be no gaps in coverage in the State occupant protection laws. Missouri law does not cover back seat occupants in passenger vehicles 16 years or older. Pickup truck drivers and passengers 18 years of age or older are also exempt.
- Under Section 307.178 RSMo, no court costs may be imposed for failure to use a seat belt.
- No points on a person's driver license may be assessed for violating the seat belt law.
- Charges for violation of Section 307.178 (1), (2), or (3) shall be dismissed or withdrawn if the driver, prior to or at hearing, provides satisfactory evidence of acquisition of child passenger restraint system or child booster seat. It is unknown as to what is required to show "satisfactory evidence of acquisition". Correct installation is not required and may not be expected.
- Several exemptions in Missouri law (Section 304.665 RSMo) allow passengers under 18 years old to ride in the unenclosed bed of a pickup truck under certain circumstances. Exemptions include, but are not limited to:

- roads that are not part of the state or federal highway system or within the corporate limits of any city;
 - if there is any means to prevent or secure a passenger from being thrown, falling or jumping from the truck; and
 - if the truck is being operated solely for the purposes of participating in a special event and there is a lack of available seating. A “special event” is “a specific social activity of a definable duration which is participated in by the person riding in the unenclosed bed”.
- The State’s Graduated Drivers License (GDL) provisions do not appear to meet the requirements to qualify Missouri for the State GDL Grant Program (Section 1200.26) of MAP-21. For example, the Interim Final Rule (IFR) imposes a restriction on nighttime driving between 10 p.m. through 5 a.m. when intermediate drivers are most at risk. While the IFR allows exceptions in the case of emergency, it does not permit other exceptions during the restricted driving hours. Missouri provisions do not meet these specifics as noted above.
 - Provisions for a temporary instruction permit prior to an intermediate driver’s license (Section 302.130 RSMo) do not include any passenger restrictions or nighttime driving restrictions or incorporate seat belt use requirements.
 - Driver education, other than behind-the-wheel instruction, is not required to obtain a driver license in Missouri.
 - A local seat belt ordinance with primary enforcement has been challenged in court. A circuit court upheld the validity and constitutionality of the ordinance. However, the decision of the circuit court has been appealed. At the time of this assessment, a decision on the appeal had not been made.

2C. RECOMMENDATIONS

- **Develop the will for political change through grassroots community advocacy, leveraging influential organizations, and generating visible public and private support.**
- Provide for standard primary enforcement statewide for all occupant protection laws.
- Increase the fine for occupant protection laws that currently allow for a maximum \$10 fine to a minimum of \$25.
- Ensure there are no age gaps in the State’s occupant protection laws.
- Allow court costs to be imposed for violations of the State’s occupant protection laws.
- Attach points to a driver license for violation of occupant protection laws.

- Reduce the number of exemptions that allow young passengers to ride in the open bed of a pickup truck.
- Determine whether child passenger violations are waived on the presentation of a purchase receipt or car seat; encourage judges and prosecutors to work toward requiring a child passenger safety technician's determination of an appropriate child restraint properly installed prior to waiver of a fine.
- Upgrade graduated driver licensing requirements to comply with the State Graduated Driver Licensing Grant Program (MAP 21), including a restriction on nighttime driving between 10 p.m. through 5 a.m. for intermediate drivers.
- Require in-class driver education to qualify for a driver license for those under the age of 18.
- Distribute a *Primary Safety Belt Ordinance Toolkit* to assist local governments considering a primary ordinance.

3. LAW ENFORCEMENT

GUIDELINE:

Each State should conduct frequent, high-visibility law enforcement efforts, coupled with communication strategies, to increase seat belt and child safety seat use. Essential components of a law enforcement program should include:

- *Written, enforced seat belt use policies for law enforcement agencies with sanctions for noncompliance to protect law enforcement officers from harm and for officers to serve as role models for the motoring public;*
- *Vigorous enforcement of seat belt and child safety seat laws, including citations and warnings;*
- *Accurate reporting of occupant protection system information on police accident report forms, including seat belt and child safety seat use or non-use, restraint type, and airbag presence and deployment;*
- *Communication campaigns to inform the public about occupant protection laws and related enforcement activities;*
- *Routine monitoring of citation rates for non-use of seat belts and child safety seats;*
- *Use of National Child Passenger Safety Certification (basic and in-service) for law enforcement officers;*
- *Utilization of Law Enforcement Liaisons (LELs), for activities such as promotion of national and local mobilizations and increasing law enforcement participation in such mobilizations and collaboration with local chapters of police groups and associations that represent diverse groups (e.g., NOBLE, HAPCOA) to gain support for enforcement efforts.*

3A. STRENGTHS

- The Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS) requires all law enforcement agencies applying for grant funds to have a seat belt use policy within their agencies. There is a specific block on the electronic application for funds that must be marked in the affirmative indicating such a seat belt use policy exists.
- There is strong law enforcement participation during national and state occupant protection mobilizations, i.e. Click It or Ticket and Youth Safety Belt Enforcement Campaign.
- Crash trend updates are regularly distributed throughout the state by OHS.
- Electronic crash reporting provides a means for near real-time crash data and the ability to more quickly identify problem areas.
- Law enforcement agencies are permitted to conduct vehicle equipment and licensing checkpoints during which enforcement of occupant protection laws may take place.

- The Missouri State Highway Patrol (MSHP) has a zero tolerance policy toward occupant protection enforcement which requires troopers to cite violators of the state's occupant protection laws when a traffic stop is made upon other probable cause.
- Seat Belt Convincers and rollover simulators are available for demonstrations through the MSHP and some local agencies.
- There are 39 jurisdictions within Missouri that have adopted local ordinances that enable their law enforcement officers to enforce seat belt violations as a primary offense.
- MoDOT provides signs to local jurisdictions that have adopted primary seat belt enforcement ordinances to help advertise that seat belt violations may be enforced as a primary offense.
- OHS has an online reporting system for law enforcement agencies to report their activities during occupant protection mobilizations.
- Many law enforcement agencies participate in one of the seven regional roadway safety coalitions.
- OHS holds an annual Highway Safety Conference for law enforcement officers that includes educational sessions on occupant protection.
- Electronic ticketing (e-ticketing) is available to many law enforcement officers which enables them to more efficiently issue citations for multiple violations.
- Law enforcement agencies throughout the State work closely with one another and the MSHP.
- Funding for law enforcement is available through both OHS and the Missouri Roadway Safety Coalition.

3B. CHALLENGES

- OHS does not have a Law Enforcement Liaison (LEL) program. Existing staff must undertake the role of liaison in addition to their administrative and programmatic responsibilities. This limits the frequency with which they can interact with and assist those law enforcement agencies who may be struggling in achieving advances in occupant protection usage rates. Personnel with a law enforcement background would garner greater cooperation and more participation from law enforcement partners.
- There appears to be a lack of year-round enforcement of occupant protection laws outside of enforcement waves where grant funding is available to pay for overtime.

- In law enforcement agencies with specialty traffic enforcement units, most enforcement for occupant protection violations comes from the few officers assigned to those units rather than from the vastly larger number of personnel assigned to uniformed and other patrol functions.
- While most, if not all, law enforcement agencies have written policies requiring their personnel to use seat belts when operating department vehicles, there are still officers who do not regularly wear their seat belts while on duty and their departments do not fully enforce department regulations requiring usage.
- Confusion exists among law enforcement personnel regarding child passenger safety laws. This likely contributes to some reluctance in taking enforcement action.
- There appears to be no clear plan for nighttime enforcement of occupant protection laws.
- Enforcement data appears to be collected for only that enforcement conducted on OHS funded overtime or during OHS enforcement campaigns.

3C. RECOMMENDATIONS

- **Establish a Law Enforcement Liaison (LEL) program. The position(s) should be staffed by former law enforcement personnel who have the ability to garner the support of law enforcement executives to work toward the highway safety goals of OHS. The LELs should also be able to coordinate and facilitate training programs to better inform the law enforcement community about highway safety concerns, practices and procedures.**
- **Enforcement of occupant protection laws needs to be emphasized on a year-round basis. Law enforcement agencies should make enforcement of these laws a priority of their patrol personnel on a daily basis.**
- Develop short roll-call type training that may be presented in person or by video that includes messaging on the importance of occupant protection enforcement and information on the occupant protection laws. This training should also include information on effective enforcement techniques including those that can be used for nighttime enforcement.
- Emphasize consistent year-round enforcement of Missouri's seat belt and child restraint laws.
- Collect all occupant protection enforcement data, not just for that performed during enforcement waves or on OHS-funded overtime.
- Implement a nighttime occupant protection enforcement strategy.

4. OCCUPANT PROTECTION FOR CHILDREN

GUIDELINE:

Each State should enact occupant protection laws that require the correct restraint of all children, in all seating positions and in every vehicle. Regulations and policies should exist that provide clear guidance to the motoring public concerning occupant protection for children. Each State should require that children birth to 16 years old (or the State's driving age) be properly restrained in the appropriate child restraint system or seat belt. Gaps in State child passenger safety and seat belt laws should be closed to ensure that all children are covered in all seating positions, with requirements for age-appropriate child restraint use. Key provisions of the law should include: driver responsibility for ensuring that children are properly restrained; proper restraint of children under 13 years of age in the rear seat (unless all available rear seats are occupied by younger children); a ban of passengers from the cargo areas of light trucks; and a limit on the number of passengers based on the number of available seat belts in the vehicle. To achieve these objectives, State occupant protection programs for children should:

- *Collect and analyze key data elements in order to evaluate the program progress;*
- *Assure that adequate and accurate training is provided to the professionals who deliver and enforce the occupant protection programs for parents and caregivers;*
- *Assure that the capability exists to train and retain nationally certified child passenger safety technicians to address attrition of trainers or changing public demographics;*
- *Promote the use of child restraints and assure that a plan has been developed to provide an adequate number of inspection stations and clinics, which meet minimum quality criteria;*
- *Maintain a strong law enforcement program that includes vigorous enforcement of the child occupant protection laws;*
- *Enlist the support of the media to increase public awareness about child occupant protection laws and the use of child restraints. Strong efforts should be made to reach underserved populations;*
- *Assure that the child occupant protection programs at the local level are periodically assessed and that programs are designed to meet the unique demographic needs of the community;*
- *Establish the infrastructure to systematically coordinate the array of child occupant protection program components;*
- *Encourage law enforcement participation in the National Child Passenger Safety Certification (basic and in-service) training for law enforcement officers.*

4A. STRENGTHS

- Missouri has a primary child restraint law for children under age eight and a seat belt law for children and teens ages 8 to 18. (Missouri has a secondary seat belt law for all drivers, a primary child restraint law for children under age eight and the Graduated Driver's License Law requires all 16-18 year old drivers and their passengers to wear a seat belt).

- The State continues to support Child Passenger Safety (CPS) training using the current National Highway Traffic Safety Administration (NHTSA) standardized curriculum.
- Eight to twelve CPS Technician classes are sponsored by the Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS) each year. Other partners are leveraging funding to support additional CPS Technician classes in the State.
- A CPS observational survey is scheduled to be conducted this year.
- A teen observational seat belt survey is conducted annually at 150 high schools across the state.
- There are 198 inspection stations within the State where families can have their child safety seats inspected by certified CPS technicians.
- There are child safety seats available for distribution/education/installation in the State.
- The State currently has 970 certified CPS technicians, 38 CPS instructors and one instructor candidate.
- In 2013, the State had a CPS technician re-certification rate of 58.0 percent. Nationally, the re-certification rate was 58.5 percent.
- The State re-certification rate for the first three months of 2014 is 71.7 percent. Nationally, the re-certification rate is 54.4 percent for the same time period.
- The Missouri State Highway Patrol (MSHP) has a certified CPS instructor in each troop location and is able to assist counties where no inspection station or other technician exists. The MSHP instructors assist with training as needed. Local programs have access to rollover simulators and convincers through the seven MSHP districts.
- A ten person volunteer CPS Advisory Committee assists OHS with CPS programs across the State.
- A Kids N Motion Update is provided to all instructors in the State each time it is updated.
- Recognizing that it is sometimes difficult for law enforcement to attend a CPS Certification course, the law enforcement basic awareness courses are offered Statewide.

4B. CHALLENGES

- A CPS Technician or Instructor Technical Update is not available statewide nor is a CPS Update provided to the CPS Advisory Committee. There are few opportunities for CPS Technicians to earn CEUs within the State.

- Funds for child occupant protection training and equipment may at some time in the near future (2015) be reduced significantly. The 2011(d) funding is no longer available. However, funding will continue (maintenance of effort) with MAP21 funding through 2015.
- There does not appear to be a coordinated, consistent, and statewide effort to reach children between the ages of 8 and 14.
- Children are often the best advocates for occupant protection in family vehicles. However, there appear to be limited statewide programs to develop children as advocates.
- It is unknown whether hospitals in the State have written CPS discharge policies.
- There is little evidence of consistent enforcement of CPS laws.
- Team Spirit is celebrating their 20th anniversary this year but has not been rigorously evaluated.

4C. RECOMMENDATIONS

- **Conduct a Child Occupant Protection Observational Survey for the entire 0 to 18 year old spectrum for a baseline.**
- **Conduct an annual Child Passenger Safety (CPS) conference/summit to update technicians, provide opportunities for re-certification and CEUs, and foster networking opportunities.**
- Include appropriate CPS messaging for children up to 18 years old in paid and earned media, with special emphasis on pre-teens and booster seat aged children.
- Develop standardized language so that advocates in the State can convey the urgency of using booster seats until the adult seat belt fits properly.
- **Explore alternative funding sources to purchase child safety seats for distribution programs.**
- Provide hospitals with model discharge policies and strongly encourage them to develop and implement a written discharge policy on how they will inform parents of the requirements of CPS laws. A model policy will be available on the National Child Passenger Safety Board website.
- Encourage law enforcement to aggressively enforce CPS laws.
- Conduct an evaluation of the impact of the Team Spirit program on traffic safety.

5. OUTREACH PROGRAM

GUIDELINE:

Each state should encourage extensive statewide and community involvement in occupant protection education by involving individuals and organizations outside the traditional highway safety community. Representation from health, business, education, and diverse cultures of the community are encouraged, among others. Community involvement broadens public support for the state's programs and can increase a state's ability to deliver highway safety education programs. To encourage statewide and community involvement, States should:

- *Establish a coalition or task force of individuals and organizations to actively promote use of occupant protection systems;*
- *Create an effective communications network among coalition members to keep members informed about issues;*
- *Provide culturally relevant materials and resources necessary to conduct occupant protection education programs, especially directed toward young people, in local settings;*
- *Provide materials and resources necessary to conduct occupant protection education programs, especially directed toward specific cultural or otherwise diverse populations represented in the State and in its political subdivisions.*

States should undertake a variety of outreach programs to achieve statewide and community involvement in occupant protection education, as described below. Programs should include outreach to diverse populations, health and medical communities, schools and employers.

a. Diverse Populations

Each State should work closely with individuals and organizations that represent the various ethnic and cultural populations reflected in State demographics. Individuals from these groups might not be reached through traditional communication markets. Community leaders and representatives from the various ethnic and cultural groups and organizations will help States to increase the use of child safety seats and seat belts. The State should:

- *Evaluate the need for, and provide, if necessary, materials and resources in multiple languages;*
- *Collect and analyze data on fatalities and injuries in diverse communities;*
- *Ensure representation of diverse groups on State occupant protection coalitions and other work groups;*
- *Provide guidance to grantees on conducting outreach in diverse communities;*
- *Utilize leaders from diverse communities as spokespeople to promote seat belt use and child safety seat;*
- *Conduct outreach efforts to diverse organizations and populations during law enforcement mobilization periods.*

b. Health and Medical Communities

Each State should integrate occupant protection into health programs. The failure of drivers and passengers to use occupant protection systems is a major public health problem that must be recognized by the medical and health care communities. The SHSO, the State Health Department and other State or local medical organizations should collaborate in developing programs that:

- *Integrate occupant protection into professional health training curricula and comprehensive public health planning;*
- *Promote occupant protection systems as a health promotion/injury prevention measure;*
- *Require public health and medical personnel to use available motor vehicle occupant protection systems during work hours;*
- *Provide technical assistance and education about the importance of motor vehicle occupant protection to primary caregivers (e.g., doctors, nurses, clinic staff);*
- *Include questions about seat belt use in health risk appraisals;*
- *Utilize health care providers as visible public spokespeople for seat belt and child safety seat use;*
- *Provide information about the availability of child safety seats at, and integrate child safety seat inspections into, maternity hospitals and other prenatal and natal care centers;*
- *Collect, analyze and publicize data on additional injuries and medical expenses resulting from non-use of occupant protection devices.*

c. Schools

Each State should encourage local school boards and educators to incorporate occupant protection education into school curricula. The SHSO in cooperation with the State Department of Education should:

- *Ensure that highway safety and traffic-related injury control, in general, and occupant protection, in particular, are included in the State-approved K-12 health and safety education curricula and textbooks;*
- *Establish and enforce written policies requiring that school employees use seat belts when operating a motor vehicle on the job; and*
- *Encourage active promotion of regular seat belt use through classroom and extracurricular activities as well as in school-based health clinics; and*
- *Work with School Resource Officers (SROs) to promote seat belt use among high school students;*
- *Establish and enforce written school policies that require students driving to and from school to wear seat belts. Violation of these policies should result in revocation of parking or other campus privileges for a stated period of time.*

d. Employers

Each State and local subdivision should encourage all employers to require seat belt use on the job as a condition of employment. Private sector employers should follow the lead of Federal and State government employers and comply with Executive Order 13043, “Increasing Seat Belt Use in the United States” as well as all applicable Federal Motor Carrier Safety Administration (FMCSA) Regulations or Occupational Safety and Health Administration (OSHA) regulations requiring private business employees to use seat belts on the job. All employers should:

- *Establish and enforce a seat belt use policy with sanctions for non-use;*
- *Conduct occupant protection education programs for employees on their seat belt use policies and the safety benefits of motor vehicle occupant protection devices.*

5A. STRENGTHS

- A large number of energetic and dedicated partners promote highway safety across the State.
- The Missouri Coalition for Roadway Safety (MCRS) includes a diverse group of partners in all areas across the State.
- The MCRS operates a well-crafted website, www.SaveMOLives.com, that includes a variety of current, comprehensive, and useful information.
- The Missouri Department of Transportation (MoDOT) staff frequently shares relevant safety information on its Facebook page to its large following of almost 25,000 fans.
- Battle of the Belt is a popular high school program throughout many areas of the State.
- The Missouri State Highway Patrol (MSHP) employs a large, active team of 13 public information officers (PIOs) across the state. This team of PIOs is extremely engaged in occupant protection efforts.
- The MSHP creates its own highway safety programs and materials such as videos and graphics. The PIOs regularly share this information with all interested parties across the state.
- The MSHP’s website offers a variety of highway safety information.
- There are several strong sports marketing partnerships with teams such as the University of Missouri and the St. Louis Cardinals. These partnerships allow for educating fans through a variety of mediums including radio, billboards, television, stadium banners, etc.

5B. CHALLENGES

- There are not many programs to reach younger audiences that have outgrown a booster seat but aren't yet driving age.
- There is limited emphasis on outreach programs to minority populations with low occupant protection usage.
- There are few examples of partnerships and programs with employers to promote occupant protection.
- Currently, no teen safety education campaigns/materials or programs are geared toward parents.

5C. RECOMMENDATIONS

- Work with partners to implement/fund tween programs that are already in place such as the Safe Kids "Countdown 2: Drive" program.
- Build partnerships with minority organizations such as the Hispanic Chamber of Commerce, NAACP, etc. to help create and disseminate appropriate occupant protection messages. (Reference: "Closing the Circle: A Multi-Cultural Primer for State Highway Safety Offices" on the Governor's Highway Safety Association website.)
- Implement a traffic safety program that students and their parents are required to attend before they are eligible to receive their high school parking permit.
- **Establish strong partnerships with organizations such as the statewide Parent Teacher Association (PTA) or local PTAs and the state or local chapters of American Academy of Pediatricians (AAP) to distribute occupant protection education materials to parents.**
- **Establish new partnerships with large employers in the state to distribute occupant protection safety education materials. Provide large employers with model seat belt use policies to implement for employees.**
- **Create partnerships and implement occupant protection programs with faith-based organizations.**

6. COMMUNICATION

GUIDELINE:

As part of each State's communication program, the State should enlist the support of a variety of media, including mass media, to improve public awareness and knowledge and to support enforcement efforts to about seat belts, air bags, and child safety seats. To sustain or increase rates of seat belt and child safety seat use, a well-organized effectively managed communication program should:

- *Identify specific audiences (e.g., low belt use, high-risk motorists) and develop messages appropriate for these audiences;*
- *Address the enforcement of the State's seat belt and child passenger safety laws; the safety benefits of regular, correct seat belt (both manual and automatic) and child safety seat use; and the additional protection provided by air bags;*
- *Continue programs and activities to increase the use of booster seats by children who have outgrown their toddler seats but who are still too small to safely use the adult seat belts;*
- *Capitalize on special events, such as nationally recognized safety and injury prevention weeks and local enforcement campaigns;*
- *Provide materials and media campaigns in more than one language as necessary;*
- *Use national themes and materials;*
- *Participate in national programs to increase seat belt and child safety seat use and use law enforcement as the State's contribution to obtaining national public awareness through concentrated, simultaneous activity;*
- *Utilize paid media, as appropriate;*
- *Publicize seat belt use surveys and other relevant statistics;*
- *Encourage news media to report seat belt use and non-use in motor vehicle crashes;*
- *Involve media representatives in planning and disseminating communication campaigns;*
- *Encourage private sector groups to incorporate seat belt use messages into their media campaigns;*
- *Utilize and involve all media outlets: television, radio, print, signs, billboards, theaters, sports events, health fairs;*
- *Evaluate all communication campaign efforts.*

6A. STRENGTHS

- The Missouri Coalition for Roadway Safety (MCRS) has a strong and active Public Information Subcommittee and each local coalition is supported by a Missouri Department of Transportation (MoDOT) Public Information Officer (PIO).
- MoDOT employs a dedicated and engaged Community Relations Specialist who works closely with the Office of Highway Safety (OHS).

- There is a good working relationship between the MoDOT Community Relations Specialist and MoDOT's advertising firm, True Media.
- The State supplies their advertising firm with timely, relevant data which they use to create their media buy plans.
- Several specific occupant protection media campaigns are conducted such as Child Passenger Safety Week, Click It or Ticket, and the Youth Seatbelt Awareness Campaign.
- A wide variety of creative paid media is being utilized to target young males such as advertisements on Pandora, outdoor advertising at gas stations on video pump tops and pump top banner ads, and digital advertising on traditionally male oriented websites such as ESPN.com.
- True Media reports that their paid advertising campaigns generate large numbers of impressions.
- The Missouri Department of Revenue hosts a website, "Parent/Guardian Role in MO Graduated Driver License (GDL) Law", that includes rights and responsibilities and a parent/teen driving agreement.

6B. CHALLENGES

- The Office of Highway Safety (OHS) does not employ a dedicated full-time Public Information Officer (PIO).
- The regional Coalition PIOs are employees of MoDOT and also work on other MoDOT issues such as construction projects and funding issues and as a result aren't focused solely on traffic safety.
- The State has a large demographic area to cover including two major media markets with a limited amount of paid advertising dollars available.
- There appears to be very little, if any, evaluations conducted after media campaigns that measure both message retention and behavior change.
- Few media materials/campaigns are available to specifically inform parents of teen drivers about the primary seat belt provisions that are a part of the State's graduated driver licensing (GDL) law.
- No media materials/campaigns are available to specifically target minority populations.

6C. RECOMMENDATIONS

- Assign at least one full-time employee to the Office of Highway Safety to be the designated Public Information Officer.
- Create a variety of materials for Missouri Coalition for Roadway Safety (MCRS) members and other traffic safety partners that include culturally sensitive messaging for minority populations.
- Create advertising and other media materials to target both parents and teens that educate them about the primary seat belt provisions as part of the State's graduated driver license (GDL) law.
- **Use surveys/questionnaires to track message retention and behavior changes after public information and education campaigns are conducted.**
- **Use evidence-based research to raise support among the general population, legislators and other community leaders for primary enforcement laws.**
- Include booster seat education in key messages to children between ages five and eight and their caregivers.

7. EVALUATION

GUIDELINE:

Each State should access and analyze reliable data sources for problem identification and program planning. Each State should conduct several different types of evaluation to effectively measure progress and to plan and implement new program strategies. Program management should:

- *Conduct and publicize at least one statewide observational survey of seat belt and child safety seat use annually, making every effort to ensure that it meets current, applicable Federal guidelines;*
- *Maintain trend data on child safety seat use, seat belt use and air bag deployment in fatal crashes;*
- *Identify high-risk populations through observational usage surveys and crash statistics;*
- *Conduct and publicize statewide surveys of public knowledge and attitudes about occupant protection laws and systems;*
- *Obtain monthly or quarterly data from law enforcement agencies on the number of seat belt and child passenger safety citations and convictions;*
- *Evaluate the use of program resources and the effectiveness of existing general communication as well as special/high-risk population education programs;*
- *Obtain data on morbidity, as well as the estimated cost of crashes, and determine the relation of injury to seat belt use and non-use;*
- *Ensure that evaluation results are an integral part of new program planning and problem identification.*

7A. STRENGTHS

- The Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS) uses a variety of data sources for problem identification, setting goals, program evaluation, and measuring progress.
- The Missouri State Highway Patrol (MSHP) is the central traffic crash data collection agency for the state of Missouri. All local law enforcement agencies throughout the state provide MSHP copies of their crash reports. All of the crash reports received, along with crashes reported by MSHP, are tabulated and analyzed by MSHP.
- Missouri updated the Uniform Crash Report in 2012. Missouri revised crash report elements using Model Minimum Uniform Crash Criteria (MMUCC) data elements and has also signed a Memo of Agreement with NHTSA to adopt and use National Emergency Medical Services Information System (NEMSIS) data elements.
- Missouri has a Traffic Records Coordinating Committee (TRCC) that meets monthly. TRCC is working with custodial agencies to develop and maintain a comprehensive traffic records system.

- Missouri crash data are available using the online Statewide Traffic Accident Records System (STARS) maintained by MSHP.
- Local law enforcement agencies are encouraged to report crash data electronically using the Law Enforcement Traffic System (LETS) software. LETS provides an avenue for uploading local crash data into STARS, eliminating manual data entry, reducing wait time for usable electronic crash data, and decreasing data entry errors. OHS offers local law enforcement agencies LETS software for free in an attempt to increase electronic crash reporting.
- MSHP publishes unbelted fatal and disabling injury crash rankings for cities, counties, and unincorporated areas in the state.
- OHS and the Missouri Coalition for Roadway Safety (MCRS) regional coalitions take into account problem crash locations when distributing occupant protection grants.
- OHS shares counts of unbelted occupant fatalities with the MCRS regional coalitions every Monday. The coalitions disseminate that information regularly among their local traffic safety partners.
- OHS sets performance goals in their Highway Safety Plan based on raw number counts of occupants involved in crashes and observed occupant restraint use. OHS has identified priority target groups for occupant protection enforcement efforts based on the crash data. These include teens, rural occupants, young males, and pickup truck drivers.
- OHS routinely uses observational surveys to determine daytime seat belt use. Observational surveys of seat belt use are recurrently conducted by the Missouri Safety Center (MSC), University of Central Missouri. The observational surveys that MSC conducts include:
 - statewide daytime seat belt use among front seat occupants that meet federal register guidelines and are approved by NHTSA's National Center for Statistics & Analysis (NCSA).
 - annual survey of high school teen seat belt use.
 - biennial survey of commercial motor vehicle driver seat belt use.
- OHS tracks enforcement activities among its law enforcement agency grantees. Grantees report using a web-based electronic reporting system. Law enforcement grantees report detailed information on hours worked and provide counts of citations, warnings and arrests, and earned media information.
- Heartland Market Research LLC conducts an annual telephone survey of Missouri drivers. The survey has been conducted each of the last four years (2010-2013). The survey results provide information on trends in exposure to occupant protection enforcement messages, perceived risk of receiving a ticket for non-compliance with the adult seat belt law, and attitudes about primary enforcement seat belt laws.

7B. CHALLENGES

- OHS does not require all occupant protection grantees to consistently measure activities and report outcomes of their program efforts. While there is reasonable tracking of law enforcement program efforts focused on occupant protection, other projects do not appear to be monitored and evaluated closely.
- Little is known concerning the amount of occupant protection enforcement taking place outside of occupant protection mobilization periods.
- There is currently a one-year time lag in the completeness of the STARS crash data files.
- Children, approximately age 4 to 14, are not identified or left out of the seat belt observational surveys, making it difficult to evaluate effectiveness of programs targeting occupants in that age range.
- OHS has indicated that occupant protection at nighttime is a priority area, but there is little evidence that information or occupant protection programs in Missouri are focused on improving seat belt use at nighttime.
- Traffic safety partners use results of observational surveys to identify and target low belt use locations; however, these observational surveys are not designed to provide reliable estimates of belt use at the local level.

7C. RECOMMENDATIONS

- Encourage local agencies to use Law Enforcement Traffic System (LETS) or other similar systems that upload crash data to Statewide Traffic Accident Records System (STARS).
- Reduce average time for crash report entry into STARS.
- Provide assistance to local law enforcement agencies that may face technological challenges to coming onboard with electronic submission of crash reports.
- **Evaluate the effectiveness of local primary ordinances across the state of Missouri.**
- Develop a nighttime seat belt observational survey.
- Demonstrate and evaluate a nighttime seat belt enforcement program in primary law locations.
- **Do more in-depth analyses of unbelted fatalities and disabling injury crashes occurring at nighttime.**

- Restart the child restraint observational survey last conducted in 2009 and conduct it at least biennially.
- Conduct an observational survey that captures children ages 4 to 14.
- Include race/ethnicity, in so far as possible, into observational surveys.
- **Ensure that evaluation results are an integral part of program planning and problem identification. Evaluate the effectiveness of all current occupant protection programs including inputs and results.**

ASSESSMENT SCHEDULE

Monday, March 31, 2014

8:00 - 8:45		Leanna Depue and Bill Whitfield
8:45 - 9:30		Scott Jones
9:30 - 10:15		Officer Karl Streckfuss
10:15 - 10:30	Break	
10:30 - 11:15		Carrie Wolken
11:15 - 12:00		Pam Hoelscher
12:00 - 1:00	Lunch	
1:00 - 1:45		Kelly Jackson and Emily Ann Brown
1:45 - 2:30		LE Team (Scott, Jeremy, Marcus)
2:30 - 3:15		Michelle Gibler
3:15 - 3:30	Break	
3:30 - 4:15		Joe Rickman (Conf Call)
4:15 - 5:00		John Miller

Tuesday, April 1, 2014

8:00 - 8:45		Sgt. Paul Hornung
8:45 - 9:30		Cpt Tim Hull
9:30 - 10:15		Teresa Krenning
10:15 - 10:30	Break	
10:30 - 11:15		Gena Spence
11:15 - 12:00		Dianna Johnson
12:00 - 1:00	Lunch	
1:00 - 1:45		Chris Luebbert
1:45 - 2:30		Praveena Ambati
2:30 - 3:15		Chris Luebbert
3:15 - 3:30	Break	
3:30 - 4:15		Russ Dunwiddie
4:15 - 5:00		Ron Beck

Wednesday, April 2, 2014

8:00 - 8:45		Chief Dan Dunn
8:45 - 9:30		Sgt. Brian Leer
9:30-10:15		Lisa Sitler
10:15 - 10:30	Break	
10:30 - 11:15		Donna Greenwell and Steve Peek
11:15 - 12:00		Sgt. Rusty Rives and Lt. Darren Gallup
12:00 - 1:00	Lunch	
1:00 - 1:45		Sharee Galnore
1:45 - 5:00		Team Report Writing

Thursday, April 3, 2014

8:00 - 10:00		Team Report Writing (all day)
10:00 - 10:15	Break	
10:15 - 12:00		
12:00 - 1:00	Lunch	
1:00 - 3:00		
3:00 - 3:15	Break	
3:15 - 5:00		

Friday, April 4, 2014

8:00-9:00		Report Out
-----------	--	------------

ASSESSMENT TEAM CREDENTIALS

Susan N. Bryant, M.A., M.B.A.
831 Clark Street
Iowa City, IA 52240
leaderservices@yahoo.com

Susan (Sue) Bryant is currently a consultant for a small firm of which she is the principal. After almost thirty years of state employment, she retired as the director of the public transportation division of the Texas Department of Transportation (TxDOT). The public transportation division had 180 employees and an approximately \$150 million budget of federal and state grant programs for rural and small urban transportation systems, the state's medical transportation program, and public transportation planning. Prior to becoming division director, she served for over ten years as the director of the Texas traffic safety program.

During her career with TxDOT, she held the position of state traffic safety director, assistant to the deputy director for field operations, and highway safety planner and traffic safety program manager. She served as secretary and member of the board of the National Association of Governors' Highway Safety Representatives (now Governors Highway Safety Association) and member of the law enforcement committee for the Transportation Research Board.

She facilitated the strategic planning process for the Governors Highway Safety Association (GHSA) and completed a "How to Manual" for occupant protection for children for GHSA. She headed a project in Texas to conduct community assessments and develop local strategic plans for underage drinking prevention. In addition, she served as community liaison for the Travis County Alliance for a Safe Community, an underage drinking prevention coalition based in Austin. She has served on highway safety program assessment teams for Alaska, California, Colorado (2), Florida (2), Georgia, Idaho, Illinois, Kentucky, Maine (2), Maryland, Massachusetts, Montana (3), Missouri (2), North Dakota, Oklahoma, South Carolina, South Dakota, Vermont, and Wyoming. She served on the team to update the impaired driving assessment tool and was also on the team to develop assessment team training. She is currently project director for a leadership in impaired driving project for the National Highway Traffic Safety Administration.

For seven years, she served as a member and then chair of the City of Rollingwood, Texas, Planning and Zoning Commission. She served as chair of the City's Utility Commission and as director with the Rollingwood Community Development Corporation. She now serves as President of the Johnson County (Iowa) Dog Park Action Committee, a 501c3 corporation.

She has taught high school and adults, consulted for the media in major television markets, and taught management to state and local officials. She has been named to "Who's Who of American Women," has received the national Award for Public Service from the U.S. Department of Transportation, and is a two-time recipient of the American Association of State Highway and Transportation Officials (AASHTO) President's Modal Award for Highway Safety. She is also a graduate of Leadership Texas.

A Phi Beta Kappa graduate with Highest Honors in English from the University of Iowa, she holds a master's degree in communication from the University of Iowa and a master's degree in business administration from the University of Texas at Austin.

Cathy L. Gillen
Principal, The Gillen Group
 (443) 463-4449; cathy@thegillengroup.com

<i>Practice Focus</i>	Cathy Gillen is a Washington, DC based public affairs transportation consultant with more than 23 years-experience in the highway safety arena. She brings non-profits, NGOs, businesses and government together to create highway safety programs that save lives and prevent injuries on the nation's highways. As a former National Highway Traffic Safety Administration (NHTSA) official with the U.S. Department of Transportation (DOT), she is proficient in behavioral safety issues including impaired driving, occupant protection, distracted driving and teen and older driving. Having served as the Managing Director of the Roadway Safety Foundation she is also an expert on the engineering issues that affect roadway safety. Her relationships with key safety organizations, government agencies including NHTSA, the Federal Highway Administration and the Federal Motor Carrier Safety Administration, and transportation reporters allow her to meet both private and public sector needs.
<i>Clients</i>	Since 2005, Gillen's clients have included AAA, the AAA Foundation for Traffic Safety (AAAFTS), AARP, The American Highway Users Alliance (Highway Users), the Automotive Coalition for Traffic Safety (ACTS), Governors Highway Safety Association (GHSA), National Organizations for Youth Safety (NOYS), the Institute of Transportation Engineers (ITE), Mitsubishi Motors North America, Make Roads Safe, the Roadway Safety Foundation (RSF), the Connecticut Department of Transportation, the Missouri Department of Transportation and many others.
<i>Significant Accomplishments</i>	<p>Led a team of PR professionals to conduct one national and 23 local press conferences in state capitols across the country to announce a Ford Motor Company safety campaign. As part of the "Boost America!" campaign, Ford donated 1 million child booster seats to low-income families through a partnership with the United Way. The local press events included speakers such as local Governors Highway Safety representatives, Governors, state legislators, parents and automobile dealers. Gillen arranged all press outreach for the events and also served as a spokesperson for the campaign.</p> <p>Managed press relations and media outreach for the National Traffic Signal Report Card project for the Institute of Transportation Engineers. The goal of the FHWA-funded campaign was to raise awareness through the media of the importance traffic signals play in moving traffic safely and efficiently across the United States. Gillen secured national and local press coverage in such media outlets as NBC Nightly News, MSNBC and CBS Network Radio.</p> <p>Created a safety coalition and campaign in South Carolina known as <i>Recognize, React, Recover</i> to address the importance of using rumble strips to prevent run-off-the-road crashes, particularly on rural roads. The campaign brought together the state department of transportation, public safety agencies, law enforcement agencies, victims of car crashes and private-sector businesses to create an educational DVD and brochure, hold a partner luncheon and a news conference to launch the campaign. Press coverage of the campaign was widespread and the DVD and brochure have been distributed to more than 5,000 safety partners across the country.</p>

Held 15 child passenger safety inspection stations for Mitsubishi's child passenger safety program known as *Kids Safety First* in September 2010, Summer 2011 and Fall of 2012. Gillen managed all logistics for the events which were held at Mitsubishi dealerships in major media outlets such as Miami, Chicago and Kansas City. In addition to managing all logistics for the events, she conducted media outreach for the events including press conferences with speakers from NHTSA and GHSA. She also managed a partnership with a major child safety seat manufacturer who provided free child safety seats for the events.

- Client Benefits* Gillen began her career in 1992 in the press office of the Maryland State Highway Administration in Baltimore, MD. She then went on to public affairs positions with the Governors Highway Safety Association, Advocates for Highway and Auto Safety and the National Highway Traffic Safety Administration. She then worked for a DC-based Strategic Communications firm where she headed up the Ford Motor Company account and managed other transportation safety accounts before starting her own practice in 2005.
- Other Activities* Gillen is a current board member of the Washington Regional Alcohol Program (WRAP); leads the National Safety Council's Maryland Safe Teen Driving Coalition; is the Maryland Representative for the National Association of Women Highway Safety Leaders (NAWHSL); and is a member of the Road Gang and the Washington Automotive Press Association (WAPA).
- Communications* Gillen has conducted dozens of media interviews, and given dozens of presentations on issues such as impaired driving and roadway safety, to highway safety groups and other organizations across the country.
- Distinctions* Gillen has received the NHTSA Administrator's Award for Excellence and The Century Council's Kevin Quinlan Traffic Safety Leader Award. She holds a bachelors of science from the University of Maryland in Journalism with a specialization in public relations and a master's degree in Publications Design from the University of Baltimore.

Lori K. Haskett

**500 SW Danbury Lane
Topeka, KS 66606
785-272-3787
lorihaskett@sbcglobal.net**

Employment History:

August 2002 to Present Kansas Department of Health and Environment
Bureau of Health Promotion
Director, Injury Prevention and Disability Programs

Responsibilities include developing policy for state programs, recruiting and maintaining public/private partnerships, fiscal management, development of grant applications, grants management, staffing assignments and budget development.

October 1999 to August 2002 Network of Employers for Traffic Safety (NETS)
Kansas NETS Coordinator

Responsibilities included: set-up and management of the KS NETS office. Coordinator is responsible for communications, administrative/marketing support and project management for association traffic safety programs and services within Kansas.

March 1999 to October 1999 AAA Kansas
Coordinator of Public Relations and Promotions

Responsibilities included: media relations, Show Your Card & Save program, Four Diamond Award presentations, editor of office newsletter

March 1998 to March 1999 Olsten Staffing Services
Personnel Supervisor

Responsibilities included: interviewing, placing employees in temporary, temporary to permanent, and permanent employment. Supervising productivity, working with collections, assisting with PeopleSoft payroll, workers compensation, and unemployment.

March 1991 to March 1998 AAA Kansas
Customer Service Representative
Promoted to Auto Travel Manager June 1994
AAA National Certified Trainer, Heathrow, FL

Oversaw Auto Travel operations in the six Kansas offices as the State Auto Travel Manager.
Responsibilities included: recruiting, training, scheduling, ordering supplies for the department, and making hotel and car reservations for members.

Education:

Bachelor of Arts, Speech Communications, Washburn University, 1994
 Hayden High School

Grants Administration Experience:

Fire Injury Prevention Project Grant, CDC, 2002 – 2011
 Core Injury Prevention and Control Project, CDC, 2002 – Present
 Sexual Violence Prevention and Education Program, CDC, 2002 – Present
 Emergency Medical Services for Children, HRSA, 2003 – Present
 State Implementation Projects for Preventing Secondary Conditions and Promoting the Health of People with Disabilities, CDC, 2005 – 2012
 Education, Training and Enhanced Services to End Violence Against and Abuse of Women with Disabilities, DOJ, 2002 – 2004 and 2006 - 2011
 Network of Employers for Traffic Safety Program, KS Dept. of Transportation, 1999 - 2002

Affiliations:

Consumer Product Safety Commission – Kansas Designee – 2009 - Present
 Safe States Alliance Executive Committee – 2008- Present
 President – 2011 to 2013
 Past – President - Currently
 Longaberger Consultant – 1995 to Present
 Kansas Public Health Association Member – 2002 - Present
 Certified Child Passenger Safety (CPS) Technician - Instructor 2000 – 2011
 Certified Child Passenger Safety (CPS) Technician 2011 - Present
 Safe Kids Kansas Coalition CPS Chairperson – 2000 to 2009
 National Child Passenger Safety Board Member – 2006 - 2008
 Kansas Chamber of Commerce and Industry, member, 2000 – 2002
 ABWA – Career Chapter – 1999
 United Way Loaned Executive – 1999
 Society of Human Resource Management – 1998, 1999

MARK SOLOMON**Preusser Research Group, Inc.****1104 Van Buren Avenue****Oxford, MS 38655**

Tel: 662-236-9288

Fax: 662-236-9390

mark@preussergroup.com

Mark (Mark) Solomon is currently Vice President of Preusser Research Group (PRG). PRG is a full service research firm specializing in transportation, highway safety, and issues related to drug and alcohol abuse. PRG has offices in Trumbull, CT and Oxford, MS.

Mark has worked at PRG for 20 years. He directs overall operations in PRG's Oxford, Mississippi office. Mr. Solomon has successfully managed a large number of highway safety projects during his time at PRG. The list of clients he has worked with includes, but is not limited to, National Highway Traffic Safety Administration (NHTSA), Insurance Institute for Highway Safety (IIHS), National Institute for Child Health and Human Development (NICHD), Federal Motor Carrier Safety Association (FMCSA), AAA Foundation for Traffic Safety, Bureau of Indian Affairs (BIA), and the National Safety Council (NSC).

Over the past 20 years, Mark has completed work in every NHTSA Region and worked with nearly every highway safety office in the United States. Mark's research and evaluation work has appeared in over 70 research reports and journal articles. He also serves as a reviewer for the Transportation Safety Board's Occupant Protection Committee.

Mark is currently working on projects to improve seat belt use at daytime and nighttime, evaluating efforts to reduce distracted driving, and currently serves as the evaluation manager for NHTSA's *More Cops More Stops* high visibility enforcement program in Tennessee and Oklahoma.

Before joining PRG, Mr. Solomon was an analyst with the Florida Department of Highway Safety where he provided analytical support to the Governor's Office and the Legislature, as well as state and local agencies.

Mark earned an undergraduate degree at Millsaps College and a Master of Science degree from Mississippi State University.

Thomas H. Woodward
 7606 McClellan Ave.
 Boonsboro, Maryland 21713

PROFESSIONAL BACKGROUND

Thomas H. Woodward retired from the Maryland State Police on July 1, 2013 after a 36 year career as a law enforcement officer in Maryland: eight years with the Frederick City Police and 28 years with the Maryland State Police. At the time of his retirement he was the Commander of the Hagerstown Barrack. As Commander, Tom is credited with being the first to implement the Data Driven Approach to Crime and Traffic Safety (DDACTS) within the Maryland State Police. He also brought increased media attention to highway safety initiatives and enforcement actions of troopers within Washington County, MD.

Prior to transferring to the Hagerstown Barrack, Tom served in the Chemical Test for Alcohol Unit for eleven years, six of those as the Commander. In this position he was responsible for the training of all breath test operators, acquisition and maintenance of all breath testing instrumentation, training of sobriety checkpoint managers, Standardized Field Sobriety Testing instruction and oversight of the state's Drug Recognition Expert (DRE) Program. He has served as an adjunct representative for the Office of Government Affairs, reviewing legislation, recommending departmental positions and testimony, and testifying before the State Legislature on many highway safety issues. He has served on the staff of the Chief of Field Operations Bureau, and as the Executive Officer for the Commander of the Transportation Safety Division. He administered highway safety grants of the Maryland State Police Field Operations Bureau for two years and supervised the Maryland Fatality Analysis Reporting System (FARS) for two years.

Mr. Woodward has been a Standardized Field Sobriety Testing (SFST) Instructor and DRE Instructor for over 20 years. He also instructs the NHTSA SFST and DRE Instructor Development training. He served as the State Coordinator of the DRE program for 10 years.

Since retirement Mr. Woodward has served on several state occupant protection assessment boards, evaluating the effectiveness of occupant programs and identifying areas for improvement.

EDUCATIONAL BACKGROUND

Mr. Woodward received a Bachelors Degree in Organizational Leadership and Development from Wheeling Jesuit University in May 2005. He is also a graduate of the Northwestern University School Police Staff and Command.

ORGANIZATIONAL AFFILIATION

- International Association of Chiefs of Police (IACP)
- IACP Drug Recognition Expert Section
 - Officer 2006-2009
 - Chair - 2009
- Mothers Against Drunk Driving (MADD) – Maryland Operations Council

Motorcycle Assessment Recommendations						
Number	Recommendation	Will recommendation be addressed?	Tasks to be completed	Assigned to	Target date	Current Status
Program Management						
I. 1	Designate a full-time motorcycle safety coordinator within the HSD	No, lack of funding and FTE allocation. All HSD program specialists are obligated to work in more than one program area.	N/A	N/A	N/A	N/A
I. 2	Develop action plans to provide accountability, measurements, and completion dates for strategies in the 2008-2012 Missouri's Blueprint to ARRIVE ALIVE and the 2009 Highway Safety Plan & Performance Plan	No, there are performance measures in the 2010 HSP & Performance Plan. The Blueprint to ARRIVE ALIVE, however, is an umbrella document that focuses on fatalities and serious injuries; it does not drill down to the micro level of action planning strategies.	N/A	N/A	N/A	N/A
I. 3	Take the lead in facilitating and coordinating cooperative efforts among motorcycle safety stakeholders to provide more unified and focused countermeasures.	Yes	1) Make contacts to develop a working group to promote helmet use and counter the efforts of lobbying groups that attempt to repeal Missouri's all-rider helmet law; 2) Work with Dr. Peterson @ SMARTER-USA.org (Michigan) to determine if Missouri should/could become a chapter or the best way to replicate their program	1) Leanna Depue and 2) Michael Davis	1) April 2010 and 2) Mid-May 2010	ongoing
I. 4	Develop a written Memorandum of Understanding to define the specific responsibilities of the Highway Safety Division and the Missouri Safety Center for providing the MMSP to Missouri Motorcyclists.	Yes	1) Meet with MoDOT Chief Counsel to begin development of MOU; 2) Host meeting and begin work on writing MOU and determine whose signatures are required on MOU; 3) Execute MOU adoption process and send copies and/or originals to appropriate offices	Chris Luebbert	1) March 2010; 2) April 2010; 3) December 2010; 4) January 2012	ongoing

Motorcycle Personal Protect Equip						
II. 1	Maintain and strengthen the universal helmet law by providing significant fines and court costs as penalties for noncompliance	Yes and No	Due to the long-term efforts of the anti-helmet lobbyists, Missouri's experience indicates that it would appear to be a waste of effort to attempt to increase fines and court costs—our efforts must be directed at maintaining our existing law.	MCRS Legislative Subcommittee and Leanna Depue	Ongoing	ongoing
II. 2	Develop an aggressive campaign to encourage helmet use through effective communications campaigns	Yes, but expanded to include safety gear.	Meeting to discuss what is needed, funds available, what might be used that has already been produced by other states	Chris Luebbert and CR staff	Ongoing	ongoing
II. 3	Coordinate efforts between public, private, and nonprofit groups to encourage the use of proper protective gear by motorcyclists	Yes, but will be expanded to include all safety gear.	Meet to determine: Whether any partners have been overlooked; funds available for materials; best venues to promote the issue; whether there are materials available from other states	Chris Luebbert, CR staff, Michael Davis	April 2010	Ongoing, though MMSP continuously promotes though training
Motorcycle Operator Licensing						
III. 1	Analyze the unlicensed motorcycle operator problem and identify why individuals do not complete the licensing process. Initiate and evaluate a three-year plan to employ best practices and strategies that encourage full licensing.	Yes	1) Discussion between DOR & MSHP; 2) Draft and submit DOR rule change for approval; 3) Submit to Secretary of State for comment period; 4) Meet to determine whether allowing a waiver of the skills test in the Experienced Rider Course is a valid option and how it would be accomplished	Gina Wisch (DOR), Rhonda Czarnecki (MSHP Driver Examiners), Chris Luebbert, and Michael Davis	1) December 2009; 2) May 2010; 3) December 2010; 4) June 2010	Cannot use rule-change process. Must be done through the legislative process. Ongoing.

III. 2	Create a work team with stakeholders from the DOR, the MSHP, the MMSP, and the HSD to review and revise the current motorcycle license testing. The revised process should provide real-time electronic transfer of information, add operational restrictions for all instruction permit holders, limit the number of instruction permits that may be issued to individuals, and deploy testing instruments that accurately and effectively evaluate safe and responsible motorcycle	Yes and No	The state does not have the capability for electronic transfer of information. We are going through process for updating manual with other agencies and have stakeholders comments provided to DOR forms group for inclusion into the final version of the MOM.	DOR, MSHP, MMSP, Chris Luebbert	December 2010	MSHP changed the motorcycle testing standards in 2011. The capability to electronically transfer information does not exist.
III. 3	Expand the license waiver program to accept the knowledge tests administered at rider training courses.	No, Missouri stakeholders are of the opinion that the knowledge test should continue to be administered by the Missouri State Highway Patrol Driver Examiners	N/A	N/A	N/A	N/A
III. 4	Create processes, data files, and reports to track individuals who apply for motorcycle endorsements or licenses. This includes test results, the number of applications for instruction permits, how long the permits are held, when individuals received their endorsement or license, whether they participated in the license waiver program, and whether they completed the licensing process.	No, lack of funding funding and manpower resources; sharing and security issues of linking MSC with the Patrol and DOR.	N/A	N/A	N/A	N/A
III. 5	Implement a compliance and quality assurance program in MSHP to ensure that all licensing tests are administered according to established procedures and standards.	Yes	Examiner training is currently being conducted.	DOR	June 2010	Completed in 2011
III. 6	Revise the MOM to include crash data, proper licensing information, and unique or dangerous riding conditions, and to encourage rider training.	Yes	Go through process to make pertinent edits to MOM	Chris Luebbert, Michael Davis, and Joni Smith	May 2010	Completed in 2011
Motorcycle Rider Educ & Training						
IV. 1	Develop a formal curriculum review and evaluation process to assure that the approved training curriculum meets the needs of Missouri Riders.	Yes	Follows MSF curriculum.	N/A	N/A	

IV. 2	Evaluate BRC instruction and instructional techniques, including the knowledge and skills tests, to ensure that the course meets the objectives of teaching individuals the knowledge and skills to safely and responsibly operate motorcycles	No, Missouri follows the Motorcycle Safety Foundation standards and is comfortable with that.	N/A	N/A	N/A	
IV. 3	Remove tuition caps and dedicate the available funding towards program monitoring, evaluation, and developing additional safety programs.	No, According to 302.135 RSMo, training sites may charge a reasonable tuition fee as determined by the director. The tuition supports the training sites so even if the cap were removed, the state wouldn't be able to access that money. The tuition is intended to support the cost of the training; it is not for the purpose of letting the training sites make a profit.	N/A	N/A	N/A	
IV. 4	Audit all course providers regularly to ensure that the skills test is being correctly administered.	Yes	Applicable audits	Michael Davis	Continuous	ongoing
IV. 5	Develop standards and methodology to annually evaluate the effectiveness of the motorcycle training program.	No, All students complete an end-of course survey. Students are also invited to fill out a follow up on-line survey several months after completion of the course.	N/A	N/A	N/A	
IV. 6	Incorporate Missouri-specific information into the knowledge test.	Yes	Review and submit changes to MOM to DOR	Michael Davis	March 2010	Completed in 2011
IV. 7	Develop a formal QAV (Quality Assurance Visit) plan for training sites and instructors. Revise QAV forms and procedures to provide more comprehensive and effective evaluation tools	Yes	Review existing monitoring process	Michael Davis	TBD	Completed in 2011
IV. 8	Require that student driver's license or permit numbers be recorded along with written and riding test scores.	No, The two systems (test results to DOR's licensing) are not linked. There are security issues associated with this and also with the fact that some drivers' licenses have social security numbers on them.	N/A	N/A	N/A	
Motorcycle Oper Under Influen Alcohol/Drugs						
V.1	Incorporate motorcycle-specific messages into current MoDOT impaired driving campaign materials and enforcement activities	Yes	Incorporate motorcycle message into impaired driving campaign	Chris Luebbert and Reeve White	May 2010	ongoing

V.2	Include impaired motorcyclist enforcement as a specific component of enforcement grants.	No, law enforcement's job is to target all impaired drivers regardless of the vehicle they are operating. Another concern is the fact that there is a much smaller volume of impaired motorcyclists as compared to impaired drivers of other vehicles. However, the Missouri Safety Center (MSC) has agreed to inform local law enforcement agencies of dates and locations of rallies being held so that they might be able to conduct saturation enforcement efforts at such events.	N/A	N/A	N/A	
V.3	Develop training programs for prosecutors and judges on the problem of impaired driving.	No, the type of vehicle involved in an impaired driving case (e.g., passenger car, pick-up truck, motorcycle) is almost entirely irrelevant	N/A	N/A	N/A	
V.4	Investigate all single-vehicle motorcycle fatalities, including determining the BAC levels in all cases.	Yes	This is already being done	N/A	N/A	ongoing
V.5	Capitalize on the enthusiasm, expertise, and passion of law enforcement partners to develop and implement impaired-riding efforts. Organize and conduct law enforcement saturations, checkpoints, and operations with an emphasis on motorcycles.	Yes, to the extent law enforcement is willing to participate.	Research impaired riding enforcement efforts that are working in other states; Determine appropriate venue to make a presentation to law enforcement agencies (LETSA, MPCA, MSA); Compile a list of dates and locations of rallies to be held in Missouri during 2010; Update list on a monthly basis	Chris Luebbert and Michael Davis	Spring 2010	Continuous
V. 6	Conduct motorcycle safety campaigns focused on impaired riding. Incorporate materials available from NHTSA, MSF, American Motorcyclist Association (AMA), and individual State programs.	Yes	Will not conduct motorcycle specific impaired riding campaign. It will be incorporate as part of the other statewide DWI campaigns.	Chris Luebbert	N/A	N/A
V. 7	Distribute NHTSA's "Detection of DWI Motorcyclists" materials to law enforcement agencies statewide.	Yes	Communicate with LE stakeholders to determine how many they need, monitor new "Roll Call" video release."	Chris Luebbert	Spring 2010	ongoing

V. 8	Develop relationships with rider groups to encourage self-policing and a culture of zero tolerance of drinking and riding	Yes	Discuss with key motorcycle groups.	Chris Luebbert	Continuous	ongoing
Legislation & Regulations						
VI.1	Maintain and strengthen the universal helmet law by providing significant fines and court costs as penalties for noncompliance.	No	Our resources are most maximized by maintaining the laws we have.	All	N/A	
VI.2	Introduce legislation to limit the number of motorcycle instruction permits that can be issued to an individual.	Yes	through a change to the Department of Revenue administrative rules. Although the changes have been drafted, DOR is undergoing a modification to the way administrative rules are filed internally. The changes are still in the pending approval stage at DOR; after approval, they will be filed with the Secretary of State. So forward movement on this action will be dependent upon when the filing modification is complete.	Brad Brester and Gina Wisch at DOR, Joni Smith and Chris Luebbert at HSD	Cannot be accomplished through Admin. Rules process. Will take legislative change.	ongoing
VI.3	Amend the Administrative Rule to allow the program to offer any curriculum approved by MoDOT	No, Missouri's administrative rule states that the approved curricula is the current version of the Motorcycle Safety Foundation Motorcycle Rider Course or Experience Rider Course. MMSP and the HSD will continue to monitor other curricula to see if something comparable is released; in which case, the Administrative Rule could always be amended at that time	N/A	N/A	N/A	N/A

Law Enforcement						
VII.1	Identify motorcycle enforcement as a specific component of enforcement grants.	Yes, however the Highway Patrol has indicated that they do not focus on any particular type of vehicle when they are conducting HMV enforcement. So specific motorcycle-related events will have to be focused on in order to enforce moving violations associated with motorcycle riders.	Review information on the web and from motorcycle publications to determine when/where rallies will be held; notify HSD of rally dates/locations; publicize to law enforcement agencies the rally dates/locations and need for enforcement Inform law enforcement agencies that they may utilize HMV grant funds to enforce motorcycle violations in targeted areas	Michael Davis, HSD law enforcement staff	May 1, 2011	ongoing
VII.2	Encourage all law enforcement to take a zero-tolerance approach to motorcycle-related violations.	No, the HSD may provide training to enhance enforcement of motorcycle violations, but a “zero tolerance” approach is departmental discretion. The MSHP has indicated that they only take a zero tolerance approach on DWI and seat belt violations, and they will not be expanding this to include motorcycle violations.	N/A	N/A	N/A	N/A
VII.3	Partner with the Chiefs of Police and Sheriff’s Associations to educate law enforcement regarding motorcycle safety issues and crash causation factors.	Yes	Compile information on motorcycle crash causation factors, Contact MPCA & MSA to request permission to publish information in their publications and/or web sites, Work with SMCR to write article(s), Provide information to MPCA & MSA to be included in their publications and/or web sites, Provide information to MSHP and request they share data and issues with their instructors to include in training, Provide information to LETSAC to be included in their conference and/or other training opportunities	John Miller, Chris Luebbert, Leanna Depue	continuous	ongoing

VII.4	Develop data-driven countermeasures and implement selective enforcement where fatal and injury motorcycle crashes are occurring.	Yes	Compile data, Share data with enforcement agencies, Encourage law enforcement agencies to use data to support selective enforcement efforts, if warranted, and to use HMTV grant funds for this purpose of needed, Determine whether educational efforts can be targeted toward problem	John Miller, Chris Luebbert, Michael Davis	Fall 2010	Crashes are sporadic in location and time of day. High crash locations really don't exist.
VII.5	Develop and distribute motorcycle crash statistics and motorcycle-specific information to aid law enforcement agencies in training and planning.	Yes	Compile data, Share data with enforcement agencies , Encourage law enforcement agencies to use data to support selective enforcement efforts, if warranted, and to use HMTV grant funds for this purpose of needed	John Miller and Chris Luebbert	Continuous as data is updated	ongoing
VII.6	Identify and fund “best practices” that are proven effective in motorcycle safety efforts.	Yes	Review “Countermeasures that Work” to determine those that can be incorporated in Missouri	Chris Luebbert and Michael Davis	ongoing	ongoing
VII.7	Include patrol-level law enforcement officers in the review and revision of the State’s Uniform Accident Report.	Yes	This is already occurring. There are 18 law enforcement officers included in the rewrite of the crash report form.	Traffic Records Coordinating Committee	Ongoing	ongoing

Highway Engineering						
VIII.1	Maintain Missouri's roadways in compliance with the Targeted 10 concerns listed in the 2008-2012 Missouri's Blueprint to ARRIVE ALIVE and in compliance with the Transportation Research Board of the National Academies' National Cooperative Highway Research Program, Report 500, Volume 22.	Yes	The motorcyclists have indicated they have issues with potholes, friction surface, tar patching, and side road intersections with loose gravel; MoDOT will continue to address these issues. MoDOT specifications require that there be no more than a ¼" lip when diamond grinding is conducted. The department has taken a proactive approach by stressing the importance of this specification when	Leanna Depue	January 31, 2011	New Blueprint to be unveiled October 2012.
Motorcycle Rider Conspicuity & Motorists Awareness Programs						
IX.1	Survey the non-motorcycling population to determine attitudes and opinions towards motorcycling. Use the information to ensure existing "Share the Road" materials are appropriate, develop new materials if needed, and create an effective distribution plan for the materials	No, not at this time.	N/A	N/A	N/A	N/A
IX.2	Implement comprehensive efforts to educate motorcyclists about how to make themselves visible to motorists.	Yes	Add more visual information on the web site to identify conspicuity, Add more visual information on the web site to identify conspicuity, Provide a link to www.video.about.com/motorcycles/Motorcycle-Visibility-.htm , Develop conspicuity brochure, Provide MMSP Conspicuity brochure to MSHP Driver Examiners for distribution to new motorcyclists, Include new fields in the crash report to address whether a motorcyclist was wearing reflective clothing and a compliant/non-compliant helmet.	Michael Davis, Chris Luebbert, Randy Silvey, Rhonda Czarnecki, Reeve White	Ongoing	ongoing

IX.3	Communicate through law enforcement and motorcycle rider groups to dispel the myth that other drivers are a motorcycle rider's biggest threat.	Yes	Verify percentage of motorcyclists involved in single-vehicle crashes, Develop creative materials (e.g., posters) to be displayed at motorcycle rallies, at DOR license offices, safety fairs, etc.	Michael Davis, Joni Smith	Ongoing	Chris Luebbert speaks frequently with motorcycle groups and shares crash stats in both single and multi-vehicle crashes.
IX.4	Ensure outreach efforts also target independent riders since rider education is not mandatory and a significant portion of riders are not affiliated with a rider group.	Yes	The Missouri Safety Center (Missouri Motorcyclist Safety Program) and MoDOT Highway Safety division will continue to produce public awareness campaigns to target all riders.	Chris Luebbert, Michael Davis	Ongoing	ongoing
IX.5	Include information on sharing the road with motorcycles in the Missouri Motorists' Handbook (Missouri Drivers Guide	Yes	This information is found on page 57.	N/A	N/A	N/A
Communications Program						
X.1	Assign primary responsibility for motorcycle safety communications to the HSD. Document the review and approval process for motorcycle safety materials and messages to ensure subject matter experts (e.g., the State coordinator and program manager) and other key players (e.g., Motorcycle Safety Advisory Committee, rider groups) have input during the development production phases	No, the HSD will not have primary responsibility for the motorcycle safety communications; that responsibility will fall upon the Public Relations committee of the Missouri Coalition for Roadway Safety. Coordination for materials, communications and outreach will be coordinated amongst the partners: MSC, HSD, MSHP, DOR and others.	N/A	N/A	N/A	N/A

X.2	Develop a comprehensive communications plan. The plan should include: A research component to identify problem areas to ensure that appropriate themes and messages are developed; Goals and objectives with realistic and measurable outcomes; Messages regarding the importance and availability of rider education, proper helmet and protective gear use, sharing the road, and the effects of alcohol and motorcyclists; Definition of target audiences, including motorists, independent riders, sport bike riders, returning riders, etc.; Use of appropriate multimedia channels; A comprehensive plan for community outreach at events; An evaluation component to measure pre- and post-campaign awareness and impact on motorist and motorcyclist behavior.	Yes, to an extent.	The Public Relations subcommittee (MCRS) and the System Management Community Relations division (MoDOT) will work to ensure that communications materials are reviewed by all partners and no conflicting or unsuitable messages are produced.	MCRS and MoDOT CR	Ongoing	Ongoing
X.3	Utilize the MSAC to coordinate PI&E efforts among the agencies that have the most involvement with the motorcycle safety program.	No, the MSAC doesn't have the authority to coordinate the efforts. The MCRS Public Information subcommittee will be utilized to coordinate the efforts statewide and with the local coalitions, as appropriate.	N/A	N/A	N/A	N/A
X.4	Update communications plans for existing campaigns, such as seat belt awareness and impaired driving, to include motorcycle safety messages about helmet use and protective gear and impaired driving respectively	No, motorcycle safety messages will be considered when appropriate, but we do not believe it would necessarily be prudent to mix seat belt and helmet messages.	N/A	N/A	N/A	N/A
X.5	Create a style guide or standard look and feel for all motorcycle safety materials.	Yes, this is something MCRS and MoDOT already try to do with all the campaigns.	Continue efforts to standardize motorcycle safety materials	PI subcommittee	Ongoing	Ongoing
X.6	Strengthen relationships with rider groups; utilize them to distribute messages/materials; explore the possibility of having a representative serve on the MSAC.	Yes	Determine groups in Missouri and work toward building a relationship with them, Research rally dates and locations, Assure the a rider representative serves on the MSAC	Michael Davis and Chris Luebbert	Ongoing	Michael Davis and Chris Luebbert have developed great partnerships with rider groups and engage in frequent dialog with them.

X.7	Develop a listserv for the HSD and the MMSP to collect contact information from people they encounter at rallies, interested rider education attendees, rider groups, etc., and send messages, statistics, and program updates via inexpensive, effective, electronic means.	Yes	Students at UCM will research on internet to find information on rider groups and what other states have available Set up the listserv on the MMSP web site	Michael Davis	June 1, 2010	ongoing
X.8	Continue to leverage paid media buys and negotiate bonus spots to be placed outside of the heavy rotation periods and arrange drive-time interviews during the riding season.	Yes	Continue to look for opportunities to leverage media buys and negotiate bonus spots; arrange drive-time interviews during riding season	PI subcommittee	Ongoing	Uncertain with the MoDOT CR changes
X.9	Collaborate with the DOR to develop and distribute materials and messages about the importance of being properly licensed.	Yes	Work on development of materials in conjunction with changing administrative rule for motorcycle licensure	Chris Luebbert and Gina Wisch	January 31, 2011	Admin. Rule change will not happen. HS has frequent conversations with rider groups about being properly licensed.
X.10	Explore distributing materials at trauma centers and other medical facilities.	No, ER docs have indicated that trauma centers are not the best place to reach people who have been in a crash or their family/friends because there are too many stressors occurring at that time (patient's welfare, insurance issues, liability/insurance issues)	N/A	N/A	N/A	N/A
X.11	Develop outreach efforts for "returning riders" (i.e., motorcyclists who haven't been riding for years and may need to update their knowledge and skills).	Yes	Ask the Insurance Coalition if they would contact their members to see if discounts are given to riders who complete MMSP training Meet with SMCR to discuss development of materials (such as the "Welcome Back" campaign the MSSEP is working on)	Chris Luebbert and Michael Davis	May 1, 2011	MMSP added Returning Rider BRC to curriculum.
X.12	Capitalize on relationships with news media to raise awareness of motorcycle safety issues, programs, and accomplishments through earned media.	Yes	This is something MCRS and MoDOT already do, and all of the MCRS regions and MoDOT districts help with as well.	PI subcommittee	Ongoing	Ongoing

Program Evaluation & Data						
XI.1	Create a system to identify and collect critical information to assist with problem identification, establishing priorities, and developing countermeasures to reduce motorcycle crashes, injuries, and fatalities.	Yes	The state already collects critical crash data. This data, and countermeasures/strategies to address the problems, are included within MoDOT's annual Highway Safety Plan and also within the Missouri Coalition for Roadway Safety's Blueprint (which is updated every 4 years).	Chris Luebbert, Michael Davis, and Joni Smith	Ongoing	Ongoing
XI.2	Establish a formal planning process for the implementation and evaluation of motorcycle countermeasures that includes detailed action steps with assigned responsibilities, identification of partners, funding requirements, status and objective evaluation criteria to measure success, effectiveness, and value.	Yes, to an extent. Responsibility for this level of detail would fall on the HSD program manager Christopher Luebbert, whose workload is already severely extended. Overall goals for the motorcycle program area have been established within Missouri's Blueprint to ARRIVE ALIVE and within the state's strategic Highway Safety Plan.	Review status of the strategies in both the Blueprint the and Highway Safety Plan.	Chris Luebbert	Ongoing	Ongoing
XI.3	Evaluate all countermeasures for their impact on reducing motorcycle crashes, injuries, and fatalities.	Yes.	Set up meeting with Leanna Depue to determine which countermeasures can or cannot be evaluated	Chris Luebbert	May 1, 2010	ongoing

	Impaired Driving Assessment Recommendations					
	Recommendation	Will recommendation be added	Tasks to be completed	Assigned to	Target date	Current Status
I	PROGRAM MANAGEMENT AND STRATEGIC PLANNING					
1A1	Ensure adequate, broad-based representation from all critical individuals and organizations on the Executive Committee of the Missouri Coalition for Roadway Safety	Yes	Submit for EC vote, an additional duty (in the MCRS Purpose & Procedural Guidelines) requiring the EC Chair to conduct a yearly review of the membership list to determine existing vacancies and assure such vacancies are filled in a timely manner, consider new additions to EC, and fill all vacancies	Leanna Depue, Executive Comm. Chair	12/3/2009	Subcommittee has changed chairs and filled any vacancies
1A2	Expand local law enforcement task forces to provide statewide coverage	Yes	Look for opportunities to promote the idea of local task forces	HS Law Enforcement program staff	Ongoing	We have expanded on existing task forces and have broadened work with regional coalitions.
1A3	Strengthen and support regional coalitions so all are operating at a minimal level of effort	Yes	Conduct information-sharing meetings with regional coalition representatives and attend regional coalition meetings to provide support and share information from the state level	Highway safety program staff liaisons who are assigned to the regional coalitions	As regional coalition meetings are set	Ongoing
1A4	Provide active and participatory traffic safety liaison with state and local prevention coalitions	Yes	Assign appropriate staff to serve as members on prevention coalitions and attend scheduled meetings.	Leanna Depue and Bill Whitfield	Ongoing	Ongoing
Strategic Planning						
1B1	Expedite the completion of the state strategic plan for impaired driving including goals, objectives, strategies, and initiatives for a systematic approach.	Yes	State Impaired Driving Strategic Plan is complete and has been disseminated	Jackie Rogers, HSD Alcohol Program Coordinator	1/22/2010	Done
1B2	Expedite the development of the new State Traffic Records Strategic Plan	Yes	Continue development of the plan under contract with data nexus	STRCC	9/30/2010	Final plan complete
Program Management						
1C1	Analyze and use impaired driving system-related data such as arrests, convictions, and BAC levels in the State's problem identification process.	Yes	Collect data submitted from grantees into the REJIS grants management system	HS Law Enforcement program staff	As activity reports are submitted	Ongoing, DPS recently received a grant that will make this easier.
1C2	Develop a highway safety program management manual including a routine procedure to incorporate and implement updates.	No, staff time is not available to develop another manual. This information is available to staff, just not in a single source.				
Resources						
1D1	Legislate an increased fee and/or fine structure in the State requiring that the money received be placed in a dedicated fund to reduce the increasing gap between available resources and the State's impaired driving needs.	No, the Missouri constitution requires that all penalties, forfeitures, and fine be distributed annually to schools.				
1D2	Pursue additional corporate/business sponsorships and support of events, programs, and campaigns.	Yes	Define specific events/programs/campaigns for which sponsorship will be pursued and avoid conflicts of interest	MoDOT CR staff, MCRS PI committee, Blueprint regions	1/31/2010	Ongoing
1D3	Enhance state legislation, particularly regarding administrative license revocation and high BAC, to meet the criteria for Section 410 funds.	Yes	Lobby for legislation with provisions addressing repeat offenders, high BAC, refusals, ignition interlock, DWITS, expungement, SIS	MoDOT GR staff and MCRS legislative subcommittee	Ongoing	HB 480 passed in the 2012 Legislative session to enhance ignition interlock use
1D4	Continue to plan and implement activities to use carry-over funds.	Yes	Work with grantees to ensure projects are implemented on time, notify HS Director and Program Manager when sources need expending, and provide a list of old funding sources that need to be processed for next year's budget	HS program staff, HS financial staff, MCRS Regional Coordinators	Ongoing	Ongoing
1D5	Continue to provide state funds to all the regional coalitions to support local efforts in traffic safety.	Yes	Submit request for SM Director to support coalitions within the annual HS budget requests	Leanna Depue and HS financial staff	Annually (May - September)	Ongoing
II	PREVENTION					

2A1	Increase the state excise tax on alcoholic beverages and dedicate it to prevention, intervention, and treatment of impaired driving and alcohol abuse.	Yes	Identify lead agency for legislation and work through legislative process	MCRS legislative subcommittee	1/31/2010	Ongoing due to political climate.
2A2	Enact restrictions on alcohol promotions such as Happy Hours	No - state regulation 11 CSR 70-2.2405G - regulates advertising as an inducement to purchase intoxicating liquor or nonintoxicating beer. See paper copy in file for further info.	Identify lead agency for legislation and work through legislative process	MCRS legislative subcommittee	1/31/2010	Ongoing due to political climate.
2A3	Enact full dram shop statutes	No, not enough legislative support. We need to focus our legislative efforts in other areas.				
2A4	Enact social host liability statutes	Yes/Unknown - see paper documentation in file	Identify lead agency for legislation and work through legislative process	MCRS legislative subcommittee	1/31/2010	Ongoing due to political climate.
2A5	Enact comprehensive open-container statutes	Yes/Unknown - see paper documentation in file	Identify lead agency for legislation and work through legislative process	MCRS legislative subcommittee	1/31/2010	Ongoing due to political climate.
2A6	Increase Division of Alcohol Control budget resources	No, \$200 million was cut from ATC's budget, resulting in the loss of 200 full-time and 500 part-time state employee positions. Therefore, we cannot expect the legislature to increase funding to ATC				
2A7	Continue to encourage all alcohol sales and service establishments to display educational information to discourage impaired driving.	Yes - see paper documentation in file	To the extent possible, we will continue to design, produce educational information and distribute them.	MoDOT CR staff	Ongoing	Ongoing
2A8	Continue to educate the public on underage drinking and irresponsible consumption of alcohol.	Yes	Complete annual public relations marketing calendar to include impaired driving campaign materials.	MoDOT CR staff	Ongoing	Ongoing
Transportation Alternatives						
2B1	Continue to support designation of a non-drinking driver in any designated driver promotional material.	Yes	Complete annual public relations marketing calendar to include impaired driving campaign materials.	MoDOT CR staff and CHEERS coordinator	Ongoing	Ongoing
2B2	Assure that designated driver and safe ride programs avoid any consumption by underage individuals or unintentional enabling of over-consumption	Yes	Continue to produce CHEERS materials that clearly define a designated driver and review CHEERS materials to add information on responsible, limited drinking	CHEERS coordinator (Jessica Schlosser) and Carrie Wolken	Ongoing	Ongoing
2B3	Establish a partnership between public transportation and traffic safety to identify and implement opportunities in the Kansas City and St. Louis metro areas where transit may be able to assist with safe rides home	No, because of workloads of the individuals in the MoDOT districts or the HS division to whom this responsibility would be directed; the MCRS regional contacts have indicated that private transit agencies (e.g., cab companies) have implemented such programs but they are often limited to operation on holidays and/or during special events				
Community-Based Programs						
2C11	Include impaired driving issues in Missouri Health Education Grade Level Expectations	No, because of the time and funding needed to develop curriculum materials and there is no guarantee that school districts would use the materials since DESE does not have control over school districts' curriculum.				

2C12	Establish youth-led school-based impaired driving, underage drinking and traffic safety prevention programs in schools throughout Missouri.	Yes	Continue to seek local schools willing to allow Think First presentations, Battle of theBelt, and Team Spirit in their schools.	Think First Director Michelle Gibler, Carrie Wolken, CR staff and Team Spirit Director - Sharee Galnore	Ongoing	Ongoing
2C13	Provide Drug Impairment Training for Education Professionals (DITEP) to school personnel throughout Missouri	Yes	Go through HSD grant process to implement the trainings	Jackie Rogers, HSD Alcohol Program Coordinator, MPCA	Ongoing	Ongoing
2C14	Incorporate non-use messages in college underage drinking and impaired driving prevention programs	Yes, to an extent	The college prevention programs funded by HSD grants are implemented through the University of Missouri-Columbia. They employ non-use messages as well as messages on reducing drinking.	Michelle Gibler, Carrie Wolken, CR staff	Ongoing	Ongoing
Employers						
2C21	Expand employer traffic safety programs to businesses throughout Missouri.	No, scarce resources do not allow this recommendation to be addressed.				
2C22	Provide current and accurate information to EAPs, employers, and those who provide employee safety programs.	Yes - see paper documentation in file	Compile listing of employers with employee safety programs, develop a toolkit of materials for use at these programs, inform employers of the toolkits' availability for these programs.	MoDOT CR staff, Michelle Gibler	Spring 2011	
Community Coalitions & Traffic Safety Programs						
2C31	Provide sustainable support for local coalitions currently supported by Strategic Prevention Framework State Incentive Grants (SPF-SIG).	Yes, to an extent	Annual review of law enforcement grant applications	HS Law Enforcement program staff	Ongoing	Ongoing
III CRIMINAL JUSTICE SYSTEM						
3A1	Provide adequate funding for the instruments and scientific personnel for the programs of breath, blood, and other chemical testing to support the needed testing program and to allow adequate quality assurance	No, Such funding is determined by the State Legislature and is not under the control of the stakeholders who are responsible for pursuing this recommendation. The stakeholders, however, will certainly continue to encourage the Legislature to consider appropriating adequate funding for support of this program.				THS is utilizing some of the Section 164 Repeat Offender transfer funding to purchase new breath instruments for use across the state.
3A2	Require 10 days or less for turn-around time on testing results to allow prompt filing of charges for impaired driving	No, The Highway Patrol has opened an additional state lab with the hope of reducing the turn-around time down to 30 days. It would be unrealistic to believe Missouri could reduce the turnaround time to 10 days or less unless several additional state labs were established or the state or local governmental agencies were able to contract with outside laboratories; due to budgetary constraints, this seems highly				
3A3	Preempt the municipal ordinances regarding impaired driving by a comprehensive and clear statutory scheme of impaired driving laws.	Yes/Unknown - see paper documentation in file	To the extent that is politically feasible, the HSD will support legislative efforts in the DWI area. The passage of HB 1695 did address some key issues in DWI law.	Joni Smith, Leanna Depue, Jackie Rogers, and MoDOT GR staff	Ongoing	Ongoing
Enforcement						
3B1	Continue the many multi-jurisdictional law enforcement saturations, checkpoints, and operations.	Yes	Continue to encourage law enforcement agencies to participate in these mobilizations.	HS Law Enforcement program staff	Ongoing	Ongoing

3E1	Continue to work with and support Office of State Courts Administrator (OSCA) with the development and deployment of the court data systems.	Yes	Conduct periodic meetings to address this issue, Continue expansion of the Justice Information System, Reduce the timeframe it takes Municipal Courts to transfer record of conviction and case transfers	STRCC and OSCA	Ongoing	Ongoing
3E2	Require courts to timely, completely, and accurately report their data to Office of State Courts Administrator (OSCA) or be barred from hearing impaired driving offenses.	No, State courts have the ability to collect and report their data to OSCA nightly and are complying with this requirement. One of the provisions of HB 1695 requires all law enforcement, prosecutors, and courts report to the DWI Tracking System at the state Highway Patrol. This has the potential of resolving this problem. It is important to note, however, that not all municipal courts have the computer capability to comply. The highway safety division is currently under contract with OSCA to bring additional municipal courts online in order to allow electronic reporting, but this contract will only support 20 additional courts.				
3E3	Support judicial education programs using the research on alcohol screening, intervention and treatment from National Institute on Alcohol Abuse and Alcoholism (NIAAA).	Yes	HB 1695 addressed this issue through DWI court provisions. The Impaired Driving subcommittee will continue to implement its Strategic Plan that includes supports judicial education programs.	Jackie Rogers, MCRS Impaired Driving Subcommittee	Ongoing	Ongoing
Administrative Sanctions and Driver Licensing Programs						
3F11	Enact legislation requiring ignition interlocks on the offender's vehicle(s) until a qualified professional has determined that the licensee's alcohol and/or drug use problem will not interfere with their safe operation of a motor vehicle.	Unknown	We will pursue this type of legislation if the political climate is conducive.			
3F12	Implement other DWI deterrents such as impoundment of or markings on the license plate, or impoundment, immobilization or forfeiture of the vehicle(s), of repeat offenders and individuals who have driven with a license suspended or revoked for impaired driving.	Unknown	We will pursue this type of legislation if the political climate is conducive.			
3F13	Lengthen suspension times for DWI convictions and administrative suspensions.	Unknown	We will pursue this type of legislation if the political climate is conducive.			
Programs						
3F21	Enact legislation to make alcohol server training mandatory.	Unknown	We will pursue this type of legislation if the political climate is conducive.			
3F22	Include 18-20 year old drivers in primary enforcement of safety belt use laws for young novice drivers.	No, it has been common practice in Missouri to enact laws that apply to minor. Once this has been accomplished, it is exceedingly difficult to attempt to get such a law passed to encompass all ages of drivers/passengers. It was the determination of the Impaired Driving Subcommittee, therefore, to support a primary seat belt law for everyone (all ages) and nothing less.				

IV	COMMUNICATION PROGRAM					
1	Make use of state-of-the-art techniques, such as online querying, to assist in the development and testing of campaign themes and media materials	No, campaigns are monitored or tracked to some extent by the number of "click throughs" on the website.				
2	Develop and implement a driver survey to provide pre- and post- data on driver awareness, knowledge, attitudes, and behavior	No, no funding.				
3	Work with various population groups to develop and provide impaired driving information to Missouri's ethnic, cultural, and linguistically diverse populations	No, no funding.				
V	ALCOHOL AND OTHER DRUG MISUSE					
5A11	Conduct an evaluation of SATOP services and complete a management review of its operations.	Yes	Present Impaired Driving Strategic Plan to the MCRS Impaired Driving Subcommittee and implement those strategies	Jackie Rogers, HSD Alcohol Coordinator	1/1/2010	Completed
5A12	Complete a strategic planning process for SATOP with its justice and traffic partners	Yes	Present State of Missouri Impaired Driving Strategic Plan to the MCRS Impaired Driving Subcommittee and determine whether an actual "strategic planning process" will be conducted for SATOP and how this will occur.	Jackie Rogers, HSD Alcohol Coordinator	1/1/2010	Completed
Medical or Health Care Settings						
5A21	Train emergency room physicians, nurses and other treatment staff in the methods of Screening and Brief Intervention.	No, due to restrictions of the Alcohol Exclusion Law				
5A22	Implement Screening and Brief Intervention techniques in emergency rooms and other settings in Missouri	No, due to restrictions of the Alcohol Exclusion Law				
5A23	Repeal the alcohol exclusion statute and prohibit insurance companies from denying coverage to individuals injured as a result of impairment.	Unknown	Depends on the political climate.			
Treatment and Rehab						
	None					
Monitoring Impaired Drivers						
5C1	Provide more effective monitoring of offenders by Substance Abuse Traffic Offender Program (SATOP) prior to their seeking license restoration and during court ordered supervision periods	Yes	Present State of Missouri Impaired Driving Strategic Plan to the MCRS Impaired Driving Subcommittee and determine whether an actual "strategic planning process" will be conducted for SATOP and how this will occur.	Jackie Rogers, HSD Alcohol Coordinator	1/1/2010	Completed
V1	PROGRAM EVALUATION AND DATA					
6A1	Require law enforcement participation in Driving While Intoxicated Tracking System (DWITS).	Yes/Unknown - see paper documentation in file	HB 1695 does require all jurisdictions to enter DWI arrest and case information into the Missouri State Highway Patrol's Driving While Intoxicated Tracking System (DWITS) to strengthen the tracking of DWI offenders. (Grant funding could be withheld from agencies that fail to report.)	Jackie Rogers and Joni Smith	Ongoing	Ongoing

6A2	Require DWITS participation as a requirement for receiving impaired driving funding.	Unknown/Yes	Some law enforcement agencies do not have the capability to electronically submit the data. For other agencies, they may have a proprietary or antiquated computerized records system that will not allow their system to "link" with another. They have indicated that this will require their officers or records clerks to encode double and sometimes triple entries into their various systems (requiring more work and more personnel time/costs). They have indicated this would be an unfunded mandate.			
6A3	Conduct several different types of evaluations to effectively measure progress, to determine effectiveness to plan and implement new program strategies and to ensure that resources are allocated appropriately	Yes	Assess evaluation methods prior to implementing strategies within the MO Impaired Driving Strategic Plan and instruct HSD staff to incorporate varying methods of evaluation into HSD contracts	MCRS Impaired Driving Subcommittee and HSD staff	Ongoing	Ongoing
6A4	Continue projects to improve traffic data collection in the State and use these data to properly evaluate programs.	Yes	Data collection is an ongoing process and is used for evaluation purposes when possible	HSD Staff	Ongoing	Ongoing
6A5	Distribute Annual Report information to as wide of an audience as possible including, but not limited to, posting on the Missouri Department of Transportation website, issuing press releases regarding highlights and success stories, and including in highway safety program presentations.	Yes	Query other states to see if, and how, they are making this happen and determine which programs/projects to highlight. Set up a brainstorming session on ways to promote successes	Pam Hoelscher	1/1/2010	Done
6A6	Include evaluation as an integral part of the planning process for the Highway Safety Plan & Performance Plan.	Yes	Include Performance Measures in 2010 HSP & Performance Plan	Joni Smith	1/1/2010	Done
Data and Records						
6B1	Develop the capability for law enforcement to electronically submit crash reports into the Statewide Traffic Accident Reporting System (STARS) system.	Yes	Currently being worked on by State Traffic Records Coordinating Committee. Work with local LEAs to identify their current system and determine the potential for those systems to be modified for electronic transfer of crash report data.	STRCC & MSHP	9/30/2010	Ongoing
6B2	Complete the Regional Justice Information Service (REJIS) pilot.	Yes	Town and Country pilot, implement statewide	STRCC	9/30/2010	Done
6B3	Add the Automated Law Enforcement Response Team (ALERT) program to the Statewide Traffic Accident Reporting System (STARS) system.	No, KC data cannot be transferred automatically to MULES.				
6B4	Develop a method to transfer Automated Law Enforcement Response Team (ALERT) data automatically into Missouri's statewide Missouri Uniform Law Enforcement System (MULES) network.	No, ALERT does not have this capability.				
6B5	Upgrade the Traffic Arrest System/Driving While Intoxicated Tracking System (TAS/DWITS) making it user friendly and require all law enforcement agencies to enter data into the system..	Yes	The Highway Patrol is working to upgrade TAS/DWITS and make it more user friendly; requiring all LEAs to enter data into the system is. HB 1695 will help with this.	Randy Silvey	Ongoing	Ongoing
6B6	Resolve vehicle data barriers that prevent linkage with driver or crash data and link these data files.	Yes	To the extent funding is available, these data barriers will be addressed.	STRCC, DOR, MSHP	Ongoing	Ongoing
6B7	Record the original charge for citations issued to motorists on the driver history.	No, if the court sends that information to DOR, then it is put into the driver history. Normally DOR does receive this information.				
6B8	Expedite the development of the new State Traffic Records Strategic Plan	Yes	Continue development of Plan under contract with Data Nexus	STRCC	9/30/2010	Ongoing

6B9	Increase membership on the Traffic Records Coordinating Committee to include stakeholders outside state government.	Yes	The TRCC would welcome participation from outside state government (and currently has members from Mid America Regional Council in Kansas City and NHTSA), they are not actively seeking additional membership.	STRCC	Ongoing	Ongoing
Information & Records Systems						
6C1	Make the original traffic charge part of the driver history thus allowing analysis of plea downs, deferred prosecutions, and other reductions in charges.	No, if the court sends that information to DOR, then it is put into the driver history. Normally DOR does receive this information				
6C2	Continue development of Traffic Arrest System/Driving While Intoxicated Tracking System (TAS/DWITS) making it user friendly.	Yes	MSHP has taken the lead on this and will continue their efforts.	MSHP	Ongoing	Ongoing
6C3	Require all law enforcement agencies to enter data into the system (DWITS)	Yes	The Highway Patrol is working to upgrade TAS/DWITS and make it more user friendly; requiring all LEAs to enter data into the system is. HB 1695 will help with this.	MSHP/STRCC	Ongoing	Ongoing
6C4	Require the municipal courts to enter their data into the Judicial Information System (JIS) or be barred from adjudicating impaired driving offenses.	Unknown	This depends on legislation and funding.	Joni Smith, LE staff	Ongoing	Ongoing
6C5	Expand the user friendly Traffic Arrest System/Driving While Intoxicated Tracking System (TAS/DWITS) to create a full citation tracking system.	Yes	The Highway Patrol is working to upgrade TAS/DWITS and make it more user friendly; requiring all LEAs to enter data into the system is. HB 1695 will help with this.	MSHP/STRCC	Ongoing	Ongoing
6C6	Maintain a complete driving history of impaired drivers including all prior offenses and initial charges.	Unknown	The Highway Patrol is working to upgrade TAS/DWITS and make it more user friendly; requiring all LEAs to enter data into the system is. HB 1695 will help with this. Track and review all impaired driving legislation for 2010.	MSHP/STRCC/Jackie Rogers	Ongoing	Ongoing

Standardized Field Sobriety Testing Assessment Recommendations								
Number	Recommendation		Will recommendation be addressed?		Tasks to be completed	Assigned to	Target date	Current Status
Program Administration								
I. 1	Assemble an advisory panel to include, but not limit to, law enforcement, prosecution, judiciary and toxicology to oversee the statewide SFST program.		Yes			Jackie Rogers		A DRE/SFST Advisory Committee has been established
I. 2	Establish a Law Enforcement Liaison (LEL) position. The LEL position can assist with improving communication between law enforcement agencies involved in Missouri SFST program.		No			Chris Luebbert, Jeremy Hodges, Vacant Position		THS staff has three staff members who work with specific law enforcement agencies in the state
I. 3	Establish a State SFST Coordinator to coordinate all SFST training to maintain standardization to the program. The SFST Coordinator shall not be involved in the delivery of the curriculum package.		Yes			Tracey Durbin, Missouri Safety Center		Missouri Safety Center coordinates the SFST program in the state and works with the Advisory Board
I. 4	The Highway Safety Division convenes a meeting with all training academy coordinators to discuss and resolve issues regarding the use of properly trained and updated SFST instructors.		No					Training Academies are using the most current SFST manual
I. 5	Develop and maintain a database of SFST practitioners and instructors across the State. This database should include, but not be limited to, dates of SFST course completion, date of last SFST update, date of last SFST proficiency and date new course materials/revisions received. This will help ensure that the most recent revision of materials are being used which should lead to acceptance of your States courts.		Yes			Tracey Durbin, Missouri Safety Center		The Missouri Safety Center maintains a listin of SFST instructors and practitioners

Program Operation								
II. 1	The NHTSA/IACP SFST curriculum should be followed and delivered in the same manner across the State, regardless of who may be delivering the training. Any existing curriculum prior to the 2006 revision should be filed for reference and their use discontinued. Additional SFST training materials may be requested through the NHTSA Central Region Office.		Yes					
II. 2	Develop and maintain an open line of communication between all Missouri SFST and DRE Instructors through the use of a State Coordinator, allowing access to all training delivered, materials used and other pertinent information, so that consistency in the Missouri SFST training can be established and maintained. The SFST coordinator and the DRE coordinator must work closely together to achieve effective communication and standardization.		Yes			Tracey Durbin, Missouri Safety Center		Tracey Durbin with the Missouri Safety Center serves as both the SFST and DRE coordinator for the state and works with the advisory board
II. 3	Develop and implement a SFST course schedule consistent with the contents contained in the Administrator's Guide of the SFST curriculum to maintain statewide standardization.		Yes					
II. 4	Establish a procedure for an in-service update every two years for SFST practitioners and SFST instructors. This update should include a proficiency examination.		Yes			Tracey Durbin, Missouri Safety Center		Tracey works with the advisory board to provide update training for both SFST instructors and practitioners as well
II. 5	Promote and utilize the National Sobriety Testing Resource Center web-site (www.sobrietytesting.org) to gain access to current SFST information.		Yes					

Program Prosecution & Adjudication								
III. 1	Include prosecutors and DOR hearing officer's in SFST and DRE training to better enable them to understand and apply the technologies of detecting alcohol and drug impaired drivers in court.		Yes			Susan Glass, Traffic Safety Resource Prosecutor		Susan provides training to prosecutors across the state
III. 2	Encourage pre-trial conferences in all DWI cases.							
III. 3	Reestablish the use of the National Judicial College to help with educating judges in the detection of alcohol and drug impaired drivers.		Yes			Jackie Rogers		The Office of State Court Administrator provides training to judges across the state and offers judges the
III. 4	Provided training for prosecutors in the effective prosecution of alcohol and drug impaired drivers. These courses include the following: 1. Prosecuting the drugged driver, 2. Standardized field sobriety testing, 3. Introduction to drugged driving, 4. Drug evaluation and classification (DEC), 5. Protecting lives/saving futures		Yes			Susan Glass, Traffic Safety Resource Prosecutor		Susan provides the training mentioned to prosecutors across the state
III. 5	Expand the number of DWI Courts to other counties and jurisdictions.		Yes			Jackie Rogers		THS funding is utilized to expand DWI Courts in the State

	Traffic Record Assessment Recommendations						
	Recommendation		Tasks to be completed	Assigned to	Target date	Current Status	
REC #	State-Wide recommendations						
1	Traffic Records System Management						
	Traffic Records Coordinating Committee						
1. 1	Expand the membership of the TRCC to include county and local law enforcement agencies and members of the local traffic engineering entities.						
1. 2	Establish a comprehensive quality assurance and improvement program guided by the NHTSA publication <i>Model Performance Measures for State Traffic Records Systems</i> .						

	Strategic Plan						
1. 3	Charge the TRCC with the development of a new Strategic Plan for State Traffic Safety Information System Improvement addressing the recommendations in this traffic records assessment. Identify deficiencies apart from those noted in the traffic records assessment by canvassing each traffic records system component custodian for input.						
1. 4	Assure that all TRCC members participate in the development of the Strategic Plan for State Traffic Safety Information System Improvement and the selection and priority setting of the projects in the Plan.						

1. 5	Include items in each TRCC meeting agenda that address progress reports on each system and project, as well as the status of the quality metrics developed by the TRCC following the guidelines in NHTSA's <i>Model Performance Measures for State Traffic Records Systems</i> .						
1. 6	Use a formal priority setting method with all TRCC members' participation for all projects considered for inclusion in the Strategic Plan for State Traffic Safety Information System Improvement.						
	Data Integration						
1. 7	Create, Maintain, and publish a centralized traffic records system file inventory defining each system including custodial contact information and identifying all data						

	element fields, their definitions, and locations within the various component systems as outlined in the <i>Advisory</i> .						
1. 8	Examine the HIPAA available exemptions for research studies to determine if the State can overcome the obstacles believed to prevent the integration of the ISS and STARS/TMS files.						
	Data Uses and Program Management Status						
1. 9	Explore methods to incorporate additional traffic records datasets in problem identification analysis to aid in obtaining effective leading indicators of traffic safety issues.						
1. 10	Develop a centralized data warehouse of commonly requested datasets.						

2	TRAFFIC RECORDS SYSTEM COMPONENTS						
	Crash Data Component						
2. 1	Re-evaluate the decision to only accept the new version of the MUCR SHP-2Q crash form beginning January 1, 2012 to ensure partner agencies are prepared for the change and that MSHP and the traffic records community understands the consequences of the impending deadline.						
2. 2	Conduct an outreach effort to identify RMS vendors operating in Missouri and convene a meeting to provide information for electronic transfer of crash reports from their crash collection software.						

2. 3	Strengthen efforts to encourage local agencies to submit electronically as soon as possible and provide operational and funding assistance.						
2. 4	Encourage local law enforcement agencies to adopt the REJIS LETS software solution for electronic capture and submission of crash reports to STARS/TMS.						
2. 5	Investigate ways to have local agencies comply with the MSHP procedure of teletype notification to the FARS unit of MSHP upon the occurrence of a fatal crash in their jurisdiction. If such a procedure is not possible to be adopted, identify options for their consideration in order to comply and cite the criticality of the notification in support of the request.						

2. 6	Continue efforts with the TRS community to integrate the crash file with other TRS components.						
2. 7	Continue efforts to automate search and data retrieval from the driver and vehicle files for auto-population of crash and citation forms.						
2. 8	Engage and leverage the STARS Committee to assist in outreach to the local law enforcement community to increase the number of agencies electronically reporting to STARS/TMS.						
	Roadway Data Component						
2. 9	Develop a strategy to address enhancements and/or modifications to the TMS for the use of the analytic software tools recommended in the Highway Safety Manual, in particular Safety Analyst. This strategy should be						

	presented to the TRCC for inclusion in the Strategic Plan for State Traffic Safety Information System Improvement.						
2. 10	Provide access to the TMS to officials of Metropolitan Planning Organizations and Regional Planning Commissions for use in program planning and project development for the Transportation Improvement Plan (TIP).						
2. 11	Accelerate current efforts to include more roadway features data for local roads in the TMS.						
	Driver Data Component						
2. 12	Consider issuing a distinctive driver license to drivers required to operate IgnitionInterlock equipped vehicles.						

2. 13	Encourage broader participation by courts to report disposition information electronically.						
2. 14	Consider reporting crash information on the driver histories of all drivers involved in a crash.						
2. 15	Consider including serious violation conviction or adverse information from previous states for newly licensed non-CDL drivers from other states.						
2. 16	Continue to actively participate in the Traffic Records Coordinating Committee as a participant and a stakeholder.						
	Vehicle Data Component						
2. 17	Consider implementing an AAMVA standard barcode on registration documents to						

	promote complete and accurate data transfer to other traffic records systems.						
2. 18	Consider implementing a customer centric registration and titling system including the DL number and full legal name of the owner to allow linkage of driver and vehicle information.						
2. 19	Participate actively in the Traffic Records Coordinating Committee as a participant and a stakeholder.						
	Citation/Adjudication Data Component						
2. 20	Encourage the adoption of JIS by those courts now using non-JIS case management systems which is essential to the creation of a comprehensive, statewide citation data repository.						
2. 21	Continue development of canned statistical reports in JIS.						

2. 22	Promote the expanded use of the LETS and FATPOT citation modules.						
2. 23	Encourage the electronic transfer of traffic citation information between LEAs, the Prosecutor's Office, and the Courts.						
2. 24	Automate the results of the seven day reporting requirement within the Courts so that all compliance information is disseminated electronically.						
	Statewide Injury Surveillance System (SWISS) Data Component						
2. 25	Revise regulations to require ambulance services to report all EMS transports to the Bureau of Emergency Services.						
2. 26	Work directly with trauma centers to gain access to BAC results for inclusion into the FARS system.						

2. 27	Continue the plan to distribute computers to Missouri ambulance services to assist with statewide reporting of ambulance transports.						
2. 28	Integrate crash and MARS data for use by the Department of Health and Senior Services, the Highway Safety Division, and FARS.						
2. 29	Increase use of injury surveillance/CODES data to help provide a complete picture of motor vehicle injuries in the State.						
2. 30	Support and expand the use of linked data for program evaluation activities.						
2. 31	Continue representation by the Bureau of Emergency Services on the TRCC.						
2. 32	Investigate ways to use the injury surveillance data to ensure complete reporting of fatalities to the FARS system.						

MISSOURI
FY 2016 Application

**Appendix D to
Part 1200 –
Certifications and
Assurances for
National Priority
Safety Program Grants
(23 U.S.C. 405)**

**APPENDIX D TO PART 1200 –
CERTIFICATIONS AND ASSURANCES
FOR NATIONAL PRIORITY SAFETY PROGRAM GRANTS (23 U.S.C. 405)**

State: Missouri

Fiscal Year: 2016

Each fiscal year the State must sign these Certifications and Assurances that it complies with all requirements, including applicable Federal statutes and regulations that are in effect during the grant period.

In my capacity as the Governor's Representative for Highway Safety, I:

- certify that, to the best of my personal knowledge, the information submitted to the National Highway Traffic Safety Administration in support of the State's application for Section 405 grants below is accurate and complete.
- understand that incorrect, incomplete, or untimely information submitted in support of the State's application may result in the denial of an award under Section 405.
- agree that, as condition of the grant, the State will use these grant funds in accordance with the specific requirements of Section 405(b), (c), (d), (e), (f) and (g), as applicable.
- agree that, as a condition of the grant, the State will comply with all applicable laws and regulations and financial and programmatic requirements for Federal grants.

Roberta Broeker
Signature Governor's Representative for Highway Safety

6-1-15
Date

Roberta Broeker, Interim Director

Printed name of Governor's Representative for Highway Safety

Instructions: Check the box for each part for which the State is applying for a grant, fill in relevant blanks, and identify the attachment number or page numbers where the requested information appears in the HSP. Attachments may be submitted electronically.

☐ **Part 1: Occupant Protection (23 CFR 1200.21)**

All States: [Fill in *all* blanks below.]

- The State will maintain its aggregate expenditures from all State and local sources for occupant protection programs at or above the average level of such expenditures in fiscal years 2010 and 2011. (23 U.S.C. 405(a)(1)(H))
- The State will participate in the Click it or Ticket national mobilization in the fiscal year of the grant. The description of the State's planned participation is provided as HSP attachment or page # _____.
- The State's occupant protection plan for the upcoming fiscal year is provided as HSP attachment or page # _____.
- Documentation of the State's active network of child restraint inspection stations is provided as HSP attachment or page # _____.
- The State's plan for child passenger safety technicians is provided as HSP attachment or page # _____.

Lower Seat belt Use States: [Check *at least 3 boxes* below and fill in *all* blanks under those checked boxes.]

- ☐ The State's **primary seat belt use law**, requiring primary enforcement of the State's occupant protection laws, was enacted on _____ and last amended on _____, is in effect, and will be enforced during the fiscal year of the grant.

Legal citation(s):

- ☐ The State's **occupant protection law**, requiring occupants to be secured in a seat belt or age-appropriate child restraint while in a passenger motor vehicle and a minimum fine of \$25, was enacted on _____ and last amended on _____, is in effect, and will be enforced during the fiscal year of the grant.

Legal citations:

- Requirement for all occupants to be secured in seat belt or age appropriate child restraint:

- Coverage of all passenger motor vehicles:

- Minimum fine of at least \$25:

- Exemptions from restraint requirements:

- ☐ The State's **seat belt enforcement plan** is provided as HSP attachment or page # _____.
- ☐ The State's **high risk population countermeasure program** is provided as HSP attachment or page # _____.
- ☐ The State's **comprehensive occupant protection program** is provided as HSP attachment # _____.
- ☐ The State's **occupant protection program assessment**: [*Check one box below and fill in any blanks under that checked box.*]

- ☐ The State's NHTSA-facilitated occupant protection program assessment was conducted on _____;

OR

- ☐ The State agrees to conduct a NHTSA-facilitated occupant protection program assessment by September 1 of the fiscal year of the grant. (This option is available only for fiscal year 2013 grants.)
-

☐ **Part 2: State Traffic Safety Information System Improvements (23 CFR 1200.22)**

- The State will maintain its aggregate expenditures from all State and local sources for traffic safety information system programs at or above the average level of such expenditures in fiscal years 2010 and 2011.

*[Fill in **at least one** blank for each bullet below.]*

- A copy of [*check one box only*] the ☐ TRCC charter or the ☐ statute legally mandating a State TRCC is provided as HSP attachment # _____ or submitted electronically through the TRIPRS database on _____.
 - A copy of TRCC meeting schedule for 12 months following application due date and all reports and other documents promulgated by the TRCC during the 12 months preceding the application due date is provided as HSP attachment # _____ or submitted electronically through the TRIPRS database on _____.
 - A list of the TRCC membership and the organization and function they represent is provided as HSP attachment # _____ or submitted electronically through the TRIPRS database on _____.
 - The name and title of the State's Traffic Records Coordinator is _____.
 - A copy of the State Strategic Plan, including any updates, is provided as HSP attachment # _____ or submitted electronically through the TRIPRS database on _____.
 - [*Check one box below and fill in **any** blanks under that checked box.*]
 - ☐ The following pages in the State's Strategic Plan provides a written description of the performance measures, and all supporting data, that the State is relying on to demonstrate achievement of the quantitative improvement in the preceding 12 months of the application due date in relation to one or more of the significant data program attributes: pages _____.
 - OR**
 - ☐ If not detailed in the State's Strategic Plan, the written description is provided as HSP attachment # _____.
 - The State's most recent assessment or update of its highway safety data and traffic records system was completed on _____.
-

☐ **Part 3: Impaired Driving Countermeasures (23 CFR 1200.23)**

All States:

- The State will maintain its aggregate expenditures from all State and local sources for impaired driving programs at or above the average level of such expenditures in fiscal years 2010 and 2011.
- The State will use the funds awarded under 23 U.S.C. 405(d) only for the implementation of programs as provided in 23 CFR 1200.23(i) in the fiscal year of the grant.

Mid-Range State:

- [Check **one box** below and fill in **any** blanks under that checked box.]
 - ☐ The statewide impaired driving plan approved by a statewide impaired driving task force was issued on _____ and is provided as HSP attachment # _____;
- OR**
- ☐ For the first year of the grant as a mid-range State, the State agrees to convene a statewide impaired driving task force to develop a statewide impaired driving plan and submit a copy of the plan to NHTSA by September 1 of the fiscal year of the grant.
- A copy of information describing the statewide impaired driving task force is provided as HSP attachment # _____.

High-Range State:

- [Check **one box** below and fill in **any** blanks under that checked box.]
 - ☐ A NHTSA-facilitated assessment of the State's impaired driving program was conducted on _____;
- OR**
- ☐ For the first year of the grant as a high-range State, the State agrees to conduct a NHTSA-facilitated assessment by September 1 of the fiscal year of the grant;
- [Check **one box** below and fill in **any** blanks under that checked box.]
 - ☐ For the first year of the grant as a high-range State, the State agrees to convene a statewide impaired driving task force to develop a statewide impaired driving plan addressing recommendations from the assessment and submit the plan to NHTSA for review and approval by September 1 of the fiscal year of the grant;
- OR**
- ☐ For subsequent years of the grant as a high-range State, the statewide impaired driving plan developed or updated on _____ is provided as HSP attachment # _____.

- A copy of the information describing the statewide impaired driving task force is provided as HSP attachment # _____.

Ignition Interlock Law: [*Fill in **all** blanks below.*]

- The State's ignition interlock law was enacted on _____ and last amended on _____, is in effect, and will be enforced during the fiscal year of the grant.

Legal citation(s):

☐ **Part 4: Distracted Driving (23 CFR 1200.24)**

*[Fill in **all** blanks below.]*

Prohibition on Texting While Driving

The State's texting ban statute, prohibiting texting while driving, a minimum fine of at least \$25, and increased fines for repeat offenses, was enacted on _____ and last amended on _____, is in effect, and will be enforced during the fiscal year of the grant.

Legal citations:

- Prohibition on texting while driving:

- Definition of covered wireless communication devices:

- Minimum fine of at least \$25 for first offense:

- Increased fines for repeat offenses:

- Exemptions from texting ban:

Prohibition on Youth Cell Phone Use While Driving

The State's youth cell phone use ban statute, prohibiting youth cell phone use while driving, driver license testing of distracted driving issues, a minimum fine of at least \$25, increased fines for repeat offenses, was enacted on _____ and last amended on _____, is in effect, and will be enforced during the fiscal year of the grant.

Legal citations:

- Prohibition on youth cell phone use while driving:

 - Driver license testing of distracted driving issues:

 - Minimum fine of at least \$25 for first offense:

 - Increased fines for repeat offenses:

 - Exemptions from youth cell phone use ban:
-

☐ **Part 5: Motorcyclist Safety (23 CFR 1200.25)**

[Check at least 2 boxes below and fill in any blanks under those checked boxes.]

☐ **Motorcycle riding training course:**

- Copy of official State document (e.g., law, regulation, binding policy directive, letter from the Governor) identifying the designated State authority over motorcyclist safety issues is provided as HSP attachment # _____.
- Document(s) showing the designated State authority approved the training curriculum that includes instruction in crash avoidance and other safety-oriented operational skills for both in-class and on-the-motorcycle is provided as HSP attachment # _____.
- Document(s) regarding locations of the motorcycle rider training course being offered in the State is provided as HSP attachment # _____.
- Document(s) showing that certified motorcycle rider training instructors teach the motorcycle riding training course is provided as HSP attachment # _____.
- Description of the quality control procedures to assess motorcycle rider training courses and instructor training courses and actions taken to improve courses is provided as HSP attachment # _____.

☐ **Motorcyclist awareness program:**

- Copy of official State document (e.g., law, regulation, binding policy directive, letter from the Governor) identifying the designated State authority over motorcyclist safety issues is provided as HSP attachment # _____.
- Letter from the Governor's Representative for Highway Safety stating that the motorcyclist awareness program is developed by or in coordination with the designated State authority is provided as HSP attachment # _____.
- Data used to identify and prioritize the State's motorcyclist safety program areas is provided as HSP attachment or page # _____.
- Description of how the State achieved collaboration among agencies and organizations regarding motorcycle safety issues is provided as HSP attachment or page # _____.
- Copy of the State strategic communications plan is provided as HSP attachment # _____.

☐ **Reduction of fatalities and crashes involving motorcycles:**

- Data showing the total number of motor vehicle crashes involving motorcycles is provided as HSP attachment or page # _____.
- Description of the State's methods for collecting and analyzing data is provided as HSP attachment or page # _____.

☐ **Impaired driving program:**

- Data used to identify and prioritize the State's impaired driving and impaired motorcycle operation problem areas is provided as HSP attachment or page # _____.
- Detailed description of the State's impaired driving program is provided as HSP attachment or page # _____.
- The State law or regulation that defines impairment.
Legal citation(s):

☐ **Reduction of fatalities and accidents involving impaired motorcyclists:**

- Data showing the total number of reported crashes involving alcohol-impaired and drug-impaired motorcycle operators is provided as HSP attachment or page # _____.
- Description of the State's methods for collecting and analyzing data is provided as HSP attachment or page # _____.
- The State law or regulation that defines impairment.
Legal citation(s):

☐ **Use of fees collected from motorcyclists for motorcycle programs:** [*Check one box below and fill in **any** blanks under the checked box.*]

☐ Applying as a Law State –

- The State law or regulation that requires all fees collected by the State from motorcyclists for the purpose of funding motorcycle training and safety programs to be used for motorcycle training and safety programs.

Legal citation(s):

AND

- The State's law appropriating funds for FY ____ that requires all fees collected by the State from motorcyclists for the purpose of funding motorcycle training and safety programs be spent on motorcycle training and safety programs.

Legal citation(s):

☐ Applying as a Data State –

- Data and/or documentation from **official** State records from the previous fiscal year showing that **all** fees collected by the State from motorcyclists for the purpose of funding motorcycle training and safety programs were used for motorcycle training and safety programs is provided as HSP attachment # _____.

☐ **Part 6: State Graduated Driver Licensing Laws (23 CFR 1200.26)**

*[Fill in **all** applicable blanks below.]*

The State's graduated driver licensing statute, requiring both a learner's permit stage and intermediate stage prior to receiving a full driver's license, was enacted on _____ and last amended on _____, is in effect, and will be enforced during the fiscal year of the grant.

Learner's Permit Stage – requires testing and education, driving restrictions, minimum duration, and applicability to novice drivers younger than 21 years of age.

Legal citations:

- Testing and education requirements:

- Driving restrictions:

- Minimum duration:

- Applicability to novice drivers younger than 21 years of age:

- Exemptions from graduated driver licensing law:

Intermediate Stage – requires driving restrictions, minimum duration, and applicability to any driver who has completed the learner’s permit stage and who is younger than 18 years of age.

Legal citations:

- Driving restrictions:
- Minimum duration:
- Applicability to any driver who has completed the learner’s permit stage and is younger than 18 years of age:
- Exemptions from graduated driver licensing law:

Additional Requirements During Both Learner’s Permit and Intermediate Stages

Prohibition enforced as a primary offense on use of a cellular telephone or any communications device by the driver while driving, except in case of emergency.

Legal citation(s):

Requirement that the driver who possesses a learner’s permit or intermediate license remain conviction-free for a period of not less than six consecutive months immediately prior to the expiration of that stage.

Legal citation(s):

License Distinguishability (*Check **one box** below and fill in **any** blanks under that checked box.*)

☐ Requirement that the State learner's permit, intermediate license, and full driver's license are visually distinguishable.

Legal citation(s):

OR

☐ Sample permits and licenses containing visual features that would enable a law enforcement officer to distinguish between the State learner's permit, intermediate license, and full driver's license, are provided as HSP attachment # _____.

OR

☐ Description of the State's system that enables law enforcement officers in the State during traffic stops to distinguish between the State learner's permit, intermediate license, and full driver's license, are provided as HSP attachment # _____.

Occupant Protection Grants
Appendix D Part 1

i. Occupant Protection Plan

Updates to the Occupant Protection Plan were implemented during the December 11, 2014, Occupant Protection Subcommittee meeting. This Occupant Protection Plan describes programs and strategies the State will implement to achieve a reduction in fatalities and injuries on Missouri public roads. Due to a substantial backlog of crash reports, Missouri's 2014 crash file has not been finalized and closed. As a result, the FY 2016 405 Application references crash statistics only through 2013.

A substantial number of occupants killed in 2011-2013 Missouri traffic crashes were not wearing safety belts or in a child safety seat compared to those injured and not injured. In fatal crashes where safety belt usage was known, 67.7% of the people who died were not restrained. Of those seriously injured, 36.4% were not restrained. Conversely, of those not injured, 690,270 were wearing a safety belt or in a child safety seat. When just looking at young people between the ages of 15 through 20, 77.4% of those who died were not buckled up.

Safety belt use dramatically reduces a person's chance of being killed or seriously injured in a traffic crash. Of the drivers involved in 2011-2013 crashes, 1 in 2 was injured when they failed to wear their safety belt, however, when they were wearing a safety belt, their chances of being injured in the crash were 1 in 8. When examining driver deaths, the differences are much more significant. Drivers had a 1 in 29.6 chance of being killed if they were not wearing a safety belt; but that chance dropped dramatically to only 1 in 1,402 if the driver was wearing a safety belt. Ejection from the vehicle at the time of the crash increases the probability of death or serious injury. In known cases of those occupants killed who were totally ejected from the vehicle, 92.1% were not restrained and of those partially ejected, 82.7% were not restrained.

The Highway Safety Office conducts two annual Safety Belt Observational Surveys. In 2014, the General Survey had 117,297 observations collected at 560 sites in 28 counties. The teen survey was conducted at 150 high schools in 92 counties resulting in a total of 35,192 observations of which 24,815 were teens. The chart below shows the safety belt use rates for the past 5 years.

Percent of Safety Belt/Passenger Vehicle Restraint Use by Year					
Year	2010	2011	2012	2013	2014

General Survey	76%	79%	79%	80%	79%
Teen	66%	67%	66%	67%	67%

Communication is vital in Missouri's overall efforts to change public behavior in safety belt use. Missouri utilizes paid media, social media, and earned media. In an effort to ensure a comprehensive occupant protection plan, strategies to improve the number of people buckling up in an age appropriate restraint are in Missouri's Strategic Highway Safety Plan (SHSP - Missouri's Blueprint to Save More Lives), Highway Safety Plan and Performance Plan (HSP), and the MCSAP Commercial Vehicle Safety Plan (CVSP).

The following is information from each of these Plans that are implemented throughout the State with the goal of increasing safety belt use thus reducing the number of people killed or injured in traffic crashes.

Missouri Blueprint to Save More Lives

The Executive Committee of the Missouri Coalition for Roadway Safety provides leadership, guidance and overall direction of Missouri's SHSP. Missouri's SHSP provides overall direction to our state's highway safety program and includes our new statewide fatality reduction goal of 700 or fewer fatalities by 2016. The document contains a list of nine strategies having the greatest potential to save more lives and reduce serious injuries. Increasing Safety Belt Use is one of the nine strategies and encourages the passage of a primary safety belt law, increasing the number of communities passing primary safety belt ordinances, and increasing the fine for non-use of a safety belt under the current law.

In addition, Unrestrained Drivers and Occupants is a Focus Area under Emphasis Area II – High-Risk Drivers and Unrestrained Occupants. The following is the list of strategies for this Focus area. In addition, at the end of the list of strategies are the performance measures that will be tracked to monitor progress.

Education

- Continue to educate law enforcement, parents and teens about the Graduated Driver License (GDL) statute and its provision that allows safety belt enforcement as a primary violation
- Educate GDL recipients about the mandatory safety belt use component of the law
- Educate parents, caregivers, and grandparents about proper selection and installation of child safety and booster seats
- Recruit/certify more law enforcement officers as Child Passenger Safety Technicians

- Continue to expand public information and education campaigns to educate the general public and target groups (pickup truck and teen occupants) about the importance of occupant protection
- Expand numbers of child safety seat inspection stations and certified Child Passenger Safety Technicians

Enforcement

- Aggressively enforce the occupant protection component of the GDL law
- Aggressively enforce the child safety seat and booster seat laws
- Encourage law enforcement to enact a zero tolerance policy when enforcing the secondary occupant protection law
- Increase the emphasis on special occupant protection mobilizations that include public information campaigns and Selective Traffic Enforcement Programs (STEP)

Engineering

- Increase use of message boards and signs that encourage restraint use

Public Policy / Other

- Enact a primary safety belt law
- Expand the number of local primary safety belt ordinances

Performance Measures

Goal #1: To increase statewide safety belt usage by 1 percent annually to:

- 81% by 2014
- 82% by 2015
- 83% by 2016

Performance Measures:

- Statewide percent observed belt use for passenger vehicles (front seat outboard occupants)

Benchmarks:

- 2013 statewide safety belt usage rate = 80%
 - 2014 statewide safety belt usage rate = 79%

Goal #2: To reduce unrestrained passenger vehicle occupant fatalities to 326 by 2016:

- 379 by 2013
- 361 by 2014

- 344 by 2015

Performance Measures:

- Number of unrestrained passenger vehicle occupant fatalities

Benchmarks:

- 2012 unrestrained passenger vehicle occupant fatalities = 396
 - 2013 Actual = 334

Goal #3: To increase safety belt citations and warnings made during grant funded enforcement activities and mobilizations by .25 percent annually based on a three-year rolling average of grant years 2011, 2012, 2013 = 35,256:

- 35,344 by 2014 (2012-2014)
- 35,432 by 2015 (2013-2015)
- 35,520 by 2016 (2014-2016)

Performance Measures:

- Number of safety belt citations issued during grant-funded enforcement and mobilizations

Benchmarks:

- 2011-2013 safety belt citations and warnings made during grant-funded enforcement activities and mobilizations = 35,256
 - 2012-2014 three-year rolling average – 33,759

Goal #4: To increase teen safety belt usage by 1 percent usage annually to:

- 68% by 2014
- 69% by 2015
- 70% by 2016

Performance Measures:

- Percent observed belt use for teen front seat outboard occupants

Benchmarks:

- 2013 teen safety belt usage rate = 67%
 - 2014 teen safety belt usage rate = 67%

Goal #5: To increase safety belt usage by commercial motor vehicle drivers by 1 percent during surveys conducted biennially to:

- 82% by 2014
- 83% by 2016

Performance Measures:

- Percent observed safety belt use for commercial motor vehicle (CMV) drivers

Benchmarks:

- 2012 CMV driver usage rate = 81%
 - 2014 CMV driver usage rate = 81%

Highway Safety Plan and Performance Plan

A section of the 2016 HSP is dedicated to Occupant Restraints. The occupant protection strategies in this application are taken from the 2016 Highway Safety Plan and are divided into the following sections: Child Passengers, Teen Passengers/Drivers, and General Occupant Protection.

Child Passengers

- Produce, promote and distribute educational materials addressing the proper installation of child safety seats and booster seats
- Maintain a state CPS Advisory committee and implement their recommendations where appropriate
- Conduct six certified Child Passenger Safety Technician classes statewide
- Certify an additional CPS instructor each year
- Maintain a statewide computer list-serve of CPS technicians and instructors
- Support child safety seat checkup events and educational programs through local law enforcement agencies, fire departments, Safe Communities, hospitals and health care agencies, safety organizations such as Safe Kids and the Traffic and Highway Safety Division
- Work with partners and with the media to garner support for an annual CPS Week in September
- When funding is available, provide child safety seats/booster seats to inspection stations for distribution to low income families
- Develop educational pieces to heighten awareness concerning the life-saving and economic benefits derived from enhanced child safety seat laws
- Conduct Child Restraint Observational Survey every other year
- Conduct CPS enforcement and public awareness campaign during National CPS Week

Teen Passengers/Drivers

- Conduct annual teen statewide safety belt enforcement and public awareness campaign in March followed by the teen safety belt observational survey in April
- Conduct youth safety belt selective traffic enforcement efforts statewide coupled with press releases, radio and internet spots, and materials targeting young drivers
- Promote the youth seat belt campaigns; modify or enhance campaigns as needed to keep a fresh approach for the teen audience
- Develop youth safety belt public awareness materials with input from young drivers
- Educate youth on the importance of safety belts through programs such as Team Spirit Youth Traffic Safety Leadership Conferences and Reunion, Battle of the Belt/It Only Takes One, ThinkFirst and the Young Traffic Offenders Program

General Occupant Protection

- Conduct NHTSA-approved statewide safety belt observational survey on an annual basis
- Produce, promote and distribute educational materials addressing occupant protection laws, the importance of wearing safety belts all the time, and air bag safety
- Promote the Saved by the Belt survivor program; maintain a database of survivors to contact those who are willing to speak publicly about their life-saving experience
- Conduct annual *Click It or Ticket* selective traffic enforcement wave during May/June, augmented with collateral public information and awareness efforts such as press releases, observational surveys, and educational programs utilizing the *Click It or Ticket* safety belt campaign message
- Compliment annual *Click It or Ticket* campaign with quarterly occupant protection enforcement days, augmented with collateral public information and awareness efforts namely through press releases.
- Conduct paid media efforts and work toward continual increases in earned media efforts
- Develop educational pieces to heighten awareness concerning the life-saving and economic benefits derived from primary safety belt laws
- Continue funding traffic occupant protection strategies training to law enforcement agencies throughout the state.
- Provide motivational educational speakers for law enforcement personnel during training events such as the annual Law Enforcement Traffic Safety Advisory Council (LETSAC) conference

Motor Carrier Safety Assistance Program (MCSAP) and the Commercial Vehicle Safety Plan

Missouri has a unique advantage in that the State's Highway Safety Plan and Commercial Vehicle Safety Plan (CVSP) are coordinated out of the same office. Missouri's Commercial Motor Vehicle Program Manager is based in the Office of Highway Safety. The Office of Highway Safety coordinates NHTSA and FMCSA funded traffic safety projects for both CMV and non-CMV, thus allowing for more efficient use of funds and better collaborative efforts.

There are two program strategies in the MCSAP CVSP that address safety belt use by commercial vehicle drivers. Missouri conducts a Commercial Motor Vehicle driver safety belt use observational survey on a biannual basis. In 2012 the safety belt use rate was 81 percent and remained the same (81%) in 2014. Below are the program strategies included in the 2015 MCSAP CVSP.

Program Strategy:	Statewide public information/education and enforcement efforts will be conducted in an effort to increase the CMV driver safety belt use rate.
Program Activity Plan:	Public Information and education FY 2016 efforts will include: <ul style="list-style-type: none">• Information at State Fair• Information at MoDOT Motor Carrier Services office• Press Releases during <i>Operation Safe Driver</i>• Safety Belt promotional information in the Motor Carrier Services <i>News on Wheels</i>, which is mailed to every carrier registered to operate in Missouri• Work with Missouri Trucking Association to share the safety message• Seatbelt use is discussed during Motor Carrier Services training sessions• Public education and awareness campaigns
Program Strategy:	Safety belt enforcement projects will be conducted with a focus on observed safety belt violations which typically results in an inspection.
Program Activity Plan:	Missouri State Highway Patrol, Kansas City Police Department and St. Louis Metropolitan Police Department (MCSAP) officers

will maintain a zero tolerance policy on seatbelt enforcement involving commercial vehicle drivers on all CMV stops and inspections.

MoDOT Motor Carrier Services sends letters to carriers who employ a driver who received a seat belt violation. The letter reminds the carrier to encourage their drivers to buckle up and reminds them of the CSA and other consequences of not wearing a safety belt.

ii. Click It or Ticket Mobilization

The state of Missouri has utilized the Click It or Ticket mobilization model for the past 12 years. Missouri will continue to use this model for future CIOT mobilizations, including participation in the FY2016 mobilization.

The FY 2014 CIOT campaign funded local cities, counties and state patrol law enforcement agencies to conduct safety belt enforcement efforts between May 19 and June 1, 2014. Contract award amounts for enforcement include \$120,960 to the Missouri State Highway Patrol, \$255,000.00 to local cities and counties and \$175,000.00 for paid media. Missouri also promoted the 2014 CIOT campaign by issuing pre and post news releases to local media and requiring all participating agencies to notify local media about their participation in the 2014 CIOT campaign and their final results. All enforcement efforts were coupled with an aggressive paid media campaign that began one week prior to the enforcement campaign and ran through June 1, 2014.

Following the same plan as FY2014, the FY2015 contract award amounts total \$121,680 to the Missouri State Highway Patrol, \$330,000 to local cities and counties, and \$350,000 for paid media. The FY2015 campaign runs May 18 – May 31, 2015. Missouri averages 171 participating law enforcement agencies for the CIOT national safety belt campaign.

iii. Child Restraint Inspection Stations

From 2001 to 2009, Missouri saw significant increases in child safety seat use each time the survey was conducted increasing from 64% to 91%. The 2014 survey reported that the usage rate remained unchanged at 91%. See Appendix B for the current survey report. The division plans to conduct child safety seat surveys every other year as funding allows.

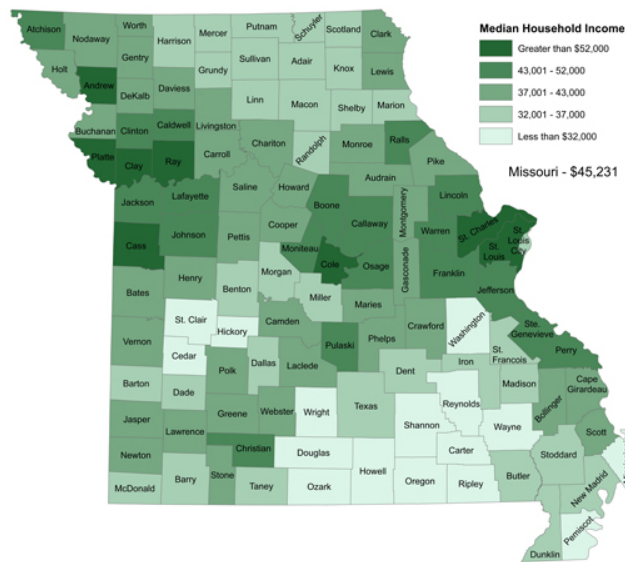

In 2006 when the Booster Seat bill was passed into law, a great deal of preliminary work needed to take place in order to notify the public about the new law, and to develop/enhance policy regarding the child passenger safety (CPS) program in Missouri, therefore the MO CPS Advisory Committee was formed. At that time, 10 individuals were selected to represent each region of the state. These members were professionals from organizations such as Fire Departments, Health Departments, Safety & Health Councils, Police Departments, Missouri State Highway Patrol, Hospitals, Safety Alliances, Safe Communities, and MoDOT. The Deputy Regional Administrator from NHTSA also served as a member on the Committee (the NHTSA representative to serve on the Committee for the 2015 fiscal year will be determined.) The State CPS Coordinator at the MoDOT Office of Highway Safety serves as the chairman. Members of the Advisory Committee are charged with the oversight of all aspects of the CPS program including inspection stations.

Missouri has an active network of 198 child restraint inspection stations. A copy of the child restraint inspection stations, car seat distribution and the child safety seat order lists can be found in Appendix A. There continues to be a minimum of at least one currently certified child passenger safety technician available in the designated counties to assist parents/caregivers with the proper procedures to install a child restraint safely. In order to be eligible to receive child safety seats by the Highway Safety Office, inspection stations are required to be listed on the NHTSA website.

These inspection stations are located around Missouri in areas that service the majority of the State's population and are able to show evidence of outreach to underserved areas. Of the 115 counties in Missouri (see separate map in Appendix A), 84 (or 73%) have one or more inspection stations that employ certified CPS technicians during posted working hours. These technicians are certified through NHTSA's Standardized CPS Course which qualifies them to provide education to parents or caregivers about the safest way for their children to travel. Although the map indicates 31 of the 115 counties do not have an inspection station listed on the NHTSA website, it should be noted that some CPS technicians service other counties surrounding the one in which they are located, which would realistically bring the count up closer to 80% coverage statewide.

There are inspection stations in approximately 80% of the locations with median household income levels less than \$32,000.

2011 U.S. Census Median Household Income - Missouri

Source: 2011 U.S. Census Bureau Small Area Estimates Branch

In counties without an inspection station, there are technicians who work in hospitals, departments of health, police departments, etc. who are not associated with an inspection station. Many of these technicians provide service to parents/caregivers who seek education on proper use of child safety seats even if they live in another county.

A child restraint is not necessarily provided by the inspection station each time. Parents sometimes only need assistance with technique or in making appropriate seat selection for their child. It is estimated that most Missouri inspection stations conduct an average of 300 child safety seat inspections per year. These inspections can be scheduled by parents during organized CPS check-up events or by making an appointment with a certified technician that can be located by accessing the NHTSA website.

At the end of each CPS training course supported by the Highway Safety office, instructors give a brief overview of the procedures to become an inspection station. Students are encouraged to talk with their employer/agency about the benefits of becoming an inspection station. The NHTSA form is provided to students so they can complete and submit it to the NHTSA contact. This process has been very successful in past years.

Evidence of successful outreach includes the distribution of 1,900 child safety seats (\$85,602 in Section 402, Section 2011(d), and some state road funds) to inspection stations in 2014 to low income families per guidelines set forth by the MO CPS Advisory Committee (a committee that was formed in 2006 as a result of the Booster Seat law that passed). Guidelines established by the Committee spell out the terms and conditions of being eligible to receive child safety seats for low income families. Those guidelines are:

1. The agency must be listed as a NHTSA-approved check site with certified technicians on staff.
2. Child restraints must be distributed to families with an economic need.
3. If a donation is collected, then federal regulations regarding program income will be followed (2 CFR Part 200, Section 200.307)
4. The agency will maintain records of the distribution(s) and donations collected.
5. All collected donations must be used to replace seats in a certified child car seat program. A certified CPS technician/instructor should supervise all child restraint distribution programs and ensure that adequate training based on the NHTSA standardized curriculum is provided to those distributing the selected seats. The certified technician should also ensure that appropriate training is provided to the recipients of the seats.

iv. Child Passenger Safety Technicians

The CPS Coordinator in Missouri's Highway Safety office (OHS) formulates an annual plan to recruit, train and maintain a sufficient number of child passenger safety technicians. As of January 2015 there were a total of 1,087 currently certified CPS technicians in Missouri, an increase from slightly over 900 last year. There are 35 certified instructors (a slight decrease from last year). A list of these technicians and instructors is downloaded on a monthly basis from the Safe Kids Worldwide website and maintained in the Highway Safety office. This list is also provided to members who serve on the MO CPS Advisory Committee for local communication efforts in the individual regions, and any public entity requesting such information. A listing of the CPS technicians by county, a map of where the technicians are located, a list of instructors, and a map of where instructors are located can be found in Appendix B.

In 2006, the first CPS Summit convened in Missouri. As a result of that Summit, the Missouri CPS Advisory Committee was formed. The 12 members that make up this committee are CPS technicians/instructors who are professionals employed by agencies including hospitals or health care facilities, law enforcement agencies (including the Missouri State Highway Patrol), a safe community organization, a safety and health council, a fire department, health departments, a Safe Kids organization, NHTSA, a safety alliance, and a MoDOT regional office. During an Annual CPS Summit these members meet to discuss the next fiscal year budget, assist with the formulation of a state CPS plan, and make recommendations or policy enhancements to existing CPS programs in Missouri. The 9th Annual CPS Advisory Committee Summit will convene in August later this year. This committee has been a key element in Missouri's successful CPS program.

The state plans to recruit, train and retain nationally Certified Child Passenger Safety Technicians to staff each child inspection station and inspection event located in the state. In an effort to maintain a sufficient number of child passenger safety technicians, between 8 and 12 CPS courses are sponsored by the OHS each year, estimating the certification of more than 200 new technicians annually. This number does not include classes that are sponsored by other agencies/partners not funded by the OHS. During the Annual CPS Summit, members are provided with a state map that indicates the counties that are lacking CPS technician representation. If funding is needed in those counties, financial assistance may be provided to that member (CPS liaison) for training. An effort is made each year to review the map to ensure each county will have at least one technician. The addition of these new technicians each year helps to ensure that Missouri will maintain a consistent number of technicians. In 2002, there were less than 400 certified technicians in Missouri. Due to the efforts of an extraordinary passionate group of safety partners, that number increased to over 1,000 by the end of 2014. It is necessary that at least one certified CPS technician be available at checkup events or inspection stations to provide key information to parents and caregivers about the proper installation of child safety seats.

CPS training opportunities are mentioned during grant meetings, regional meetings, and any time program staff members meet with the public/safety partners in an effort to promote child passenger safety. A CPS training brochure (see Appendix B) was developed and distributed to the public in an effort to reach potential partners that are interested in enhancing their careers in the field of child passenger safety. The brochure outlines the benefits and registration procedures for attending NHTSA's Standardized CPS training course. The brochure is available through the online ordering system along with other CPS-related safety materials (see Appendix B).

4. Additional Requirements for lower seat belt use rate states

iii. Seat Belt Enforcement

In order to achieve a sustained safety belt enforcement effort, Missouri conducts four quarterly occupant protection enforcement campaigns in addition to the annual CIOT campaign, including participation in the FY2016 campaign. Missouri has law enforcement projects in each of the counties shown on the map depicting over 70% of the state's population. Those counties and relative agencies are following (SO – Sheriff's Office; PD – Police Department):

Buchanan County: Buchanan Co. SO, St. Joseph PD

Platte County: Platte Co. SO, Platte City PD, Edgerton PD, Weston PD, Parkville PD, Riverside DPS

Clay County: Clay Co SO, Gladstone PD, Liberty PD, Smithville PD, North KCPD, Kearney PD, Excelsior Springs PD, Oakview PD

Jackson County: Jackson Co SO, KCPD, Independence PD, Lee's Summit PD, Grain Valley PD, Raytown PD, Grandview PD, Lone Jack PD, Sugar Creek PD, Lake Tapawingo PD

Cass County: Cass Co SO, Belton PD, Lake Winnebago, Raymore PD, Pleasant Valley PD, Harrisonville PD, Cleveland PD

Johnson County: Missouri State Highway Patrol

Jasper County: Jasper Co SO, Joplin PD, Webb City PD, Oronogo PD, Carthage PD, Cartersville PD, Carl Junction PD, Duquesne PD

Newton County: Newton Co. SO, Neosho PD, Joplin PD

Greene County: Greene Co. SO, Springfield PD, Republic PD

Christian County: Christian Co SO, Nixa PD, Ozark PD, Billings PD

Boone County: Boone Co. SO, Columbia PD, Hallsville PD

Cole County: Cole Co. SO, Jefferson City PD

Lincoln County: Lincoln Co. SO, Troy PD, Hawk Point PD, Moscow Mills PD

St. Charles: St. Charles Co. SO, St. Charles PD, St. Peters PD, Wentzville PD, O'Fallon PD, Lake St. Louis PD, Foristell PD, Cottleville PD, New Melle PD

St. Louis County: St. Louis County PD, Florissant PD, Hazelwood PD, Bridgeton PD, St. John PD, St. Ann PD, Chesterfield PD, Creve Coeur PD, Maryland Heights PD, Webster Groves PD, Pacific PD, Eureka PD, Kirkwood PD, Olivette PD, Overland PD, Town and Country PD, Bellefontaine Neighbors PD, Ballwin PD, Breckenridge Hills PD, Brentwood PD, Edmundson PD, Calverton Park PD, Charlack PD, Clayton PD, Ferguson PD, Glendale PD, Rock Hill PD, Shrewsbury PD, University City PD, Velda City PD

St. Louis City: St. Louis Metro PD

Franklin County: Franklin Co. SO, Union PD, Washington PD, St. Clair PD, Sullivan PD, New Haven PD

Jefferson County: Jefferson County SO, Arnold PD, Pevely PD, Crystal City PD, Herculaneum PD, Byrnes Mill PD, DeSoto PD, Festus PD, Hillsboro PD

St. Francois County: Farmington PD, Leadington PD

Cape Girardeau County: Cape Girardeau Co. SO, Cape Girardeau PD, Jackson PD

We strongly encourage all law enforcement agencies funded through our grants to continue safety belt enforcement activity throughout the grant year.

Solicitation for quarterly occupant protection campaigns are sent to all law enforcement agencies in the State of Missouri. Participating agencies are requested to post enforcement totals to a Mobilization Reporting web page. During fiscal year 2015 the CIOT quarterly mobilization dates are November 24, 2014, February 20, 2015, March 15-31, 2015, April 14, 2015 and September 13-19, 2015. The March 15-31 campaign will focus on teens and the September 13-19 campaign will focus on child passenger safety; law enforcement agencies receive additional monies for participation in these campaigns. All quarterly campaigns are coupled with an earned media campaign. Media efforts will be strongly focused in the following media markets: St. Louis, Kansas City, Columbia/Jefferson City, Springfield, Joplin and Cape Girardeau. These areas include the counties that comprise the top 70% of the state's population, per 2010 Missouri census data.

Quarterly enforcement dates for FY2016 have not been finalized but will follow the same calendar as FY2015.

To support the continued effort of sustaining safety belt enforcement, law enforcement agencies that are awarded grants each fiscal year to work hazardous moving violation projects include contract conditions that state the following: *Agency is strongly encouraged to participate in all national or state mobilization efforts in conjunction with, or at the direction of, the Traffic and Highway Safety Division. These mobilizations include, but are not limited to: Click It or Ticket campaign, impaired driving campaign, youth seat belt enforcement campaign, and quarterly enforcement efforts. Mobilization reporting efforts shall be completed using the online mobilization reporting form located at: www.modot.mo.gov/safety.*

April 14, 2015

Dear Chief/Sheriff:

The annual Click It or Ticket safety belt campaign is soon approaching and once again the MoDOT Traffic & Highway Safety Division asks for your help in increasing safety belt use in Missouri. Since 2010, 3,021 vehicle occupants have been killed on Missouri's roadways, 1,826 of which were not belted – that is a 67% unbuckled fatality rate. This trend is continuing for 2015 where so far Missouri has seen 177 fatalities on our roadways, with 67% unbuckled.

Please help encourage motorists to buckle up through stepped up enforcement and education during this year's Click It or Ticket Enforcement Campaign, which runs May 18 – May 31, 2015. Enforcement of the seat belt laws, whether the state's secondary law or local primary ordinances, is essential in ensuring motorists Arrive Alive at their destinations.

Enclosed with this letter are reporting instructions for recording your citation and warning information in the online mobilization reporting system. This is important to complete so the public can be informed of our efforts and for required reporting to the National Highway Traffic Safety Administration. In addition to the reporting instructions, pre & post press releases and safety belt talking points are also included for your use in educating the public and your officers regarding safety belt use in Missouri and the importance of buckling up. More information is available at www.TrafficSafetyMarketing.gov.

Thank you in advance for your participation in this year's Click It or Ticket Campaign. If you have any questions please contact Scott Jones at (573) 522-1341 or scott.jones@modot.mo.gov.

Regards,

Bill Whitfield
Highway Safety Director

Enclosures

Click It or Ticket 2015

**Don't forget, the annual
Click It or Ticket Campaign runs
May 18 – May 31, 2015**

**Please help encourage Missourians to
BUCKLE UP during this campaign.**

***Since 2010, 3,021 vehicle occupants killed in
Missouri; 1,826 (67%) were not belted!***

Please report your citation results to Highway Safety's Mobilization site:

1. Go to: <http://mobilization.rejis.org/frmLogin.aspx>
2. Use the drop down arrows to select the "2015 Click It or Ticket" campaign and your law enforcement department for the agency.
3. Enter your department's ORI and enter the password "Click".
4. Next, enter all data collected for the campaign, then hit "Calc" and "Save".
Note: "Save" uploads your data to the site. You can then select your entry to print.

**Please report your
statistics by
June 30, 2015**

**For information, call:
Scott Jones
MoDOT Highway Safety Division

NEWS RELEASE

For Release: May 2015

For More Information Contact: (Department Contact and Phone Number)

Brake for Seat Belts

(Name of Agency) to Participate in Click It or Ticket Enforcement

(Name of City or County, State) – [Organization Name] will be joining with statewide law enforcement May 18 – 31 for an aggressive “Click It or Ticket” mobilization to crack down on Missouri’s seat belt violations.

Six out of 10 people killed in Missouri traffic crashes are unbuckled. And even with all the advancements in automobile safety and education on the importance of seat belt use, Missouri’s seat belt use has remained relatively unchanged in the last six years and consistently below the national average.

Missouri has a 79 percent seat belt use, which is well below the national average of 87 percent. Teens and pick-up truck drivers are among those least likely to buckle up at 67 and 63 percent.

“Every day someone dies in a crash in Missouri because they weren’t buckled up,” said **[Local Official, Title]**. “We will be pulling out all the stops to ensure motorists are buckling up.”

Seat belt use is the single most effective way to protect people and reduce fatalities in motor vehicle crashes.

Buckle Up and Arrive Alive. For information on Missouri seatbelt usage, visit www.saveMOlives.com.

(Name of Agency) Releases Results of Click It or Ticket Enforcement

Motorists Reminded to Buckle Up and Arrive Alive

(Name of City or County) – The (Name of Agency) participated in the national Click It or Ticket mobilization conducted May 18 – 31. During the enforcement effort, officers issued a total of (number) traffic tickets including: (number) seat belt tickets; (number) speeding tickets; (number) driving while intoxicated; and (number) other traffic violations. (Number) felony arrests were made as a result of the crackdown.

“Seat belts are your single best defense in a crash,” stated (Name of Chief or Sheriff). “Law enforcement will continue to encourage drivers to make a simple, smart choice to buckle up and Arrive Alive.”

Six out of 10 people killed in Missouri traffic crashes are unbuckled. Missouri’s seat belt use has remained relatively unchanged in the last six years. Missouri has a 79 percent seat belt use, which is well below the national average of 87 percent. Teens and pick-up truck drivers are among those least likely to buckle up at 67 and 63 percent.

Buckle up and Arrive Alive. For more information on Missouri’s seat belt use, visit www.saveMOlives.com.

###

**Talking Points for Click It or Ticket
May/June 2015**

General Talking Points

- Click It or Ticket enforcement will take place May 18 – May 31.
- This year's campaign will focus on unbelted drivers and passengers as well as child safety seat violations.
- Six out of 10 vehicle occupants killed in 2014 Missouri traffic crashes are unrestrained.
- In 2014, 767 people were killed in traffic crashes on Missouri's roadways, and 62 percent of those were not restrained.
- Even with all the advancements in automobile safety and education on the importance of seat belt use, Missouri's seat belt use has remained relatively unchanged in the last six years and consistently below the national average.
- Missouri has a 79 percent seat belt use rate, which is well below the national average of 87 percent (2014 data). *Source: 2014 SB Survey*
- Teens and pick-up truck drivers are among those least likely to buckle up at 67 and 64.5 percent respectively. *Source: 2014 SB Survey*
- Missouri traffic fatalities have decreased by 39 percent since 2005 saving 3,269 lives. Yet seat belt use in Missouri has shown only slight improvement.
- 67.8% (7,213) of the vehicle occupants killed in 2005-2014 traffic crashes were unrestrained representing more than 1-1/2 times the amount of lives we have saved with our safety initiatives since 2005.
- Seat belts reduce the risk of dying in a crash by 45 percent.

Missouri Safety Belt Usage Statistics from 2014 SB Survey and CPS survey

- Missouri's overall safety belt usage rate is 79 percent, compared to 87 percent nationwide. This includes safety belt use on drivers and front seat passengers of passenger cars, SUVs, vans and pickup trucks.

Pickup Trucks	64.5 percent
Cars	79.4 percent
Van	83.2 percent
SUV	83.5 percent
Teens	67 percent

- The 2014 data from 21 survey sites revealed a child safety seat usage rate of 91 percent for children under age four.
- 92 percent of surveyed children under age four were located in the back seat of the vehicle.
- Missouri's child safety seat survey revealed that when drivers are not buckled up, 33 percent of children were not restrained either, but when the driver was buckled up, 98 percent of the children were also restrained.

Missouri Safety Belt Usage Rates by Year

<u>Year</u>	<u>Usage Rate</u>	<u>Year</u>	<u>Usage Rate</u>
2000	68%	2007	77%
2001	68%	2008	76%
2002	69%	2009	77%
2003	73%	2010	76%
2004	76%	2011	79%
2005	77%	2012	79%
2006	75%	2013	80%
		2014	79%

National Statistics from NHTSA:

Too Many Are Not Getting the Message.....

- Younger motorists – young men in particular – are most at risk. Among teens and young adults, ages 18-34, who were killed in fatal crashes in 2013, 78.5% were **NOT** buckled up at the time of the crash—the highest percentage of any age group. The number jumps to 81.5% when only men in this age group are included.
- Pickup truck drivers and passengers are also at risk. In 2013, 81.9% of pickup truck occupants who were killed in traffic crashes were not buckled up at the time of the crashes, compared to 58.6% of passenger car occupants who were killed from not buckling up.
- Nationally, 62% of the 10,135 passenger vehicle occupants who were killed in motor vehicle traffic crashes overnight (6 p.m. to 5:59 a.m.) in 2011 were not wearing their seat belts at the time of the fatal crashes, compared to 43% during the daytime hours.

Seat Belts Save Lives!

- Worn correctly, seat belts reduce the risk of fatal injury by 45 percent for front-seat passenger car occupants — and by 60 percent for pickup truck, SUV and van occupants.
- In fatal crashes in 2013, 79 percent of passenger vehicle occupants who were thrown from their vehicles were killed. However, less than 1 percent of crash victims who were buckled up were totally ejected from their vehicles, compared to 35 percent of those who were unbuckled.
- Motorists are 75 percent less likely to be killed in rollover crashes if they are buckled up.

Click It or Ticket - Cracking Down on Low Belt Use

- **Enforcement Works** — *Click It or Ticket* has helped increase the observed national belt usage rate which rose to an all-time high of 87 percent in 2014, up from just 58 percent in 1994.
- **Local efforts, national reach** — Thousands of state and local law enforcement and highway safety officials across the nation will participate in the national *Click It or Ticket* enforcement mobilization from May 18 to May 31.
- **Twenty-four hours a day** — To convince more nighttime drivers to buckle up, the 2014 mobilization will include round-the-clock enforcement – but especially at night.
- **We can't stop now** -- The national *Click It or Ticket* mobilization has increased seat belt use and saved lives, but there is still much more to do. Highly visible enforcement and greater public awareness can turn thousands of lives lost into many more lives saved!

For more information on Missouri seat belt usage, visit www.saveMOlives.com and for more information on the national campaign, visit <http://www.trafficsafetymarketing.gov/>.

iv. High Risk Population

During the past three years, 67.7% of individuals killed in crashes in Missouri were unrestrained. The number of unbelted teens killed in Missouri crashes during the last three years is even higher, at 77.4%. When analyzing only the pick-up truck drivers and passengers, 81% of those killed during the last three years were unrestrained. Missouri's observed safety belt use rate of 79 percent in 2014 is well below the national average of 87 percent.

Missouri conducts both a statewide and a teen safety belt use observational survey each year. The Child Safety Seat and Commercial Motor Vehicle Driver Safety Belt Use Surveys are conducted periodically; both were conducted in 2014. Teen safety belt use is of particular concern, as this group's safety belt use is 12 percent lower than the overall use rate.

Survey	Year	Safety Belt Use
Statewide (all users)	2014	79%
Teen	2014	67%
Child Safety Seat (under 4)	2014	91%
Commercial Motor Vehicle	2014	81%

Countermeasures targeting the high risk populations of teenage drivers, passengers in child safety seats and drivers on rural roadways include:

Education

- Continue to educate law enforcement about the Graduated Driver License (GDL) statute and the provision that defines safety belt enforcement as a primary violation
- Educate GDL recipients and parents about the mandatory safety belt use component of the law
- Continue to expand public information and education campaigns to educate the general public and target groups (pick-up truck and teen occupants) about the importance of occupant protection
- Expand the availability of driver educational programs for young drivers (classes, web-based, etc.)
- Educate young drivers on all aspects of safe driving and rules of the road
- Educate parents on the importance of purchasing safety-enhanced vehicles for their young drivers
- Educate parents about the availability of in-vehicle driver monitoring devices
- Educate parents on the importance of open communication with their young drivers regarding high risk driving behaviors (e.g. distractions, impairment, safety belt use, dealing with passengers, etc.)
- Expand peer-to-peer training on safe driving habits and being a safe/respectful passenger

- Educate parents, caregivers and grandparents about proper selection and installation of child safety and booster seats.
- Recruit and certify more law enforcement officers as Child Passenger Safety technicians
- Expand the number of child safety seat inspection stations and certified Child Passenger Safety Technicians.

Enforcement

- Aggressively enforce the occupant protection component of the GDL law
- Encourage law enforcement to enact a zero tolerance policy when enforcing the secondary occupant protection law
- Increase the emphasis on special occupant protection mobilizations that include public information campaigns and Selective Traffic Enforcement Programs
- Encourage strict enforcement of GDL law (e.g. curfew, safety belt, passenger restrictions)
- Expand enforcement targeting young drivers
- Encourage strict enforcement of texting law
- Expand law enforcement participation in the Youth Seat Belt Enforcement Campaign
- Aggressively enforce the child safety seat and booster seat laws

Engineering

- Increase use of message boards and signs that encourage restraint use

Public Policy / Other

- Enact a primary safety belt law
- Expand the number of local primary safety belt ordinances
- Enhance GDL law components to include passenger restrictions, stricter curfews, increased supervised driving hours and restricted cell phone use

Emergency Medical Services

- Develop a plan to expand the awareness and use of In Case of Emergency (ICE) to encourage people to enter emergency contact information in their mobile phone

Projects Targeting Teenage Drivers, Passengers in Child Safety Seats and Drivers on Rural Roadways

- Team Spirit – Consisting of two full training programs and four one-day workshops conducted each year potentially reaching 72 high schools statewide. One Reunion conducted each year to renew and reenergize students to continue safety belt and safe driving education. Each high school team provides peer-to-peer education in their school and community consisting of seat belt use and safe driving habits.

- Battle of the Belt/It Only Takes One – Annual seat belt competition conducted by high school students consisting of two surprise seat belt surveys, peer-to-peer seat belt education, parent/teen driving contract, law enforcement and media communication, and creation of a public service announcement. Approximately 150 schools participate in the competition each year.
- Youth Seat Belt Enforcement – Annual law enforcement seat belt campaign utilizing grant funding to encourage law enforcement agencies to conduct high visibility enforcement for two weeks in locations where teens frequently drive. The enforcement campaign is coupled with a media campaign to encourage and educate teens on the importance of safety belt use.
- Media – Media campaigns and communication efforts are utilized year round through the use of posters, brochures, incentive items, You Tube videos, social media and the SaveMOlives webpage to encourage and educate all age groups and roadway users on the importance of safety belt use.
- Missouri Coalition for Roadway Safety – Coalition efforts in all seven districts target high risk roadway users year round on topics such as seat belt use, texting and driving and underage drinking. Multiple programs and events occur though out the state by many different groups.
- Alliance Sports Marketing Campaign – Sponsorship with fifteen motor sports venues across the state and three baseball teams. Each venue implemented the Drive Sober or Get Pulled Over and safety belt messages on premium signage, team schedule posters, making public address announcements and t-shirt promotions.
- Occupant Protection Law Enforcement Grants – Missouri conducts four quarterly occupant protection enforcement campaigns in addition to the annual CIOT campaign Solicitation for quarterly occupant protection campaigns are sent to all law enforcement agencies in the State of Missouri. Participating agencies are requested to post enforcement totals to a Mobilization Reporting web page. During fiscal year 2015 the CIOT quarterly mobilization dates are November 24, 2014, February 20, 2015, March 15-31, 2015, April 14, 2015 and September 13-19, 2015. The March 15-31, campaign will focus on teens and the September 13-19 campaign will focus on child passenger safety; law enforcement agencies receive additional monies for participation in these campaigns. All quarterly campaigns are coupled with an earned media campaign. Media efforts will be strongly focused in the following media markets: St. Louis, Kansas City, Columbia/Jefferson City, Springfield, Joplin and Cape Girardeau. Mobilization dates for FY2016 have not been determined yet but will follow the same calendar as FY2015.
- Click It or Ticket It Law Enforcement and Media Campaign – The FY2015 campaign runs May 18 – May 31, 2015:
 - CIOT includes providing funding to local cities, counties and state patrol law enforcement agencies to conduct safety belt enforcement efforts between May 18 and May 31, 2015. Contract award amounts total \$121,680 to the Missouri State

Highway Patrol and \$330,000 to local cities and counties. Missouri averages 171 participating law enforcement agencies for the CIOT national safety belt campaign.

- Missouri will also promote the 2015 CIOT campaign by issuing news releases to local media and requiring all participating agencies to notify local media about their participation in the 2015 CIOT campaign. All enforcement efforts will be coupled with an aggressive paid media campaign that will begin one week prior to the enforcement campaign and run through May 31, 2015. Paid media contract awards total \$350,000 for FY2015.
- Child Passenger Safety Technicians - The CPS Coordinator in Missouri's Highway Safety office formulates an annual plan to recruit, train and maintain a sufficient number of child passenger safety technicians. As of February 2014 there are a total of 989 currently certified CPS technicians in Missouri, 38 of whom are certified instructors. Between 8 and 12 CPS Courses are sponsored by the Highway Safety office each year, estimating the certification of more than 200 new technicians annually. This number does not include classes that are sponsored by other agencies/partners.
- Child Passenger Safety Brochure - A CPS training brochure was developed and distributed to the public in an effort to reach potential partners that are interested in enhancing their careers in the field of child passenger safety.

v. Comprehensive Occupant Protection Program

To qualify for an occupant protection grant, States must submit an occupant protection plan that describes programs the State will implement for achieving reduction in traffic crashes, fatalities and injuries on public roads. Missouri conducted a NHTSA-facilitated Occupant Protection Program Assessment March 31, 2014, to April 4, 2014. Input from the assessment was used when developing the multi-year strategic plan. Scott Jones has been designated as the occupant protection coordinator and Missouri has established a statewide occupant protection task force. Over the past 7 years, safety belt use in Missouri has ranged between 76-80 percent. As a result, Missouri must apply as a lower seat belt use rate state and implement a comprehensive occupant protection program.

The chart below shows Missouri's seat belt use rate for the past five years.

% of Safety Belt/Passenger Vehicle Restraint Use by Year				
2010	2011	2012	2013	2014
76%	79%	79%	80%	79%

The percent of unrestrained passenger vehicle occupants killed and seriously injured in crashes remain essentially unchanged between 2009 and 2013. The percent dropped to 62.1% in 2014. Below is a chart showing the number of passenger vehicle occupant fatalities and serious injuries from 2009-2014 and corresponding percent of unrestrained passenger vehicle occupants. *Serious injury data are incomplete for 2014 because our crash file for that year has not been finalized.

Fatal/Serious Injury by Percent of Unrestrained by Year						
Year	2009	2010	2011	2012	2013	2014
Total Occupant Fatalities	693	634	615	619	579	574
Unbelted Fatalities	425	392	380	396	334	324
% Unrestrained	67.1%	67.7%	68.6%	70.8%	63.4%	62.1%
Total Occupant Serious Injuries	5,359	4,994	4,451	4,350	3,690	*
Unbelted Serious Injuries	1,730	1,598	1,452	1,449	1,202	*
% Unrestrained	35.6%	35.9%	36.5%	37.5%	36.0%	*

Missouri's Strategic Highway Safety Plan (Missouri's Blueprint to Save More Lives) identifies nine strategies having the greatest potential to save more lives and reduce

serious injuries. One of the “Necessary Nine” is to increase safety belt use. Aggressive implementation of this strategy and the other eight will lead to more lives being saved.

The task force includes safety partners throughout Missouri who will work diligently to develop, implement, enforce and evaluate the comprehensive occupant protection program. The overall outcome is to educate and motivate citizens to buckle up every vehicle occupant in an age appropriate restraint or safety belt on every trip. The program involves a combination of enforcement, public information, education and incentives. This two-year comprehensive occupant protection program includes the following components as outlined in NHTSA’s Uniform Guidelines for State Highway Safety Programs No. 20 – Occupant Protection.

I. Program Management

The Highway Safety office provides centralized occupant protection planning, implementation, coordination, and program monitoring. The Highway Safety Office will:

FY 2015

- Develop a multi-year implementation plan for the Occupant Protection Strategic Plan
 - The Highway Safety Office Occupant Protection Coordinator in cooperation with the Occupant Protection Subcommittee will develop the implementation plan.
 - The Highway Safety Office, in conjunction with the Missouri Department of Health and Senior Services and the U.S. Centers for Disease Control – National Center for Injury Prevention and Control hosted a “Motor Vehicle Project Workshop” focusing on seat belt use in Missouri. This workshop served as the Occupant Protection Summit and pulled together several key stakeholders to assist in developing a comprehensive Occupant Protection Plan. The workshop was conducted June 18 – 19, 2014. The Occupant Protection Subcommittee was formed by attendees at this workshop.
 - The Occupant Protection Subcommittee met on December 11, 2014 and March 24, 2015. A majority of these initial meetings were to educate the Committee members on the responsibility of the new Committee, the requirements set

forth under MAP-21 for low seatbelt use states, and the need to develop and implement the Occupant Protection Strategic Plan. Subcommittee members will discuss details of the DRAFT Strategic Plan during the next quarterly meetings. A list of Subcommittee members and meeting minutes & agendas are included in Appendix D.

- Once the plan is completed, the OP Subcommittee and Coordinator will assume the leadership role in educating the MCRS Executive Committee and the 7 MCRS Regional Coalitions about the elements of the plan. In addition they will seek the Regional Coalitions' support to assist in implementing the Plan.
- Continue to encourage the seven Regional Coalitions for Roadway Safety to expand the integration of occupant protection programs into their overall safety programs. They should implement both enforcement and educational Occupant Protection programs.
 - Maps of safety belt usage by site as well as regional safety belt use numbers from the 2014 statewide observational survey were provided to the seven Regional Coalitions prior to the 2015 Click It or Ticket Campaign. With the observational survey conducted in four counties per Region, the seven Regions will now have detailed survey data specific to their area to better plan and implement local enforcement and education programs related to safety belt use.
- Evaluate the effectiveness of the occupant protection program by
 - Conducting a Statewide Seat Belt Observational Survey and a Teen Safety Belt Observational Survey
 - Monitoring the percent of safety belt use by occupants killed in traffic crashes
 - Monitoring the percent of safety belt use by teens killed in traffic crashes
 - Monitoring the number of occupant protection citations and warnings.

FY 2016

- Implement the multi-year Occupant Protection Strategic Plan
 - The Highway Safety Office Occupant Protection Coordinator in cooperation with the Occupant Protection Subcommittee will monitor the status of the implementation plan.
 - The OP Subcommittee and Coordinator will continue to educate the MCRS Executive Committee and the 7 MCRS Regional

Coalitions about the elements of the plan. In addition, they will continue to seek the Regional Coalitions support to assist in implementing the Plan.

- Continue to encourage the seven Regional Coalitions for Roadway Safety to expand the integration of occupant protection programs into their overall safety programs. They should implement both enforcement and educational Occupant Protection programs.
 - Updated maps of safety belt usage by site as well as regional safety belt use numbers from the 2015 observational study will continue to be provided to the seven Regional Coalitions prior to the 2016 Click It or Ticket Campaign. The seven Regions will use this detailed survey data specific to their area to better plan and implement local enforcement and education programs related to safety belt use.
- Evaluate the effectiveness of the occupant protection program by
 - Conducting a Statewide Seat Belt Observational Survey and a Teen Safety Belt Observational Survey
 - Monitoring the percent of safety belt use by occupants killed in traffic crashes
 - Monitoring the percent of safety belt use by teens killed in traffic crashes
 - Monitoring the number of occupant protection citations and warnings.

FY 2017

- Continue implementation of the multi-year Occupant Protection Strategic Plan
 - The Highway Safety Office Occupant Protection Coordinator in cooperation with the Occupant Protection Subcommittee will monitor the status of the implementation plan.
 - The OP Subcommittee and Coordinator will continue to educate the MCRS Executive Committee and the 7 MCRS Regional Coalitions about the elements of the plan. In addition, they will continue to seek the Regional Coalitions support to assist in implementing the Plan.
- Continue to encourage the seven Regional Coalitions for Roadway Safety to expand the integration of occupant protection programs into their overall safety programs. They should implement both enforcement and educational Occupant Protection programs.

- Updated maps of safety belt usage by site as well as regional safety belt use numbers from the 2016 observational survey will continue to be provided to the seven Regional Coalitions prior to the 2017 Click It or Ticket Campaign. The seven Regions will use this survey data specific to their area to better plan and implement local enforcement and education programs related to safety belt use.
- Evaluate the effectiveness of the occupant protection program by
 - Conducting a Statewide Seat Belt Observational Survey and a Teen Safety Belt Observational Survey
 - Monitoring the percent of safety belt use by occupants killed in traffic crashes
 - Monitoring the percent of safety belt use by teens killed in traffic crashes
 - Monitoring the number of occupant protection citations and warnings.

II. Legislation, Regulation, and Policy

Efforts continue to enact new laws and strengthen existing occupant protection laws, regulations and policies to increase the use of age appropriate restraints and safety belts. The Highway Safety Office will:

FY 2015

- Support efforts to alter legislation that would increase age appropriate restraint use/ safety belt use, i.e. primary enforcement, increase the fine for not wearing a safety belt and local primary safety belt ordinances
- Continue to include in our grant application a question regarding the status of the agency's internal safety belt policy for all personnel
- Support and increase awareness about Missouri Department of Transportation's Guide for Drivers on MoDOT Business official policy that "seat belt use is mandatory for the driver and all passengers"
- Monitor the number of primary safety belt local ordinances. As of June, 2014, there are 40 local primary safety belt ordinances.

FY 2016

- Support efforts to alter legislation that would increase age appropriate restraint use/ safety belt use, i.e. primary enforcement, increase the fine for not wearing a safety belt and local primary safety belt ordinances

- Continue to include in our grant application a question regarding the status of the agency's internal safety belt policy for all personnel
- Support and increase awareness about Missouri Department of Transportation's Guide for Drivers on MoDOT Business official policy that "seat belt use is mandatory for the driver and all passengers"
- If a primary safety belt law has not passed, monitor the number of primary safety belt local ordinances.

FY 2017

- Support efforts to alter legislation that would increase age appropriate restraint use/ safety belt use, i.e. primary enforcement, increase the fine for not wearing a safety belt and local primary safety belt ordinances
- Continue to include in our grant application a question regarding the status of the agency's internal safety belt policy for all personnel
- Support and increase awareness about Missouri Department of Transportation's Guide for Drivers on MoDOT Business official policy that "seat belt use is mandatory for the driver and all passengers"
- If a primary safety belt law has not passed, monitor the number of primary safety belt local ordinances.

III. Enforcement Program

A core element of our occupant protection program is strong, sustained enforcement of existing laws coupled with public education. To advance these elements, the Highway Safety Office will:

FY 2015

- Support vigorous enforcement of occupant protection laws through special OP funding and incentive programs
 - Click It or Ticket Mobilization
 - Four Quarterly Occupant Protection Enforcement initiatives established by Missouri's Law Enforcement Traffic Safety Advisory Council
 - National Child Passenger Safety Week
- Offering specialized training for law enforcement officers on the technical aspects of child safety seats and corresponding laws, and officer safety and safety belt use
- Increase law enforcement officers' awareness of the occupant protection components of the Graduated Driver License Law and encourage strong enforcement of these laws.

- Monitor the number of LE agencies participating in the mobilizations and the number of overtime hours.
- Monitor the number of occupant protection citations and warnings.

FY 2016

- Support vigorous enforcement of occupant protection laws through special OP funding and incentive programs
 - Click It or Ticket Mobilization
 - Four Quarterly Occupant Protection Enforcement initiatives established by Missouri's Law Enforcement Traffic Safety Advisory Council
 - National Child Passenger Safety Week
- Offering specialized training for law enforcement officers on the technical aspects of child safety seats and the corresponding laws, and officer safety and safety belt use
- Increase law enforcement officers' awareness of the occupant protection components of the Graduated Driver License Law and encourage strong enforcement of these laws.
- Monitor the number of LE agencies participating in the mobilizations and the number of overtime hours.
- Monitor the number of occupant protection citations and warnings.

FY 2017

- Support vigorous enforcement of occupant protection laws through special OP funding and incentive programs
 - Click It or Ticket Mobilization
 - Four Quarterly Occupant Protection Enforcement initiatives established by Missouri's Law Enforcement Traffic Safety Advisory Council
 - National Child Passenger Safety Week
- Offering specialized training for law enforcement officers on the technical aspects of child safety seats and the corresponding laws, and officer safety and safety belt use
- Increase law enforcement officers' awareness of the occupant protection components of the Graduated Driver License Law and encourage strong enforcement of these laws.
- Monitor the number of LE agencies participating in the mobilizations and the number of overtime hours.
- Monitor the number of occupant protection citations and warnings.

IV. Public Information and Education Program

To enhance public awareness and knowledge about the value of using safety belts and age-appropriate restraints, the state's media efforts have been and will continue to be strongly focused towards this effort. The Highway Safety Office will enlist the support of media to implement a well-planned public information program as well as:

FY 2015

- Support each OP law enforcement initiative with a corresponding public information campaign designed to increase the public's awareness of aggressive enforcement during specified periods
- Continue to develop specialized messages and educational programs that target low-use populations like teens, pick-up drivers, African American drivers/vehicle occupants and rural populations
- Continue to use NHTSA and other State developed OP public information materials to their fullest extent
- Publicize results of OP surveys and relevant data through press releases and events
- Continue to encourage news media to report belt use and non-use in motor vehicle crashes
- Encourage MCRS Regional Coalitions to host media events for Click It or Ticket and National Child Passenger Safety Week
- Include Occupant Protection questions on our annual Highway Safety Drivers Survey

FY 2016

- Support each OP law enforcement initiative with a corresponding public information campaign designed to increase the public's awareness of aggressive enforcement during specified periods
- Continue to develop specialized messages and educational programs that target low-use populations like teens, pick-up drivers, African American drivers/vehicle occupants and rural populations
- Continue to use NHTSA and other State developed OP public information materials to the fullest extent
- Publicize results of OP surveys and relevant data through press releases and events

- Continue to encourage news media to report belt use and non-use in motor vehicle crashes
- Encourage MCRS Regional Coalitions to host media events for Click It or Ticket and National Child Passenger Safety Week
- Include Occupant Protection questions on our annual Highway Safety Drivers Survey

FY 2017

- Support each OP law enforcement initiative with a corresponding public information campaign designed to increase the public's awareness of aggressive enforcement during specified periods
- Continue to develop specialized messages and educational programs that target low-use populations like teens, pick-up drivers, African American drivers/vehicle occupants and rural populations
- Continue to use NHTSA and other State developed OP public information materials to the fullest extent
- Publicize results of OP surveys and relevant data through press releases and events
- Continue to encourage news media to report belt use and non-use in motor vehicle crashes
- Encourage MCRS Regional Coalitions to host media events for Click It or Ticket and National Child Passenger Safety Week
- Include Occupant Protection questions on our annual Highway Safety Drivers Survey

V. Health/Medical Program

Failing to wear a safety belt or use age-appropriate restraints is a major public health issue. Efforts will be made to integrate occupant protection elements into health programs. The Highway Safety Office will:

FY 2015

- Continue to utilize health care professionals as speakers at press events, conferences and summits
- Continue to support and encourage hospital-based policies on transport of new babies/children in age appropriate restraint systems when leaving the hospital
- Continue to support health department's educational programs to encourage use of age appropriate restraints

- Continue to encourage physicians to educate patients, parents, and other care-givers about the need to use age appropriate restraints
- Continue to utilize medical expense data to support the positive results of using age appropriate child restraints and safety belts

FY 2016

- Continue to utilize health care professionals as speakers at press events, conferences and summits
- Continue to support and encourage hospital-based policies on transport of new babies/children in age appropriate restraint systems when leaving the hospital
- Continue to support health department's educational programs to encourage use of age appropriate restraints
- Continue to encourage physicians to educate patients, parents, and other care-givers about the need to use age appropriate restraints
- Continue to utilize medical expense data to support the positive results of using age appropriate child restraints and safety belts

FY 2017

- Continue to utilize health care professionals as speakers at press events, conferences and summits
- Continue to support and encourage hospital-based policies on transport of new babies/children in age appropriate restraint systems when leaving the hospital
- Continue to support health department's educational programs to encourage use of age appropriate restraints
- Continue to encourage physicians to educate patients, parents, and other care-givers about the need to use age appropriate restraints
- Continue to utilize medical expense data to support the positive results of using age appropriate child restraints and safety belts

VI. Child Passenger Safety Program

Promotion of proper use of age-appropriate child restraints is a key component of the occupant protection program. To help achieve that objective the Highway Safety Office will:

FY 2015

- Maintain the state Child Passenger Safety Advisory Committee

- Host a Child Passenger Safety Advisory Committee annual meeting to strengthen communication and discuss program direction and recommendations
- Increase the number of Child Passenger Safety Technicians and Instructors
- Conduct and support child safety seat educational programs and displays (e.g. checkup events, community fairs, presentation for community groups, etc.)
- Garner support for National CPS week in September from Regional Coalitions, Safety partners, CPS Advisory Committee, media and other advocates
- Support the Buckle Up Missouri CPS Conference in Springfield, Missouri – May of 2015

FY 2016

- Maintain the state Child Passenger Safety Advisory Committee
- Host a Child Passenger Safety Advisory Committee annual meeting to strengthen communication and discuss program direction and recommendations
- Increase the number of Child Passenger Safety Technicians and Instructors
- Conduct and support child safety seat educational programs and displays (e.g. checkup events, community fairs, presentation for community groups, etc.)
- Garner support for National CPS week in September from Regional Coalitions, Safety partners, CPS Advisory Committee, media and other advocates

FY 2017

- Maintain the state Child Passenger Safety Advisory Committee
- Host a Child Passenger Safety Advisory Committee annual meeting to strengthen communication and discuss program direction and recommendations
- Increase the number of Child Passenger Safety Technicians and Instructors
- Conduct and support child safety seat educational programs and displays (e.g. checkup events, community fairs, presentation for community groups, etc.)

- Garner support for National CPS week in September from Regional Coalitions, Safety partners, CPS Advisory Committee, media and other advocates

VII. School-Based Program

Efforts will be made to incorporate occupant protection principles into school-based curricula and programs. To help accomplish this goal, the Highway Safety Office will:

FY 2015

- Continue to encourage the Highway Safety Office and the MCRS Regional Coalitions to support OP school-based programs (e.g. Battle of the Belt, Tween Programs, Buckle Buddy the Buckle Up Dragon)
- Continue to support OP programs through the Highway Safety Office and the MCRS Regional Coalitions at school-based health fairs, extra-curricular activities, state championship events, etc.
- Continue to support OP activities of the Partners in Prevention. Partners in Prevention are a conglomerate of Universities implementing various prevention programs.
- Continue to support the Highway Safety Office high school-based Team Spirit and Team Spirit Reunion programs. These programs develop school-based highway safety action plans which include an occupant protection component.

FY 2016

- Continue to encourage the Highway Safety Office and the MCRS Regional Coalitions to support OP school-based programs (e.g. Battle of the Belt, Tween Programs, Buckle Buddy the Buckle Up Dragon)
- Continue to support OP programs through the Highway Safety Office and the MCRS Regional Coalitions at school-based health fairs, extra-curricular activities, state championship events, etc.
- Continue to support OP activities of the Partners in Prevention. Partners in Prevention are a conglomerate of Universities implementing various prevention programs.
- Continue to support the Highway Safety Office high school-based Team Spirit and Team Spirit Reunion programs. These programs develop school-based highway safety action plans which include an occupant protection component.

FY 2017

- Continue to encourage the Highway Safety Office and the MCRS Regional Coalitions to support OP school-based programs (e.g. Battle of the Belt, Tween Programs, Buckle Buddy the Buckle Up Dragon)
- Continue to support OP programs through the Highway Safety Office and the MCRS Regional Coalitions at school-based health fairs, extra-curricular activities, state championship events, etc.
- Continue to support OP activities of the Partners in Prevention. Partners in Prevention are a conglomerate of Universities implementing various prevention programs.
- Continue to support the Highway Safety Office high school-based Team Spirit and Team Spirit Reunion programs. These programs develop school-based highway safety action plans which include an occupant protection component.
- Implement the new It Only Takes One program involving peer-to-peer highway safety education and includes parent, law enforcement and media components.

VIII. Worksite Program

Employers should develop strong workplace occupant protection use policies and enforcement strategies. These programs should stress the importance of safety belt use both on and off the job. To advance this program, the Highway Safety Office will:

FY 2015

- Partner with the Missouri based Safety Councils to host employer OP educational programs. Topics will include the development of OP policies, enforcement strategies, health care costs, and potential legal ramifications.
- Participate as requested in worksite based health fairs and events
- Provide OP speakers for worksite based educational programs

FY 2016

- Partner with the Missouri based Safety Councils to host employer OP educational programs. Topics will include the development of OP policies, enforcement strategies, health care costs, and potential legal ramifications.
- Participate as requested in worksite based health fairs and events
- Provide OP speakers for worksite based educational programs

FY 2017

- Partner with the Missouri based Safety Councils to host employer OP educational programs. Topics will include the development of OP policies, enforcement strategies, health care costs, and potential legal ramifications.
- Participate as requested in worksite based health fairs and events
- Provide OP speakers for worksite based educational programs

IX. Outreach Program

Engaging individuals and organizations outside the traditional highway safety community in occupant protection education is key to advancing the use of safety belts and age-appropriate restraints. These programs not only increase knowledge about occupant protection but stimulate community support. To expand community involvement, the Highway Safety Office will:

FY 2015

- Continue to support the seven MCRS Regional Coalitions and their occupant protection initiatives
- Utilize the State MCRS Public Information Subcommittee to develop Occupant protection outreach and public information materials for use by the MCRS Regional Coalitions
- Develop occupant protection displays for use at the Missouri State Fair and other major community events
- Continue to support the use of the nine seat belt convincers at public events throughout the State
- Continue to support the use of crashed car/truck displays at public events and parades
- Continue to promote the *Saved by the Belt* survivor program

FY 2016

- Continue to support the seven MCRS Regional Coalitions and their occupant protection initiatives
- Utilize the State MCRS Public Information Subcommittee to develop Occupant protection outreach and public information materials for use by the MCRS Regional Coalitions
- Develop occupant protection displays for use at the Missouri State Fair and other major community events

- Continue to support the use of the nine seat belt convincers at public events throughout the State
- Continue to support the use of crashed car/truck displays at public events and parades
- Continue to promote the *Saved by the Belt* survivor program

FY 2017

- Continue to support the seven MCRS Regional Coalitions and their occupant protection initiatives
- Utilize the State MCRS Public Information Subcommittee to develop Occupant protection outreach and public information materials for use by the MCRS Regional Coalitions
- Develop occupant protection displays for use at the Missouri State Fair and other major community events
- Continue to support the use of the nine seat belt convincers at public events throughout the State
- Continue to support the use of crashed car/truck displays at public events and parades
- Continue to promote the *Saved by the Belt* survivor program

X. Evaluation Program

Several types of evaluations will be used to measure the progress of the occupant protection program strategies. To monitor the progress, the Highway Safety Office will:

FY 2015

- Conduct a statewide safety belt observational survey using the new NHTSA approved methodology. This survey will result in safety belt use rates not only for the state but also for the 7 MCRS Regional Coalitions
- Conduct a teen safety belt observational survey at 150 high schools throughout MO. This survey will result in safety belt use rates not only for the state but also for the 7 MCRS Regional Coalitions
- Conduct a child restraint observational survey at 21 locations in 18 counties at local retail stores
- Conduct a Commercial Motor Vehicle Safety Belt Driver Survey at 250 locations in 76 Missouri counties.
- The following performance measures will be monitored
 - Number of unrestrained vehicle occupant fatalities and serious injuries

- Number of unrestrained vehicle occupant fatal and serious injury crashes
- Percent of unbelted drivers killed in crashes
- Percent of unbelted teen driver (15-19) killed in crashes
- Number of local primary safety belt
- Number of occupant protection citations and warnings
- Number of LE agencies participating in OP mobilizations
- Number of overtime hours spent on OP enforcement

FY 2016

- Conduct a statewide safety belt observational survey using the new NHTSA approved methodology. This survey will result in safety belt use rates not only for the state but also for the 7 MCRS Regional Coalitions
- Conduct a teen safety belt observational survey at 150 high schools throughout MO. This survey will result in safety belt use rates not only for the state but also for the 7 MCRS Regional Coalitions
- Conduct a study to evaluate the effectiveness of local primary safety belt ordinances
- The following performance measures will be monitored
 - Number of unrestrained vehicle occupant fatalities and serious injuries
 - Number of unrestrained vehicle occupant fatal and serious injury crashes
 - Percent of unbelted drivers killed in crashes
 - Percent of unbelted teen driver (15-19) killed in crashes
 - Number of local primary safety belt
 - Number of occupant protection citations and warnings
 - Number of LE agencies participating in OP mobilizations
 - Number of overtime hours spent on OP enforcement

FY 2017

- Conduct a statewide safety belt observational survey using the new NHTSA approved methodology. This survey will result in safety belt use rates not only for the state but also for the 7 MCRS Regional Coalitions
- Conduct a teen safety belt observational survey at 150 high schools throughout MO. This survey will result in safety belt use rates not only for the state but also for the 7 MCRS Regional Coalitions
- Conduct a child restraint observational survey at 21 locations in 18 counties at local retail stores
- Conduct a Commercial Motor Vehicle Safety Belt Driver Survey at 250 locations in 76 Missouri counties.

- The following performance measures will be monitored
 - Number of unrestrained vehicle occupant fatalities and serious injuries
 - Number of unrestrained vehicle occupant fatal and serious injury crashes
 - Percent of unbelted drivers killed in crashes
 - Percent of unbelted teen driver (15-19) killed in crashes
 - Number of local primary safety belt
 - Number of occupant protection citations and warnings
 - Number of LE agencies participating in OP mobilizations
 - Number of overtime hours spent on OP enforcement

REGISTRATION

The registration fee for the CPS Certification Course is \$75.00. Registration MUST be completed online at www.safekids.org/certification. Start by selecting the FIND A COURSE link and search for all classes in Missouri to locate a CPS class in your area. Please follow and read all online instructions closely. You will be required to create a user name/ password with an active e-mail address to register.

NOTE: It is preferred that you pay online with a debit or credit card. You are not registered until payment is received. If you cannot register with a debit/credit card, please call 877-366-8154 to be sure you are registering correctly. They are able to help you with any registration problems. For questions about a specific course, contact the lead instructor listed at the registration web site above.

The student manual will be given to you on the first day of class. If you desire to begin preparation in advance, you can find more information and view/download the student manual at www.cpsboard.org.

PLEASE CONSIDER THIS TRAINING if you are passionate about keeping children safe from their number one killer---UNINTENTIONAL INJURIES!

The Highway Safety Division at MoDOT and other partners are proud to support child passenger safety inspection stations and checkup events. Many Missouri communities are in need of trained volunteers along with agency support for continued involvement in our established programs.

ARRIVE ALIVE--It's For The Kids!

MoDOT's Highway Safety Division

Unhappy about the improper installation of your child safety seat?

See a certified Child Passenger Safety (CPS) technician today for a safe and happy baby!

Or better yet, become a certified CPS technician yourself through the NHTSA certified training. Here's how:

Child Passenger Safety Training Opportunities in Missouri.

WHY CPS?

- National Certification goes from State to State.
- Be your Agency's/community's local resource person for child passenger safety issues.
- Reduce agency liability by having properly trained staff.
- Support a community program that has high visibility with a great need identified.
- Families are highly mobile today with numerous unmet transportation needs.
- To better educate legislators to the dangers of unsafe laws and the consequences of misuse.
- To better enforce a law you understand.
- To help your agency/community develop transportation policies.
- To participate in or start a child safety seat inspection station in your community.

This national standardized child passenger safety technician certification course is three to four days long and combines classroom instruction, hands-on work with car seats and vehicles, and a community safety seat checkup event, where students demonstrate proper use and installation of child restraints and safety belts and then teach these skills to parents.

You must attend class each day and the car seat event to successfully complete this course. Certification as a CPS technician is good for two years then requires renewal every two years.

WHO?

This training is for individuals who want to make a difference in children's lives by educating parents and caregivers on the proper use and installation of child safety seats. Examples are: parents, teachers, nurses, civic organization volunteers, safety members of corporations, childcare providers, OT, PT, staff caring for children with special health care needs, law enforcement, emergency responders, auto dealership & repair staff, school transport staff, social workers, churches & family support workers that work with underserved agencies. Participants should be prepared for the physical activity required for installing child safety seats. Please notify your course lead instructor if you have any physical limitations so your needs can be accommodated.

7 out of 10 kids

are at risk in a traffic crash!

Car crashes are the No. 1 killer of kids. Nearly 73 percent of all child restraints are not used correctly. Is your child safe?

Play by the Rules

MISSOURI'S CHILD RESTRAINT LAW

Always check the owner's manual for proper use of your child safety seat or booster seat. To verify that your child safety seat has been installed correctly, you can visit www.seatcheck.org to search for a certified Child Passenger Safety technician nearest you.

Growing Up Safe

As children grow, how they are secured in your car, truck or SUV should change. Save your child from injury or death by buckling them in correctly.

Lap and
shoulder
safety belts

Children 8 and over or weighing at least 80 pounds or at least 4'9" tall are required to be secured by a safety belt or booster seat appropriate for that child.

Booster seats
with lap and
shoulder belt

Children ages 4 through 7 who weigh at least 40 pounds must be in an appropriate child safety seat or booster seat unless they are 80 pounds or 4'9" tall.

Child
safety
seats

Children less than 4 years old or less than 40 pounds must be in an appropriate child safety seat, per manufacturer's instructions of the child restraint.

7 out of 10 kids
are at risk in a
traffic crash!

As of August 28, 2006, Missouri law requires all children under the age of eight to be in an appropriate child safety seat or booster seat unless they are 80 lbs. or 4'9" tall.

Motor-vehicle crashes kill more than 40,000 Americans and injure 2.7 million each year.

Approximately 70 percent of motor vehicle occupants fatally injured in Missouri traffic crashes were not wearing safety belts. Safety belts are considered the most important safety equipment in a motor vehicle, and using them correctly and on every trip is the most effective way to reduce injuries and fatalities in a crash.

Research from the National Highway Traffic Safety Administration indicates automobile occupants are 45 percent more likely to survive a crash if they are wearing their lap and shoulder belts correctly; pickup truck and light truck passengers are 60 percent more likely to survive a crash when buckled up correctly.

Properly worn seat belts and functioning air bags can reduce the risk of death in a vehicle crash 63 percent, according to a recent study led by Justin Cummins, an orthopedic surgeon at Dartmouth Hitchcock Medical Center in Lebanon, NH.

Safety Belts

Safety belts are an adult's most effective occupant protection device in motor vehicles. **Chapter 307 of the Missouri Revised Statutes** requires all adults riding in the front seat of a car, pickup truck, sport utility vehicle or van to wear safety belts.

Children ages eight through 15 must always wear safety belts. A law enforcement officer can stop you and issue you a citation for no other reason than non-compliance with this law.

You Need to Know

- To be effective, safety belts must be worn correctly. The lap belt should be worn low and snug across the hips. The shoulder belt should lay over the shoulder and across the chest, adjusted according to the vehicle's owner's manual. Never place the shoulder belt under your arm or behind your back – this could result in a serious or fatal injury.
- Pregnant women should always wear safety belts with the lap belt as low as possible across the hips.
- Safety belts should be worn in combination with air bag systems. They keep your body in the safest position so an air bag can do its job.
- Drivers with air bags should keep at least a 10-inch distance between the air bag and their breast bone.
- A tilt steering wheel should be tilted down so the air bag will deploy toward the chest and not the head.

Child Safety Seats

- **Chapter 307 of the Missouri Revised Statutes** requires all children under age eight to be properly secured in an appropriate child safety seat or booster seat. This includes all cars, pickup trucks, SUVs and vans. A law enforcement officer can stop you and issue you a citation for no other reason than non-compliance with this law.

Missouri Law Requires:

- Children **less than 4 years old or less than 40 pounds** to be in an appropriate child safety seat.
- Children ages 4 through 7 years old who weigh at least 40 pounds **must** be in an appropriate child safety seat or booster seat unless they are 80 pounds or 4'9" tall.
- Children 8 and over or weighing at least **80 pounds** or at least **4'9"** tall are required to be secured by a **safety belt** or **booster seat** appropriate for that child.

Types of Safety Seats:

There are many types of safety seats. Choose one that is right for your child's size and age, and fits correctly in your vehicle. Your options include:

Infant Seats are used from birth until a child is at least one year old **and** weighs at least 20 pounds. These should be placed in the back seat facing the rear of the vehicle, at the angle recommended by the manufacturer. **Never place a rear-facing infant seat in front of an air-bag.**

Convertible Seats are for children between birth and 40 pounds. These seats face backward or forward, depending on the child's age and size. They can be adjusted as your child grows. All children under one year old and weighing less than 20 pounds must face the rear of the vehicle.

Booster Seats are for children who've outgrown convertible seats. They face forward and must be used for children 4-7 years old unless they are 4'9" tall or weigh 80 pounds. Booster seats should never be used with a lap belt only, they require the use of lap and shoulder belts. If your vehicle does not have shoulder belts in the rear seats, have them installed.

Not sure if your child's safety seat is installed correctly? Contact the Missouri Department of Transportation's Traffic and Highway Safety Division at **800-800-BELT (2358)** to find an approved fitting station near you, or visit www.nhtsa.dot.gov.

Keeping Kids Safe

- Properly installed child safety seats should have no more than one inch of side-to-side movement.
- Check the owner's manual for proper use of your child safety seat or booster seat.
- Many seats use a plastic chest clip to keep the shoulder straps positioned correctly on your child. The chest clip should be at armpit level.
- Never use an old safety seat; it may have invisible damage or may be missing parts. Check the child safety seat for an expiration date. Typically they should be discarded after six years.
- The National Highway Traffic Safety Administration recommends that children 12 and under ride properly restrained in the back seat.
- The National Highway Traffic Safety Administration recommends keeping your 1 to 3 year old children in rear-facing car seats for as long as possible. It's the best way to keep them safe. They should remain rear-facing until they reach the height or weight limit allowed by the car seat's manufacturer.

EXECUTIVE SUMMARY

The Missouri Safety Center conducted a child safety seat survey between March 1st and May 31st, 2014, in 18 counties at 21 Wal-Mart Supercenters or Stores. The purpose of the survey was to determine observed restraint use (i.e. child safety seat, booster seat, and safety belt) versus non use by children under the age of four. **Observations were based upon the child being restrained vs not restrained and did not attempt to determine “correct” usage of these devices.** Since the survey team did not have personal interaction with the vehicle driver, observations (the age of the child and gender and ethnic origin of the driver) were based upon their best judgment. Wal-Mart parking lots were selected for the observations to minimize socio-economic, ethnic and educational bias. In addition, vehicles were traveling at slower speeds which aided in more concise identification of driver, passenger, and child restraint use.

The 18 counties were randomly selected from the list of Urban and Rural counties utilized for the Statewide Safety Belt Survey prior to 2013. Jackson and St. Louis Counties were automatically placed in the pool, due to their large population base. Three additional Urban counties (population of 50,000 or more) and 13 rural counties (population less than 50,000) were randomly selected from the pool of five remaining Urban and 13 Rural counties. The Urban counties selected were: Boone, Clay, Greene, Jackson, St. Louis, and St. Charles. Adair, Camden, Callaway, Jefferson, Johnson, Lawrence, Lafayette, Lincoln, Platte, Polk, Scott, and Webster were selected from the Rural county pool. Greene County was in the original pool of counties selected for the statewide safety belt survey but was later replaced.

Most surveys were conducted on Friday, Saturday or Sunday. Collection periods were in two hour blocks from 9:00-11:00 am, 1:00-3:00 pm, and 5:00-7:00 pm totaling six observational hours per site. There were a total of 126 hours of observational time for the 21 survey sites.

A total of 2,432 children were observed under the age of four riding in 2,056 vehicles.

Summary of the Findings

- The 2014 data from 21 survey sites revealed that 91.2 percent of the 2,432 children under age four were restrained. This is a 0.1 percent decrease from the reported 2009 restraint use figure (91.3%).
- Manchester (97%), Troy (97%), Kirkwood (96%), Festus (96%), and Warrensburg (96%) had the highest child restraint use respectfully. Gladstone, Aurora, Springfield, Wentzville, Osage Beach, Bolivar, Higginsville, Lee’s Summit, Oak Grove, and Kirksville had over 90 percent child restraint use. Sikeston had the lowest restraint use rate at 79 percent.
- Ninety-two percent of the children were located in the back seat of the vehicle.

- Of the 2,217 children who were restrained, 51 percent were in forward facing child safety seats. Twenty percent were in booster seats, which is a 2 percent increase from 2009. Children restrained by safety belts increased from 4 percent in 2009 to 17 percent in 2014.
- A total of 215 children (9%) were not restrained. Most of those children, 96 percent (206), were “loose” in the vehicle either sitting, standing, or lying in the seat. The remaining four percent (9) were being held on the lap of another passenger. Sixteen percent (35) of the children not restrained were located in the front seat.
- Fifty-nine percent of the drivers were female and 41 percent were male. Of the 1,222 female drivers, 82 percent were using safety belts. Only seventy-six percent of the male drivers (630) were belted. This was a six percent increase for female drivers and a five percent increase for male drivers from 2009.
- Sixty-two percent of the 2,056 vehicles observed were passenger cars with 12 percent vans, 20 percent sports utility vehicles (SUVs), and 6 percent light duty trucks.
- Drivers of vans most frequently used safety belts 91 percent of the time, while light duty truck drivers wore safety belts the least at 68 percent.
- Of the 2,056 drivers, 88 percent were White, 9 percent Black, 2 percent Hispanic, and 1 percent Asian.
- Only 63 percent of the 32 Hispanic drivers were wearing safety belts. Eighty-nine percent of the Asian, 81 percent of the White, and 65 percent of the Black drivers were belted.
- Female and male drivers were almost equally likely to have their children restrained at 92 and 91 percent respectively. This is a one percent increase for males and no change in percentage for females when compared to the 2009 data (92% for female – 90% for male).
- When the driver was belted, 98 percent of the children were also restrained. In contrast, when the driver was not belted 33 percent of the children were also not restrained.
- In the 376 vehicles with a second child in the age range, 38 percent of the children were not restrained if the driver was not restrained.
- Twenty-four percent of the children with Hispanic drivers were not restrained. In contrast, only 6 percent of children with Asian drivers were not restrained.
- Children were restrained in trucks 87 percent of the time. This is a 9 percent increase from the 78 percent in 2009. Eighty-nine percent of the children were restrained in a passenger car, 95 percent of the children were restrained in a SUV, and 98 percent were restrained in vans.

INTRODUCTION

The Highway Safety Division of MODOT requested the Missouri Safety Center to conduct a statewide child safety seat survey. The purpose of the survey was to determine observed use versus non use of restraint devices (i.e. child safety seat, booster seat, safety belt) by children under the age of four. Observations were based upon use vs. non use and **did not determine “correct” usage of these restraints**. Missouri law requires that all children under age four riding in a motor vehicle must be secured in a child safety seat or vest. This includes all cars, pickup trucks, vans and buses manufactured with safety belts.

All surveys were conducted at Wal-Mart Super Centers or stores located in selected towns within the targeted counties. There were a total of 21 survey sites in 18 counties. The survey methodology is located in Appendix A.

The following report summarizes observations collected between March 1st and May 31st, 2014. All data for this study were derived from two survey instruments (See Appendix B). One instrument collected information on the child’s/children’s restraint use and the other focused on the driver’s safety belt use, gender, and vehicle type. The last three columns of the driver’s survey identified their Ethnic origin: X indicates Black, Y indicates Asian, Z indicates Hispanic and no mark indicates White.

There were a total of 2,432 children observed in 2,056 vehicles. Sixty-two percent of the vehicles were passenger cars, 20 percent sports utility vehicles, 6 percent light duty trucks and 12 percent vans. Table 1 shows chronologically the day and date these data were collected as well as the town and total observations by county.

In 2001, observations were conducted in 12 counties and 15 locations. The 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, and 2014 surveys consisted of observations in 18 counties and 21 locations. A total of 2,432 observations were collected in 21 locations in 2014 as compared to 4,233 observations in 2009, 4,706 observations in 2008, 4,180 observations in 2007, 2,004 observations in 2006, 5,144 observations in 2005, 4,940 observations in 2004, 5,255 observations in 2003, 4,828 observations in 2002, and 3,125 observations in 15 locations in 2001. Table 2 shows a summary of the number of observations by county by year. The number of survey locations was expanded in 2002; therefore six counties will not have 2001 data.

Six hours of observations were conducted at each site in the following time frames: 9:00-11:00 am, 1:00-3:00 pm, and 5:00-7:00 pm. A total of 126 observational hours were accumulated at the 21 survey sites. Table 3 depicts the number of observations by time of day by county. Forty-three percent (1,065) of the total observations were collected during the 5:00-7:00 pm time frame. During the 9:00-11:00 am time frame twenty-three percent (575) were observed with thirty-two percent (792) being observed during the 1:00-3:00 pm time frame. The largest percent of observations were conducted in the Jackson County area.

CHILD'S RESTRAINT USE SUMMARY

In the 2,056 vehicles there were 2,432 children within the targeted age range. Observations were collected at 21 survey sites and revealed that 91.2 percent of the children were restrained by either a forward facing child safety seat, rear facing child safety seat, booster seat or safety belt. Correct use was not determined. These findings are displayed in Figure 1. In 2014, 91.2 percent of the children were restrained, in 2009, 91.3 percent of the children were restrained, in 2008, 90.2 percent of the children were restrained, in 2007, 88.2 percent of the children were restrained, in 2006, 82.9 percent of the children were restrained, in 2005, 81.8 percent of the children were restrained, in 2004, 76.7 percent were restrained, in 2003, 73.1 percent were restrained, in 2002, 70 percent were restrained, and in 2001, 65 percent were restrained. Child restraint use has increased by 26.2 percent since 2001.

Figure 1: Child's Restraint Use

Table 4 depicts child restraint use for each county in 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, and 2014. In the 2014 survey, Lincoln and St. Louis counties had the highest percent of child restraint use with 96.7 and 96.6 percent, respectively. Counties having 90 percent restraint use or higher included Adair, Camden, Clay, Greene, Jefferson, Johnson, Lafayette, Lawrence, Lincoln, Polk, St. Charles, and St. Louis. The lowest percent of child restraint use was in Scott County with 79.2 percent.

Ninety-two percent of the 2,432 children (restrained and not restrained) were located in the back seat. Figure 2 shows the child's location by seating position. Table 5 shows child's seating position by year.

Figure 2: Child's Location by Seating Position

Table 5

2003	86%	14%
2002	84%	16%
2001	83%	17%

Fifty-one percent (1,134) of the 2,217 children restrained were in child safety seats in the forward facing position. Twenty percent (442) were observed in booster seats. Children in safety belts increased from 4 percent in 2009 to 17 percent in 2014. Observations by restraint type are located in Figure 3. Table 6 presents Child's Restraint Type by year.

Figure 3: Child's Restraint Type/Seat Position

Table 6
Child's Restraint Type
2001 - 2014

Of the 2,432 children observed 215 (9%) were not restrained. There were 175 (81%) unrestrained children sitting in the vehicle with 147 (84%) sitting in the back and 28 (16%) sitting in the front seat. A total of 9 (4%) of the unrestrained children were sitting on the lap of a vehicle passenger, of that 4 (44%) were located in the back seat with 5 (56%) located in the front of the vehicle. Thirty (14%) unrestrained children were standing in the vehicle with 2 (7%) standing in the front and 28 (93%) standing in the back. One (0.6%) unrestrained child was lying in the back seat. Figure 4 shows the unrestrained child's position in the vehicle.

Figure 4: No Restraint by Child's Position

DRIVER, PASSENGER, AND VEHICLE INFORMATION

In addition to the child's restraint use, the vehicle's driver and outboard front seat passenger's safety belt use was also recorded. Of the 2,056 drivers, 79 percent were belted. Seventy-four percent of the outboard front seat passengers were restrained. The majority of the drivers observed in 2014 were female at 59 percent. Table 7 shows the driver's safety belt use for 2001 through 2014 by gender.

When broken down by type of vehicle, 75 percent of the passenger car drivers, 90 percent of the SUV drivers, 68 percent of the truck drivers and 91 percent of the van drivers were belted. Driver's safety belt use by vehicle type for 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, and 2014 are displayed in Table 8.

Another data element captured about the driver, in addition to gender and restraint use, was ethnicity. The ethnic origin was determined by the judgment of the survey team. Of the 2,056 drivers, 88 percent (1,818) were White, while 1 percent was Asian (28), 9 percent were African-American (178) and 2 percent were Hispanic (32). Figure 5 displays the frequency and percent of drivers by ethnic origin.

Figure 5: Driver by Ethnic Origin

Children were restrained for female drivers at 92 percent and for male drivers at 91 percent. Figure 6 shows child restraint use by the driver's gender.

Figure 6: Child's Restraint Use by Driver's Gender

When the driver was belted, 98 percent of the children were also restrained. Accordingly, when the driver was not belted, 33 percent of the children were not restrained. Driver belt use by child's restraint use is illustrated in Figure 7.

Figure 7: Child's Restraint Use by Driver's Belt Use

In vehicles with a second child in the targeted age range, 98 percent were restrained when the driver was belted. In contrast, when the driver was not belted, 38 percent of the children were not restrained. Of the 2,056 vehicles, 18 percent (376) were observed with multiple children in the targeted age range. Figure 8 depicts this information.

Figure 8: 2nd Child's Restraint Use by Driver's Belt

Table 9 shows the percentage of drivers' belted by ethnic origin. Based upon the observations at the 21 survey sites, only 65 percent of the African American drivers and 63% of Hispanic drivers were belted. In contrast, the White and Asian drivers were belted 81 and 89 percent respectively. Overall belt use by all drivers was 79 percent.

Figure 9: Child's Restraint Status by Driver's Ethnic Origin

Light duty trucks had the lowest child restraint use at 87 percent. Observed child restraint use increased in both the Light Duty Trucks and Van in 2014, with the exception being SUVs, which decreased from 96 percent in 2009, to 95 percent in 2014. Within the vehicle type Car, the child restraint percentage stayed the same as in 2009 (89%). Table 11 and Figure 10 reflect these data.

Figure 10: Child's Restraint Use by Vehicle Type

Child Safety Seat Survey Survey Methodology

The Missouri Division of Highway Safety requested the Missouri Safety Center to develop a methodology to conduct a statewide child safety seat survey. In preparation for the statewide survey, in 2001 a pilot test was conducted utilizing the proposed survey methodologies. It was determined that the child safety seat surveys would be conducted within the same 20 counties that were randomly selected for the statewide safety belt survey which comprise 85% of the state's population.

County Sampling Plan

The 20 counties were divided into two groups, urban and rural. Urban counties contain population of 50,000 or more, while rural counties contain less than 50,000. The counties selected for data sampling were:

Urban: St. Louis County

Jackson
Greene
Boone
St. Charles
Clay
Cape Girardeau

Rural:

Adair
Christian
Callaway
Camden
Johnson
Lafayette
Lawrence
Lincoln
Newton
Polk
Scott
Stoddard
Webster

To select the counties for the 2001 survey, a fish bowl approach was used. St. Louis County and Jackson County were automatically placed in the sample due to their population base. From the remaining five urban counties, two were randomly selected. Six rural counties were randomly selected from the pool of thirteen. The urban counties selected were St. Louis, Jackson, Greene, and St. Charles counties. Callaway, Camden, Lafayette, Lawrence, Scott and Webster counties were selected from the rural pool.

To expand the sample in 2002, additional counties were selected from both the urban and rural pools using the fish bowl approach. Boone and Clay were added to the urban group for a total of six counties. Adair, Jefferson, Johnson, Lincoln, Platte and Polk were added to the rural group. Sites were identified in a total of 18 counties. These same counties and corresponding sites were utilized in the 2014 survey.

Observation Sites

After the counties were selected, all the Wal-Mart stores were identified in each of the counties. If multiple stores were located in the county, Wal-Mart Super Centers were selected first due to their high traffic volumes. Most rural counties had only one Wal-Mart store. Wal-Mart stores were used as observation sites to reduce socio-economic and educational bias due to their broad customer base.

In the case of St. Louis and Jackson Counties, three sites were selected in Jackson and two in St. Louis. All other counties had at least one Wal-Mart store or Super Center; therefore, it was not necessary to identify alternate observational sites. A total of 21 sites were identified in the 18 counties. The 18 counties were Adair, Boone, Callaway Camden, Clay, Green, Jackson, Jefferson, Johnson, Lafayette, Lawrence, Lincoln, Platte, Polk, St. Charles, St. Louis, Scott, and Webster.

Data Collection

Two surveyors were used at each site. One recorded use or non use of child safety restraints, location of the seat, and type of seat for children under the age of four. The other recorded safety belt use by the driver and outboard passenger, as well as, the vehicle type, driver's gender and ethnic origin. Data were not collected on the correct use of the child restraint device. Vehicles qualifying for the survey included passenger vehicles, vans, sports utility vehicles and light duty trucks. Observation points at the selected stores were at or near the main entrance to the store.

Each observational period was two hours in length. Data were collected for six hours at each site between the following time periods: 9:00-11:00 am, 1:00-3:00 pm, and 5:00-7:00 pm. A total of 126 hours of observation was collected at the 21 sites. Most surveys were conducted on Friday, Saturday or Sunday with one collected on Monday, Tuesday and Wednesday. The weekend days were most frequently selected to improve the volume of traffic at each site.

Survey Team

The same two observers were used to collect data at 18 of the 21 survey sites. Maintaining the same surveyors minimized the inconsistency in data collection techniques.

Operation

At each observational site, data collectors determined the main entrance of each store by observing traffic flow for a least a 10 minute period. Once determined, the survey team's vehicle was positioned to get the best visual view for determining restraint use. Observers recorded the restraint use of children under the age of four and safety belt use the driver and outboard passenger. All "qualifying" vehicles were counted regardless of the license plate state. Restraint use was recorded for children under the age of four regardless of their location in the vehicle.

A total of 120 minutes of observational time was collected at each survey site between the hours of 9:00-11:00 am, 1:00-3:00 pm and 5:00-7:00 pm.

Data Analysis

The observation forms were scanned using the Remark Software program. The SPSS System was then used to conduct the data analysis. Data were analyzed for the child, driver, passenger, and vehicle type. Percentages of child safety restraint use and driver/outboard front seat passenger safety belt use were then computed for each site and by county. Data were analyzed for the restrained and unrestrained child as well as the driver and outboard passenger. Demographic data including gender and ethnic origin of the driver were also summarized.

ACKNOWLEDGEMENTS

The assessment team would like to acknowledge and thank the Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS) Director Leanna Depue and Program Administrator Bill Whitfield for their support, level of effort, and commitment to occupant protection in Missouri. Special thanks goes to Occupant Protection Coordinator Scott Jones for his exemplary support in developing the assessment agenda, administering the questionnaires, compiling briefing materials, and providing logistical support to the team.

The team would also like to acknowledge the hard work and dedication of the Missouri Coalition for Roadway Safety, staff representatives from OHS, MoDOT, the Missouri State Highway Patrol (MSHP), local law enforcement (Boone County Sheriff's Office, Creve Coeur Police Department, Joplin Police Department, Kansas City Metro Police Department, St. Louis County Police Department and Willow Springs Police Department), Lincoln County Health Department, Missouri Safety Center, Missouri Safe Kids, ThinkFirst Missouri and others, many of whom volunteered their time to share their knowledge and expertise during the assessment. Thanks to everyone committed to *Saving Mo Lives* on Missouri roadways.

This assessment could not have been conducted without the guidance and involvement from the National Highway Traffic Safety Administration's regional and headquarters staff: Susan DeCourcy, Janice Hartwill-Miller, Amy Schick and Laura Dunn; and support from their supervisors, Region 7 Administrator Chris Murphy and Occupant Protection Division Chief Maria Vegega. Special thanks also goes to Laura Nichols, who served as the administrative consultant for this assessment.

ASSESSMENT BACKGROUND

The purpose of the Occupant Protection Program Assessment is to provide the State of Missouri with a comprehensive review of its occupant protection program by identifying strengths, accomplishments, and challenges. In addition to using data and other resources, this report provides valuable insights for occupant protection program planning.

The assessment process provides a systematic approach for measuring progress by following the format of the *Uniform Guidelines for State Highway Safety Programs, Guideline No. 20, Occupant Protection* (November 2006). These guidelines offer direction to states in formulating their plans for highway safety efforts that are supported with 23 U.S.C. Section 402 (State and Community Highway Safety), 23 U.S.C. Section 405(b) (Occupant Protection) and other grant funds. The guidelines provide a framework for developing a balanced highway safety program and serve as a tool with which states can assess the effectiveness of their own programs.

All states, in cooperation with their political subdivisions, should have a comprehensive occupant protection program that educates and motivates its citizens to use available motor vehicle occupant protection systems. A combination of use requirements, aggressive enforcement, public information, education, and incentives is necessary to achieve lasting increases in occupant protection usage, which will prevent fatalities and decrease the number and severity of injuries.

The National Highway Traffic Safety Administration (NHTSA) staff facilitated the Occupant Protection Program Assessment. Working with the Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS), NHTSA recommended a team of five individuals with proven expertise in various aspects of occupant protection program development, implementation, and evaluation. Efforts were made to select a team that reflected the needs and interests expressed by OHS.

The assessment consisted of a thorough review of state-provided occupant protection program briefing materials and interviews with state and community-level program directors, coordinators, advocates, law enforcement personnel, and OHS staff. The conclusions drawn by the assessment team were based primarily upon the facts and information provided in the briefing materials and by the various experts who made presentations to the team.

Following completion of the interviews on Wednesday, April 2, 2014, the team convened to review and analyze the information presented. On Friday, April 4, 2014, the team briefed OHS and other invited guests on its findings and discussed major points and recommendations.

The assessment team noted that many occupant protection and general traffic safety activities are conducted throughout Missouri. It is not the intent of this report to thoroughly document all of these successes, nor to give credit to the large number of individuals at all levels who are dedicated to traffic safety. By its very nature, the report focuses on areas where further improvements can be made. Please consider this report as constructive criticism. It is an attempt to provide assistance at all levels for improvement, which is consistent with the overall goals of assessments.

This report is a consensus report. The recommendations provided are based on the unique characteristics of Missouri and what the assessment team members believe Missouri, its political subdivisions, and partners can do to improve the reach and effectiveness of the occupant protection program.

Missouri conducted a NHTSA occupant protection assessment in 2009. In addition to utilizing this current assessment report for occupant protection planning, the team strongly encourages OHS to continue using the 2009 assessment recommendations. Some recommendations from the previous assessment are now reinforced in this document to highlight their importance and reinforce that their implementation is key to improving Missouri's occupant protection program.

This Occupant Protection Program Assessment Report is not a NHTSA document and it belongs to OHS. Missouri is strongly encouraged to use the assessment report as the basis for making program improvements, assessing legislative priorities, providing additional training opportunities, evaluating funding priorities, and shaping future strategic highway safety plans.

EXECUTIVE SUMMARY

The state of Missouri, in cooperation with the National Highway Traffic Safety Administration (NHTSA), initiated an Occupant Protection Program Assessment. During the February 14, 2014 pre-assessment conference call, the Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS) asked the team of independent experts to identify practical strategies that a secondary enforcement law state can utilize to increase overall seat belt usage, strategies to increase teen seat belt use, and innovative enforcement approaches. Particular attention was given to these areas.

Recommendations from this assessment are intended to guide OHS toward improvements in program management; regulations, legislation and policy; law enforcement; communication; occupant protection for children; outreach; and data and evaluation.

OHS, the Missouri Coalition for Roadway Safety, and other dedicated partners are committed to improving highway safety. By 2016, Missouri is committed to having 700 or fewer traffic fatalities on its roadways.

OHS guides Missouri's overall highway safety program, identifies the most critical statewide traffic safety needs, awards and monitors highway safety grants, and coordinates high visibility enforcement mobilizations such as Click It or Ticket/Click It for Life. OHS takes a thorough approach in assessing the state's occupant protection challenges that run the gamut, from decreasing the overall number of crashes (fatal, injury and property damage only) to reducing unrestrained fatality crashes and increasing observed seat belt use rates. OHS relies heavily on performance management and observational surveys to assess program efficacy.

Since 2005, Missouri has seen a 40 percent reduction in motor vehicle fatalities. In 2013, 757 people were killed in traffic crashes, the lowest number since 1945. Despite this noteworthy progress, Missouri has struggled to see meaningful increases in its seat belt use rate over the past ten years, ranging from 76 percent in 2004 to 80.1 percent in 2013. Missouri's teen seat belt usage rate stands at 67 percent. In 2013, sixty-three percent of all vehicle occupants fatally injured were unbelted and nearly 8 out of 10 vehicle occupants age 15-25 died unrestrained.

With 33,000 miles of state-owned and maintained roadways, Missouri's state road system is the 7th largest in the country. Roughly 75 percent of fatalities occur on the major state-owned roads. The "off (county/city) system" consists of 96,000 road miles. Similar to national trends, Missouri seat belt use compliance in rural areas is generally lower than more populated areas. Young men, pickup truck drivers and minorities are also less likely to buckle up.

Missouri, known as the "Show-Me State", has highly varied geography and is the 21st largest and the 18th most populous of the 50 United States. According to the 2010 U.S. Census, more than six million people live in Missouri with over half of Missourians residing within the St. Louis and Kansas City metropolitan areas.

Recently, MoDOT underwent significant staffing reductions. OHS was not immune to these reductions. Despite the staffing downsize, OHS manages more than 400 contracts with a \$3.4 million contracted budget in FY 2014 for occupant protection.

The state of Missouri has a secondary enforcement seat belt law for adults in the front seat of passenger vehicles. There is no seat belt law for adult rear seat occupants. With little political will at the state level, largely due to freedom of choice concerns, Missouri's prospect of upgrading to primary enforcement at the current time is bleak. To Missouri's credit, the state leads the way in enacting local primary enforcement seat belt law ordinances. Currently 21 percent of Missouri's population is covered by 39 local primary belt ordinances. This offers a unique opportunity to mitigate secondary law enforcement challenges and reduce serious injuries and fatalities on Missouri's roadways.

While there are a number of dedicated CPS professionals in Missouri, opportunity exists to better reach children between the ages of 8 and 18.

With 114 counties and more than 600 law enforcement agencies in the state, OHS has three staff liaisons that work to recruit and maintain enforcement agencies to participate in year round and/or mini-grant opportunities. Given the diversity of Missouri's police departments, ranging from larger metropolitan departments which are very traffic-minded to smaller sheriffs' offices that opt not to enforce traffic safety, opportunity exists to educate more law enforcement personnel on the importance of buckling up.

Further opportunity exists to refine the target audiences and educate minority and higher-risk groups through traditional and non-traditional communication mediums.

Despite Missouri's many challenges, OHS staff and those interviewed as part of this assessment are dedicated to improving highway safety for all Missourians. Each person brings his or her own unique expertise and experience that should be leveraged to the fullest capacity.

Using occupant protection is the single most effective habit Missourians can do to protect themselves in a crash and *Arrive Alive*. Based on the fundamental elements of the *Uniform Guidelines for State Highway Safety Programs for Occupant Protection*, this assessment report identifies Missouri's strengths and challenges and provides recommendations for the major occupant protection program areas.

KEY RECOMMENDATIONS

*(Note: Key Recommendations are **BOLDED** in each individual section)*

- **Task regional coalitions and the Occupant Protection Subcommittee of the Missouri Coalition for Roadway Safety with the creation, development, and implementation of new initiatives in occupant protection.**
- **Develop the will for political change through grassroots community advocacy, leveraging influential organizations, and generating visible public and private support.**
- **Establish a Law Enforcement Liaison (LEL) program. The position(s) should be staffed by former law enforcement personnel who have the ability to garner the support of law enforcement executives to work toward the highway safety goals of OHS. The LELs should also be able to coordinate and facilitate training programs to better inform the law enforcement community about highway safety concerns, practices and procedures.**
- **Enforcement of occupant protection laws needs to be emphasized on a year-round basis. Law enforcement agencies should make enforcement of these laws a priority of their patrol personnel on a daily basis.**
- **Conduct a Child Occupant Protection Observational Survey for the entire 0 to 18 year old spectrum for a baseline.**
- **Conduct an annual Child Passenger Safety (CPS) conference/summit to update technicians, provide opportunities for re-certification and CEUs, and foster networking opportunities.**
- **Explore alternative funding sources to purchase child safety seats for distribution programs.**
- **Establish strong partnerships with organizations such as the statewide Parent Teacher Association (PTA) or local PTAs and the state or local chapters of American Academy of Pediatricians (AAP) to distribute occupant protection education materials to parents.**
- **Establish new partnerships with large employers in the state to distribute occupant protection safety education materials. Provide large employers with model seat belt use policies to implement for employees.**
- **Create partnerships and implement occupant protection programs with faith-based organizations.**
- **Use surveys/questionnaires to track message retention and behavior changes after public information and education campaigns are conducted.**

KEY RECOMMENDATIONS (continued)

- Use evidence-based research to raise support among the general population, legislators and other community leaders for primary enforcement laws.
- **Evaluate the effectiveness of local primary ordinances across the state of Missouri.**
- Do more in-depth analyses of unbelted fatalities and disabling injury crashes occurring at nighttime.
- Ensure that evaluation results are an integral part of program planning and problem identification. Evaluate the effectiveness of all current occupant protection programs including inputs and results.

1. PROGRAM MANAGEMENT

GUIDELINE:

Each state should have centralized program planning, implementation and coordination to achieve and sustain high rates of seat belt use. Evaluation is also important for determining progress and ultimate success of occupant protection programs.

- *Provide leadership, training and technical assistance to other State agencies and local occupant protection programs and projects;*
- *Establish and convene an occupant protection advisory task force or coalition to organize and generate broad-based support for programs. The coalition should include agencies and organizations that are representative of the State's demographic composition and critical to the implementation of occupant protection initiatives;*
- *Integrate occupant protection programs into community/corridor traffic safety and other injury prevention programs; and*
- *Evaluate the effectiveness of the State's occupant protection program.*

1A. STRENGTHS

- The Missouri Occupant Protection Program is administered by the Office of Highway Safety (OHS) in the Traffic and Highway Safety Division of the Missouri Department of Transportation (MoDOT) with highly experienced and dedicated traffic safety professionals.
- The Missouri Coalition for Roadway Safety (MCRS) serves as the state traffic safety coalition for goal-setting, planning, and coordination. The MCRS is composed of an executive committee, ten state-level subcommittees, and seven regional coalitions.
- Regional coalitions are composed of a variety of traffic safety professionals, volunteers, and advocates. Participants report that satisfaction in and effectiveness of the coalitions are high to very high.
- The Executive Committee of the MCRS provides the leadership for Missouri's Strategic Highway Safety Plan (SHSP), entitled *Missouri's Blueprint to Save More Lives*.
- The SHSP identifies the vision, mission, and goal for traffic safety in Missouri:

Vision: Continuously Moving Missouri toward Zero Deaths
Goal: 700 or Fewer Fatalities by 2016
Mission: To make travel on Missouri's roadways safer through a partnership of committed local, state, federal, public and private organizations.
- "Increasing Safety Belt Use" is among the nine strategies in the SHSP to reduce traffic injuries and fatalities. The SHSP also incorporates "Unrestrained Drivers and Occupants" as

a focus area. A comprehensive core of strategies for this focus area includes education, enforcement, engineering, and public policy.

- Six identified and measurable performance measures are tracked to determine the progress of occupant protection programs.
- The State has selected a goal to increase statewide seat belt usage by two percentage points annually such that an 87 percent rate is achieved by 2015.
- OHS includes a designated Occupant Protection Coordinator. The Coordinator is an experienced grant manager and traffic safety leader.
- The Executive Committee of the MCRS approved the establishment of a statewide Occupant Protection Subcommittee. The subcommittee will be chaired by the State Occupant Protection Coordinator within OHS. It is planned to be implemented by July 1, 2014.
- In FY 2014, OHS planned to develop a multi-year strategic plan for occupant protection in conjunction with an Occupant Protection Summit. The goal is to complete this plan by July 1, 2014.
- OHS is working with the Centers for Disease Control and Prevention (CDC) to support the strategic planning process. CDC is interviewing various persons in the state, to be followed by a workshop, and concluding with a report with recommendations and results.
- According to the 2014 Highway Safety Program Cost Summary (June 2013), a significant amount of funds has been planned to support occupant protection efforts. These include, but aren't limited to:

2014 Planned Occupant Protection Funds		
Federal Fund Source	Amount	State/local
Section 402 (OP)	\$ 870,149	
MAP-21 (Section 405b)	\$ 900,000	\$ 225,000
Section 2011	\$ 504,462	\$ 264,500
TOTAL	\$ 2,274,611	\$ 489,500

[These amounts do not include, for example, Community Traffic Safety projects (\$208,130), Safe Communities projects (\$179,287), and Child Restraint projects (\$80,000).]

- Additional resources are available to local projects through the regional MCRS coalitions. The regional coalitions develop traffic safety plans and manage state funds for projects to implement those plans. These projects for enforcement, public information and education supplement and support state programs and campaigns.
- The state occupant protection program takes a comprehensive approach that combines program management, legislative and policy efforts, law enforcement, public information and education, child passenger safety, and program evaluation.

- Based on crash data and observational surveys, identified primary target groups for occupant protection include teens, rural drivers and passengers, young males, and pickup truck drivers.
- In support of the grant application process, OHS conducts regional workshops for existing and potential grantees. Packets and information that include instructions and traffic crash data are provided to attendees.
- OHS developed and implemented a grants management system that now provides web-based processes for grant application submissions, contract development, enforcement reporting, and vouchering. Users consider this system to be easy to use and helpful. Additional components are in development for reporting and training.
- Project selection is based on multiple factors to help determine the potential for project success. *Countermeasures That Work: A Highway Safety Countermeasure Guide for State Highway Safety Offices* (NHTSA) serves as a reference document for project development and selection.
- Project ideas come from a variety of sources such as sharing with other states, research reports, and meetings and events such as the national Lifesavers traffic safety conference.
- Consolidation of the administration of Click It or Ticket mini-grants with the Missouri Safety Center eases the time spent on basic grant management tasks by OHS staff for this program while maintaining quality control and oversight.

1B. CHALLENGES

- In 2012, OHS was reduced by six full time employees (FTEs) as part of an overall 19 percent staff reduction for MoDOT.
- The designated occupant protection coordinator does not spend 100 percent of staff time on occupant protection but also carries significant responsibility in law enforcement coordination and grant management.
- The designated child passenger safety coordinator spends up to 20 percent of time on activities other than occupant protection.
- Successful projects have operated in pockets of the State for several years but have not expanded statewide. These projects, such as Battle of the Belts in various high schools, are time and personnel intensive. With limited staff at the state and regional level, it is difficult to grow these types of programs.
- Due to programming constraints, it is difficult to create, develop, and implement new initiatives that could energize the public and the highway safety community.

- While there are numerous meetings and traffic safety conferences, there has not been a state conference that focuses specifically and solely on occupant protection programs and issues.
- Different funding streams result in multiple applications and grants to the same grantee. Grant program complexity may mean additional staff time for all involved.

1C. RECOMMENDATIONS

- Incorporate recommendations from this assessment and the Centers for Disease Control and Prevention (CDC) initiative in developing the State's comprehensive occupant protection strategic plan.
- Conduct a functional job analysis for an occupant protection coordinator to determine what tasks are essential to Office of Highway Safety (OHS); contract, grant, or transfer functions to create a full-time occupant protection coordinator position within OHS.
- Expand identified, successful projects statewide.
- **Task regional coalitions and the Occupant Protection Subcommittee of the Missouri Coalition for Roadway Safety with the creation, development, and implementation of new initiatives in occupant protection.**
- Conduct a state conference for current and new partners in occupant protection; use this conference to gain renewed commitment to occupant protection programs and policies.
- Continue to simplify and streamline grant management processes.
- Continue development and increase use of the online grants management system.

2. LEGISLATION/REGULATION AND POLICY

GUIDELINE:

Each state should enact and vigorously enforce primary enforcement occupant protection use laws. Each state should develop public information programs to provide clear guidance to the motoring public concerning motor vehicle occupant protection systems. This legal framework should include:

- *Legislation permitting primary enforcement that requires all motor vehicle occupants to use systems provided by the vehicle manufacturer;*
- *Legislation permitting primary enforcement that requires that children birth to 16 years old (or the State's driving age) be properly restrained in an appropriate child restraint system (i.e., certified by the manufacturer to meet all applicable Federal safety standards) or seat belt;*
- *Legislation permitting primary enforcement that requires children under 13 years old to be properly restrained in the rear seat (unless all available rear seats are occupied by younger children);*
- *Graduated Driver Licensing (GDL) laws that include three stages of licensure, and that place restrictions and sanctions on high-risk driving situations for novice drivers (i.e., nighttime driving restrictions, passenger restrictions, zero tolerance, required seat belt use);*
- *Regulations requiring employees and contractors at all levels of government to wear seat belts when traveling on official business;*
- *Official policies requiring that organizations receiving Federal highway safety program grant funds develop and enforce an employee seat belt use policy; and*

Outreach to state insurance commissioners to encourage them to persuade insurers to offer incentives to policyholders who use seat belts and child restraints. Insurance commissioners are likely to have significant influence with insurers that write policies in

2A. STRENGTHS

- Missouri was among the first states to adopt a seat belt law, implementing secondary enforcement legislation in 1985.
- There are committed, dedicated and persistent safety advocates in the State, including the top leadership of the Missouri Department of Transportation, who continue to promote occupant protection and support policy initiatives. For example, the former president of the St. Louis Area Police Chiefs Association was instrumental in obtaining a primary enforcement ordinance for the city of Creve Coeur.
- Thirty-eight cities and one county have passed local ordinances which permit traditional (i.e., primary) enforcement. These ordinances cover over 1 million people, 21 percent of

Missouri's population. The safety advantages and cost savings of implementing primary enforcement have been persuasive in the passage of these ordinances.

- Factual information regarding state law and the potential of primary enforcement and a higher fine is provided to the public and to state legislators.
- Significant planning documents, such as *Missouri's Blueprint to Save More Lives*, have reiterated the safety community's commitment to upgrade state and local requirements by designating key strategies to:
 - enact a primary safety belt law.
 - expand the number of local primary safety belt ordinances.
- Occupant protection legislation covers all drivers and front seat passengers (Section 307.178 RSMo), persons less than eighteen years of age operating or riding in a truck (Section 307.178 RSMo), and a child less than sixteen years of age (Section 307.179 RSMo).
- Under designated circumstances, failure to wear a safety belt may be admitted in a case to mitigate damages.
- The State's child passenger safety law (Section 307.179 RSMo) requires use of an appropriate child passenger safety system which meets federal standards for:
 - Children less than four years of age, regardless of weight, and
 - Children weighing less than 40 pounds, regardless of age.
- Section 307.179 RSMo requires use of an appropriate restraint system or booster seat which meets federal standards for children at least four years of age but less than eight years of age who also weigh at least 40 pounds but less than 80 pounds and who are also less than four feet nine inches tall.
- Section 307.179 RSMo requires use of a vehicle safety belt or appropriate booster seat which meets federal standards for children at least 80 pounds or more than four feet nine inches tall.
- Violation of subsections of Section 307.179 RSMo for children less than or equal to 80 pounds or less than or equal to four feet nine inches tall may result in a fine of up to \$50 plus court costs.
- Lincoln County, Missouri, has an ordinance prohibiting the sale of used car seats. This is the only ordinance of its kind in the country.
- The Highway and Transportation Commission is charged with implementing a program to educate and ensure compliance with the State's occupant protection laws.

- Missouri law (Section 304.665 RSMo) prohibits a person under 18 years old from riding in the unenclosed bed of a truck with a licensed gross weight of less than 12,000 pounds.
- Under Missouri's graduated driver licensing (GDL) provisions (Section 302.178 RSMo):
 - An intermediate driver's license requires that the driver and all passengers wear seat belts at all times.
 - Some limited restrictions are made on permissible nighttime driving. An intermediate driver's license holder is prohibited from driving between the hours of 1:00 a.m. and 5:00 a.m. unless accompanied by a legally-designated individual unless the travel is to or from school or educational program or activity, a regular place of employment or in emergency situations as defined by regulation. (See also "Challenges" below.)
 - For the first six months of an intermediate driver's license, there may be only one passenger under the age of 19 who is not a member of the holder's immediate family. After the first six months, there may be no more than three passengers under 19 years of age who are not members of the holder's immediate family.
- State of Missouri Administrative Policy (SP-4, Revised May 15, 2008) requires that all occupants of state vehicles or private vehicles operated on state business "shall use safety restraints where equipped".
- According to the Missouri Department of Transportation Employee Handbook (September 2013), employees are required to use seat belts when driving or riding in a department vehicle.
- The Office of Highway Safety (OHS) requires all grantees to have an employee seat belt policy.
- Research specific to Missouri - *Evaluation of a County Enforcement Program with a Primary Seat Belt Ordinance: St. Louis County, Missouri* (NHTSA 2010) and *Estimated Minimum Savings to the Medicaid Budget in Missouri by Implementing a Primary Seat Belt Law* (NHTSA 2007) - has documented the advantages of primary enforcement in lives saved, injuries prevented, and cost savings.
- Federal commercial motor vehicle regulation (§392.16: Use of seat belts) requires that a commercial motor vehicle which has a seat belt assembly installed at the driver's seat shall not be driven unless the driver has properly restrained himself/herself with the seat belt assembly.
This regulation is supported by the Commercial Motor Vehicle Safety Program which provides funds for inspection, enforcement, and education.
- OHS is developing the *Primary Safety Belt Ordinance Toolkit* to assist local governments in adopting primary seat belt ordinances. The toolkit includes a model primary seat belt ordinance, crash data, maps, and seat belt survey results.

2B. CHALLENGES

- Since first passed in 1985, Missouri has been unable to upgrade its seat belt law to allow for standard enforcement. Therefore, despite the fact that failure to wear a seat belt is illegal, law enforcement is unable to appropriately and adequately enforce the law.
- The political climate and belief in the primacy of personal freedom have not been conducive to passing upgrades to the State's occupant protection laws. According to the Highway Drivers Survey (Missouri Department of Transportation 2012), about half of respondents wish to keep the seat belt law as secondary (51 percent) and prefer to keep the penalty as is (52.9 percent).
- There has not been sufficient, influential support from certain individual leaders, such as some state and local elected officials and powerful professional and business organizations, to achieve legislative change.
- Missouri's occupant protection legislation does not meet the following requirements of Moving Ahead for Progress in the 21st Century Act (MAP-21) Section 405(b) grant program and increase occupant protection:
 - The State must provide for imposition of a fine of not less than \$25 per unrestrained occupant. Missouri's seat belt law (Section 307.178 RSMo) provides for a fine not to exceed \$10. Section 307.179 (2) (4) RSMo, requiring use of a seat belt or booster seat for children at least 80 pounds or more than four feet nine inches tall, also provides for a fine not to exceed \$10. A \$10 fine is the lowest in the country and is generally considered insufficient to influence those who fail to wear a seat belt.
 - There must be no gaps in coverage in the State occupant protection laws. Missouri law does not cover back seat occupants in passenger vehicles 16 years or older. Pickup truck drivers and passengers 18 years of age or older are also exempt.
- Under Section 307.178 RSMo, no court costs may be imposed for failure to use a seat belt.
- No points on a person's driver license may be assessed for violating the seat belt law.
- Charges for violation of Section 307.178 (1), (2), or (3) shall be dismissed or withdrawn if the driver, prior to or at hearing, provides satisfactory evidence of acquisition of child passenger restraint system or child booster seat. It is unknown as to what is required to show "satisfactory evidence of acquisition". Correct installation is not required and may not be expected.
- Several exemptions in Missouri law (Section 304.665 RSMo) allow passengers under 18 years old to ride in the unenclosed bed of a pickup truck under certain circumstances. Exemptions include, but are not limited to:

- roads that are not part of the state or federal highway system or within the corporate limits of any city;
 - if there is any means to prevent or secure a passenger from being thrown, falling or jumping from the truck; and
 - if the truck is being operated solely for the purposes of participating in a special event and there is a lack of available seating. A “special event” is “a specific social activity of a definable duration which is participated in by the person riding in the unenclosed bed”.
- The State’s Graduated Drivers License (GDL) provisions do not appear to meet the requirements to qualify Missouri for the State GDL Grant Program (Section 1200.26) of MAP-21. For example, the Interim Final Rule (IFR) imposes a restriction on nighttime driving between 10 p.m. through 5 a.m. when intermediate drivers are most at risk. While the IFR allows exceptions in the case of emergency, it does not permit other exceptions during the restricted driving hours. Missouri provisions do not meet these specifics as noted above.
 - Provisions for a temporary instruction permit prior to an intermediate driver’s license (Section 302.130 RSMo) do not include any passenger restrictions or nighttime driving restrictions or incorporate seat belt use requirements.
 - Driver education, other than behind-the-wheel instruction, is not required to obtain a driver license in Missouri.
 - A local seat belt ordinance with primary enforcement has been challenged in court. A circuit court upheld the validity and constitutionality of the ordinance. However, the decision of the circuit court has been appealed. At the time of this assessment, a decision on the appeal had not been made.

2C. RECOMMENDATIONS

- **Develop the will for political change through grassroots community advocacy, leveraging influential organizations, and generating visible public and private support.**
- Provide for standard primary enforcement statewide for all occupant protection laws.
- Increase the fine for occupant protection laws that currently allow for a maximum \$10 fine to a minimum of \$25.
- Ensure there are no age gaps in the State’s occupant protection laws.
- Allow court costs to be imposed for violations of the State’s occupant protection laws.
- Attach points to a driver license for violation of occupant protection laws.

- Reduce the number of exemptions that allow young passengers to ride in the open bed of a pickup truck.
- Determine whether child passenger violations are waived on the presentation of a purchase receipt or car seat; encourage judges and prosecutors to work toward requiring a child passenger safety technician's determination of an appropriate child restraint properly installed prior to waiver of a fine.
- Upgrade graduated driver licensing requirements to comply with the State Graduated Driver Licensing Grant Program (MAP 21), including a restriction on nighttime driving between 10 p.m. through 5 a.m. for intermediate drivers.
- Require in-class driver education to qualify for a driver license for those under the age of 18.
- Distribute a *Primary Safety Belt Ordinance Toolkit* to assist local governments considering a primary ordinance.

3. LAW ENFORCEMENT

GUIDELINE:

Each State should conduct frequent, high-visibility law enforcement efforts, coupled with communication strategies, to increase seat belt and child safety seat use. Essential components of a law enforcement program should include:

- *Written, enforced seat belt use policies for law enforcement agencies with sanctions for noncompliance to protect law enforcement officers from harm and for officers to serve as role models for the motoring public;*
- *Vigorous enforcement of seat belt and child safety seat laws, including citations and warnings;*
- *Accurate reporting of occupant protection system information on police accident report forms, including seat belt and child safety seat use or non-use, restraint type, and airbag presence and deployment;*
- *Communication campaigns to inform the public about occupant protection laws and related enforcement activities;*
- *Routine monitoring of citation rates for non-use of seat belts and child safety seats;*
- *Use of National Child Passenger Safety Certification (basic and in-service) for law enforcement officers;*
- *Utilization of Law Enforcement Liaisons (LELs), for activities such as promotion of national and local mobilizations and increasing law enforcement participation in such mobilizations and collaboration with local chapters of police groups and associations that represent diverse groups (e.g., NOBLE, HAPCOA) to gain support for enforcement efforts.*

3A. STRENGTHS

- The Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS) requires all law enforcement agencies applying for grant funds to have a seat belt use policy within their agencies. There is a specific block on the electronic application for funds that must be marked in the affirmative indicating such a seat belt use policy exists.
- There is strong law enforcement participation during national and state occupant protection mobilizations, i.e. Click It or Ticket and Youth Safety Belt Enforcement Campaign.
- Crash trend updates are regularly distributed throughout the state by OHS.
- Electronic crash reporting provides a means for near real-time crash data and the ability to more quickly identify problem areas.
- Law enforcement agencies are permitted to conduct vehicle equipment and licensing checkpoints during which enforcement of occupant protection laws may take place.

- The Missouri State Highway Patrol (MSHP) has a zero tolerance policy toward occupant protection enforcement which requires troopers to cite violators of the state's occupant protection laws when a traffic stop is made upon other probable cause.
- Seat Belt Convincers and rollover simulators are available for demonstrations through the MSHP and some local agencies.
- There are 39 jurisdictions within Missouri that have adopted local ordinances that enable their law enforcement officers to enforce seat belt violations as a primary offense.
- MoDOT provides signs to local jurisdictions that have adopted primary seat belt enforcement ordinances to help advertise that seat belt violations may be enforced as a primary offense.
- OHS has an online reporting system for law enforcement agencies to report their activities during occupant protection mobilizations.
- Many law enforcement agencies participate in one of the seven regional roadway safety coalitions.
- OHS holds an annual Highway Safety Conference for law enforcement officers that includes educational sessions on occupant protection.
- Electronic ticketing (e-ticketing) is available to many law enforcement officers which enables them to more efficiently issue citations for multiple violations.
- Law enforcement agencies throughout the State work closely with one another and the MSHP.
- Funding for law enforcement is available through both OHS and the Missouri Roadway Safety Coalition.

3B. CHALLENGES

- OHS does not have a Law Enforcement Liaison (LEL) program. Existing staff must undertake the role of liaison in addition to their administrative and programmatic responsibilities. This limits the frequency with which they can interact with and assist those law enforcement agencies who may be struggling in achieving advances in occupant protection usage rates. Personnel with a law enforcement background would garner greater cooperation and more participation from law enforcement partners.
- There appears to be a lack of year-round enforcement of occupant protection laws outside of enforcement waves where grant funding is available to pay for overtime.

- In law enforcement agencies with specialty traffic enforcement units, most enforcement for occupant protection violations comes from the few officers assigned to those units rather than from the vastly larger number of personnel assigned to uniformed and other patrol functions.
- While most, if not all, law enforcement agencies have written policies requiring their personnel to use seat belts when operating department vehicles, there are still officers who do not regularly wear their seat belts while on duty and their departments do not fully enforce department regulations requiring usage.
- Confusion exists among law enforcement personnel regarding child passenger safety laws. This likely contributes to some reluctance in taking enforcement action.
- There appears to be no clear plan for nighttime enforcement of occupant protection laws.
- Enforcement data appears to be collected for only that enforcement conducted on OHS funded overtime or during OHS enforcement campaigns.

3C. RECOMMENDATIONS

- **Establish a Law Enforcement Liaison (LEL) program. The position(s) should be staffed by former law enforcement personnel who have the ability to garner the support of law enforcement executives to work toward the highway safety goals of OHS. The LELs should also be able to coordinate and facilitate training programs to better inform the law enforcement community about highway safety concerns, practices and procedures.**
- **Enforcement of occupant protection laws needs to be emphasized on a year-round basis. Law enforcement agencies should make enforcement of these laws a priority of their patrol personnel on a daily basis.**
- Develop short roll-call type training that may be presented in person or by video that includes messaging on the importance of occupant protection enforcement and information on the occupant protection laws. This training should also include information on effective enforcement techniques including those that can be used for nighttime enforcement.
- Emphasize consistent year-round enforcement of Missouri's seat belt and child restraint laws.
- Collect all occupant protection enforcement data, not just for that performed during enforcement waves or on OHS-funded overtime.
- Implement a nighttime occupant protection enforcement strategy.

4. OCCUPANT PROTECTION FOR CHILDREN

GUIDELINE:

Each State should enact occupant protection laws that require the correct restraint of all children, in all seating positions and in every vehicle. Regulations and policies should exist that provide clear guidance to the motoring public concerning occupant protection for children. Each State should require that children birth to 16 years old (or the State's driving age) be properly restrained in the appropriate child restraint system or seat belt. Gaps in State child passenger safety and seat belt laws should be closed to ensure that all children are covered in all seating positions, with requirements for age-appropriate child restraint use. Key provisions of the law should include: driver responsibility for ensuring that children are properly restrained; proper restraint of children under 13 years of age in the rear seat (unless all available rear seats are occupied by younger children); a ban of passengers from the cargo areas of light trucks; and a limit on the number of passengers based on the number of available seat belts in the vehicle. To achieve these objectives, State occupant protection programs for children should:

- *Collect and analyze key data elements in order to evaluate the program progress;*
- *Assure that adequate and accurate training is provided to the professionals who deliver and enforce the occupant protection programs for parents and caregivers;*
- *Assure that the capability exists to train and retain nationally certified child passenger safety technicians to address attrition of trainers or changing public demographics;*
- *Promote the use of child restraints and assure that a plan has been developed to provide an adequate number of inspection stations and clinics, which meet minimum quality criteria;*
- *Maintain a strong law enforcement program that includes vigorous enforcement of the child occupant protection laws;*
- *Enlist the support of the media to increase public awareness about child occupant protection laws and the use of child restraints. Strong efforts should be made to reach underserved populations;*
- *Assure that the child occupant protection programs at the local level are periodically assessed and that programs are designed to meet the unique demographic needs of the community;*
- *Establish the infrastructure to systematically coordinate the array of child occupant protection program components;*
- *Encourage law enforcement participation in the National Child Passenger Safety Certification (basic and in-service) training for law enforcement officers.*

4A. STRENGTHS

- Missouri has a primary child restraint law for children under age eight and a seat belt law for children and teens ages 8 to 18. (Missouri has a secondary seat belt law for all drivers, a primary child restraint law for children under age eight and the Graduated Driver's License Law requires all 16-18 year old drivers and their passengers to wear a seat belt).

- The State continues to support Child Passenger Safety (CPS) training using the current National Highway Traffic Safety Administration (NHTSA) standardized curriculum.
- Eight to twelve CPS Technician classes are sponsored by the Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS) each year. Other partners are leveraging funding to support additional CPS Technician classes in the State.
- A CPS observational survey is scheduled to be conducted this year.
- A teen observational seat belt survey is conducted annually at 150 high schools across the state.
- There are 198 inspection stations within the State where families can have their child safety seats inspected by certified CPS technicians.
- There are child safety seats available for distribution/education/installation in the State.
- The State currently has 970 certified CPS technicians, 38 CPS instructors and one instructor candidate.
- In 2013, the State had a CPS technician re-certification rate of 58.0 percent. Nationally, the re-certification rate was 58.5 percent.
- The State re-certification rate for the first three months of 2014 is 71.7 percent. Nationally, the re-certification rate is 54.4 percent for the same time period.
- The Missouri State Highway Patrol (MSHP) has a certified CPS instructor in each troop location and is able to assist counties where no inspection station or other technician exists. The MSHP instructors assist with training as needed. Local programs have access to rollover simulators and convincers through the seven MSHP districts.
- A ten person volunteer CPS Advisory Committee assists OHS with CPS programs across the State.
- A Kids N Motion Update is provided to all instructors in the State each time it is updated.
- Recognizing that it is sometimes difficult for law enforcement to attend a CPS Certification course, the law enforcement basic awareness courses are offered Statewide.

4B. CHALLENGES

- A CPS Technician or Instructor Technical Update is not available statewide nor is a CPS Update provided to the CPS Advisory Committee. There are few opportunities for CPS Technicians to earn CEUs within the State.

- Funds for child occupant protection training and equipment may at some time in the near future (2015) be reduced significantly. The 2011(d) funding is no longer available. However, funding will continue (maintenance of effort) with MAP21 funding through 2015.
- There does not appear to be a coordinated, consistent, and statewide effort to reach children between the ages of 8 and 14.
- Children are often the best advocates for occupant protection in family vehicles. However, there appear to be limited statewide programs to develop children as advocates.
- It is unknown whether hospitals in the State have written CPS discharge policies.
- There is little evidence of consistent enforcement of CPS laws.
- Team Spirit is celebrating their 20th anniversary this year but has not been rigorously evaluated.

4C. RECOMMENDATIONS

- **Conduct a Child Occupant Protection Observational Survey for the entire 0 to 18 year old spectrum for a baseline.**
- **Conduct an annual Child Passenger Safety (CPS) conference/summit to update technicians, provide opportunities for re-certification and CEUs, and foster networking opportunities.**
- Include appropriate CPS messaging for children up to 18 years old in paid and earned media, with special emphasis on pre-teens and booster seat aged children.
- Develop standardized language so that advocates in the State can convey the urgency of using booster seats until the adult seat belt fits properly.
- **Explore alternative funding sources to purchase child safety seats for distribution programs.**
- Provide hospitals with model discharge policies and strongly encourage them to develop and implement a written discharge policy on how they will inform parents of the requirements of CPS laws. A model policy will be available on the National Child Passenger Safety Board website.
- Encourage law enforcement to aggressively enforce CPS laws.
- Conduct an evaluation of the impact of the Team Spirit program on traffic safety.

5. OUTREACH PROGRAM

GUIDELINE:

Each state should encourage extensive statewide and community involvement in occupant protection education by involving individuals and organizations outside the traditional highway safety community. Representation from health, business, education, and diverse cultures of the community are encouraged, among others. Community involvement broadens public support for the state's programs and can increase a state's ability to deliver highway safety education programs. To encourage statewide and community involvement, States should:

- *Establish a coalition or task force of individuals and organizations to actively promote use of occupant protection systems;*
- *Create an effective communications network among coalition members to keep members informed about issues;*
- *Provide culturally relevant materials and resources necessary to conduct occupant protection education programs, especially directed toward young people, in local settings;*
- *Provide materials and resources necessary to conduct occupant protection education programs, especially directed toward specific cultural or otherwise diverse populations represented in the State and in its political subdivisions.*

States should undertake a variety of outreach programs to achieve statewide and community involvement in occupant protection education, as described below. Programs should include outreach to diverse populations, health and medical communities, schools and employers.

a. Diverse Populations

Each State should work closely with individuals and organizations that represent the various ethnic and cultural populations reflected in State demographics. Individuals from these groups might not be reached through traditional communication markets. Community leaders and representatives from the various ethnic and cultural groups and organizations will help States to increase the use of child safety seats and seat belts. The State should:

- *Evaluate the need for, and provide, if necessary, materials and resources in multiple languages;*
- *Collect and analyze data on fatalities and injuries in diverse communities;*
- *Ensure representation of diverse groups on State occupant protection coalitions and other work groups;*
- *Provide guidance to grantees on conducting outreach in diverse communities;*
- *Utilize leaders from diverse communities as spokespeople to promote seat belt use and child safety seat;*
- *Conduct outreach efforts to diverse organizations and populations during law enforcement mobilization periods.*

b. Health and Medical Communities

Each State should integrate occupant protection into health programs. The failure of drivers and passengers to use occupant protection systems is a major public health problem that must be recognized by the medical and health care communities. The SHSO, the State Health Department and other State or local medical organizations should collaborate in developing programs that:

- *Integrate occupant protection into professional health training curricula and comprehensive public health planning;*
- *Promote occupant protection systems as a health promotion/injury prevention measure;*
- *Require public health and medical personnel to use available motor vehicle occupant protection systems during work hours;*
- *Provide technical assistance and education about the importance of motor vehicle occupant protection to primary caregivers (e.g., doctors, nurses, clinic staff);*
- *Include questions about seat belt use in health risk appraisals;*
- *Utilize health care providers as visible public spokespeople for seat belt and child safety seat use;*
- *Provide information about the availability of child safety seats at, and integrate child safety seat inspections into, maternity hospitals and other prenatal and natal care centers;*
- *Collect, analyze and publicize data on additional injuries and medical expenses resulting from non-use of occupant protection devices.*

c. Schools

Each State should encourage local school boards and educators to incorporate occupant protection education into school curricula. The SHSO in cooperation with the State Department of Education should:

- *Ensure that highway safety and traffic-related injury control, in general, and occupant protection, in particular, are included in the State-approved K-12 health and safety education curricula and textbooks;*
- *Establish and enforce written policies requiring that school employees use seat belts when operating a motor vehicle on the job; and*
- *Encourage active promotion of regular seat belt use through classroom and extracurricular activities as well as in school-based health clinics; and*
- *Work with School Resource Officers (SROs) to promote seat belt use among high school students;*
- *Establish and enforce written school policies that require students driving to and from school to wear seat belts. Violation of these policies should result in revocation of parking or other campus privileges for a stated period of time.*

d. Employers

Each State and local subdivision should encourage all employers to require seat belt use on the job as a condition of employment. Private sector employers should follow the lead of Federal and State government employers and comply with Executive Order 13043, “Increasing Seat Belt Use in the United States” as well as all applicable Federal Motor Carrier Safety Administration (FMCSA) Regulations or Occupational Safety and Health Administration (OSHA) regulations requiring private business employees to use seat belts on the job. All employers should:

- *Establish and enforce a seat belt use policy with sanctions for non-use;*
- *Conduct occupant protection education programs for employees on their seat belt use policies and the safety benefits of motor vehicle occupant protection devices.*

5A. STRENGTHS

- A large number of energetic and dedicated partners promote highway safety across the State.
- The Missouri Coalition for Roadway Safety (MCRS) includes a diverse group of partners in all areas across the State.
- The MCRS operates a well-crafted website, www.SaveMOLives.com, that includes a variety of current, comprehensive, and useful information.
- The Missouri Department of Transportation (MoDOT) staff frequently shares relevant safety information on its Facebook page to its large following of almost 25,000 fans.
- Battle of the Belt is a popular high school program throughout many areas of the State.
- The Missouri State Highway Patrol (MSHP) employs a large, active team of 13 public information officers (PIOs) across the state. This team of PIOs is extremely engaged in occupant protection efforts.
- The MSHP creates its own highway safety programs and materials such as videos and graphics. The PIOs regularly share this information with all interested parties across the state.
- The MSHP’s website offers a variety of highway safety information.
- There are several strong sports marketing partnerships with teams such as the University of Missouri and the St. Louis Cardinals. These partnerships allow for educating fans through a variety of mediums including radio, billboards, television, stadium banners, etc.

5B. CHALLENGES

- There are not many programs to reach younger audiences that have outgrown a booster seat but aren't yet driving age.
- There is limited emphasis on outreach programs to minority populations with low occupant protection usage.
- There are few examples of partnerships and programs with employers to promote occupant protection.
- Currently, no teen safety education campaigns/materials or programs are geared toward parents.

5C. RECOMMENDATIONS

- Work with partners to implement/fund tween programs that are already in place such as the Safe Kids "Countdown 2: Drive" program.
- Build partnerships with minority organizations such as the Hispanic Chamber of Commerce, NAACP, etc. to help create and disseminate appropriate occupant protection messages. (Reference: "Closing the Circle: A Multi-Cultural Primer for State Highway Safety Offices" on the Governor's Highway Safety Association website.)
- Implement a traffic safety program that students and their parents are required to attend before they are eligible to receive their high school parking permit.
- **Establish strong partnerships with organizations such as the statewide Parent Teacher Association (PTA) or local PTAs and the state or local chapters of American Academy of Pediatricians (AAP) to distribute occupant protection education materials to parents.**
- **Establish new partnerships with large employers in the state to distribute occupant protection safety education materials. Provide large employers with model seat belt use policies to implement for employees.**
- **Create partnerships and implement occupant protection programs with faith-based organizations.**

6. COMMUNICATION

GUIDELINE:

As part of each State's communication program, the State should enlist the support of a variety of media, including mass media, to improve public awareness and knowledge and to support enforcement efforts to about seat belts, air bags, and child safety seats. To sustain or increase rates of seat belt and child safety seat use, a well-organized effectively managed communication program should:

- *Identify specific audiences (e.g., low belt use, high-risk motorists) and develop messages appropriate for these audiences;*
- *Address the enforcement of the State's seat belt and child passenger safety laws; the safety benefits of regular, correct seat belt (both manual and automatic) and child safety seat use; and the additional protection provided by air bags;*
- *Continue programs and activities to increase the use of booster seats by children who have outgrown their toddler seats but who are still too small to safely use the adult seat belts;*
- *Capitalize on special events, such as nationally recognized safety and injury prevention weeks and local enforcement campaigns;*
- *Provide materials and media campaigns in more than one language as necessary;*
- *Use national themes and materials;*
- *Participate in national programs to increase seat belt and child safety seat use and use law enforcement as the State's contribution to obtaining national public awareness through concentrated, simultaneous activity;*
- *Utilize paid media, as appropriate;*
- *Publicize seat belt use surveys and other relevant statistics;*
- *Encourage news media to report seat belt use and non-use in motor vehicle crashes;*
- *Involve media representatives in planning and disseminating communication campaigns;*
- *Encourage private sector groups to incorporate seat belt use messages into their media campaigns;*
- *Utilize and involve all media outlets: television, radio, print, signs, billboards, theaters, sports events, health fairs;*
- *Evaluate all communication campaign efforts.*

6A. STRENGTHS

- The Missouri Coalition for Roadway Safety (MCRS) has a strong and active Public Information Subcommittee and each local coalition is supported by a Missouri Department of Transportation (MoDOT) Public Information Officer (PIO).
- MoDOT employs a dedicated and engaged Community Relations Specialist who works closely with the Office of Highway Safety (OHS).

- There is a good working relationship between the MoDOT Community Relations Specialist and MoDOT's advertising firm, True Media.
- The State supplies their advertising firm with timely, relevant data which they use to create their media buy plans.
- Several specific occupant protection media campaigns are conducted such as Child Passenger Safety Week, Click It or Ticket, and the Youth Seatbelt Awareness Campaign.
- A wide variety of creative paid media is being utilized to target young males such as advertisements on Pandora, outdoor advertising at gas stations on video pump tops and pump top banner ads, and digital advertising on traditionally male oriented websites such as ESPN.com.
- True Media reports that their paid advertising campaigns generate large numbers of impressions.
- The Missouri Department of Revenue hosts a website, "Parent/Guardian Role in MO Graduated Driver License (GDL) Law", that includes rights and responsibilities and a parent/teen driving agreement.

6B. CHALLENGES

- The Office of Highway Safety (OHS) does not employ a dedicated full-time Public Information Officer (PIO).
- The regional Coalition PIOs are employees of MoDOT and also work on other MoDOT issues such as construction projects and funding issues and as a result aren't focused solely on traffic safety.
- The State has a large demographic area to cover including two major media markets with a limited amount of paid advertising dollars available.
- There appears to be very little, if any, evaluations conducted after media campaigns that measure both message retention and behavior change.
- Few media materials/campaigns are available to specifically inform parents of teen drivers about the primary seat belt provisions that are a part of the State's graduated driver licensing (GDL) law.
- No media materials/campaigns are available to specifically target minority populations.

6C. RECOMMENDATIONS

- Assign at least one full-time employee to the Office of Highway Safety to be the designated Public Information Officer.
- Create a variety of materials for Missouri Coalition for Roadway Safety (MCRS) members and other traffic safety partners that include culturally sensitive messaging for minority populations.
- Create advertising and other media materials to target both parents and teens that educate them about the primary seat belt provisions as part of the State's graduated driver license (GDL) law.
- **Use surveys/questionnaires to track message retention and behavior changes after public information and education campaigns are conducted.**
- **Use evidence-based research to raise support among the general population, legislators and other community leaders for primary enforcement laws.**
- Include booster seat education in key messages to children between ages five and eight and their caregivers.

7. EVALUATION

GUIDELINE:

Each State should access and analyze reliable data sources for problem identification and program planning. Each State should conduct several different types of evaluation to effectively measure progress and to plan and implement new program strategies. Program management should:

- Conduct and publicize at least one statewide observational survey of seat belt and child safety seat use annually, making every effort to ensure that it meets current, applicable Federal guidelines;*
- Maintain trend data on child safety seat use, seat belt use and air bag deployment in fatal crashes;*
- Identify high-risk populations through observational usage surveys and crash statistics;*
- Conduct and publicize statewide surveys of public knowledge and attitudes about occupant protection laws and systems;*
- Obtain monthly or quarterly data from law enforcement agencies on the number of seat belt and child passenger safety citations and convictions;*
- Evaluate the use of program resources and the effectiveness of existing general communication as well as special/high-risk population education programs;*
- Obtain data on morbidity, as well as the estimated cost of crashes, and determine the relation of injury to seat belt use and non-use;*
- Ensure that evaluation results are an integral part of new program planning and problem identification.*

7A. STRENGTHS

- The Missouri Department of Transportation (MoDOT) Traffic and Highway Safety Division's Office of Highway Safety (OHS) uses a variety of data sources for problem identification, setting goals, program evaluation, and measuring progress.
- The Missouri State Highway Patrol (MSHP) is the central traffic crash data collection agency for the state of Missouri. All local law enforcement agencies throughout the state provide MSHP copies of their crash reports. All of the crash reports received, along with crashes reported by MSHP, are tabulated and analyzed by MSHP.
- Missouri updated the Uniform Crash Report in 2012. Missouri revised crash report elements using Model Minimum Uniform Crash Criteria (MMUCC) data elements and has also signed a Memo of Agreement with NHTSA to adopt and use National Emergency Medical Services Information System (NEMSIS) data elements.
- Missouri has a Traffic Records Coordinating Committee (TRCC) that meets monthly. TRCC is working with custodial agencies to develop and maintain a comprehensive traffic records system.

- Missouri crash data are available using the online Statewide Traffic Accident Records System (STARS) maintained by MSHP.
- Local law enforcement agencies are encouraged to report crash data electronically using the Law Enforcement Traffic System (LETS) software. LETS provides an avenue for uploading local crash data into STARS, eliminating manual data entry, reducing wait time for usable electronic crash data, and decreasing data entry errors. OHS offers local law enforcement agencies LETS software for free in an attempt to increase electronic crash reporting.
- MSHP publishes unbelted fatal and disabling injury crash rankings for cities, counties, and unincorporated areas in the state.
- OHS and the Missouri Coalition for Roadway Safety (MCRS) regional coalitions take into account problem crash locations when distributing occupant protection grants.
- OHS shares counts of unbelted occupant fatalities with the MCRS regional coalitions every Monday. The coalitions disseminate that information regularly among their local traffic safety partners.
- OHS sets performance goals in their Highway Safety Plan based on raw number counts of occupants involved in crashes and observed occupant restraint use. OHS has identified priority target groups for occupant protection enforcement efforts based on the crash data. These include teens, rural occupants, young males, and pickup truck drivers.
- OHS routinely uses observational surveys to determine daytime seat belt use. Observational surveys of seat belt use are recurrently conducted by the Missouri Safety Center (MSC), University of Central Missouri. The observational surveys that MSC conducts include:
 - statewide daytime seat belt use among front seat occupants that meet federal register guidelines and are approved by NHTSA's National Center for Statistics & Analysis (NCSA).
 - annual survey of high school teen seat belt use.
 - biennial survey of commercial motor vehicle driver seat belt use.
- OHS tracks enforcement activities among its law enforcement agency grantees. Grantees report using a web-based electronic reporting system. Law enforcement grantees report detailed information on hours worked and provide counts of citations, warnings and arrests, and earned media information.
- Heartland Market Research LLC conducts an annual telephone survey of Missouri drivers. The survey has been conducted each of the last four years (2010-2013). The survey results provide information on trends in exposure to occupant protection enforcement messages, perceived risk of receiving a ticket for non-compliance with the adult seat belt law, and attitudes about primary enforcement seat belt laws.

7B. CHALLENGES

- OHS does not require all occupant protection grantees to consistently measure activities and report outcomes of their program efforts. While there is reasonable tracking of law enforcement program efforts focused on occupant protection, other projects do not appear to be monitored and evaluated closely.
- Little is known concerning the amount of occupant protection enforcement taking place outside of occupant protection mobilization periods.
- There is currently a one-year time lag in the completeness of the STARS crash data files.
- Children, approximately age 4 to 14, are not identified or left out of the seat belt observational surveys, making it difficult to evaluate effectiveness of programs targeting occupants in that age range.
- OHS has indicated that occupant protection at nighttime is a priority area, but there is little evidence that information or occupant protection programs in Missouri are focused on improving seat belt use at nighttime.
- Traffic safety partners use results of observational surveys to identify and target low belt use locations; however, these observational surveys are not designed to provide reliable estimates of belt use at the local level.

7C. RECOMMENDATIONS

- Encourage local agencies to use Law Enforcement Traffic System (LETS) or other similar systems that upload crash data to Statewide Traffic Accident Records System (STARS).
- Reduce average time for crash report entry into STARS.
- Provide assistance to local law enforcement agencies that may face technological challenges to coming onboard with electronic submission of crash reports.
- **Evaluate the effectiveness of local primary ordinances across the state of Missouri.**
- Develop a nighttime seat belt observational survey.
- Demonstrate and evaluate a nighttime seat belt enforcement program in primary law locations.
- **Do more in-depth analyses of unbelted fatalities and disabling injury crashes occurring at nighttime.**

- Restart the child restraint observational survey last conducted in 2009 and conduct it at least biennially.
- Conduct an observational survey that captures children ages 4 to 14.
- Include race/ethnicity, in so far as possible, into observational surveys.
- **Ensure that evaluation results are an integral part of program planning and problem identification. Evaluate the effectiveness of all current occupant protection programs including inputs and results.**

ASSESSMENT SCHEDULE

Monday, March 31, 2014

8:00 - 8:45		Leanna Depue and Bill Whitfield
8:45 - 9:30		Scott Jones
9:30 - 10:15		Officer Karl Streckfuss
10:15 - 10:30	Break	
10:30 - 11:15		Carrie Wolken
11:15 - 12:00		Pam Hoelscher
12:00 - 1:00	Lunch	
1:00 - 1:45		Kelly Jackson and Emily Ann Brown
1:45 - 2:30		LE Team (Scott, Jeremy, Marcus)
2:30 - 3:15		Michelle Gibler
3:15 - 3:30	Break	
3:30 - 4:15		Joe Rickman (Conf Call)
4:15 - 5:00		John Miller

Tuesday, April 1, 2014

8:00 - 8:45		Sgt. Paul Hornung
8:45 - 9:30		Cpt Tim Hull
9:30 - 10:15		Teresa Krenning
10:15 - 10:30	Break	
10:30 - 11:15		Gena Spence
11:15 - 12:00		Dianna Johnson
12:00 - 1:00	Lunch	
1:00 - 1:45		Chris Luebbert
1:45 - 2:30		Praveena Ambati
2:30 - 3:15		Chris Luebbert
3:15 - 3:30	Break	
3:30 - 4:15		Russ Dunwiddie
4:15 - 5:00		Ron Beck

Wednesday, April 2, 2014

8:00 - 8:45		Chief Dan Dunn
8:45 - 9:30		Sgt. Brian Leer
9:30-10:15		Lisa Sitler
10:15 - 10:30	Break	
10:30 - 11:15		Donna Greenwell and Steve Peek
11:15 - 12:00		Sgt. Rusty Rives and Lt. Darren Gallup
12:00 - 1:00	Lunch	
1:00 - 1:45		Sharee Galnore
1:45 - 5:00		Team Report Writing

Thursday, April 3, 2014

8:00 - 10:00		Team Report Writing (all day)
10:00 - 10:15	Break	
10:15 - 12:00		
12:00 - 1:00	Lunch	
1:00 - 3:00		
3:00 - 3:15	Break	
3:15 - 5:00		

Friday, April 4, 2014

8:00-9:00		Report Out
-----------	--	------------

ASSESSMENT TEAM CREDENTIALS

Susan N. Bryant, M.A., M.B.A.
831 Clark Street
Iowa City, IA 52240
leaderservices@yahoo.com

Susan (Sue) Bryant is currently a consultant for a small firm of which she is the principal. After almost thirty years of state employment, she retired as the director of the public transportation division of the Texas Department of Transportation (TxDOT). The public transportation division had 180 employees and an approximately \$150 million budget of federal and state grant programs for rural and small urban transportation systems, the state's medical transportation program, and public transportation planning. Prior to becoming division director, she served for over ten years as the director of the Texas traffic safety program.

During her career with TxDOT, she held the position of state traffic safety director, assistant to the deputy director for field operations, and highway safety planner and traffic safety program manager. She served as secretary and member of the board of the National Association of Governors' Highway Safety Representatives (now Governors Highway Safety Association) and member of the law enforcement committee for the Transportation Research Board.

She facilitated the strategic planning process for the Governors Highway Safety Association (GHSA) and completed a "How to Manual" for occupant protection for children for GHSA. She headed a project in Texas to conduct community assessments and develop local strategic plans for underage drinking prevention. In addition, she served as community liaison for the Travis County Alliance for a Safe Community, an underage drinking prevention coalition based in Austin. She has served on highway safety program assessment teams for Alaska, California, Colorado (2), Florida (2), Georgia, Idaho, Illinois, Kentucky, Maine (2), Maryland, Massachusetts, Montana (3), Missouri (2), North Dakota, Oklahoma, South Carolina, South Dakota, Vermont, and Wyoming. She served on the team to update the impaired driving assessment tool and was also on the team to develop assessment team training. She is currently project director for a leadership in impaired driving project for the National Highway Traffic Safety Administration.

For seven years, she served as a member and then chair of the City of Rollingwood, Texas, Planning and Zoning Commission. She served as chair of the City's Utility Commission and as director with the Rollingwood Community Development Corporation. She now serves as President of the Johnson County (Iowa) Dog Park Action Committee, a 501c3 corporation.

She has taught high school and adults, consulted for the media in major television markets, and taught management to state and local officials. She has been named to "Who's Who of American Women," has received the national Award for Public Service from the U.S. Department of Transportation, and is a two-time recipient of the American Association of State Highway and Transportation Officials (AASHTO) President's Modal Award for Highway Safety. She is also a graduate of Leadership Texas.

A Phi Beta Kappa graduate with Highest Honors in English from the University of Iowa, she holds a master's degree in communication from the University of Iowa and a master's degree in business administration from the University of Texas at Austin.

Cathy L. Gillen
Principal, The Gillen Group
(443) 463-4449; cathy@thegillengroup.com

<i>Practice Focus</i>	<p>Cathy Gillen is a Washington, DC based public affairs transportation consultant with more than 23 years-experience in the highway safety arena. She brings non-profits, NGOs, businesses and government together to create highway safety programs that save lives and prevent injuries on the nation's highways. As a former National Highway Traffic Safety Administration (NHTSA) official with the U.S. Department of Transportation (DOT), she is proficient in behavioral safety issues including impaired driving, occupant protection, distracted driving and teen and older driving. Having served as the Managing Director of the Roadway Safety Foundation she is also an expert on the engineering issues that affect roadway safety. Her relationships with key safety organizations, government agencies including NHTSA, the Federal Highway Administration and the Federal Motor Carrier Safety Administration, and transportation reporters allow her to meet both private and public sector needs.</p>
<i>Clients</i>	<p>Since 2005, Gillen's clients have included AAA, the AAA Foundation for Traffic Safety (AAAFTS), AARP, The American Highway Users Alliance (Highway Users), the Automotive Coalition for Traffic Safety (ACTS), Governors Highway Safety Association (GHSA), National Organizations for Youth Safety (NOYS), the Institute of Transportation Engineers (ITE), Mitsubishi Motors North America, Make Roads Safe, the Roadway Safety Foundation (RSF), the Connecticut Department of Transportation, the Missouri Department of Transportation and many others.</p>
<i>Significant Accomplishments</i>	<p>Led a team of PR professionals to conduct one national and 23 local press conferences in state capitols across the country to announce a Ford Motor Company safety campaign. As part of the "Boost America!" campaign, Ford donated 1 million child booster seats to low-income families through a partnership with the United Way. The local press events included speakers such as local Governors Highway Safety representatives, Governors, state legislators, parents and automobile dealers. Gillen arranged all press outreach for the events and also served as a spokesperson for the campaign.</p> <p>Managed press relations and media outreach for the National Traffic Signal Report Card project for the Institute of Transportation Engineers. The goal of the FHWA-funded campaign was to raise awareness through the media of the importance traffic signals play in moving traffic safely and efficiently across the United States. Gillen secured national and local press coverage in such media outlets as NBC Nightly News, MSNBC and CBS Network Radio.</p> <p>Created a safety coalition and campaign in South Carolina known as <i>Recognize, React, Recover</i> to address the importance of using rumble strips to prevent run-off-the-road crashes, particularly on rural roads. The campaign brought together the state department of transportation, public safety agencies, law enforcement agencies, victims of car crashes and private-sector businesses to create an educational DVD and brochure, hold a partner luncheon and a news conference to launch the campaign. Press coverage of the campaign was widespread and the DVD and brochure have been distributed to more than 5,000 safety partners across the country.</p>

Held 15 child passenger safety inspection stations for Mitsubishi's child passenger safety program known as *Kids Safety First* in September 2010, Summer 2011 and Fall of 2012. Gillen managed all logistics for the events which were held at Mitsubishi dealerships in major media outlets such as Miami, Chicago and Kansas City. In addition to managing all logistics for the events, she conducted media outreach for the events including press conferences with speakers from NHTSA and GHSA. She also managed a partnership with a major child safety seat manufacturer who provided free child safety seats for the events.

- Client Benefits* Gillen began her career in 1992 in the press office of the Maryland State Highway Administration in Baltimore, MD. She then went on to public affairs positions with the Governors Highway Safety Association, Advocates for Highway and Auto Safety and the National Highway Traffic Safety Administration. She then worked for a DC-based Strategic Communications firm where she headed up the Ford Motor Company account and managed other transportation safety accounts before starting her own practice in 2005.
- Other Activities* Gillen is a current board member of the Washington Regional Alcohol Program (WRAP); leads the National Safety Council's Maryland Safe Teen Driving Coalition; is the Maryland Representative for the National Association of Women Highway Safety Leaders (NAWHSL); and is a member of the Road Gang and the Washington Automotive Press Association (WAPA).
- Communications* Gillen has conducted dozens of media interviews, and given dozens of presentations on issues such as impaired driving and roadway safety, to highway safety groups and other organizations across the country.
- Distinctions* Gillen has received the NHTSA Administrator's Award for Excellence and The Century Council's Kevin Quinlan Traffic Safety Leader Award. She holds a bachelors of science from the University of Maryland in Journalism with a specialization in public relations and a master's degree in Publications Design from the University of Baltimore.

Lori K. Haskett

**500 SW Danbury Lane
Topeka, KS 66606
785-272-3787
lorihaskett@sbcglobal.net**

Employment History:

August 2002 to Present Kansas Department of Health and Environment
Bureau of Health Promotion
Director, Injury Prevention and Disability Programs

Responsibilities include developing policy for state programs, recruiting and maintaining public/private partnerships, fiscal management, development of grant applications, grants management, staffing assignments and budget development.

October 1999 to August 2002 Network of Employers for Traffic Safety (NETS)
Kansas NETS Coordinator

Responsibilities included: set-up and management of the KS NETS office. Coordinator is responsible for communications, administrative/marketing support and project management for association traffic safety programs and services within Kansas.

March 1999 to October 1999 AAA Kansas
Coordinator of Public Relations and Promotions

Responsibilities included: media relations, Show Your Card & Save program, Four Diamond Award presentations, editor of office newsletter

March 1998 to March 1999 Olsten Staffing Services
Personnel Supervisor

Responsibilities included: interviewing, placing employees in temporary, temporary to permanent, and permanent employment. Supervising productivity, working with collections, assisting with PeopleSoft payroll, workers compensation, and unemployment.

March 1991 to March 1998 AAA Kansas
Customer Service Representative
Promoted to Auto Travel Manager June 1994
AAA National Certified Trainer, Heathrow, FL

Oversaw Auto Travel operations in the six Kansas offices as the State Auto Travel Manager.
Responsibilities included: recruiting, training, scheduling, ordering supplies for the department, and making hotel and car reservations for members.

Education:

Bachelor of Arts, Speech Communications, Washburn University, 1994
Hayden High School

Grants Administration Experience:

Fire Injury Prevention Project Grant, CDC, 2002 – 2011
Core Injury Prevention and Control Project, CDC, 2002 – Present
Sexual Violence Prevention and Education Program, CDC, 2002 – Present
Emergency Medical Services for Children, HRSA, 2003 – Present
State Implementation Projects for Preventing Secondary Conditions and Promoting the Health of People with Disabilities, CDC, 2005 – 2012
Education, Training and Enhanced Services to End Violence Against and Abuse of Women with Disabilities, DOJ, 2002 – 2004 and 2006 - 2011
Network of Employers for Traffic Safety Program, KS Dept. of Transportation, 1999 - 2002

Affiliations:

Consumer Product Safety Commission – Kansas Designee – 2009 - Present
Safe States Alliance Executive Committee – 2008- Present
 President – 2011 to 2013
 Past – President - Currently
Longaberger Consultant – 1995 to Present
Kansas Public Health Association Member – 2002 - Present
Certified Child Passenger Safety (CPS) Technician - Instructor 2000 – 2011
Certified Child Passenger Safety (CPS) Technician 2011 - Present
Safe Kids Kansas Coalition CPS Chairperson – 2000 to 2009
National Child Passenger Safety Board Member – 2006 - 2008
Kansas Chamber of Commerce and Industry, member, 2000 – 2002
ABWA – Career Chapter – 1999
United Way Loaned Executive – 1999
Society of Human Resource Management – 1998, 1999

MARK SOLOMON

Preusser Research Group, Inc.

1104 Van Buren Avenue

Oxford, MS 38655

Tel: 662-236-9288

Fax: 662-236-9390

mark@preussergroup.com

Mark (Mark) Solomon is currently Vice President of Preusser Research Group (PRG). PRG is a full service research firm specializing in transportation, highway safety, and issues related to drug and alcohol abuse. PRG has offices in Trumbull, CT and Oxford, MS.

Mark has worked at PRG for 20 years. He directs overall operations in PRG's Oxford, Mississippi office. Mr. Solomon has successfully managed a large number of highway safety projects during his time at PRG. The list of clients he has worked with includes, but is not limited to, National Highway Traffic Safety Administration (NHTSA), Insurance Institute for Highway Safety (IIHS), National Institute for Child Health and Human Development (NICHD), Federal Motor Carrier Safety Association (FMCSA), AAA Foundation for Traffic Safety, Bureau of Indian Affairs (BIA), and the National Safety Council (NSC).

Over the past 20 years, Mark has completed work in every NHTSA Region and worked with nearly every highway safety office in the United States. Mark's research and evaluation work has appeared in over 70 research reports and journal articles. He also serves as a reviewer for the Transportation Safety Board's Occupant Protection Committee.

Mark is currently working on projects to improve seat belt use at daytime and nighttime, evaluating efforts to reduce distracted driving, and currently serves as the evaluation manager for NHTSA's *More Cops More Stops* high visibility enforcement program in Tennessee and Oklahoma.

Before joining PRG, Mr. Solomon was an analyst with the Florida Department of Highway Safety where he provided analytical support to the Governor's Office and the Legislature, as well as state and local agencies.

Mark earned an undergraduate degree at Millsaps College and a Master of Science degree from Mississippi State University.

Thomas H. Woodward
7606 McClellan Ave.
Boonsboro, Maryland 21713

PROFESSIONAL BACKGROUND

Thomas H. Woodward retired from the Maryland State Police on July 1, 2013 after a 36 year career as a law enforcement officer in Maryland: eight years with the Frederick City Police and 28 years with the Maryland State Police. At the time of his retirement he was the Commander of the Hagerstown Barrack. As Commander, Tom is credited with being the first to implement the Data Driven Approach to Crime and Traffic Safety (DDACTS) within the Maryland State Police. He also brought increased media attention to highway safety initiatives and enforcement actions of troopers within Washington County, MD.

Prior to transferring to the Hagerstown Barrack, Tom served in the Chemical Test for Alcohol Unit for eleven years, six of those as the Commander. In this position he was responsible for the training of all breath test operators, acquisition and maintenance of all breath testing instrumentation, training of sobriety checkpoint managers, Standardized Field Sobriety Testing instruction and oversight of the state's Drug Recognition Expert (DRE) Program. He has served as an adjunct representative for the Office of Government Affairs, reviewing legislation, recommending departmental positions and testimony, and testifying before the State Legislature on many highway safety issues. He has served on the staff of the Chief of Field Operations Bureau, and as the Executive Officer for the Commander of the Transportation Safety Division. He administered highway safety grants of the Maryland State Police Field Operations Bureau for two years and supervised the Maryland Fatality Analysis Reporting System (FARS) for two years.

Mr. Woodward has been a Standardized Field Sobriety Testing (SFST) Instructor and DRE Instructor for over 20 years. He also instructs the NHTSA SFST and DRE Instructor Development training. He served as the State Coordinator of the DRE program for 10 years.

Since retirement Mr. Woodward has served on several state occupant protection assessment boards, evaluating the effectiveness of occupant programs and identifying areas for improvement.

EDUCATIONAL BACKGROUND

Mr. Woodward received a Bachelors Degree in Organizational Leadership and Development from Wheeling Jesuit University in May 2005. He is also a graduate of the Northwestern University School Police Staff and Command.

ORGANIZATIONAL AFFILIATION

- International Association of Chiefs of Police (IACP)
- IACP Drug Recognition Expert Section
 - Officer 2006-2009
 - Chair - 2009
- Mothers Against Drunk Driving (MADD) – Maryland Operations Council

10. Open Discussion/New Business/Questions
11. Next Meeting?

12/11/2014

Scott welcomed everyone and gave an explanation of the purpose of the meeting. Scott then opened up the floor for volunteers or nomination to be Chair and Co-chair of the committee. There will not be a time limit on these positions; each person will serve until they no longer are able. The committee will plan to meet quarterly.

Dianna Johnson volunteered to act as Secretary, recording meeting minutes and reserving meeting rooms for future meetings.

Deborah Randol volunteered to serve as Subcommittee Chair.

Phyllis Larimore volunteered to serve as Subcommittee Co-chair.

Scott talked a little more about the reason we need this subcommittee. Indicating seatbelt numbers are low statewide; Highway Safety (HS) needs outside input on how to guide programs and provide new ideas; and it provides statewide coverage. NHTSA also requires a safety belt Task Force in the Map 21 rules., Scott read and explained the rule for the low seat belt rate states category in which Missouri falls.

A question was asked regarding funding for health departments statewide to conduct seat belt programs. Bill explained funding is distributed annually following an application process.

Scott explained the 2014 Occupant Protection Assessment process and why it was conducted. Specified the Key Recommendations, the first recommendation is to create a subcommittee and another recommendation was to enact a primary seat belt law.

A question was raised regarding the seat belt surveys in relation to the location of the municipal seat belt ordinances. Scott explained where the surveys are conducted and why. Courtnie stated that Wright County compared the cities of Hartville (ordinance) and Mansfield for seat belt use. Scott handed out the location maps for the statewide survey. Maps for 2014 should be done by the end of this week. Scott will e-mail them out to the group. Gena reminded the group that they are limited to the regulations that are created by NHTSA. Bill reminded the group that in 1998 the survey began and in 2012 the methodology changed. HS does not deviate from the methodology. NHTSA has to approve all changes. HS will keep the current methodology for 3 years before requesting changes from NHTSA. NHTSA does not have a protocol on Child Safety Seat surveys. Iowa conducts an interactional (stop and talk to driver) child safety seat survey as does Kansas (not CPS techs, not interactional) if we need other states to compare our survey protocol.

Scott indicated that during the Primary Ordinance Seat Belt Workshop in 2013, two recommendations of importance were brought up: 1. when creating an ordinance conduct a pre and post seat belt survey in the city to look at the effects of the ordinance. 2. Create a tool kit for primary ordinance adoption.

CPS Survey was discussed by Pam. The survey was conducted in April, first one since 2009. Usage rate remained the same at 91%.

Action: Pam will post the CPS survey on SaveMOlives.com

Scott explained that Framing was a topic at the 2014 Seat Belt Workshop, information can be found at the following website: <http://sfa.frameworksinstitute.org>. It was recommended that all MoDOT Community Relations staff review the website.

Action: The PI & E subcommittee will review the Framing and discuss ways to incorporate it in the seat belt programs. Carrie or Kelly will report back to the group at the next meeting.

Praveena asked if there was funding available to other agencies, perhaps health departments who conduct seat belt education programs. Scott explained the application process. Bill stated we would welcome those applications, but try to avoid requests for staff due to the high cost of maintaining staff position and avoiding any supplanting issues. Longevity of programs is also looked at closely. Bill recommended requesting material purchases, workshops, etc. Grant application meetings are scheduled for January. Dates are on the GMS site. Scott distributed the application meeting registration forms to all present. Phyllis explained that the regional blueprint coalitions also have funding for projects and the health departments can apply for funding. Bill and Scott explained the reimbursement process regarding how HS receives the funding.

Statewide seat belt survey findings were discussed by Gena. She is still working to collect data. The process was slowed down due to NHTSA's request for a statewide number and Leanna's requested for a regional district number. The Safety Center had to create new methodology for the regional number and is currently compiling this data. The survey should be complete before the end of next week.

Statewide usage is 78.82%. Front seat driver and front outboard passenger. Scott and Gena explained the weighted vs. un-weighted differences.

2014 Teen Seat Belt Survey results were explained by Carrie. HS teen programs were discussed. Courtnie has a program with EMS/Firefighters with teens. Gena asked if we talked to any of the schools with a high rate. Dianna indicated that some schools compete with BOTB but we are unsure of anyone who actually talked to those schools.

Scott discussed the CMV survey.

Primary Ordinances were explained by Scott explained, including the City of Mansfield ordinance decision. Scott encouraged everyone to take the primary seat belt list provided in the materials and try to convince others municipalities to pass an ordinance. The Transportation Commission will be pushing the safety belt law and a stronger law for distracted driving. Unknown as to which direction the legislature will go this year with the subject. Local struggles: Courtnie – three municipalities have passed in her area and she gave a description of how and who she talked to. MoDOT can supply any stats needed for persuasion. Dianna and the Central District Coalition is looking at working with business to create policies for employees. Theresa – St. Louis LE plays a large part in getting the ordinances passed.

It was recommended that a Community Relations staff person be a member of this subcommittee.

Action: Scott will request a CR staff member to join the committee.

Next Meeting: March 25th 10:00

Meeting adjourned.

Missouri Coalition for Roadway Safety

Occupant Protection Subcommittee

Deborah Randol, Chair
Phyllis Larimore, Co-Chair

AGENDA

AGENDA TOPICS

1. Welcome

2. Approval of Minutes

Minutes approved

Handouts: Agenda, MO 325 System Fact Sheet, FY2016 OP Applications, Survey

Scott mentioned the changes to members.

3. MAP-21 Requirements for Task Force

Scott explained the Low Seat Belt use state requirements for the OP Task Force. We will be reporting the meetings and minutes and events of the subcommittee to NHTSA.

4. Update on 2016 Occupant Protection Applications

Handout FY2016 OP Applications: This lists all of the agencies who have submitted applications where Occupant Protection is a focus of the project, including the in-house Highway Safety applications. Contracts will be decided next week by HS staff.

Central District described the race track program with Alliance Sports Marketing. Table at the race track. Each person stopped wearing a seat belt receives a "ticket" from LE that they can trade in for a promo item. Event went very well. At this event approximately 70-80% had their seatbelts on when arriving.

Question: How much OP funding is available? Bill explained the process of the funding guidelines from NHTSA and the installments awarded during the year. There isn't a set number, based on the applications received and the amount provided by NHTSA.

Scott explained the contract process and the help that HS provides.

Question: What is happening in Jefferson Co? Enforcement and education in high schools. Jefferson Co has not conducted OP enforcement before. County has a renewed, bolder approach to

getting the message out. They are wanting to put a trailer together with the message to take out to events. Jefferson Co and St. Louis co are both at the top of the fatality list. OP is a big issue in both areas. A SHSP was created last year for Jefferson Co also and OP was a focus.

5. Legislative Update

MoDOT was pushing for OP primary, but it has not moved. Bill was drafted but not assigned to a committee. Little hope that it will move. Do not know who sponsored it. Distracted driving legislation for all drivers had a hearing, but has not moved either.

Helmet repeal has moved, two hearings, one in the house, told it will pass the house and move on to the senate. Speculating it will make it to the governor's desk. Bill testified on a bill that allows the person to license a motorcycle as a "helmet free" bike. Out of state riders would need a waiver to ride helmet free. Speculating it will move well too. Freedom of the Road Riders pushing helmet law. Moves easily due to the individual freedom of choice movement.

Explanation between MoDOT and MCRS: Coalition members can voice their opinion to the legislature. As employees of the State of MO cannot. We no longer have a strong representative at the capital. Legislative subcommittee disbanded after Dale Findley retired.

Is there a group that lobbyists belong? Lobbyists are paid to lobby for issues, unknown if there is a formal group. Insurance groups are not lobbying for seat belt legislation. Firefighters union has lobbyists. LE has to weigh what issues they will or will not fight. We need to speak to our own legislators by using our own grassroots efforts.

Can we do action alerts? Yes. We have been asked to send out the actions when we are aware of them.

Local ordinances stopping the helmet repeal? Not yet.

Use the framing message when talking to legislators. Numbers do not mean much to them. Action alerts are fine, but we all need to be careful when voicing an opinion on issues.

75 mph speed limit? No update.

Bill will get the bill numbers and sponsors.

Can we send out alerts?

Talking points for issues? MoDOT can have stats and maps created.

E-mail talking points out to group. See if Kelly can e-mail them to all subcommittees.

6. Click It or Ticket

- **Enforcement**
- **Media**

May 18-31, 2015 – national campaign. LE, TV, radio, gas pump toppers. Around \$200,000 to LE for the campaign. Media will start May 11. \$325,000 dedicated to media. Some to Cardinal and Royal radio network. 80 Gas station locations (mostly urban) pump toppers playing video and others with static toppers. New this year, 75 car washes will have waterproof banners with the message. Digital media with Pandora Radio. Will also be creating new creative materials with MSHP. Facebook and twitter messaging too.

This is a high visibility campaign so the media portion is important to combine with the LE efforts. June 1 will begin the S/B survey.

Teen enforcement is occurring now until March 31. With a new PSA. We need to keep the message in the schools and community leaders. School Health advisory council involved. Required by statute.

Share teen programs with the safe kids advisory council.

7. 2014 Safety Belt Survey Map Book

Booklet was discussed at last meeting. Brief cover page and the counties that are included.

Weighted vs weighted explanation. Do not use the weighted number. Alternate sites explained. This information has also been sent to MSHP and the LE advisory council. All 28 counties in the survey will also receive it.

This is the 2nd year on the new NHSTA required methodology.

MO Seat Belt Survey included in packet.

Scott explained the way the Safety Center surveyors get the data for the survey.

8. Primary Ordinance Update

New listing included in packet.

9. Constructing Action Plan

- **OP Assessment Recommendations**
- **CDC/ICF Assessment Recommendations**

Recommendations were sent out from Assessment. Suggested using the impaired driving strategic plan format. NHTSA has approved this format and it could be used and improved throughout the years. Before the next meeting Scott will have a draft plan created and will get it to everyone.

The May central region coalition meeting will be in Columbia. All city officials, fire and LE will be invited and a presentation will be conducted regarding creating a local primary seat belt ordinance.

Include the state fire marshal office in our mission to lobby for us at state level and city level.

Include fire fighter on this group.

Scott will construct the plan.

10. Open Discussion/New Business/Questions

Missouri's 325 plan – Scott gave a brief explanation of the plan and funding drop. Handed out a fact sheet for the group to use.

11. Next Meeting? July 22, 2015 at 10:00

Appendix D Part 2

State Traffic Safety Information System Improvement Grant Introduction: The purpose of this grant is to support State's efforts to improve data systems needed to assist in identifying priorities for Federal, State, and local highway traffic safety programs. The grant assists in linking intrastate data systems, and to improve the compatibility and interoperability of these data systems and the data systems of other States for highway safety purposes. This grant provides additional funding for Missouri which allows us to enhance our ability to analyze national trends in crash occurrences, rates, outcomes, and circumstances.

MISSOURI COALITION FOR ROADWAY SAFETY

MEETING TITLE: MCRS Executive Committee

DATE: June 21, 2007

TIME: 10:00 a.m. - noon

LOCATION: Missouri State Highway Patrol, 1510 East Elm St., Jefferson City

MEMBERS (an X indicates the member was in attendance)

☒ Leanna Depue, Chairperson, MoDOT Highway Safety
☒ Melissa Black, MoDOT System Management
☐ Joseph Boyd, FMCSA
☒ Ron Breau, MO Motor Carriers
☒ Terry Butler, Missouri Safety Center
☐ Randy Cornell, Contract Freighters, Inc.
☐ Romell Cooks, NHTSA
☐ J.R. "Buddy" Davis, LETSAC
☐ Susan deCourcy, NHTSA
☒ Dale Findlay, Missouri Safety Council
☐ Mell Henderson, MARC
☐ Sandy Hentges, MoDOT System Management

Others present:

Michael Briggs, MARC
 Bill Coleman, FMCSA
 Don Neumann, FHWA

☐ Don Hillis, MoDOT System Management
☐ Brad Jones, Missouri State Highway Patrol
☐ James Keathley, Missouri State Highway Patrol
☐ Kevin Keith, MoDOT
☐ Gary Lowe, Missouri Safety Center
☒ Allen Masuda, FHWA
☐ Nancy McAnagh, DHSS
☐ Mike Right, AAA
☒ Angie Rolufs, University of Missouri-Rolla
☒ Trish Vincent, DOR
☒ Bill Whitfield, MoDOT Highway Safety Division
☐ Jim Wild, E-W Gateway Council of Governments

Stephen Risse, MARC
 Kathy Shikles, MoDOT Highway Safety

AGENDA TOPICS:

Welcome and Introductions
 Review Subcommittee Status
 2008 Blueprint Conference
 Update on Motorcycle Safety Task Force
 2007 Blueprint Funding
 Process to Update Missouri's Blueprint for Safer Roadways
 Suspended, Revoked and Unlicensed Task Force
 Subcommittee Reports

KEY POINTS:

Welcome and Introductions

Leanna Depue welcomed all present.

2007 Blueprint Funding

Two million dollars will be given again this year to be used for Blueprint efforts. The Executive Committee received two requests for funding. The DWI Subcommittee requested approximately \$75,000 for conducting an administrative review of the breath alcohol ignition interlock program. We've also had requests for additional training for first responders on the safest way to respond to crashes involving hybrid electric vehicles and vehicles with advanced airbag systems. After discussion, a motion made by Dale Findlay and seconded by Trish Vincent passed dividing the two million dollars up as follows:

- \$800,000 – Implementation funds to the regions
- \$200,000 – Executive Committee (funding for administrative review of the breath alcohol ignition interlock program and hybrid electric vehicles and vehicles with advanced airbag systems.)
- \$600,000 – Statewide Public Information initiatives
- \$400,000 – Public Information funds to the regions

Review of Subcommittee Status

- Commercial Motor Vehicle – Active. Randy Cornell of Joplin in chairperson. They need to come up with bulleted subcommittee responsibilities.
- Impaired Driving Subcommittee (formerly DWI Subcommittee) – Active. Membership may need to be expanded. A motion was made by Trish Vincent and seconded by Dale Findlay to change the name of the DWI Subcommittee to Impaired Driving Subcommittee. Motion passed.
- Enforcement Subcommittee – Active. Bill Whitfield is currently chairperson but has accepted another position at Highway Safety. Will need to find replacement.
- Traffic Records Coordinating Committee (formerly Evaluation Subcommittee) – Active. It was proposed that the Evaluation Subcommittee and the Traffic Records Coordinating Committee be combined and their focus be expanded. Leanna talked with Randy Silvey and Brad Jones about this. Ron Breau made a motion and Trish Vincent seconded that the Evaluation Subcommittee be renamed to Traffic Records Coordinating Subcommittee and that they be charged with developing a plan for improvement of record keeping systems in the state of Missouri. Motion approved.
- Judicial Subcommittee – Inactive. Trish Vincent made a motion, which was seconded by Allen Masuda to eliminate this subcommittee and transfer tasks to other subcommittees. Motion approved. The Enforcement Subcommittee will get the responsibility of reviewing case law and provide updates as appropriate and monitor sentencing trends and issues. The Impaired Driving Subcommittee will get the responsibility of tracking the expansion and activities of DWI courts and assisting with the promotion of court monitoring.
- Legislative Subcommittee – Active
- Public Information Subcommittee – Active
- Roadway Infrastructure Subcommittee – Active. Angela Rolufs of University of Missouri-Rolla is chairperson. They need to come up with bulleted subcommittee responsibilities.
- Strategic Planning and Implementation Subcommittee – Active

Process to Update Blueprint

The current Blueprint was completed in November 2004. We need to begin the process of updating the Blueprint. The Public Information Subcommittee wants to be heavily involved. Leanna requested working with the regional coalitions to hold open forums in each of the regions to get input on the Blueprint prior to revising it. Michael Briggs also suggested working with the MPOs and Regional Councils. Leanna suggested asking the regional coalitions to schedule them this fall. Leanna will try to attend all of them but would like members of the Executive Committee to try to attend at least one of them. Michael Briggs made a motion and Ron Breau seconded that we ask the regions to hold forums or a public type meeting to support the concept or get input to updating the Blueprint. Motion approved.

2008 Blueprint Conference

Dale Findlay made a motion and Bill Coleman seconded that we host a 2008 Blueprint Conference. Motion passed. We need to form a working group to address the development of the 2008 Blueprint Conference. Don Neumann agreed to lead the charge and Trish Vincent said she would assist.

Suspended, Revoked and Unlicensed Task Force

Trish Vincent said that last year Sen. Stouffer introduced legislation regarding driving while suspended and revoked. Another state uses a different color of license plates to make it easier for law enforcement to identify DWI offenders. This could be expanded to suspended and revoked drivers. The Department of Revenue is trying to find a tool to assist law enforcement to keep these drivers off the road. Trish said they could possibly make the plate start with a specific letter. Dale Findlay made a motion and Ron Breau seconded that we form a task force to look at suspended and revoked drivers. Motion approved. Trish Vincent agreed to take the lead and put together a task force to address this issue. Bill Whitfield suggested that someone from the Law Enforcement Traffic Safety Advisory Council, Missouri Police Chiefs Association, and Missouri Sheriffs Association be included on this task force. Trish said they need some legal counsel on the task force as well.

Motorcycle Safety Task Force

The Motorcycle Safety Task Force has met and put together a proposal for expenditures of 2010 fund. They were allocated \$100,000. Terry Butler reported on how the money will be spent.

Operation STOP

Operation STOP is a virtual web based memorial for Missouri people who have died in crashes. This website was created to give Missouri teenagers a place to learn from the mistakes or misfortunes of other teens. An individual developed this

website. They manage the deaths that are reported to the Highway Patrol. We need to investigate this website further before linking it to our site. The website is <http://www.operationstop.com>.

Resource Guide on Highway Safety Training

Terry Butler agreed to chair a working group to look at potential development of a resource guide for highway safety training in the state. Angie Rolufs agreed to assist.

Subcommittee Reports

Enforcement Subcommittee – Bill Whitfield

Waiting for numbers on the Click It or Ticket, Pickup Truck and youth initiative. Click It or Ticket focused in 20 counties. We contracted with 120 agencies and the Missouri State Highway Patrol. Bill said they met with the agencies personally for the Click It and Ticket and Pickup Truck projects. Earned media events were scheduled along with paid media. The law enforcement participation was up from last year. We rolled out a new reporting web based system. By the next meeting, Bill will be able to report the seat belt usage rate.

Bill Whitfield is the new MCSAP program assistance coordinator. We need to look at getting another chairperson for the Enforcement Subcommittee.

Legislative Subcommittee – Dale Findlay

Even though primary seat belt legislation did not pass this year, Dale thanked everyone for working so hard. Dale hoped there was no discouragement. Dale is not sure who'll be our sponsor next year. They'll be meeting to look at the primary seat belt issue again to come up with recommendations for next year. We saved the motorcycle helmet law and motor vehicle inspection program.

Legislation was passed that contains an emergency clause on the provisions regarding the use a nonalcoholic antiseptic for cleansing the skin prior to drawing blood for determining alcohol content of the blood.

Public Information Subcommittee – Melissa Black

Child Passenger Safety

- National Child Passenger Safety Week was February 11-17
- Used radio, TV, pump toppers, posters
- Materials all online
- Press event around the state
- Child Passenger Safety week is being moved to September

Never Made It Teen Safety Belt Campaign

- Radio, TV, Internet, Theaters
- February 19 – March 12
- Materials all online
- March 1 – 16 enforcement efforts

Work Zone Safety Awareness

- April 2-6 Work zone Awareness
- Radio, TV, Billboards
- Press event

Primary Safety Belt

- Helped with rallies, materials, press materials, etc.

Buckle Up in Your Truck Campaign

- April 29 – May 12
- TV, radio, materials all online
- Hangtags
- Press events around the state – shared event with Kansas in May at Ford Plant and shared some media as well (also District 6)

Click It or Ticket

- May 13 – June 2
- TV, radio, materials all online, added additional funds from 07 budget to strengthen this effort
- Seat belt survey was June 4
- Press events around the state

Battle of the Belt

- Sent reminders to schools for upcoming contest, which was changed to run September 6 – December 31 to give them more flexibility
- Added the private schools, along with public
- Already have some of the funding for prizes from Shelter
- Added the video content element to the competition – so this will be an additional prize

Budget

- Tallied final 07 budget
- Planned for 08 spending
- Asked regions for the 07 reports by July 1, 08 plans by August 1

Updating Marketing Plan

- Currently resend or put on the Web soon

Ad Agency RFP

- New agency chosen through OA, will be announced soon, any state agency

Coming Up

- Impaired Driving Crackdown – August 15 through September 3
- “Never Made It” campaign will run Sept. 07 through Oct. 07
- Impaired Driving campaign will run November 07 through December 07
- “Operation Safe Teen” may possibly be moved to April 08

Website Update

Boost and Buckle T-shirts – State Fair and Child Passenger Safety Week in September. Each district will get some T-shirts. Trish said daycares would be a good place. T-shirts came from another funding source because we passed the law.

Infrastructure Subcommittee - Angie Rolufs

Working on the following:

- Roadway Safety Audit - interested in putting back in state. Big push in LTAP community. Simple brochure of what is a roadway safety audit and why do we want to have it in our community.
- Roundabout Awareness - Working with Brian and giving pitch on roundabouts for RPCs. MoDOT has some brochures.
- LTAP - working with District 10 on pilot training on EMS and guard cable
- Working on LED traffic lighting – saves money and easier to see. Working with Springfield and Rolla on putting those in place.

Commercial Motor Vehicle Subcommittee – Ron Breau

- Had an organizational session.
- Obtained data from Brian on CMV and accidents to start reviewing.
- Randy Cornell is thinking of having a conference call meeting next week.

Other issues:

Allen Masuda suggested having future Executive Committee meetings in a location that is capable of connecting by telephone for those who cannot attend.

MEMORANDUM
Missouri Department of Transportation
Highway Safety Division
2211 St. Mary's Blvd., P. O. Box 270
Jefferson City, MO 65102

Fax (573) 634-5977

State Traffic Safety Information System Improvement Grant
Section 408

State of Missouri

TO: Romell Cooks, Regional Administrator
Region 7, NHTSA

FROM: Pete Rahn, Director and Governor's Representative
Missouri Department of Transportation

SUBJECT: Grant Application – Section 408

DATE:

I certify that:

The State of Missouri has established a Traffic Records Coordinating Committee (TRCC) and that the Committee has oversight responsibility for the implementation of the State of Missouri's Traffic Records Strategic Plan. The Committee's membership list is included within this application.

A copy of the State of Missouri's multiyear highway safety data and traffic records Strategic Plan is included.

The State of Missouri has adopted and is using the MMUCC data elements. The State has also signed a Memo of Agreement with the National Highway Traffic Safety Administration (NHTSA) to adopt and use NEMSIS data elements.

The State of Missouri will make available or submit to NHTSA its Strategic Plan and documentation of the TRCC's membership, organization, and authority.

The State of Missouri will use Section 408 funds only to evaluate, improve, and link its highway safety data and traffic records system in accordance with eligible use detailed in 23 U.S.C. 408.

Section 408 funds received by the State of Missouri will be administered in accordance with 49 CFR Part 18.

The State of Missouri will maintain its aggregate expenditures from all other sources for highway safety data programs at or above the average level of such expenditures maintained by the State in FY 2003 and FY 2004.

Our mission is to provide a world-class transportation experience that delights our customers and promotes a prosperous Missouri.

Traffic Records Coordinating Committee

Jefferson City, MO**

MEETING MINUTES

Welcome

- The meeting began at 9:00 am.
- Minutes approved

Project Reports

- DOR – No Report
- OSCA –Working on implementing JIS in 20 courts. Currently only working with Ellisville and Miner because of staffing. Kirksville and Monroe are requesting information on JIS as well.
- MSHP – The patrol crash reports are being completed for January 2014 and the municipal reports are complete through the last week of December.
- MODOT – John discussed the demo of the interactive map.
- DHSS – No Report

Budget Report (Jeremy)

Obligated – 814,686.62

FY14 – Amount spent as of 8/21/2014 = \$345,202.02

Percent of budget spent = 42%

Vendors (Jeremy) – Brazos (Cape Girardeau), Rejis (Nixa), ITI, Lexis Nexis, Missouri Sheriffs Association (Securetrac)

TRIPRS (Jeremy)

- Discussed FY15 Grant Application

TRAINING – OSCA provided traffic training to clerks this week. MSHP trained in Troop E on crash reports and classification. Brad Jones conducted DWITS training in Troop F as well.

Local Information / Needs – N/A

MEETING MINUTES

Welcome

- The meeting began at 9:00 am.
- Minutes approved

Project Reports

- DOR – No Report
- OSCA – We are developing a list of municipal courts in which we are planning on implementing JIS. We are also looking in to developing a municipal platform for submission.
- MSHP – The patrol crash reports are being completed for January 2014 and the municipal reports are complete through February. The DPPA is slowing down the process. We are also wrapping up the 2014 data file.
- MODOT – Discussed Traffic Records Forum.
- DHSS – All of the hardware is in the field being utilized except six that are waiting on commission approval. In May DHSS sent their required data to Nemesis and did not receive any kickbacks.

Budget Report (Jeremy)

Obligated – 814,686.62

**State of Missouri
Traffic Records Coordinating Committee Meeting**

**November 20, 2014
Missouri State Highway Patrol
General Headquarters Building
Jefferson City, MO**

AGENDA

Welcome

Project Reports

- DOR
- OSCA
- MSHP
- MODOT
- DHSS

Budget Report -

Obligated - \$884,459.47

FY15 – Amount Spent as of 11/20/2014 = \$14,935.98

FY14 – Amount Spent as of 11/20/2014 = \$470,050.93

Percent of budget spent = 58%

Vendors (Jeremy) – Brazos (Cape Girardeau), Rejis (Nixa and Lee's Summit), ITI, Lexis Nexis,

Training -

Local Information -

Discussion – Traffic Records Forum 2014, Buy America, Rejis (Mobile Ticketing)
– JIS interface, IPR, FY15 Assessment

Adjourn

**State of Missouri
Traffic Records Coordinating Committee Meeting**

**November 20, 2014
Missouri State Highway Patrol
General Headquarters Building
Jefferson City, MO**

MEETING MINUTES

Welcome

- The meeting began at 9:00 am.
- Minutes approved

Project Reports

- DOR – Working on conviction file layout and reviewing crime bill.
- OSCA – Training court personnel in Kirksville, Ellisville, and Miner. These courts will be fully implemented by January 2, 2015. We currently have 18 additional municipal courts that want to move to JIS although we can't accommodate that until the new operating system is implemented.
- MSHP – Patrol reports are complete through February and locals through March. We are working on the encode project for municipal citations and hope to have that complete by January 2015. We have also upgraded the GIS software for crash mapping.
- MODOT – We are currently participating in a roadway data analysis study. We are also working with St. Louis and Springfield to gather the required MIRE information.
- DHSS – All the Ipads have been distributed to the ambulance districts. We are also working with our vendor to improve the report writer which will make it easier for DHSS to get the ambulance run reports.

Budget Report (Jeremy)

Obligated – 884,459.47
FY14 – Amount spent as of 11/20/2014 = \$470,050.93
Percent of budget spent = 58%

Vendors (Jeremy) – Brazos (Cape Girardeau), Rejis (Nixa and Lees Summit), ITI, Lexis Nexis,

TRAINING – DHSS is providing ambulance run reporting training when the agencies pick up the Ipads.

Discussion – Traffic Records Forum 2014, Buy America, LETS Survey, REJIS, (Mobile Ticketing)
– JIS Interface, IPR, FY15 Assessment

Adjourn

- Meeting adjourned at 10:00 am.

MEETING MINUTES

Welcome

- The meeting began at 9:00 am.
- Minutes approved

Project Reports

- DOR – Working on fiscal notes.
- OSCA – Ellisville and Miner are online. We are currently evaluating the list of courts requesting to utilize JIS. We have funds to develop a record of conviction program. The program is still in the design phase although it is anticipated to be implemented by September 30, 2015.
- MSHP – Patrol and local reports are complete through May and starting on June. The schedule for STARS training is developed and is being sent out. We will be conducting four training sessions in the Macon, St. Louis, Springfield, and Willow Springs.
- MODOT – We are still working on collecting data on every roadway which must be complete by 2020.
- DHSS – No Report

Budget Report (Jeremy)

Obligated – \$1,121,362.60
FY15 – Amount spent as of 1/29/2015 = \$84,235.93
Percent of budget spent = 8%

Vendors (Jeremy) – Brazos (Cape Girardeau), Rejis (Nixa and Lees Summit), ITI, Lexis Nexis,

TRAINING – None

LOCAL INFORMATION - None

Discussion – Buy America, REJIS (Mobile Ticketing) – JIS Interface, IPR – three requested, FY15 Assessment, LETS, and DPPA

Adjourn

- Meeting adjourned at 10:00 am.

Vision Statement

Missouri is building a comprehensive traffic records system, with maximal use of automated field data collection software, error correction at the point of collection, electronic data sharing between the field and central databases, vastly increased data integration, and access for all legitimate users. This long-term vision includes creation of merged datasets, redaction of personal identifiers, and accessible via online analytic tools or through staff dedicated to assisting users. These resources will be housed within the various custodial agencies but made accessible for legitimate users through password-secured websites.

Missouri's traffic records system will work towards a formal data quality program with performance indicators for each of the six core system areas. The quality control program will be based on data quality measurements developed in cooperation with the custodial agencies responsible for each major database. The indicators used by the systems' managers to monitor day-to-day performance will "roll up" to user-oriented indicators available in monthly and annual summaries. The TRCC will work with the custodial agencies to develop and maintain the data quality reporting function.

Goal

To move forward in upgrading and integrating the data systems used to conduct safety analyses in the State.

Objectives

Crash System

- 1) To reduce the number of days from the crash date to the date the crash report is entered into the database to less than thirty (30) days (C-T-1).
- 2) To have 50% of the crash reports entered into the database within thirty (30) days after the crash (C-T-2).

Vehicle System

<None>

Driver System

- 1) To reduce the number of days from the conviction date to the date the conviction is posted to the state of the driver's to ten (10) days (D-T-1).

Roadway System

- 1) To identify 100% of public road miles on the State's base map (R-C-2).

Citation/Adjudication System

- 1) To reduce the number of days from the date of the charge disposition to the date the charge disposition is entered into the statewide adjudication database to seven (7) days (C/A-T-2).

EMS/Injury Surveillance

- 1) To reduce the number of days from the date of an EMS run to the date when the EMS patient care report is entered into the database to thirty (30) days (I-T-1).

Memo of Understanding

To: Gail Vasterling, Director
Missouri Department of Health and Senior Services

From: Bill Whitfield
Highway Safety Director, Traffic and Highway Safety Division, MoDOT

Date: May 28, 2015

Subject: Missouri Strategic Plan for Traffic Records Data FY16

New funding provisions established by Moving Ahead for Progress in the 21st Century (MAP-21) has reemphasized the need for timely, accurate, complete, uniform, integrated and accessible highway safety data and traffic records systems. With the Missouri Strategic Plan for Highway Safety Information Systems, new objectives are being formulated to achieve the goal identified within the plan. That goal is to develop a coordinated statewide traffic records data system that is integrated, readily accessible and supplies complete, accurate, uniform, and timely traffic information to all users.

To achieve this goal, it is important that the Director of Revenue, Director of the Department of Transportation, the Court Administrator of the Office of State Court Administrators, Director of the Department of Health and Senior Services, the Traffic and Highway Safety Division Director, and the Superintendent of the Missouri State Highway Patrol (or their designated representative) to participate in the Statewide Traffic Records Coordinating Committee (STRCC). The STRCC must have multidisciplinary membership and include, among others, owners, operators, collectors and users of traffic records and public health and injury control data systems in order to advance traffic records data systems in Missouri.

Objectives of the Committee

- To provide leadership and support to ensure that traffic records data is readily accessible to users, timely, accurate, complete, uniform, and in compliance with the Missouri Strategic Plan.
- Continue the Statewide Traffic Records Advisory Committee (STRAC) as a means to forge partnerships, assure that all constituents with a stake in injury/crash reporting are represented and provide effective access, integration, and linking of all appropriate files. This committee will continue to update and revise the Missouri Strategic Plan.

- Efforts need to be made by the STRAC to inform the STRCC about the importance of the traffic records improvement endeavor and to enlist their support in its accomplishment.

Funding

Funds made available from the National Highway Traffic Safety Administration (NHTSA) by provisions of MAP-21 (Section 405c) to the State of Missouri will be utilized to assist agencies in improvements of traffic records data systems. Budget items listed within the Missouri Strategic Plan for Highway Safety Information Systems do not commit any agency to expenditures or personnel, but rather as assistance to the participating agencies.

Role of the STRCC

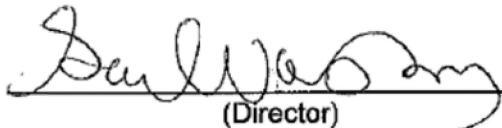

The STRCC have specific review and approval authority with respect to our State's highway safety data and traffic records systems and technologies used to keep such systems current. They also review changes to those systems before changes are implemented. This oversight is vital to the effectiveness of the committee.

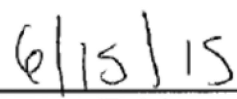

The committee will:

- a) include representatives from highway safety, highway infrastructure, law enforcement and adjudication officials, and public health, emergency medical services (EMS), injury control, driver licensing, and motor carrier agencies and organizations;
- b) have authority to review any of the State's highway safety data and traffic records systems and to review changes to such systems before the changes are implemented;
- c) provide a forum for the discussion of highway safety data and traffic records issues and report on any such issues to the agencies and organization in the State that create, maintain, and use highway safety data and traffic records;
- d) consider and coordinate the views of organizations in the State that are involved in the administration, collection and use of the highway safety data and traffic records system;
- e) represent the interests of the agencies and organizations within the traffic records system to outside organizations;
- f) review and evaluate new technologies to keep the highway safety data and traffic records systems up-to-date;
- g) improve the State's traffic records data system; and
- h) annually approve the membership of the TRCC, the TRCC coordinator, and the Missouri Strategic Plan.

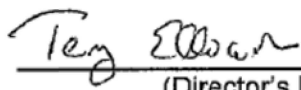

Agreement to Participate

This agency agrees to be a participant in the statewide traffic records data system. The director, or designee, agrees to participate as a member of the Statewide Traffic Records Coordinating Committee. This agreement does not bind or restrict the agency to any financial or manpower requirement but reflects the agency's commitment to the Missouri Strategic Plan for Highway Safety Information Systems

(Director)

(Date)

I hereby designate Terry Ellsworth as my representative on the Traffic Records Coordinating Committee (TRCC).

(Director's Designee)

(Date)

I hereby designate CAPTAIN PAUL KERBERIN as my representative on the Traffic Records Coordinating Committee (TRCC).

Capt Paul D. Kerberin
(Director's Designee)

05/28/15
(Date)

Authority and Structure of TRCC

The Traffic Records Coordinating Committee was established by the Missouri Commission for Roadway Safety. The coordinating committee has authority given to it by the governor's representative to review any of the State's highway safety data and traffic records systems, to review changes to those systems before changes are implemented, and to develop, maintain, and approve the State's Traffic Records Information System's Strategic Plan. The committee consists of a multidisciplinary membership that includes, among others, owners, operators, collectors and users of traffic records and public health and injury control data systems, highway safety, highway infrastructure, law enforcement and adjudication officials, and public health, emergency medical services (EMS), injury control, driver licensing and motor agencies and organizations. The diversity of this oversight is vital to the effectiveness of the committee. The Traffic Records Coordinating Committee reviews its membership annually to ensure that there is a diverse atmosphere in the committee as well as approve the TRCC coordinator. The committee has the authority to change the State's multi-year Strategic Plan as well as the performance measures used to demonstrate the quantitative progress. The TRCC is comprised of the directors and/or their designees of the following agencies:

Missouri Department of Transportation

Missouri Department of Transportation – Highway Safety Division

Missouri Department of Transportation - MCSAP

Missouri State Highway Patrol

Missouri Department of Revenue

Missouri Department of Health and Social Services

Missouri Office of State Courts Administrator

Federal Motor Carrier Safety Administration

National Highway Traffic Safety Administration

Federal Highway Administration

Mid-America Regional Council (Municipal Planning Office)

St. Louis County Police Department

Nixa Police Department

Lee's Summit Police Department

Sikeston Department of Public Safety

Cole County

City of Columbia

Statement of TRCC Operation and Function Status

The TRCC provides a forum for the discussion of highway safety data and traffic records issues and reports on any such issues to the agencies and organizations in the State that create, maintain, and use highway safety data and traffic records. It considers and coordinates the views of organizations in the State that are involved in the administration, collection and use of the highway safety data and traffic records systems, and represents the interests of the agencies and organizations within the traffic records system to outside organizations. The TRCC also reviews and evaluates new technologies to keep the highway safety data and traffic records systems up-to-date in order to improve the State's traffic records data system. The traffic records strategic plan is coordinated with the state strategic highway safety plan to ensure both plans are executed efficiently.

The TRCC normally meets every third Thursday on a monthly basis. The committee has revised the Missouri Strategic Plan that is based upon the NHTSA Model of Performance Measures to accommodate and reflect measurements to show progress in each of the core systems.

The State of Missouri has adopted and is using the MMUCC data elements. A review of the elements used was recently completed. Missouri has also signed a Memo of Agreement with the National Highway Traffic Safety Administration to adopt and use of NEMSIS data elements.

MMUCC Changes

The revised Missouri Uniform Accident Report was implemented on January 1, 2012 and all the local law enforcement agencies in the state seem well receptive to the new report. The revised form collects ten (10) additional fully compliant MMUCC data elements.

FY 2015 Executive Summary**Crash System****MO – P06 / Contract #15-M3DA-04-006 LETS Software Hosting and Support**

A significant initiative for 2014-15 is the anticipated upgrade of LETS to be a fully web/browser enabled application. The current 10+ year old service platform continues to be a popular and efficient means of collecting and sharing crash report data for Missouri Law Enforcement. The technical maintenance issues and selected user base requests for change have been documented into a project proposal and approved by the project sponsor. A viable web based crash diagramming software solution has been identified and funding approved for adoption of the platform. These functional improvements and the integration of crash scene diagramming software into LETS are intended to result in local support savings, hosting service delivery efficiencies, and likely service improvement benefits for officers, due to the change in technologies employed. Funds for this project will be expended by September 30, 2015.

MO – P22 / Contract #15-M3DA-04-007 Traffic Records Data Improvement

Utilizing this grant we contracted with several vendors in FY15 to create interfaces with STARS and JIS to improve e-crash and e-citation submission. We also worked with other state agencies and provided funding to attend advanced training in the traffic records arena. The funds allocated to this contract will not be expended by September 30, 2015 because of issues in obtaining Memo's of Understanding and delays in project development.

MO-P26 / Contract # 15-M3DA-04-004 Statewide Traffic Accident Records (STARS)/FARS Support

In regard to STARS/FARS Support, items two and three listed below are complete and number three is on-going. These items were part of project #14-K9-04-003. Items one and four are currently part of project #15-M3DA-04-004. Considering the NHTSA has decided not to host a FARS system-wide training conference, funding for FARS out-of-state travel is being shifted to other FARS-related expenses.

1. Secure federal funding in order for the MSHP to meet contract obligations with the NHTSA to support the FARS. The funding will cover expenditures associated with labor; indirect costs such as postage, office supplies, etc. and in-state and out-of-state travel.
2. Secure federal funding in order for the MSHP to meet our MOU obligation with the MoDOT and cover the costs to contract with computer consultants to transition STARS batch jobs from COOL: Gen technology.

3. Secure federal funding in order for the MSHP to contract with computer consultants to develop and implement web-based security enhancements to the STARS.
4. Secure funding to transition to a programming framework entitled DOT NET (.NET). MoDOT plans to initiate the safety module of the TMS.NET project in July 2014. This project will allow STARS integration with TMS to stay active.

It is anticipated the funds awarded to this project will be expended by September 30, 2015.

MO-P31 / Contract # 15-M3DA-04-009 Increase Automation of Local Crash Reporting

This project is focused on the law enforcement agencies that currently do not have a software system to capture traffic crash data and submit to STARS. A liaison is being utilized to recruit agencies to adopt the Law Enforcement Traffic System, (LETS). The LETS system is an up-grade to a lot of current local systems and allows the agency to transfer crash reports directly to STARS. Funds for this project will be expended by September 30, 2015.

Vehicle System

Driver System

(See Citation / Adjudication System discussion)

Roadway System

<none to report>

Citation / Adjudication System

MO-P35/ Contract Number #15-M3DA-04-005 JIS Monitoring and Municipal Reporting

The Office of State Courts Administrator (OSCA) is requesting funding to improve the collection and management of traffic records, as well as increase the accuracy and timeliness of reporting disposition information by monitoring the electronic transmission of traffic-related conviction data from the courts to DOR and MSHP to determine if on-site assistance or training/instruction is required to increase the accuracy and timeliness of reporting.

Municipal courts that are not automated or on an automated system that does not submit

data directly to the Department of Revenue are struggling with meeting the seven day requirement. Providing an interface and web-based reporting form would assist the municipal courts in ensuring the traffic data is reported timely. The remaining amount of funds is expected to be expended by September 30, 2015.

MO-P37 St. Louis County Hardware/Software Upgrades/ Approved Project Pending Approval of Buy Amercia Waiver

This project would develop a software interface between the REJIS electronic ticketing system and the electronic state prosecutor/court system to allow electronic transmittal of traffic citations. Numerous county and municipal law enforcement agencies throughout the state of Missouri use the REJIS electronic ticketing system. The St. Louis County Police Department, Lee's Summit, and Nixa Police Departments will coordinate a model project, which will include the purchase of electronic ticketing printers, installation and supplies, as well as the development of the interface software. When fully tested and determined to be working properly, the interface software will be provided at no cost to all city/county agencies utilizing the REJIS system, thereby creating a statewide interface between REJIS and state courts/prosecutors. This electronic interface will reduce the time that it takes to route traffic citations to the prosecutor/court and increase the accuracy of the citations. A change in the administration staff as well as the Buy America waiver process has slowed this project down. Because we have not received a response in regards to our buy America waiver no funds have been expended as of June 10, 2015.

MO-P38 Lee's Summit Police Department Hardware/Software Upgrades/ Approved Project Pending Approval of Buy America Waiver

This project would develop a software interface between the REJIS electronic ticketing system and the electronic state prosecutor/court system to allow electronic transmittal of traffic citations. Numerous county and municipal law enforcement agencies throughout the state of Missouri use the REJIS electronic ticketing system. The St. Louis County Police Department, Lee's Summit, and Nixa Police Departments will coordinate a model project, which will include the purchase of Toughbook tablets and the development of the interface software. When fully tested and determined to be working properly, the interface software will be provided at no cost to all city/county agencies utilizing the REJIS system, thereby creating a statewide interface between REJIS and state courts/prosecutors. This electronic interface will reduce the time that it takes to route traffic citations to the prosecutor/court and increase the accuracy of the citations. Because we have not received a response in regards to our buy America waiver no funds have been expended as of June 10, 2015.

MO-P39 Cape Girardeau Police Department E-Citation Project/ Approved Project Pending Approval of Buy America Waiver

This project would develop a software interface between the Brazos Technology's Records Management System and the electronic state prosecutor/court system to allow electronic transmittal of traffic citations. Several municipal law enforcement agencies within the State of Missouri use the Brazos electronic ticketing system. The City of Cape Girardeau and Sikeston Department of Public Safety have contracted with Brazos to spearhead this project. When the system is fully implemented and tested, the interface software between Brazos will be provided at no cost to all city/county agencies utilizing the Brazos system, thereby creating a statewide interface between Brazos and state courts/prosecutors. This electronic interface will reduce the time that it takes to route traffic citations to the prosecutor/court and increase the accuracy of the citations. It was discovered that the hardware needed for this project was not manufactured/assembled in the USA and we are currently awaiting the approval of a Buy America Waiver. If the waiver is approved this project will be on course and the funds will be expended by September 30, 2015.

MO-P40/ Contract #15-M3DA-04-011 Nixa Police Department E-Citation Project

This project would develop a software interface between the REJIS electronic ticketing system and the electronic state prosecutor/court system to allow electronic transmittal of traffic citations. Numerous county and municipal law enforcement agencies throughout the state of Missouri use the REJIS electronic ticketing system. The St. Louis County Police Department, Lee's Summit, and Nixa Police Departments will coordinate a model project, which will include the purchase of electronic ticketing printers, installation and supplies, as well as the development of the interface software. When fully tested and determined to be working properly, the interface software will be provided at no cost to all city/county agencies utilizing the REJIS system, thereby creating a statewide interface between REJIS and state courts/prosecutors. This electronic interface will reduce the time that it takes to route traffic citations to the prosecutor/court and increase the accuracy of the citations. The agency because of the untimeliness of the response of the Buy America Waiver, has chosen to purchase the hardware with local funds with the Highway Safety Office covering service charges. This project has not vouchered for any reimbursement yet to date although the request should be received by our office any day. It is anticipated the funds awarded to this project will be expended by September 30, 2015.

Contract #15-M3DA-04-010 Sikeston Department of Public Safety E-Citation Project

This project would develop a software interface between the Brazos Technology's Records Management System and the electronic state prosecutor/court system to allow electronic transmittal of traffic citations. Several municipal law enforcement agencies within the State of Missouri use the Brazos electronic ticketing system. The City of Cape Girardeau and Sikeston Department of Public Safety have contracted with Brazos to spearhead this project. When the system is fully implemented and tested, the interface software between Brazos will be provided at no cost to all city/county agencies utilizing the Brazos system, thereby creating a statewide interface between Brazos and state courts/prosecutors. This electronic interface will reduce the time that it takes to route traffic citations to the prosecutor/court and increase the accuracy of the citations. The Sikeston Department of Public Safety has only requested service fees and integration costs for this project. This project will be on course and the funds will be expended by September 30, 2015.

FY 2016 Budget Request**Crash System****MO-P06 LETS Software Hosting and Support**

A significant initiative for FY15 has been the upgrade of LETS to a web/browser enabled application. The current 10+ year old service platform continues to be a popular and efficient means of collecting and sharing crash report data for Missouri Law Enforcement. The changes needed to make this a web based service, simplifying local maintenance and providing additional capabilities for the 289 active Law Enforcement agencies have been approved. One significant outcome has been the identification and funding of a web enabled crash diagramming solution to be integrated into LETS. This capability will simplify the creation and retention of required diagrams and eliminate software acquisition, distribution and replacement costs in the foreseeable future. Plans are to implement this diagramming software into the current version of LETS, to obtain maximum utility and benefit, and later the planned web version of LETS. As of March 31, 2015 there are 289 local law enforcement agencies using the LETS software which accounts for 36,097 of the crash reports in Missouri. In FY15 we have developed a LETS Committee to help us access the different changes that need to be made to the system. The committee assisted us in creating a survey that has been sent to all the agencies in the state for comment. The comments have been analyzed and another meeting with the committee is forthcoming in order to finalize what the complete LETS upgrade will entail. Funds for this project will be expended by September 30, 2016.

MoDOT	LETS Software	\$ 318,305.00
-------	---------------	---------------

1. Secure federal funding in order for the MSHP to meet contract obligations with NHTSA to support the FARS. The funding will cover expenditures associated with costs such as office supplies and postage, in-state and out-of-state travel, and salary and fringe benefits for FARS analysts.
2. Secure federal funding in order for MSHP to meet our MOU obligation with MoDOT and cover the costs to complete the transition of the STARS from COOL:Gen technology to .NET.

MSHP (Highway Patrol)	Stars and Fars Support	\$ 270,479.00
-----------------------	------------------------	---------------

1. Continue administering the STARS program and timely collection and dissemination of motor vehicle crash data by improving, or at minimum maintaining, our current crash report processing levels.
2. Make sure certain law enforcement agencies are forwarding motor vehicle crash reports to the statewide repository for inclusion into the STARS by performing annual reviews of each

agency's crash report count. Also, establish a dialogue with agencies that have failed to submit crash reports/data or underreported to the STARS.

3. Enhance Missouri law enforcement officers knowledge of the STARS motor vehicle crash classification/reporting requirements by either providing training seminars within approximately 100 miles (one way) of their jurisdiction, or regional-type training sessions.
4. Make certain, within two weeks from the date of their request, statewide coroners and medical examiners are supplied with the instruments necessary to collect specimens from motor vehicle fatality crash victims for testing of alcohol and/or drugs.
5. Secure contractual technical support in order to maintain the STARS, test and support interfaces between law enforcement record management systems and STARS, resolve any unexpected malfunctions that would negatively impact the system, and develop/implement necessary system enhancements.
6. Stay abreast of local, state, and national training seminars or information forums pertaining to traffic records issues, systems, programs, practices, etc. and if deemed beneficial, permit Patrol Records Division personnel to attend.
7. Make certain a sufficient supply of Missouri Uniform Crash Report forms, Missouri Uniform Crash Report Preparation Manuals, and related items are available for dissemination to statewide law enforcement personnel.

MSHP (Highway Patrol) Statewide Traffic Accident Records System \$ 130,335.00

The TRCC will provide assistance to local agencies and vendors that currently collect crash data in the different software data bases/ systems in order to improve those databases/ systems so that complete electronic submission can be achieved. This grant will assist agencies who currently do not have a software system to capture traffic crash data they will need to be provided with potential technical assistance to bring then on line with one of the available systems, including the state's Law Enforcement Traffic System, (LETS). This project will also assist local agencies with e-submission of citations through the purchase and integration of e-citation software and hardware. It will also assist in the development of electronic alcohol influence reports (AIRs) which will allow for local departments to provide Department of Revenue (DOR) with real time alcohol offense data. This project will also provide assistance to agencies in developing a low cost means of electronically applying for search warrants.

Citation / Adjudication System

The Office of State Courts Administrator (OSCA) is requesting funding to improve the collection and management of traffic records, as well as increase the accuracy and timeliness of reporting disposition information.

Funding will be used for staff to monitor the electronic transmission of traffic related conviction data from the courts to DOR and MSHP. Monitoring will be accomplished using established reporting tools. Funding is also needed for staff to travel to courts to provide on-site assistance or training/instruction needed to increase the accuracy and timeliness of reporting.

OSCA (State Courts)	Missouri Court JIS Monitoring & Reporting	\$ 162,527.36
---------------------	---	---------------

Objective:

Produce the accounting module for the new traffic court system which will allow court clerks to be more efficient by reducing the steps to process accounting information and have the ability to dispose of traffic cases in one application . Adding the traffic module should make the new traffic court system more adopted by manual courts or courts with multiple applications. This would increase the number of courts that will report record of convictions through an automated process which should increase the percentage of cases reported in the mandated 7 day time period.

Goal:

Increase the ability of courts to report complete and accurate record of conviction data in the mandated 7 day time frame.

OSCA (State Courts)

Traffic Court Automated Report

\$ 591,500.00

May	13,405	96.49	May	13,405	96.49	May	12,101	158.97
Jun	12,636	104.75	Jun	12,543	155.81	Jun	11,262	161.09
Total	73,914	89.73		69,370	153.16		69,675	161.19

(* - Local law enforcement began submitting the revised crash reports electronically on January 1st.)

The project has experienced an increase in time for crash reports to be received by TMS. The increase in time is apparent starting in January of 2013. The increased time to TMS is caused from the introduction of the updated crash form which increased the fully compliant MMUC data elements from 26 to 36.

Measurement Method: The difference between the date of the crash and the date of the data entry for each report is determined. All differences are added and divided by the number of crash reports to obtain the average for each month. The weight of each month based on the number of reports is obtained by dividing each month's report total by the total number of reports. The weighted average for that reporting period is established by computing $(W1X1) + (W2X2) + (W3X3) + (W4X4) + (W5X5)$.

Jefferson City, MO 65102

Phone: 573-751-5419

Email: Jeremy.Hodges@modot.mo.gov

Project Description: REJIS (Regional Justice Information System in St. Louis) developed and provides a web-based traffic data management system for local law enforcement agencies throughout the State of Missouri. This software has been developed with the oversight and approval of an advisory board comprised of local agencies and funded by NHTSA 402,408, and 405c funds. Training for new users is provided at TWO dedicated sites in a classroom environment, how to videos as well as via the internet and a dedicated customer service line. The customer help desk also assists in providing customer support for software issues that may arise on a local basis. This software allows the agencies to enter crash and citation data that is stored on a dedicated server at REJIS.

The LETS software currently utilizes an X-Y coordinate mapping system to plot the locations of each crash and citation occurrence. This system is labor intensive to larger cities and requires update maintenance. MoDOT has developed a GPS based mapping system that allows local crash data to be located on MoDOT's GIS maps.

REJIS will continue to assure that all data will be acceptable to the State of Missouri's accident reporting system (STARS) for electronic filing.

Project Goal(s):

1. To continue to increase the number of law enforcement agencies submitting electronic crash reports to the Missouri State Highway Patrol as well as increasing the number of crashes being reported into the STARS system.
2. Continue to work with smaller agencies statewide to get them moved into the LETS software where possible. This will be done by contacting each targeted agency and providing them information on the LETS software system as well as the offer to provide them a copy of the diagramming software (licensing agreement currently in procurement phase).
3. Continue to work with medium sized agencies to get them moved into the LETS software where possible. This will be done by contacting each targeted agency and providing them information on the LETS software system as well as the offer to provide them a copy of the diagramming software (licensing agreement currently in procurement phase).
4. Continue to work with larger police departments statewide to provide assistance in moving to electronic reporting. This assistance may include helping them move to the LETS software.
5. Maintain an accurate active database as to the status of each Missouri law enforcement agency in the electronic submission process. This will include their current RMS system, contact information for the agency, and status of electronically submitting crash data to MSHP.

Benchmark:

As of October 1, 2006, the LETS software is being used by approximately 50 local law enforcement agencies. REJIS has developed and piloted crash report collection software for mobile laptops. A collision diagram package has also been tested by law enforcement agencies. The agencies decided that the crash zone collision reconstruction software was the easiest for law enforcement to utilize.

As of 6/1/15 the LETS software is being used by 289 agencies to report electronically to the MSHP repository.

Activity Report

<u>Report Start</u>	<u>Report End</u>	<u>Report Date</u>	<u>Provided By</u>
06-16-2007	06-15-2008	06-15-2008	

Progress	<i>The collision diagram issue has been resolved by REJIS. A protocol was developed that will "tag" the diagram and assign it to the report for electronic transfer. Testing for electronic transfer continues between REJIS and the MSHP. It is anticipated that the data from all LETS participants will be capable of electronic transfer by the end of this year.</i>
Problems	
Plans	<i>REJIS and the MSHP are conducting testing of the electronic transfer capability of the LETS software. The collision diagram issue has been resolved. The next item to be addressed will be the GPS location. This will allow MoDOT and MSHP to "land" the local crash data on GPS mapping systems for crash data review.</i>
Comments	

<u>Report Start</u> 06-16-2008	<u>Report End</u> 06-15-2009	<u>Report Date</u> 02-20-2009	<u>Provided By</u>
Progress	<i>Electronic filing of crash data from LETS users is now active. The Missouri traffic crash system (STARS) began accepting the electronic filing on January 2, 2009.</i>		
Problems	<i>None encountered</i>		
Plans	<i>Continue to increase the number of LETS users resulting in an increased number of crash reports being electronically filed.</i>		
Comments	<i>This project is complimented by the Local Crash Data Filing (MO-P22) as local agencies that are contacted and have no RMS system of wish to change are referred to this LETS software. Through the efforts of MO-P22, the results of this project will be enhanced.</i>		

<u>Report Start</u> 06-16-2010	<u>Report End</u> 06-15-2011	<u>Report Date</u> 06-22-2011	<u>Provided By</u> R Silvey
Progress	<i>One of Missouri's goals is to increase the electronic submission of crash reports to the state crash report database (STARS). The LETS software has caused the number of crash reports submitted electronically to increase. The result has decreased the number of days for non-state patrol crash reports to reach the STARS system. Prior to electronic submission capability, it took 82.08 days for crash reports to be entered into the State's database by local law enforcement. That number has decreased to 49.04 days at the end of FY 10.</i>		
Problems	<i>Missouri has revised its crash report form to include additional MMUCC codes. The new form will be implemented on January 1, 2012. The LETS software had to be updated to include the new crash report form. Work on this is in its final stages and LETS will be ready for the implementation date.</i>		

Plans	<p>A GPS location tool will be added to the LETS software in 2012. This will allow officers to point and click the crash location on a GPS map. The software will automatically fill in all location information.</p> <p>The LETS software will also provide a portal for RMS systems to extract data from the LETS database for local vehicle and persons files. This portal will be ready in 2012.</p>
Comments	None

<u>Report Start</u> 10-01-2011	<u>Report End</u> 04-18-2012	<u>Report Date</u> 04-18-2012	<u>Provided By</u> Randy Silvey
Progress	<p>The LETS software has been rewritten to include the revised Missouri crash report form both in paper format and electronic format. LETS was the only software in Missouri capable of transitioning to the new report form on January 1, 2012. A GPS Location Tool is being tested for use with the LETS software which will allow an officer to point and click the location of the crash with the location data being automatically entered onto the report. REJIS is also testing a data portal that will allow other records management systems access to their agency's crash data stored in LETS. Both the GPS Location Tool and the Portal will be available by the end of April, 2012. As of March 1, 2012 there are 102 local law enforcement agencies using the LETS software which accounts for 35,000 of the crash reports in Missouri.</p>		
Problems	None reported.		
Plans	Continue soliciting non-LETS agencies to use the software for electronic reporting to the STARS system. Secondly, to host a statewide workshop previewing the software.

<u>Report Start</u> 06-16-2011	<u>Report End</u> 06-15-2012	<u>Report Date</u> 06-16-2014	<u>Provided By</u> Jeremy Hodges
Progress	<p>One of Missouri's goals is to increase the electronic submission of crash reports to the state crash report database (STARS). The LETS software has caused the number of crash reports submitted electronically to increase by approximately 37,335 annually. The result has not decreased the number of days for non-state patrol crash reports to reach the STARS system because of the already large backlog from implementing the new crash report.</p>		
Problems	<p>Missouri has revised its crash report form to include additional MMUCC codes. The new form will be implemented on January 1, 2012. The implementation was well received by law enforcement agencies. The LETS software had to be updated to include the new crash report form. The LETS software was ready to go with the new crash form on January 1, 2012.</p>		

Plans	<p>A GPS location tool was added to the LETS software in 2012. This tool has allowed officers to point and click the crash location on a GPS map and land the crashes with a uniform mapping system. The software also automatically fills in all location information to prevent data entry errors.</p> <p>The LETS software will also provide a portal for RMS systems to extract data from the LETS database for local vehicle and persons files. This portal will be ready in 2012.</p>
Comments	

<u>Report Start</u> 10-1-2014	<u>Report End</u> 09-30-2015	<u>Report Date</u> 06-08-2015	<u>Provided By</u> Jeremy Hodges
Progress	<p>One of Missouri's goals is to increase the electronic submission of crash reports to the state crash report database (STARS). The LETS software has caused the number of crash reports submitted electronically to increase by approximately 36,097 annually. The result has not decreased the number of days for non-state patrol crash reports to reach the STARS system because of the already large backlog from implementing the new crash report.</p>		
Problems	<p>Missouri has revised its crash report form to include additional MMUCC codes. The new form will be implemented on January 1, 2012. The implementation was well received by law enforcement agencies. The LETS software had to be updated to include the new crash report form. The LETS software was ready to go with the new crash form on January 1, 2012. Currently LETS does not have an integrated crash scene diagramming software package which requires our office to purchase software and manually install the software on each agency computer. LETS is also only available as a program and not as a web based solution.</p>		

Plans	<i>A GPS location tool was added to the LETS software in 2012. This tool has allowed officers to point and click the crash location on a GPS map and land the crashes with a uniform mapping system. The software also automatically fills in all location information to prevent data entry errors.</i>
	<i>The LETS software will also provide a portal for RMS systems to extract data from the LETS database for local vehicle and persons files. This portal has been available since 2012.</i>
	<i>We are currently integrating a crash scene diagram solution that would be available free of charge to all LETS users. We are also improving the LETS platform to a web based version that would allow access to any officer on any computer.</i>

Email: *Jeremy.Hodges@modot.mo.gov*

Project Description: Based upon the identified problem of getting data into a format to allow for full electronic transfer, a need exists to work directly with the local law enforcement agencies to make adjustments that will allow this to happen. Specifically, each reporting agency will need to have an assessment completed to determine what actions are needed to allow for direct input into the STARS system. This means that based upon the identified requirements by the Missouri State Highway Patrol's STARS system, assistance will need to be provided to local agencies that currently collect crash data in the different software data bases. Also for those agencies who currently do not have a software system to capture traffic crash data they will need to be provided with potential technical assistance to bring then on line with one of the available systems, including the state's Law Enforcement Traffic System, (LETS). This project will provide for a liaison to work directly with the local law enforcement agencies to allow them to up-grade/up-date their current local systems to transfer directly with the STARS system of the Missouri State Highway Patrol. This project will also assist local agencies with e-submission of citations through the purchase and integration of e-citation software and hardware. It will also assist in the development of electronic alcohol influence reports (AIRs) which will allow for local departments to provide Department of Revenue (DOR) with real time alcohol offense data. This project will also provide assist to agencies in developing a low cost means of electronically applying for search warrants.

Milestones

<i>Milestone Description</i>	<i>Target Date</i>	<i>Actual Date</i>	<i>Status</i>

Provide assistance to local agencies for E-Crash			

<i>Report Start</i>	<i>Report End</i>	<i>Report Date</i>	<i>Provided By</i>
10-1-2014	09-30-2015	06-08-2015	Jeremy Hodges
<i>Progress</i>	Missouri has contracted with Information Technologies Inc. to build a interface to STARS. We have also contracted with REJIS to build an interface from their mobile ticketing module to JIS. We are also currently working with various agencies around the state to implement e-citation and e-crash systems.		
<i>Problems</i>	Missouri does not have a mandatory statewide e-crash to e-citation system for local agencies to utilize.		
<i>Plans</i>	Complete the interface between Information Technologies Inc. and STARS which will add an additional 108 agencies submitting electronic crash reports to STARS. Complete the E-citation interface with JIS which will allow an additional 60,000 citations to be submitted electronically to our court system.

This project is focused on the law enforcement agencies that currently do not have a software system to capture traffic crash data and submit to STARS. A liaison is being utilized to recruit agencies to adopt the Law Enforcement Traffic System, (LETS). The LETS system is an up-grade to a lot of current local systems and allows the agency to transfer crash reports directly to STARS.

06-16-2007	06-15-2008	06-15-2008
Progress	<i>During this project year there was direct contact with 350 local law enforcement agencies. There have been a total of 27 agencies that moved to the LETS software.</i>	
Problems		
Plans	<i>This is a new project that has been developed to identify those agencies not utilizing the LETS software which will soon allow electronic transfer of crash data. Funding for this project will allow Missouri to build protocols for various software suites that enable non-LETS users to file crash data electronically.</i>	
Comments		

<u>Report Start</u> 06-16-2008	<u>Report End</u> 06-15-2009	<u>Report Date</u> 02-18-2009	<u>Provided By</u> Randy Silvey
Progress	<p><i>By December 31, 2008 the contractor had obtained a listing of local agencies not using the LETS software. Contact is being made with agencies to determine what RMS system is being used to collect crash data or, if no RMS system is used, to offer the LETS software to them.</i></p> <p><i>In January, 2009 a meeting was conducted with the Kansas City, Missouri Police Department. A new RMS had recently been installed and the agency has the capability to create extraction files as needed. The Missouri State Highway Patrol had previously provided the KCPD with a listing of the edit checks required for electronic transfer. The determination was that KCPD will be able to create an extraction file that will in turn electronically transfer their crash data to the STARS system. The target date for completion of the extraction files and begins transfer of data has been set for the third quarter of 2009. Hardware issues (MDT units for on-scene data collection) will be addressed through Section 408 funding.</i></p> <p><i>A similar meeting was held in January with the Platte County Sheriff's Department and the Lee's Summit Police Department. Both agencies use the same RMS system and will be capable of creating a shared extraction protocol. A target date for implementation has not been set but will likely occur by the end of the second quarter.</i></p> <p><i>Talks are underway with the ITI software company to utilize the Jackson County Sheriff's Department as a pilot site for creation of an extraction protocol within the ITI RMS software. Section 408 funding will be utilized for this project. If successful, this protocol can then be shared with approximately 90 other local agencies in Missouri that use the same ITI RMS software.</i></p>		
Problems			

Plans	<p>1) Continue extraction protocol development with the ITI company due to the large impact it will have on electronic transfer of crash data in Missouri.</p> <p>2) Continue monitoring the extraction file development with Kansas City, Platte County, and Lee's Summit.</p> <p>3) Continue to contact agencies not having an RMS system and encourage usage of the LETS software.</p>
Comments	<p>This project is one of three projects that are designed to implement the electronic transfer of crash data to the STARS system. The other two are the LETS software project and the Missouri State Patrol Auto-Entry project.</p> <p>With the implementation of the Kansas City PD extraction protocol, Missouri will see an increase of at least 10% of crash data being electronically filed overall.</p>

<u>Report Start</u>	<u>Report End</u>	<u>Report Date</u>	<u>Provided By</u>
06-16-2010	06-15-2011	06-23-2011	
Progress	The contractor has moved approximately 55 law enforcement agencies to the LETS software. Of these agencies about 30 are electronically transferring the crash data to the State's database. He is also working with the law enforcement agencies to determine if their RMS system provider will be revising their crash report form to comply with the new state form to be implemented on January 1, 2012.		
Problems	None		
Plans	Continued contact with the LE agencies concerning their RMS systems being compliant with the new crash report form. He will also continue to guide agencies towards the LETS software or will assist in developing other means of electronically transferring crash data to the State's database.		
Comments	It should be noted that the activities of this project have directly affected the number of days it takes for crash data to be entered into the State's database. Electronic transfer of crash data to the State's database is a high priority of the Highway Safety Office. This project is an important part of that priority.

Phone: (573) 751-3012

Email: russ.dunwiddie@mshp.dps.mo.gov

Project Description: This project will entail personnel from the Highway Patrol, Traffic Records Division, processing and encoding information from approximately 140,000 - 160,000 motor vehicle crash reports into the STARS. The Patrol will also make certain the web-based STARS statistical reports and maps noted earlier are operational and accessible. Other various types of statistical ad hoc reports will be produced and distributed upon request.

The Traffic Records Division will combat the processing backlog of motor vehicle crash reports by Patrol personnel working overtime hours. Employees engaged in the overtime projects will scan and pre-code source documents, and/or encode information into the STARS. The overtime compensation will be at a rate equivalent to time and one-half their regular salary plus fringe benefits. During the past twenty years, these projects have been

instrumental in both preventing expansion of and decreasing the backlog.

The Traffic Records Division will mail a reminder to Missouri law enforcement agencies authorized by statute to investigate motor vehicle crashes that 2014 motor vehicle crash reports must be submitted to the statewide repository by January 30, 2015. Once a majority of submitted 2014 crash reports have been processed, division personnel will review statistics on the number of reports encoded into the STARS for each agency and compare the 2014 total to the previous three-year average. Those agencies that failed to submit crash reports, or experienced a significant reduction in crash reporting, will be contacted via correspondence and/or telephone. The Traffic Records Division will also review agencies January - June 2015 submission of crash reports and follow-up on any identified discrepancies.

The Traffic Records Division will invite local law enforcement personnel authorized to investigate motor vehicle crashes, review crash reports, or provide training on crash reporting to attend a STARS accident report/classification training class conducted by Highway Patrol personnel. Efforts will be made to either schedule the sessions at each Highway Patrol troop headquarters (or if not available at the respective MoDOT district headquarters), or provide regional-type training sessions at five to seven selected locations within the state. A web-based student registration page will be posted on the Patrol's official Internet home page. Prior to each session, Traffic Records Division personnel will identify the number of students registered and weigh the costs of providing the session in comparison to the number of students. If a session is not cost effective and thus canceled, steps will be taken to inform registered students of training sessions at other locations. For instance, it would not be cost effective to provide STARS training to two registered students at Troop H, St. Joseph. As an alternative to the canceled session at St. Joseph, these students would be invited to attend STARS training at Troop A, Lee's Summit.

The demand for supplies used by Missouri coroners and medical examiners to obtain specimens from motor vehicle fatality crash victims will be met by purchasing approximately 950 kits consisting of a cardboard container, vial, syringe, tube, etc. These kits will be disseminated by the Traffic Records Division's FARS analysts.

In an effort to remedy malfunctions, test and support interfaces, or develop and implement enhancements to either the pre-2012 or current STARS or web-based statistical reports/maps noted above, the Highway Patrol's Information Systems Division and Traffic Records Division will secure contractual technical support.

In order to stay up-to-date on the latest trends in traffic records technology, programs, practices, etc., a representative(s) from the Traffic Records Division will attend the annual

International Forum on Traffic Records and Highway Information Systems, as well as other seminars or meetings either in-state or out-of-state related to these topics.

In order to make certain an adequate supply of the Missouri Uniform Crash Report form, Preparation Manual, and related reporting materials are available, the Highway Patrol's print shop will print approximately 50,000 to 100,000 sets of crash report forms and 200 to 400 preparation manuals.

Milestones

<i>Milestone Description</i>	<i>Target Date</i>	<i>Actual Date</i>	<i>Status</i>
Completion of the committee review of the 2008 MMUCC and recommended revisions to the MUAR.	08-31-2009	07-22-2009	Completed
Develop a prototype of the revised MUAR based on the committee MMUCC review and recommendations.	10-30-2009	11-18-2009	Completed
Complete revisions to the MUAR Preparation Manual based on MMUCC review and committee recommendations.	03-31-2010	04-29-2010	Completed
Committee review and discussion of the prototype MUAR and MUAR Preparation Manual.	05-31-2010	05-19-2010	Completed
Law Enforcement Testing of the prototype MUAR and MUAR Preparation Manual.	06-30-2010	07-30-2010	Completed
Develop the STARS technical and system specifications document.	07-30-2010	12-20-2010	Completed
Disseminate the STARS technical and system specifications document. Vendors and computer consultants to begin system development / programming of the STARS as well as local law enforcement crash reporting software.	02-28-2011	03-01-2011	Completed
Begin printing of the MUAR, MUAR Preparation Manual, and MUAR Field Investigation Notebook	02-28-2011	04-01-2011	Completed
First statewide training circuit of law enforcement personnel on the newly revised MUAR and MUAR Preparation Manual	06-30-2011	07-13-2011	Completed

System testing of the revised STARS and local law enforcement crash report software / interfaces and if necessary update and redistribute the STARS technical and system specifications document based on system testing outcome.	07-29-2011	09-06-2011	Completed
Final testing of the revised STARS and local law enforcement agency software / interfaces.	10-31-2011	11-29-2011	Completed
Second statewide training circuit of law enforcement personnel on the newly revised MUAR and MUAR Preparation Manual.	12-30-2011	12-21-2011	Completed
Implementation of the revised MUAR, MUAR Preparation Manual, and STARS	01-01-2012	01-01-2012	Completed
Overtime to address a backlog of crash reports created by implementation of a new crash report form.	07-31-2012	07-28-2012	Completed
Ongoing support to existing interfaces that support electronic submission of crash data to STARS.	09-30-2012		Completed
Complete "bug fixes" and enhancements to the web-enabled STARS.	09-30-2012		On Schedule
Continue administering the STARS program and timely collection and dissemination of motor vehicle crash data by improving, or at minimum maintaining, our current crash report processing levels.	10/1/2014		In Progress
Make sure certain law enforcement agencies are forwarding motor vehicle crash reports to the statewide repository for inclusion into the STARS by performing annual reviews of each agency's crash report count. Also, establish a dialogue with agencies that have failed to submit crash reports/data or underreported to the STARS.	10/1/2014		In Progress
Enhance Missouri law enforcement officers knowledge of the STARS motor vehicle crash classification/reporting requirements by either providing training seminars within approximately 100 miles (one way) of their jurisdiction, or regional-type training sessions.	10/1/2014		In Progress

Make certain, within two weeks from the date of their request, statewide coroners and medical examiners are supplied with the instruments necessary to collect specimens from motor vehicle fatality crash victims for testing of alcohol and/or drugs.	10/1/2014	In Progress
Secure contractual technical support in order to maintain the STARS, test and support interfaces between law enforcement record management systems and STARS, resolve any unexpected malfunctions that would negatively impact the system, and develop/implement necessary system enhancements.	10/1/2014	In Progress
Stay abreast of local, state, and national training seminars or information forums pertaining to traffic records issues, systems, programs, practices, etc. and if deemed beneficial, permit Patrol Records Division personnel to attend.	10/1/2014	In Progress
Make certain a sufficient supply of Missouri Uniform Crash Report forms, Missouri Uniform Crash Report Preparation Manuals, and related items are available for dissemination to statewide law enforcement personnel.	10/1/2014	In Progress

Project Description: MSHP will continue to glean and disseminate comprehensive motor vehicle traffic fatality data to NHTSA's, FARS, as outlined in the cooperative agreement between the MSHP and NHTSA. MSHP will also contract with computer consultants to complete the rewrite/transition of the STARS from a COOL:Gen framework to .NET. This includes the STARS data entry screens utilized by the MSHP and crash location landing screens.

Milestones

MAP-21 SECTION 405c
INTERIM PROGRESS REPORTING IN FY 2016State: Missouri Report Date: 5/24/2015 Submitted by: Jeremy Hodges

System to be Impacted	<u>X</u> CRASH ___ DRIVER ___ VEHICLE ___ ROADWAY ___ CITATION/ADJUDICATION ___ EMS/INJURY
Performance Area(s) to be Impacted	<u>X</u> ACCURACY ___ TIMELINESS <u>X</u> COMPLETENESS ___ ACCESSIBILITY ___ UNIFORMITY <u>X</u> INTEGRATION
Performance Measure used to track Improvement(s)	<p>Narrative Description of the Measure</p> <p>The number of agencies reporting error free crash reports electronically to the highway patrol's crash repository via LETS.</p> <p>The purpose of this project is to provide a reliable electronic crash reporting system that provides a high level of accuracy, integration, and accessibility to the crash reporting system for all law enforcement agencies. To provide training on as needed basis for Missouri Law Enforcement to ensure the system is utilized in a consistent manner. The LETS system will also allow law enforcement agencies to integrate the crash reporting system with the Department of Revenue (DOR) in order to accurately identify the vehicle and driver data in the crash report by using DOR's database.</p> <p>The focus of this project is to assist local law enforcement agencies in the use of the Law Enforcement Traffic Software (LETS). Based upon the identified problem of getting data into a format that allows for full electronic transfer, a need exists to work directly with the local law enforcement agencies, software providers and the State Traffic Accident Reporting System (STARS) staff to identify current systems and the potential for those systems to be modified for electronic transfer of crash report data. The edit checks that are incorporated in the LETS program are designed to submit crash reports to STARS in an error free format. This project will also provide support for LETS enhancements and user support.</p> <p>In order for MoDOT to receive accurate and complete data the LETS application has been extremely valuable. This project involved soliciting law enforcement agency support, an edit check system that streamlines accurate submission of crash reports, integration with DOR to ensure vehicle and driver data are accurate. The chart below indicates the number of agencies using LETS to electronically submit crash reports, the total number of crash reports submitted by LETS yearly, and the number of reports returned due to errors from Missouri Highway Patrol (MSHP).</p>

	<p>LETSS Timeline Submission Errors</p> <p>4/01/12 to 3/31/13 226</p> <p>4/01/13 to 3/31/14 117</p> <p>4/01/14 to 3/31/2015 109</p>	<p>Total Agencies signed up to use LETSS</p> <p>246</p> <p>267</p> <p>289</p>	<p>Total reports submitted Electronically to STARS through LETSS</p> <p>31,611</p> <p>37,335</p> <p>36,097</p>
Is project included in the Strategic Plan and/or in TRIPRS?	<p>Yes</p> <p>Law Enforcement Traffic Software (L.E.T.S.) (TRIPRS MO-P06) / Contract # Strategic Plan Page 41</p>		
Is this a new project? Or was it the same measure used to show progress in FY145	<p>New Measure - No</p> <p>Same Measure as FY15 - Yes</p> <p>If yes, is the State using the same data set, with the same time period to demonstrate progress? No</p>		
Improvement(s) Achieved or Anticipated	<p>Narrative of the Improvement(s)</p> <p>For FY15 on March 31, 2014, LETS electronically submitted a total of 37,335 crash reports with 117 errors. As of March 31, 2015 LETS electronically submitted a total of 36,097 crash reports with 109 errors.</p>		
Specification of how the Measure is calculated / estimated	<p>Narrative Description of Calculation / Estimation Method</p> <p>The total of agencies signed up to use the LETS program include all agencies that are active in the current LETS system. The total number of electronic crash reports are a sum off all reports submitted to LETS and then transferred to the Missouri State Highway Patrol's (MSHP) crash report repository. The number of LETS submission errors is provided by the Missouri State Highway Patrol.</p>		

Date and Baseline Value for the Measure (A contiguous, 12 month performance period starting no earlier than April 1, 2013)	4/01/2013 - 3/31/2014 – 37,335 crash reports
Date and Current Value for the Measure (An identical contiguous, 12 month baseline period starting no earlier than April 1, 2012 (i.e., the prior year).	4/01/2014 - 3/31/2015 – 36,097 crash reports

Crash System

2011 Traffic Records Assessment Recommendations

- I. Re-evaluate the decision to only accept the new version of the MUCR SHP-2Q crash form beginning January 1, 2012 to ensure partner agencies are prepared for the change and that MSHP and the traffic records community understands the consequences of the impending deadline.
- II. Conduct an outreach effort to identify RMS vendors operating in Missouri and convene a meeting to provide information for electronic transfer of crash reports from their crash collection software.
- III. Strengthen efforts to encourage local agencies to submit electronically as soon as possible and provide operational and funding assistance.
- IV. Encourage local law enforcement agencies to adopt the REJIS LETS software solution for electronic capture and submission of crash reports to STARS/TMS.
- V. Investigate ways to have local agencies comply with the MSHP procedure of teletype notification to the FARS unit of MSHP upon the occurrence of a fatal crash in their jurisdiction. If such a procedure is not possible to be adopted, identify options for their consideration in order to comply and cite the criticality of the notification in support of the request.
- VI. Continue efforts with the TRS community to integrate the crash file with other TRS components.
- VII. Continue efforts to automate search and data retrieval from the driver and vehicle files for auto-population of crash and citation forms.
- VIII. Engage and leverage the STARS Committee to assist in outreach to the local law enforcement community to increase the number of agencies electronically reporting to STARS/TMS.

Vehicle System

< No Projects Related to Vehicle System >

Vehicle System

2011 Traffic Records Assessment Recommendations

- I. Consider implementing an AAMVA standard barcode on registration documents to promote complete and accurate data transfer to other traffic records systems.
- II. Consider implementing a customer centric registration and titling system including the DL number and full legal name of the owner to allow linkage of driver and vehicle information.
- III. Participate actively in the Traffic Records Coordinating Committee as a participant and a stakeholder.

Driver System

< No Projects Related to Driver System >

Driver System

2011 Traffic Records Assessment Recommendations

- I. Consider issuing a distinctive driver license to drivers required to operate Ignition Interlock equipped vehicles.
- II. Encourage broader participation by courts to report disposition information electronically.
- III. Consider reporting crash information on the driver histories of all drivers involved in a crash.
- IV. Consider including serious violation conviction or adverse information from previous states for newly licensed non-CDL drivers from other states.
- V. Continue to actively participate in the Traffic Records Coordinating Committee as a participant and a stakeholder.

Roadway System

< No Projects Related to Roadway System >

Roadway System

2011 Traffic Records Assessment Recommendation

- I. Develop a strategy to address enhancements and/or modifications to the TMS for the use of the analytic software tools recommended in the Highway Safety Manual, in particular Safety Analyst. This strategy should be presented to the TRCC for inclusion in the Strategic Plan for State Traffic Safety Information System Improvement.
- II. Provide access to the TMS to officials of Metropolitan Planning Organizations and Regional Planning Commissions for use in program planning and project development for the Transportation Improvement Plan (TIP).
- III. Accelerate current efforts to include more roadway features data for local roads in the TMS.

*Project Summary Report**Missouri*

Project Label - Name: Project # MO-P35 / Contract #15-M3DA-04-005 - JIS Monitoring and Municipal Reporting

Priority: Medium

Revision Date: 23-JUN-2011

Last Updated: 10-JUN-2015

Status: Active

Lead Agency: Office of State Courts Administrator

Partners: Missouri courts, Department of Revenue, Missouri State Highway Patrol and Missouri Office of Prosecutorial Services

Website:

Project Director

Name: Mr. Doug Buschjost

Agency: OSCA, Project Manager

Address: 2112 Industrial Drive

Jefferson City, MO 65109

Phone: (573) 751-4377

Email: doug.buschjost@courts.mo.gov

Project Description: The Office of State Courts Administrator (OSCA) is requesting funding to improve the collection and management of traffic records, as well as increase the accuracy and timeliness of reporting disposition information by monitoring the electronic transmission of traffic-related conviction data from the courts to DOR and MSHP to determine if on-site assistance or training/instruction is required to increase the accuracy and timeliness of reporting.

Municipal courts that are not automated or on an automated system that does not submit data directly to the Department of Revenue are struggling with meeting the seven day requirement. Providing an interface and web-based reporting form would assist the municipal courts in ensuring the traffic data is reported timely.

Milestones

<i>Milestone Description</i>	<i>Target Date</i>	<i>Actual Date</i>	<i>Status</i>
------------------------------	--------------------	--------------------	---------------

At least 70% of the courts will be reporting within 7 days at a 90%-100% success rate	09-30-2013	On Schedule
Develop test environments in order to sufficiently submit and analyze the modified electronic traffic reporting data elements.	02/28/2014	Complete
Deploy the electronic traffic reporting enhancements by September 30, 2014	06/30/2014	Complete
At least 73% of all courts will be reporting within 7 days at 90%-100% success rate. Melissa this is up 3% from last time. With the implementation of ROC in Show Me Courts, this number should increase because more manual courts will report electronically.		In Progress
Contact all approved municipal vendors not submitting ROC's to DOR using encrypted transmission. Measurement - provide a list of the outcome of our contact with each vendor - are they submitting the encrypted data or not (with reasons why or why not).		In Progress

Activity Report

<u>Report Start</u>	<u>Report End</u>	<u>Report Date</u>	<u>Provided By</u>
10-01-2012	05-31-2014	06-16-2014	Melissa Kampeter

1) Deploy the electronic traffic reporting enhancements by September 30, 2014 (JIS Conversion)

Progress: Because the vendor has to convert a system they're not familiar with, it will until the end of 2015 to complete the project. The complexity of the converted forms is taking the vendor longer than expected to complete the conversation. PAQ 1 (Case Management and Accounting)

Delivery 1 17 forms

Delivery 2 18 forms

Delivery 3 16 forms

Total 51 forms

All Use cases for PAQ 1 are completed and delivered to the vendor. Twenty-three converted forms have been delivered to OSCA for testing (17 from Delivery 1 plus 6 from Delivery 2). None have passed testing at this time. Delivery Dates for PAQ 1 Delivery 2.2 is August 8, 2014 . Delivery Dates for PAQ 1 Delivery 2.3 is October 17, 2014. No Delivery Dates yet for PAQ 1 Delivery 3.

Progress

PAQ 2 (Case Management and Accounting)

Delivery 1-7 52 forms

Forty-six use cases for PAQ 2 are completed and waiting to be delivered to the vendor when all of them are completed.

2) Developed test environment in order to sufficiently submit and analyze traffic reporting data elements.

Progress: Because of the order of delivery of the forms from the vendor, staff has to test forms multiple time to ensure they're working as expected.

3) At least 70% of the courts will be reporting within 7 days at a 90%-100% success rate

Progress: In March, 2104, 490 of the 619 courts (115 state courts and 504 municipal courts) reported 90% or higher success rate which equates to 80%.

Problems	<p>1) Deploy the electronic traffic reporting enhancements by September 30, 2014 (JIS Conversion) <i>Problem: Because the vendor has to convert a system they're not familiar with, it will until the end of 2015 to complete the project. The complexity of the converted forms is taking the vendor longer than expected to complete the conversation.</i></p> <p>2) Developed test environment in order to sufficiently submit and analyze traffic reporting data elements. <i>Problem: Because of the order of delivery of the forms from the vendor, staff has to test forms multiple time to ensure they're working as expected.</i></p> <p>3) At least 70% of the courts will be reporting within 7 days at a 90%-100% success rate <i>Problem: A large number of courts reporting record of conviction are municipal divisions, which rely on the postal service to submit their information to the Department of Revenue. By using the postal service, there are delays in submitting the record of convictions within 7 days, as required by statute.</i></p>
Plans	<p>1) Deploy the electronic traffic reporting enhancements by September 30, 2014 (JIS Conversion) <i>Plans: Work with the vendor and other criminal justice agencies (Missouri State Highway Patrol and Missouri Department of Revenue) to ensure that the conversion will transmit record of conviction data correctly and accurately.</i></p> <p>2) Developed test environment in order to sufficiently submit and analyze traffic reporting data elements. <i>Plans: Test the forms as delivered by the vendor to ensure that the functionality that transmit data to the criminal justice agencies (Missouri State Highway Patrol and Department of Revenue) works correctly.</i></p> <p>3) At least 70% of the courts will be reporting within 7 days at a 90%-100% success rate <i>Plans: Continue to work with all courts to ensure that records of convictions are reported timely. Staff will assist courts with working on problems located on their issues log and provide training for courts when their conviction reporting is below 90%.</i></p>
Comments	

<u>Report Start</u>	<u>Report End</u>	<u>Report Date</u>	<u>Provided By</u>
---------------------	-------------------	--------------------	--------------------

10-01-2014	09-30-2015	06-10-2015	Melissa Kampeter
	<p>In September 2013, all Missouri courts (619) reported record of convictions, within the established time period of seven days, including CDL as follows:</p> <p>265 courts reported convictions 100%</p> <p>111 courts report convictions between 90-99% of the time</p>		
	<p>Progress In September 2014, the numbers changes as follows:</p> <p>204 courts reported convictions 100%</p> <p>108 courts report convictions between 90-99% of the time</p> <p>The numbers are slightly lower because courts were aggressively working to keep their records of convictions current while working on older convictions on their issues log.</p> <p>Courts receive their record of convictions monthly which gives the courts an opportunity to identify areas that need improvement. Office of State Courts Administrator's (OSCA) staff also monitor those numbers and contact courts with percentages below 90% to provide training/assistance.</p>		
Progress	<p>Using the electronic system, JIS, allows a court to electronically submit Commercial Driver's License (CDL) convictions to the Department of Revenue in the time frames mandated by federal and state law. Reports indicated that many of the courts using JIS are reporting convictions in the mandated time frames. The result does vary month by month. Some of the common reasons that a court may not meet the time frame are:</p> <p>Problems</p> <ul style="list-style-type: none"> -Staff turnover which causes a backlog of cases and it takes time to train a new staff member -Data entry errors which requires additional days to research and make the correction -Clean up old cases-court discover that cases that were not transmitted when checking their issues log 		

Problems	Using the electronic system, JIS, allows a court to electronically submit Commercial Driver's License (CDL) convictions to the Department of Revenue in the timeframes mandated by federal and state law. Reports indicated that many of the courts using JIS are reporting convictions in the mandated timeframes. The result does vary month by month. Some of the common reasons that a court may not meet the timeframe are:
	<ul style="list-style-type: none">▪ Staff turnover which causes a backlog of cases and it takes time to train a new staff member▪ Data entry errors which requires additional days to research and make the correction▪ Clean up of old cases – court discover that cases were not transmitted when checking their issues log
Plans	Continue to work with JIS vendors with electronically submitting to JIS. We will also continue to implement new courts onto JIS and train the appropriate court staff to ensure data quality.

*Project Summary Report**Missouri****Project Label - Name: MO-P37 - St. Louis County Electronic Ticketing******Priority:*** Low***Revision Date:*** 01-OCT-2012***Last Updated:*** 10-JUNE-2015***Status:*** Start Up***Lead Agency:*** St. Louis County Police Department***Partners:*** OSCA and DOR***Website:******Project Director***Name: *Mr. Scott Roach*Agency: *St. Louis County Police Department,*Address: *7900 Forsyth Blvd.**Clayton, MO 63105*Phone: *314-576-1055*Email: *Jeremy.Hodges@modot.mo.gov*

Project Description: A partnership would be developed between stakeholders (MODOT, St. Louis County PD, REJIS, OSCA, St. Louis County Prosecuting Attorney's office, and any other identified parties). Hardware, software and other supplies necessary for an electronic ticketing model project would be purchased. REJIS will develop an interface between any applicable systems that the state court, prosecuting attorney, and Fine Collection Center currently operate. The interface would be fully tested and evaluated by the St. Louis County Police Department and REJIS. Once the stakeholders are satisfied that the interface works and performs as required, it would be rolled out statewide to all REJIS users, free of charge. We are currently awaiting the approval of a Memo of Understanding between REJIS and OSCA as well as a response on a Buy America Waiver.

Milestones

<i>Milestone Description</i>	<i>Target Date</i>	<i>Actual Date</i>	<i>Status</i>
Implement electronic ticketing for traffic officers in order to: 1. Reduce error rate on tickets 2. Reduce clerical entry time 3. Reduce time delay between issuance and receipt in state court system	09-30-2015		Behind Schedule

Problems	None reported		
Plans	Continue to pursue e-citation data is collected from the officer to the state court.		
Comments			

<u>Report Start</u> 10-01-2013	<u>Report End</u> 06-16-2014	<u>Report Date</u> 06-16-2014	<u>Provided By</u> Jeremy Hodges
--	--	---	--

Progress	<i>Currently Lee's Summit has begun to utilize e-citation devices with a few members of their traffic unit. Once these officers are trained they are going to train the entire traffic unit on the use of the e-citation devices.</i>
Problems	<i>The interface from the police department's records management system and the courts has been slow to get developed. The courts have transferred over to JIS although the interface from REJIS mobile ticketing to JIS is still in the procurement process. The purchase of mobile data terminals (Toughbook tablets) has been put on hold until the Buy America Waiver is approved in DC.</i>
Plans	<i>The agency plans to continue to utilize 405c funds to acquire hardware and software to ensure that the interface between REJIS and JIS is complete and the entire traffic unit is using e-citation devices.</i>
Comments	

<u>Report Start</u> 10-01-2014	<u>Report End</u> 09-30-2015	<u>Report Date</u> 06-09-2015	<u>Provided By</u> Jeremy Hodges
Progress	Currently Lee's Summit has fully implemented e-citation with their patrol division excluding the motorcade officers. We are currently awaiting a response to our Buy America Waiver which would provide the equipment necessary for the motorcade officers to do e-citation. REJIS has developed the interface between their e-citation module and JIS and we are awaiting approval of the Memo of Understanding submitted to Office of State Courts to activate the interface.		
Problems	The untimeliness in receiving a response in regards to the Buy America Waiver has slowed the implementation of e-citation department wide. Also the Memo of Understanding has held up the project waiting on chief council's approval.		
Plans	The agency plans to continue to utilize 405c funds to acquire hardware and software to ensure that the interface between REJIS and JIS is complete and the entire traffic unit is using e-citation devices and submit their data directly to JIS.

Email: dhickey@cityofcapegirardeau.org

Project Description: With a standard paper citation, the process of issuing a citation by the officer, transfer to police records division, and then to the court system, is currently a long and sometimes drawn out process. Officers are also spending a large amount of time on the side of the road issuing a citation. Once the citation is issued, the process can then take five to seven days to reach the court clerks for the citation to be processed and entered in the court docket. Data entry is then required for the citation to be entered into the state system. By implementing an all-digital electronic ticket platform, the time that the officer has to spend on the side of the road will be decreased, the time that it takes the citation to be transferred to the court system will be decreased and the amount of data entry required by police and court clerk will also be reduced drastically.

Performance Measure used to track Improvement(s)	<p>Narrative Description of the Measure</p> <p>The results of Mobile Ticketing project involving Lee's Summit Police Department (LSPD) and REJIS.</p> <p>The purpose of this project is to provide a reliable electronic mobile ticketing system that provides a high level of accuracy, integration, and accessibility to the Lee's Summit Municipal Court which will provide this municipal data electronically to the Missouri Office of State Courts (OSCA). To provide training on an as needed basis for Lee's Summit Police Department to ensure the system is utilized in a consistent manner. The mobile ticketing system will also allow LSPD to integrate the ticket reporting system with the Lee's Summit Municipal Court and their RMS system, and the Missouri Office of State Court's Justice Information System (JIS), in order to accurately identify the vehicle and driver data in the electronic tickets by using Department of Revenue's (DOR) database.</p> <p>This system also allows the probable cause statements on the tickets to be uniform. The verbiage is in the system exactly how the prosecutor would like it to read. All tickets are legible and the court dates are also entered for the officers, so there are fewer errors there as well.</p> <p>LSPD began the mobile ticketing project with the 8 traffic officers in February 2014 and they trained the other officers. In August, LSPD also began using mobile ticketing for summons on their General Order Complaints, i.e. assault, trespass, etc.</p> <p>In order for the Lee's Summit Courts to receive accurate and complete data the mobile ticketing application has been extremely valuable. This project involved soliciting REJIS support, Lee's Summit Municipal Court, and the Prosecutor's Office.</p> <p>*Please note the supporting documentation for this measure is available upon request. It was not included in the Strategic Plan because it is 300+ pages in length.</p> <p>The chart below indicates the number of citations and warnings issued:</p> <table border="1"> <thead> <tr> <th>Timeline</th> <th>Paper Citations</th> <th>Paper Warnings</th> <th>Electronic Citations</th> <th>Electronic Warnings</th> <th>Paper Voids</th> <th>E-Voids</th> </tr> </thead> <tbody> <tr> <td>04/01/13 to 3/31/14</td> <td>5,972</td> <td>2,901</td> <td>429</td> <td>153</td> <td>769</td> <td>13</td> </tr> <tr> <td>04/01/14 to 03/31/15</td> <td>863</td> <td>276</td> <td>10,375</td> <td>6,489</td> <td>2</td> <td>219</td> </tr> </tbody> </table>	Timeline	Paper Citations	Paper Warnings	Electronic Citations	Electronic Warnings	Paper Voids	E-Voids	04/01/13 to 3/31/14	5,972	2,901	429	153	769	13	04/01/14 to 03/31/15	863	276	10,375	6,489	2	219

Citation / Adjudication System

2011 Traffic Records Assessment Recommendations

- I. Encourage the adoption of JIS by those courts now using non-JIS case management systems which is essential to the creation of a comprehensive, statewide citation data repository.
- II. Continue development of canned statistical reports in JIS.
- III. Promote the expanded use of the LETS and FATPOT citation modules.
- IV. Encourage the electronic transfer of traffic citation information between LEAs, the Prosecutor's Office, and the Courts.
- V. Automate the results of the seven (7) day reporting requirement within the Courts so that all compliance information is disseminated electronically.

EMS / Injury Surveillance System

EMS / Injury Surveillance System Measurements**Timeliness**

Measure	Project
I-T-1: The <i>median</i> or <i>mean</i> number of days from (a) the date of an EMS run to (b) the date when the EMS patient care report is entered into the database.	TRIPRS Project # MO-P30 – EMS Run Reporting As of this date of January 1, 2013 the ambulance agencies of the state of MO report quarterly and are required to report all ambulance run data.
I-T-2: The <i>percentage</i> of EMS patient care reports entered into the State EMS discharge file within XX* days after the EMS run.	The Department of Health and Senior Services, Bureau of EMS requires that all ambulance calls must be complete in a 24 hour period of the time of the actual ambulance call. This is a policy found throughout the Ambulance Services in the state of MO.

*e.g., 5, 30, or 90 days

I-T-1

Objective: To collect **ALL** Missouri ground/air Ambulance reports. This will improve patient care throughout the state of MO. This will assist in following the patient through the MO Trauma System and all other calls. The time critical diagnosis system is currently being implemented throughout the state of Missouri. With the Time Critical Diagnosis, air/ground ambulance services are required to take the severely sick and injured to the most appropriate hospital for treatment of their injuries.

Results:

Baseline	2009	2010	2011	2012	2013
0	0	0	-	-	-

Results Description: The Bureau of EMS was not a participant in 06-10.

Measurement Method: The Bureau of EMS received NHTSA 408 money in the Fall of 2011 at that time we purchased 94 computers to be distributed to 46 ambulance services that were only reporting by paper. The agency has purchased an additional 54 Ipads to increase the electronic submission of EMS data which have been assigned to agencies in need of hardware to assist with report submission. From 4/1/2013 to 3/31/2014 the BEMS received over 617,662 reports of which over 80% were electronic.

I-T-2

Project Summary Report

Missouri

Project Label - Name: MO-Project #30 - EMS Run Electronic Reporting

Priority:

Revision Date: 01-JUN-2010

Last Updated: 09-JUNE-2015

Status: Active

Lead Agency: Department of Health and Senior Services

Partners: Stakeholders include public agencies such as local public health agencies, fire protection districts, ambulance districts, public hospitals, state and local law enforcement agencies. Private sector agencies include private ambulance services, health care providers, hospitals and trauma centers.

Website:

Project Director

Name: Mr. Terry Ellsworth

Agency: Missouri Department of Health and Senior Services

Address: 3418 Kalpp Drive/ PO Box 570

Jefferson City, MO

Phone: 573-751-6356

Email: Terry.ellsworth@dhss.mo.gov

Project Description: The project has two main parts: In part 1, the DHSS will work with the ambulance services to increase cooperation through no-cost means to improve electronic reporting. In part 2: the DHSS will seek funding, spread over multiple years to pay for complete coverage of EMS providers so that every ambulance is provided with a laptop computer or note book, and then to require 100% reporting by all services of all runs using the electronic systems.

The Missouri Ambulance Reporting System Initiative would enable Missouri Emergency Medical Service providers to contribute one hundred percent of EMS call data into the Statewide Missouri Ambulance Reporting System (hereafter MARS) and the National EMS Information System, (hereafter NEMSIS).

Once the Bureau of EMS receives data from the ambulance services we have provided with a laptop computer, the Bureau of EMS in coordination with the current vendor of our report system, a NEMSIS Injury Surveillance Matrix will be sent to Missouri Highway patrol for evaluation and analysis of data that the Bureau of EMS has collected. The Injury Surveillance

Matrix will then be a cooperation of Department of Health and Senior Services, Missouri Highway Patrol and Missouri Department of Transportation, Highway Safety Division of Injury data.

Currently the Missouri Department of Health and Senior Services receive data from approximately ten percent of the calls that occur throughout the state. The major obstacle in mandating one hundred percent data contribution from both rural and urban providers is a lack of funding to purchase hardware. Real time contribution of all EMS call data would facilitate statistical analysis of incidents including illness trends, increases in service requests, and emergency department diversions, which may be indicative of a regional or statewide bioterrorism event.

Milestones

<i>Milestone Description</i>	<i>Target Date</i>	<i>Actual Date</i>	<i>Status</i>
25% of all EMS Run data electronically filed into the MARS system. Since the Bureau of EMS and Missouri Highway for Safety started discussing this project of collecting data from ambulance services, the state of MO has increased the data collection and reporting to NEMSIS by 40%	01-30-2014		Complete
50% of all EMS Run data electronically filed into the MARS system.	09-30-2014		Complete
75% of all EMS Run data electronically filed into the MARS system.	09-30-2015		On Schedule
100% of all EMS Run data electronically filed into the MARS system.	01-31-2017		On Schedule

Activity Report

<u>Report Start</u> 04-04-2011	<u>Report End</u> 9-30-2011	<u>Report Date</u> 04-04-2011	<u>Provided By</u> Shirley Gastler
Progress	A contract from the State Highway Safety is being reviewed by the DHSS. Once this contract has been accepted it will be fully executed by the Highway Safety Office and the funds will be awarded for this project.		
Problems	We ran into a couple of snags. We have had to re-bid the computers for the 2012 distribution due to the time of the first bid and permission to order from the DHSS. We are in the process of re-bidding the hardware.		
Plans	To purchase laptop computers for ambulances.

**MAP-21 SECTION 405c
INTERIM PROGRESS REPORTING IN FY 2016**

State: Missouri Report Date: May 29, 2015 Submitted by: Jeremy Hodges

System to be Impacted	<input type="checkbox"/> CRASH <input type="checkbox"/> DRIVER <input type="checkbox"/> VEHICLE <input type="checkbox"/> ROADWAY <input type="checkbox"/> CITATION/ADJUDICATION <input checked="" type="checkbox"/> EMS/INJURY																						
Performance Area(s) to be Impacted	<input checked="" type="checkbox"/> ACCURACY <input type="checkbox"/> TIMELINESS <input checked="" type="checkbox"/> COMPLETENESS <input type="checkbox"/> ACCESSIBILITY <input type="checkbox"/> UNIFORMITY <input type="checkbox"/> INTEGRATION																						
Performance Measure used to track Improvement(s)	<p>Narrative Description of the Measure</p> <p>The completeness and accuracy of EMS run data reports submitted to Department of Health and Senior Services (DHSS).</p> <p>This project has allowed the Department of Health and Senior Services to work with the 231 rural and urban ambulance services to increase cooperation through a no-cost means to the ambulance services in order to improve electronic reporting. The funding from the previous 408 grant has provided laptop and Ipad computers to EMS providers thereby increasing their ability to report of all runs instead of just life threatening.</p> <p>The laptops and Ipads have provided ambulance districts with more access to the Missouri Ambulance Reporting System (MARS). The extra access to the online reporting system has increased the accuracy and completeness of ambulance run data files through edit checks as well as cut out the need for many ambulance districts to submit their run data reports via mailed hard copy.</p> <p>The focus of this project was to review each of Missouri's ambulance districts and determine their need for support hardware to report ambulance run data. The districts were analyzed based on their ability to report and history of reporting ambulance run data to the MARS online reporting system. Once that data was analyzed ambulance services in the most need for hardware support and training were provided those services. By tasking the agencies that were provided hardware to submit electronic reports it will better assist DHSS in many ways. The real time contribution of all EMS call data will facilitate statistical analysis of incidents including illness trends, increases in service requests, emergency department diversions, which may be indicative of a regional or statewide MCI event, continue to stay NEMSIS compliant, and would allow Missouri Highway Patrol access to injury crash data in fatal crashes in a timely manner.</p> <p>DHSS's completeness of ambulance run reports progress.</p> <table border="1"> <thead> <tr> <th rowspan="2">Timeline</th><th rowspan="2">Total Ambulance Run Reports</th><th colspan="4">Validity</th></tr> <tr> <th>80-100%</th><th>60 – 79%</th><th>40 – 59%</th><th>0 – 39%</th></tr> </thead> <tbody> <tr> <td>04/01/13 - 03/31/14</td><td>631,338</td><td>617,662</td><td>65</td><td>0</td><td>13,783</td></tr> <tr> <td>04/01/14 - 03/31/15</td><td>664,707</td><td>664,485</td><td>202</td><td>0</td><td>20</td></tr> </tbody> </table>	Timeline	Total Ambulance Run Reports	Validity				80-100%	60 – 79%	40 – 59%	0 – 39%	04/01/13 - 03/31/14	631,338	617,662	65	0	13,783	04/01/14 - 03/31/15	664,707	664,485	202	0	20

EMS / Injury Surveillance System

2011 Traffic Records Assessment Recommendations

- I. Revise regulations to require ambulance services to report all EMS transports to the Bureau of Emergency Services.
- II. Work directly with trauma centers to gain access to BAC results for inclusion into the FARS system.
- III. Continue the plan to distribute computers to Missouri ambulance services to assist with statewide reporting of ambulance transports.
- IV. Integrate crash and MARS data for use by the Department of Health and Senior Services, the Highway Safety Division, and FARS.
- V. Increase use of injury surveillance/CODES data to help provide a complete picture of motor vehicle injuries in the State.
- VI. Support and expand the use of linked data for program evaluation activities.
- VII. Continue representation by the Bureau of Emergency Services on the TRCC.
- VIII. Investigate ways to use the injury surveillance data to ensure complete reporting of fatalities to the FARS system.

Traffic Records Assessment Introduction

Missouri realizes that a complete traffic records system is necessary for planning, operational management or control, and evaluation of a State's highway safety activities. Missouri's state agencies tasked with managing electronic data work in conjunction with local municipalities to ensure the states strategic plan is implemented and producing adequate results. The most recent records assessment was conducted on May 15-20, 2011 and provided forty-two (42) recommendations. These recommendations are listed below in the 2011 Traffic Records Assessment Report. In the report we have identified what recommendations Missouri has implemented, the date the recommendation was updated (included in the state comments), and how the recommendation is incorporated into the system is included in the following pages 114-128.

Traffic Record Assessment Status Report*Missouri**Assessment Date: May 6, 2011**Assessment Updated June 1, 2015*

REC_LABEL	RECOMMENDATION	RECOMMENDATION_STATUS	STATE_COMMENTS	COMMENTS_BY	COMMENT_DATE	MOD_DATE
MOTRA11001	Expand the membership of the TRCC to include county and local law enforcement agencies and members of the local traffic engineering entities.	K	The TRCC has included members from larger law enforcement agencies across the state as well as a local traffic engineers from Cole County and the City of Columbia.	Jeremy Hodges	6/17/2013 Reviewed 6/09/2015	6/09/2015
MOTRA11002	Establish a comprehensive quality assurance and improvement program guided by the NHTSA publication Model Performance Measures for State Traffic Records Systems.	G	The TRCC is reviewing implementing a quality assurance and improvement program.	Jeremy Hodges	3/12/2013 Reviewed 6/09/2015	3/12/2013

MOTRA11003	Charge the TRCC with the development of a new Strategic Plan for State Traffic Safety Information System Improvement addressing the recommendations in this traffic records assessment. Identify deficiencies apart from those noted in the traffic records assessment by canvassing each traffic records system component custodian for input.	I	The TRCC does assist in the development and approval of the Strategic Plan. The TRCC does review the recommendations provided in the traffic records assessment in order to determine where efforts should be focused. The TRCC needs to develop a formal process to assist the traffic records system component custodian to identify all the deficiencies.	Jeremy Hodges	6/10/2014 Reviewed 6/09/2015	3/12/2013
MOTRA11004	Assure that all TRCC members participate in the development of the Strategic Plan for State Traffic Safety Information System Improvement and the selection and priority setting of the projects in the Plan. (As mentioned it is advisable to acquire the skills	I	The TRCC actively participates in the development and implementation of the Strategic Plan. The members through a facilitator discuss the different projects and their importance to our traffic data system.	Jeremy Hodges	3/13/2013 Reviewed 6/09/2015	3/13/2013

	of a facilitator to conduct workshops for the Plan development.)					
MOTRA11005	Include items in each TRCC meeting agenda that address progress reports on each system and project, as well as the status of the quality metrics developed by the TRCC following the guidelines in NHTSA's Model Performance Measures for State Traffic Records Systems.	I	Progress reports are provided at each TRCC meeting. The members do provide specific data metrics for their projects at least on an annual basis.	Jeremy Hodges	3/13/2013 Reviewed 6/09/2015	3/13/2013
MOTRA11006	Use a formal priority setting method with all TRCC members' participation for all projects considered for inclusion in the Strategic Plan for State Traffic Safety Information System Improvement.	G	The TRCC is reviewing methods to implement a formal priority setting method during the selection and discussion of projects although to date one has not been adopted.	Jeremy Hodges	3/12/2013 Reviewed 6/09/2015	6/09/2015
MOTRA11007	Create, maintain, and publish a centralized traffic records system file inventory	E	A list of the custodial contacts for each state agency is available although the TRCC has not created a centralized traffic records system	Jeremy Hodges	3/13/2013 Reviewed 6/09/2015	3/13/2013

	defining each system including custodial contact information and identifying all data element fields, their definitions, and locations within the various component systems as outlined in the Advisory.		file.			
MOTRA11008	Examine the HIPAA available exemptions for research studies to determine if the State can overcome the obstacles believed to prevent the integration of the ISS and STARS/TMS files.	I	The Bureau of Emergency Medical Services BEMS has investigated the implications of HIPAA in regards to the integration of ISS and STARS/TMS. BEMS has a strategy that will allow the integration without any violation of HIPAA. This interface has been slowed because of a change over in staff.	Andrew Hunter	6/10/2013 Reviewed 6/09/2015	6/09/2015
MOTRA11009	Explore methods to incorporate additional traffic records datasets in problem identification analysis to aid in obtaining effective leading indicators of traffic safety issues.	H	The projects are awarded based on problem identification. After the problem is identified we explore datasets in making and evaluating our decisions.	Jeremy Hodges	3/12/2013 Reviewed 6/09/2015	3/12/2013
MOTRA11010	Develop a centralized data warehouse of	E	The TRCC has not fully investigated the feasibility of this type of	Jeremy Hodges	3/12/2013 Reviewed	3/12/2013

	commonly requested datasets.		system in the state.		6/09/2015	
MOTRA11011	Re-evaluate the decision to only accept the new version of the MUCR SHP-2Q crash form beginning January 1, 2012 to ensure partner agencies are prepared for the change and that MSHP and the traffic records community understands the consequences of the impending deadline.	J	The revised Missouri Uniform Crash Report was successfully implemented on January 1, 2012. Only one version was implemented and is currently utilized and acceptable. Crash report forms were distributed to all Missouri law enforcement agencies authorized to investigate motor vehicle crashes. Agencies were also provided with information on how to access an electronic version of the Missouri Uniform Crash Report form and Preparation Manual via the Missouri State Highway Patrol's web page. A total of 22 training sessions were completed by Missouri State Highway Patrol, Traffic Records Division, personnel to statewide local law enforcement personnel on rules for completing the 2012 Missouri Uniform Crash Report.	Russ Dunwiddie	2/27/2013 Reviewed 6/09/2015	6/09/2015

MOTRA11012	Conduct an outreach effort to identify RMS vendors operating in Missouri and convene a meeting to provide information for electronic transfer of crash reports from their crash collection software.	I	MSHP is currently testing with the software vendor Information Technologies, Inc. to facilitate electronic crash reporting for approximately 100 local law enforcement agencies.	Russ Dunwiddie	2/27/2013 Reviewed 6/09/2015	6/09/2015
MOTRA11013	Strengthen efforts to encourage local agencies to submit electronically as soon as possible and provide operational and funding assistance.	I	The Missouri State Highway Patrol, Traffic Records Division, also strongly encourages this concept when conducting crash report training to Missouri's local law enforcement personnel. The MoDOT, Highway and Traffic Safety Division, dedicated part of their 2013 grant application overview seminars to a presentation by the REJIS on the LETS software. Highway Safety has also included the promotion of LETS at coalition meetings as well as statewide law enforcement conferences.	Russ Dunwiddie	2/27/2013 Reviewed 6/09/2015	6/09/2015
MOTRA11014	Encourage local law enforcement agencies to adopt the REJIS LETS software solution	I	MoDOT, Highway and Traffic Safety Division, reserved part of their 2015 grant application training for a	Jeremy Hodges	2/27/2013 Reviewed 6/09/2015	6/09/2015

	for electronic capture and submission of crash reports to STARS/TMS.		presentation by REJIS on the LETS software. Traffic and Highway Safety has also authorized departmental mailings and phone solicitation with local law enforcement agencies.			
MOTRA11015	Investigate ways to have local agencies comply with the MSHP procedure of teletype notification to the FARS unit of MSHP upon the occurrence of a fatal crash in their jurisdiction. If such a procedure is not possible to be adopted, identify options for their consideration in order to comply and cite the criticality of the notification in support of the request.	I	No formal action has been completed on this matter. This issue is addressed during the Missouri State Highway Patrol, Traffic Records Division's, crash report training to Missouri's local law enforcement personnel.	Jeremy Hodges	2/27/2013 Reviewed 6/09/2015	2/27/2013
MOTRA11016	Continue efforts with the TRS community to integrate the crash file with other TRS components.	I	At this time, Missouri's crash data file is only integrated with the Missouri Department of Transportation and Missouri Department of Health.	Jeremy Hodges	2/27/2013 Reviewed 6/09/2015	2/27/2013
MOTRA11017	Continue efforts to automate search and data retrieval from	I	The Missouri State Highway Patrol implemented this practice with their	Christina Predmore and Tracy Robertson	2/27/2013 Reviewed 6/3/2015	6/3/2015

	the driver and vehicle files for auto-population of crash and citation forms.		electronic crash report and Uniform Citation forms. The LETS software also employs this practice for their electronic crash report form. It's unknown if they use it for their electronic citation.			
MOTRA11018	Engage and leverage the STARS Committee to assist in outreach to the local law enforcement community to increase the number of agencies electronically reporting to STARS/TMS.	G	All STARS Committee members are aware of the ability to establish electronic transfer of data to STARS/TMS and that electronic transfer is encouraged by the Missouri State Highway Patrol and MoDOT. However, there has been no formal action by the STARS Committee on this matter.	Jeremy Hodges	2/27/2013 Reviewed 6/09/2015	2/27/2013
MOTRA11019	Develop a strategy to address enhancements and/or modifications to the TMS for the use of the analytic software tools recommended in the Highway Safety Manual, in particular SafetyAnalyst. This strategy should be presented to the TRCC for inclusion in the Strategic Plan	J	We continue to use the Highway Safety Manual for safety analysis. We are also continuing to integrate Safety Analyst and TMS.	John Miller	3/12/2013 Reviewed 6/09/2015	6/09/2015

	for State Traffic Safety Information System Improvement.					
MOTRA11020	Provide access to the TMS to officials of Metropolitan Planning Organizations and Regional Planning Commissions for use in program planning and project development for the Transportation Improvement Plan (TIP).	I	MARC and EWGCC both have direct access to TMS data. We have also worked with additional agencies, but this has not been an easy task due to IT constraints. We continue to supply both crash and roadway data to numerous agencies on an annual basis or as needed. Additionally, each year we supply safety and roadway data to our Regional Planning Commissions and MPOs.	John Miller	3/12/2013 Reviewed 6/09/2015	6/09/2015
MOTRA11021	Accelerate current efforts to include more roadway features data for local roads in the TMS.	G	MoDOT is currently looking at this opportunity with the assistance of FHWA.	John Miller	3/13/2013 Reviewed 6/09/2015	6/09/2015
MOTRA11022	Consider issuing a distinctive driver license to drivers required to operate Ignition Interlock equipped vehicles.	E	We have not implemented this as we do not have statutory authority to do so.	Tracy Robertson	3/4/2013 Reviewed 6/09/2015	6/09/2015

MOTRA11023	Encourage broader participation by courts to report disposition information electronically.	I	The Driver License Bureau (Missouri) encourages courts to report disposition information electronically. As of April 2015, a total of 245 municipal courts are now reporting electronically.	Tracy Robertson	3/12/2013 Reviewed 6/3/2015	6/03/2015
MOTRA11024	Consider reporting crash information on the driver histories of all drivers involved in a crash.	E	We have not implemented this as we do not have statutory authority to do so.	Tracy Robertson	3/13/2013 Reviewed 6/09/2015	6/09/2015
MOTRA11025	Consider including serious violation conviction or adverse information from previous states for newly licensed non-CDL drivers from other states.	I	Missouri includes alcohol convictions from other states for newly licensed non-CDL drivers. Missouri also denies the issuance of a Missouri license to a driver for 5 years if a driver has two alcohol offenses within five years and for 10 years if the driver has three or more alcohol offenses, regardless of the state the convictions occurred in. The denial period is 5/10 years from the date of the last conviction.	Tracy Robertson	3/4/2013 Reviewed 6/03/2015 Tracy Robertson	6/03/2015
MOTRA11026	Continue to actively participate in the Traffic Records Coordinating Committee as a participant and a stakeholder.	K	Driver License Bureau is an active participant in the committee.	Jeremy Hodges	3/12/2013 Reviewed 6/09/2015	3/12/2013

MOTRA11027	Consider implementing an AAMVA standard barcode on registration documents to promote complete and accurate data transfer to other traffic records systems.	C	The Motor Vehicle Bureau would consider changes to the current vehicle registration receipt to include an AAMVA standard barcode to promote complete and accurate data transfer to other traffic records systems although the funding is not available at this time.	Christina Predmore	3/15/2013 Reviewed 6/3/2015 C. Predmore	6/3/2015
MOTRA11028	Consider implementing a customer centric registration and titling system including the DL number and full legal name of the owner to allow linkage of driver and vehicle information.	C	The Motor Vehicle Bureau has not implemented as funding is not available.	Christina Predmore	3/8/2013 Reviewed 6/3/2015 C. Predmore	6/3/2015
MOTRA11029	Participate actively in the Traffic Records Coordinating Committee as a participant and a stakeholder.	K	The Motor Vehicle Division actively participates in the TRCC.	Jeremy Hodges	3/15/2013 Reviewed 6/09/2015	3/15/2013
MOTRA11030	Encourage the adoption of JIS by those courts now using non-JIS case management systems which is essential to the creation of a comprehensive, statewide citation data	I	This item is completed on a case by case basis. The focus has been placed on monitoring the court for compliance opposed to implementation. If a municipal court processes a large amount of tickets, we will decide on a case by case basis to implement	Tracy Robertson	6/10/2013 Reviewed 6/09/2015	6/09/2015

	repository.		JIS. (ALL state courts report citation dispositions electronically)			
MOTRA11031	Continue development of canned statistical reports in JIS.	K	Canned statistical reports have been implemented into JIS	Tina Jones	2/27/2013 Reviewed 6/10/2015	6/10/2015
MOTRA11032	Promote the expanded use of the LETS and FATPOT citation modules.	I	The citation module for LETS has been designed to integrate with other RMS systems in order for departments to be able to utilize the e-citation software. The FATPOT system has not been expanded upon at this time.	Jeremy Hodges	3/13/2013 Reviewed 6/09/2015	3/13/2013
MOTRA11033	Encourage the electronic transfer of traffic citation information between LEAs, the Prosecutor's Office, and the Courts.	I	We are really pushing this item as we implement e-filing with the state courts. We have also issued contracts with several LEAs in the state to begin this process	Jeremy Hodges	6/10/2013 Reviewed 6/09/2015	2/27/2013
MOTRA11034	Automate the results of the seven day reporting requirement within the Courts so that all compliance information is disseminated electronically.	I	All state courts, municipal courts using JIS and other municipal courts using a system approved by the State Judicial Records Committee submits there result electronically. We will continue to encourage municipal courts to transmit their statistics electronically.	Tracy Robertson	2/27/2013 Reviewed 6/09/2015	6/09/2015

MOTRA11035	Revise regulations to require ambulance services to report all EMS transports to the Bureau of Emergency Services.	H	The assistance provided by this project prompted the Governor's State Advisory Council on EMS to draft and approve regulation mandating 100% electronic reporting. Missouri is currently awaiting the implementation of the National EMS Information System 3.0 dataset prior to filing this regulation.	Terry Ellsworth	4/11/2012 Reviewed 6/09/2015	6/09/2015
MOTRA11036	Work directly with trauma centers to gain access to BAC results for inclusion into the FARS system.	E	Currently Bureau of EMS does not have a data file that would allow this to occur. The bureau is now reviewing the options to create this data file.	Andrew Hunter	3/12/2013 Reviewed 6/09/2015	6/09/2015
MOTRA11037	Continue the plan to distribute computers to Missouri ambulance services to assist with statewide reporting of ambulance transports.	I	The Bureau of EMS has increased the data from the distributed computers; the increase is 74% of data. As of this date 12-12-12 out of the 49 ambulance services receiving the laptops we are receiving data from all. The Bureau of EMS runs a report monthly to check on the import of data/and or direct entry. In FY13 54 Ipads were purchased and have been distributed to agencies in need of hardware to assist with the electronic submission. We distributed 49 of the	Terry Ellsworth	12/12/2012 Reviewed 6/09/2015	6/09/2015

			Ipads to 19 additional EMS services with 15 doing direct entry and the remaining direct upload.			
MOTRA11038	Integrate crash and MARS data for use by the Department of Health and Senior Services, the Highway Safety Division, and FARS.	H	The distribution of EMS computers has been completed, 49 agencies received computers, 24 out of 43 are now reporting direct entry, 11 are still in need of training, and 6 are current with 3rd party vendor submission. We distributed 49 Ipads to 19 additional EMS services with 15 doing direct entry and the remaining direct upload. The integration is planned for the end of 2015 but because of staffing issues we have not been able to begin the integration.	Terry Ellsworth	6/17/2013 Reviewed 6/09/2015	6/09/2015
MOTRA11039	Increase use of injury surveillance/CODES data to help provide a complete picture of motor vehicle injuries in the State.	E	Due to staff shortages and competing priorities, the Department of Health and Senior Services is no longer able to support CODES surveillance linkage. The Department continues to	Andrew Hunter	3/13/2013 Reviewed 6/09/2015	6/09/2015

			provide injury surveillance data through the Patient Abstract System available through their web-query system (MICA).			
MOTRA11040	Support and expand the use of linked data for program evaluation activities.	H	The Bureau of EMS has established a rapport with Missouri Highway Patrol Data surveillance and will begin to build a report from our Missouri Ambulance Report Data for the NHTSA Injury Matrix Surveillance that will be sent to the data collection group of Missouri State Highway Patrol	Terry Ellsworth	12/12/2012 Reviewed 6/09/2015	6/09/2015
MOTRA11041	Continue representation by the Bureau of Emergency Services on the TRCC.	K	The Bureau of Emergency Medical Services BEMS is an active participant in the TRCC.	Terry Ellsworth	3/4/2013 Reviewed 6/09/2015	6/9/2015
MOTRA11042	Investigate ways to use the injury surveillance data to ensure complete reporting of fatalities to the FARS system.	I	The Bureau of EMS is currently getting data from the Department of Health in order to help better ensure accurate data is submitted to FARS	Andrew Hunter	3/13/2013 Reviewed 6/09/2015	6/09/2015

State: Missouri Report Date: 5/24/2015 Submitted by: Jeremy Hodges

System to be Impacted	<u>X</u> CRASH ___ DRIVER ___ VEHICLE ___ ROADWAY ___ CITATION/ADJUDICATION ___ EMS/INJURY																
Performance Area(s) to be Impacted	<u>X</u> ACCURACY ___ TIMELINESS <u>X</u> COMPLETENESS ___ ACCESSIBILITY ___ UNIFORMITY <u>X</u> INTEGRATION																
Performance Measure used to track Improvement(s)	<p>Narrative Description of the Measure</p> <p>The number of agencies reporting error free crash reports electronically to the highway patrol's crash repository via LETS.</p> <p>The purpose of this project is to provide a reliable electronic crash reporting system that provides a high level of accuracy, integration, and accessibility to the crash reporting system for all law enforcement agencies. To provide training on as needed basis for Missouri Law Enforcement to ensure the system is utilized in a consistent manner. The LETS system will also allow law enforcement agencies to integrate the crash reporting system with the Department of Revenue (DOR) in order to accurately identify the vehicle and driver data in the crash report by using DOR's database.</p> <p>The focus of this project is to assist local law enforcement agencies in the use of the Law Enforcement Traffic Software (LETS). Based upon the identified problem of getting data into a format that allows for full electronic transfer, a need exists to work directly with the local law enforcement agencies, software providers and the State Traffic Accident Reporting System (STARS) staff to identify current systems and the potential for those systems to be modified for electronic transfer of crash report data. The edit checks that are incorporated in the LETS program are designed to submit crash reports to STARS in an error free format. This project will also provide support for LETS enhancements and user support.</p> <p>In order for MoDOT to receive accurate and complete data the LETS application has been extremely valuable. This project involved soliciting law enforcement agency support, an edit check system that streamlines accurate submission of crash reports, integration with DOR to ensure vehicle and driver data are accurate. The chart below indicates the number of agencies using LETS to electronically submit crash reports, the total number of crash reports submitted by LETS yearly, and the number of reports returned due to errors from Missouri Highway Patrol (MSHP).</p> <table style="width: 100%; margin-top: 20px;"> <thead> <tr> <th style="text-align: left;">Timeline</th><th style="text-align: center;">Total Agencies signed up to use LETS</th><th style="text-align: center;">Total reports submitted Electronically to STARS through LETS</th><th style="text-align: center;">LETS Submission Errors</th></tr> </thead> <tbody> <tr> <td>4/01/12 to 3/31/13</td><td style="text-align: center;">246</td><td style="text-align: center;">31,611</td><td style="text-align: center;">226</td></tr> <tr> <td>4/01/13 to 3/31/14</td><td style="text-align: center;">267</td><td style="text-align: center;">37,335</td><td style="text-align: center;">117</td></tr> <tr> <td>4/01/14 to 3/31/2015</td><td style="text-align: center;">289</td><td style="text-align: center;">36,097</td><td style="text-align: center;">109</td></tr> </tbody> </table>	Timeline	Total Agencies signed up to use LETS	Total reports submitted Electronically to STARS through LETS	LETS Submission Errors	4/01/12 to 3/31/13	246	31,611	226	4/01/13 to 3/31/14	267	37,335	117	4/01/14 to 3/31/2015	289	36,097	109

INTERIM PROGRESS REPORTING IN FY 2016**

State: Missouri Report Date: May 29, 2015 Submitted by: Jeremy Hodges

System to be Impacted	<input type="checkbox"/> CRASH <input type="checkbox"/> DRIVER <input type="checkbox"/> VEHICLE <input type="checkbox"/> ROADWAY <input type="checkbox"/> CITATION/ADJUDICATION <input checked="" type="checkbox"/> EMS/INJURY																						
Performance Area(s) to be Impacted	<input checked="" type="checkbox"/> ACCURACY <input type="checkbox"/> TIMELINESS <input checked="" type="checkbox"/> COMPLETENESS <input type="checkbox"/> ACCESSIBILITY <input type="checkbox"/> UNIFORMITY <input type="checkbox"/> INTEGRATION																						
Performance Measure used to track Improvement(s)	<p>Narrative Description of the Measure</p> <p>The completeness and accuracy of EMS run data reports submitted to Department of Health and Senior Services (DHSS).</p> <p>This project has allowed the Department of Health and Senior Services to work with the 231 rural and urban ambulance services to increase cooperation through a no-cost means to the ambulance services in order to improve electronic reporting. The funding from the previous 408 grant has provided laptop and Ipad computers to EMS providers thereby increasing their ability to report of all runs instead of just life threatening.</p> <p>The laptops and Ipads have provided ambulance districts with more access to the Missouri Ambulance Reporting System (MARS). The extra access to the online reporting system has increased the accuracy and completeness of ambulance run data files through edit checks as well as cut out the need for many ambulance districts to submit their run data reports via mailed hard copy.</p> <p>The focus of this project was to review each of Missouri's ambulance districts and determine their need for support hardware to report ambulance run data. The districts were analyzed based on their ability to report and history of reporting ambulance run data to the MARS online reporting system. Once that data was analyzed ambulance services in the most need for hardware support and training were provided those services. By tasking the agencies that were provided hardware to submit electronic reports it will better assist DHSS in many ways. The real time contribution of all EMS call data will facilitate statistical analysis of incidents including illness trends, increases in service requests, emergency department diversions, which may be indicative of a regional or statewide MCI event, continue to stay NEMSIS compliant, and would allow Missouri Highway Patrol access to injury crash data in fatal crashes in a timely manner.</p> <p>DHSS's completeness of ambulance run reports progress.</p> <table border="1"> <thead> <tr> <th rowspan="2">Timeline</th><th rowspan="2">Total Ambulance Run Reports</th><th colspan="4">Validity</th></tr> <tr> <th>80-100%</th><th>60 – 79%</th><th>40 – 59%</th><th>0 – 39%</th></tr> </thead> <tbody> <tr> <td>04/01/13 - 03/31/14</td><td>631,338</td><td>617,662</td><td>65</td><td>0</td><td>13,783</td></tr> <tr> <td>04/01/14 - 03/31/15</td><td>664,707</td><td>664,485</td><td>202</td><td>0</td><td>20</td></tr> </tbody> </table>	Timeline	Total Ambulance Run Reports	Validity				80-100%	60 – 79%	40 – 59%	0 – 39%	04/01/13 - 03/31/14	631,338	617,662	65	0	13,783	04/01/14 - 03/31/15	664,707	664,485	202	0	20
Timeline	Total Ambulance Run Reports			Validity																			
		80-100%	60 – 79%	40 – 59%	0 – 39%

**MAP-21 SECTION 405c
INTERIM PROGRESS REPORTING IN FY 2016**

State: Missouri Report Date: 5/29/2015 Submitted by: Jeremy Hodges

System to be Impacted	<input type="checkbox"/> CRASH <input type="checkbox"/> DRIVER <input type="checkbox"/> VEHICLE <input type="checkbox"/> ROADWAY <input checked="" type="checkbox"/> CITATION/ADJUDICATION <input type="checkbox"/> EMS/INJURY																					
Performance Area(s) to be Impacted	<input checked="" type="checkbox"/> ACCURACY <input checked="" type="checkbox"/> TIMELINESS <input checked="" type="checkbox"/> COMPLETENESS <input type="checkbox"/> ACCESSIBILITY <input checked="" type="checkbox"/> UNIFORMITY <input checked="" type="checkbox"/> INTEGRATION																					
Performance Measure used to track Improvement(s)	<p>Narrative Description of the Measure</p> <p>The results of Mobile Ticketing project involving Lee's Summit Police Department (LSPD) and REJIS.</p> <p>The purpose of this project is to provide a reliable electronic mobile ticketing system that provides a high level of accuracy, integration, and accessibility to the Lee's Summit Municipal Court which will provide this municipal data electronically to the Missouri Office of State Courts (OSCA). To provide training on an as needed basis for Lee's Summit Police Department to ensure the system is utilized in a consistent manner. The mobile ticketing system will also allow LSPD to integrate the ticket reporting system with the Lee's Summit Municipal Court and their RMS system, and the Missouri Office of State Court's Justice Information System (JIS), in order to accurately identify the vehicle and driver data in the electronic tickets by using Department of Revenue's (DOR) database.</p> <p>This system also allows the probable cause statements on the tickets to be uniform. The verbiage is in the system exactly how the prosecutor would like it to read. All tickets are legible and the court dates are also entered for the officers, so there are fewer errors there as well.</p> <p>LSPD began the mobile ticketing project with the 8 traffic officers in February 2014 and they trained the other officers. In August, LSPD also began using mobile ticketing for summons on their General Order Complaints, i.e. assault, trespass, etc.</p> <p>In order for the Lee's Summit Courts to receive accurate and complete data the mobile ticketing application has been extremely valuable. This project involved soliciting REJIS support, Lee's Summit Municipal Court, and the Prosecutor's Office.</p> <p>The chart below indicates the number of citations and warnings issued:</p> <table border="1"> <thead> <tr> <th>Timeline</th><th>Paper Citations</th><th>Paper Warnings</th><th>Electronic Citations</th><th>Electronic Warnings</th><th>Paper Voids</th><th>E-Voids</th></tr> </thead> <tbody> <tr> <td>04/01/13 to 3/31/14</td><td>5,972</td><td>2,901</td><td>429</td><td>153</td><td>769</td><td>13</td></tr> <tr> <td>04/01/14 to 03/31/15</td><td>863</td><td>276</td><td>10,375</td><td>6,489</td><td>2</td><td>219</td></tr> </tbody> </table>	Timeline	Paper Citations	Paper Warnings	Electronic Citations	Electronic Warnings	Paper Voids	E-Voids	04/01/13 to 3/31/14	5,972	2,901	429	153	769	13	04/01/14 to 03/31/15	863	276	10,375	6,489	2	219

4.

Traffic Records Assessment Introduction

Missouri realizes that a complete traffic records system is necessary for planning, operational management or control, and evaluation of a State's highway safety activities. Missouri's state agencies tasked with managing electronic data work in conjunction with local municipalities to ensure the states strategic plan is implemented and producing adequate results. The most recent records assessment was conducted on May 15-20, 2011 and provided forty-two (42) recommendations. These recommendations are listed below in the 2011 Traffic Records Assessment Report. In the report we have identified what recommendations Missouri has implemented, the date the recommendation was updated (included in the state comments), and how the recommendation is incorporated into the system is included in the following pages 128-146.

Traffic Record Assessment Report

Missouri

Assessment Date: May 6, 2011

1. Recommendation Label: MOTRA11001

Recommendation: *Expand the membership of the TRCC to include county and local law enforcement agencies and members of the local traffic engineering entities.*

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Completed

State Comments: *The TRCC has included members from larger law enforcement agencies on each side of the state as well as a local traffic engineer from Columbia and Jefferson City. This comment was made by Hodges.9 on February 4, 2013*

2. Recommendation Label: MOTRA11002

Recommendation: *Establish a comprehensive quality assurance and improvement program guided by the NHTSA publication Model Performance Measures for State Traffic Records Systems.*

Recommendation Type:

Major Recommendation?: Yes

Status: No Progress

State Comments: *The TRCC is reviewing implementing a quality assurance and improvement program. This comment was made by Jeremy Hodges on March 3, 2013*

3. Recommendation Label: MOTRA11003

Recommendation: *Charge the TRCC with the development of a new Strategic Plan for State Traffic Safety Information System Improvement addressing the recommendations in this*

traffic records assessment. Identify deficiencies apart from those noted in the traffic records assessment by canvassing each traffic records system component custodian for input.

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Some Progress

State Comments: *The TRCC does assist in the development and approval of the Strategic Plan. The TRCC does review the recommendations provided in the traffic records assessment in order to determine where efforts should be focused. The TRCC plans to develop a formal process to assist the traffic records system component custodian to identify all the deficiencies. This comment was made by Jeremy Hodges on March 3, 2013*

4. Recommendation Label: MOTRA11004

Recommendation: *Assure that all TRCC members participate in the development of the Strategic Plan for State Traffic Safety Information System Improvement and the selection and priority setting of the projects in the Plan. (As mentioned it is advisable to acquire the skills of a facilitator to conduct workshops for the Plan development.)*

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Some Progress

State Comments: *The TRCC actively participates in the development and implementation of the Strategic Plan. The members through a facilitator discuss the different projects and their importance to our traffic data system. This comment was made by Jeremy Hodges on March 4, 2013*

5. Recommendation Label: MOTRA11005

Recommendation: *Include items in each TRCC meeting agenda that address progress reports on each system and project, as well as the status of the quality metrics developed by the TRCC following the guidelines in NHTSA's Model Performance Measures for State Traffic Records Systems.*

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Some Progress

State Comments: Progress reports are provided at each TRCC meeting. The members do provide specific data metrics for their projects at least on an annual basis. This comment was made by Jeremy Hodges on March 4, 2013

6. Recommendation Label: MOTRA11006

Recommendation: Use a formal priority setting method with all TRCC members' participation for all projects considered for inclusion in the Strategic Plan for State Traffic Safety Information System Improvement.

Recommendation Type:

Major Recommendation?: Yes

Status: Some Progress

State Comments: The TRCC is reviewing methods to implement a formal priority setting method during the selection and discussion of projects. This comment was made by Jeremy Hodges on March 3, 2013

7. Recommendation Label: MOTRA11007

Recommendation: Create, maintain and publish a centralized traffic records system file inventory defining each system including custodial contact information and identifying all data element fields, their definitions, and locations within the various component systems as outlined in the Advisory.

Recommendation Type:

Major Recommendation?: No

Status: Not Addressed - Concerns about Feasibility and / or Implementation

State Comments: A list of the custodial contacts for each state agency is available although the TRCC has not created a centralized traffic records system file. This comment was made by Jeremy Hodges on March 4, 2013

8. Recommendation Label: MOTRA11008

Recommendation: Examine the HIPAA available exemptions for research studies to determine if the State can overcome the obstacles believed to prevent the integration of the ISS and STARS/TMS files.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Some Progress

State Comments: The Bureau of Emergency Medical Services BEMS has investigated the implications of HIPAA in regards to the integration of ISS and STARS/TMS. BEMS has a strategy that will allow the integration without any violation of HIPAA. This comment was made by Hodges.9 on March 4, 2013

9. Recommendation Label: MOTRA11009

Recommendation: Explore methods to incorporate additional traffic records datasets in problem identification analysis to aid in obtaining effective leading indicators of traffic safety issues.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Pending Action

State Comments: The projects are awarded based on problem identification. After the problem is identified we explore datasets in making and evaluating our decisions. This comment was made by Jeremy Hodges on March 3, 2013

10. Recommendation Label: MOTRA11010

Recommendation: Develop a centralized data warehouse of commonly requested datasets.

Recommendation Type:

Major Recommendation?: No

Status: Not Addressed - Concerns about Feasibility and / or Implementation

State Comments: The TRCC has not fully investigated the feasibility of this type of system in the state. This comment was made by Jeremy Hodges on March 3, 2013

11. Recommendation Label: MOTRA11011

Recommendation: Re-evaluate the decision to only accept the new version of the MUCR SHP-2Q crash form beginning January 1, 2012 to ensure partner agencies are prepared for

the change and that MSHP and the traffic records community understands the consequences of the impending deadline.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Significant progress

State Comments: *The revised Missouri Uniform Crash Report was successfully implemented on January 1, 2012. Only one version was implemented and is currently utilized and acceptable. Crash report forms were distributed to all Missouri law enforcement agencies authorized to investigate motor vehicle crashes. Agencies were also provided with information on how to access an electronic version of the Missouri Uniform Crash Report form and Preparation Manual via the Missouri State Highway Patrol's web page. A total of 22 training sessions were completed by Missouri State Highway Patrol, Traffic Records Division, personnel to statewide local law enforcement personnel on rules for completing the 2012 Missouri Uniform Crash Report. This comment was made by Hodges.9 on February 4, 2013*

12. Recommendation Label: MOTRA11012

Recommendation: *Conduct an outreach effort to identify RMS vendors operating in Missouri and convene a meeting to provide information for electronic transfer of crash reports from their crash collection software.*

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Some Progress

State Comments: *Although there has not been a formal meeting with RMS vendors, the MoDOT, Highway and Traffic Safety Division, continues to contract with a vendor to contact Missouri law enforcement agencies and promote the concept of electronic transfer of crash reports/data to the Statewide Traffic Accident Records System (STARS). The technical specifications for electronic transfer have been provided to several vendors; however, none have progressed to the point where formal meetings are needed in order to establish transfers. This comment was made by Hodges.9 on February 4, 2013*

13. Recommendation Label: MOTRA11013

Recommendation: *Strengthen efforts to encourage local agencies to submit crash reports electronically as soon as possible and provide operational and funding assistance.*

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Some Progress

State Comments: The Missouri State Highway Patrol, Traffic Records Division, also strongly encourages this concept when conducting crash report training to Missouri's local law enforcement personnel. The MoDOT, Highway and Traffic Safety Division, dedicated part of their 2013 grant application overview seminars to a presentation by the REJIS on the LETS software. Highway Safety has also included the promotion of LETS at coalition meetings as well as statewide law enforcement conferences. This comment was made by Hodges.9 on February 4, 2013

14. Recommendation Label: MOTRA11014

Recommendation: Encourage local law enforcement agencies to adopt the REJIS LETS software solution for electronic capture and submission of crash reports to STARS/TMS.

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Some Progress

State Comments: MoDOT, Highway and Traffic Safety Division, reserved part of their 2013 grant application training for a presentation by REJIS on the LETS software. Traffic and Highway Safety has also authorized departmental mailings and phone solicitation with local law enforcement agencies. This comment was made by Hodges.9 on February 4, 2013

15. Recommendation Label: MOTRA11015

Recommendation: Investigate ways to have local agencies comply with the MSHP procedure of teletype notification to the FARS unit of MSHP upon the occurrence of a fatal crash in their jurisdiction. If such a procedure is not possible to be adopted, identify options for their consideration in order to comply and cite the criticality of the notification in support of the request.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Some Progress

State Comments: No formal action has been completed on this matter. This issue is addressed during the Missouri State Highway Patrol, Traffic Records Division's, crash report training to Missouri's local law enforcement personnel. The state has very few fatal crashes that are not worked by MSHP; when this occurs we are addressing the issue with each agency individually. This comment was made by Hodges.9 on February 4, 2013

16. Recommendation Label: MOTRA11016

Recommendation: The TRCC should continue efforts with the TRS community to integrate the crash file with other TRS components.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Some Progress

State Comments: At this time, Missouri's crash data file is only integrated with the Missouri Department of Transportation and Missouri Department of Health. This comment was made by Hodges.9 on February 4, 2013

17. Recommendation Label: MOTRA11017

Recommendation: Continue efforts to automate search and data retrieval from the driver and vehicle files for auto-population of crash and citation forms.

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Some Progress

State Comments: The Missouri State Highway Patrol implemented this practice with their electronic crash report and Uniform Citation forms. The LETS software also employs this practice for their electronic crash report form. It's unknown if they use it for their electronic citation. This comment was made by Hodges.9 on February 4, 2013

18. Recommendation Label: MOTRA11018

Recommendation: Engage and leverage the STARS Committee to assist in outreach to the local law enforcement community to increase the number of agencies electronically reporting to STARS/TMS.

Recommendation Type:

Major Recommendation?: No

Status: No Progress

State Comments: All STARS Committee members are aware of the ability to establish electronic transfer of data to STARS/TMS and that electronic transfer is encouraged by the Missouri State Highway Patrol and MoDOT. However, there has been no formal action by the STARS Committee on this matter. This comment was made by Hodges.9 on February 4, 2013

19. Recommendation Label: MOTRA11019

Recommendation: Develop a strategy to address enhancements and/or modifications to the TMS for the use of the analytic software tools recommended in the Highway Safety Manual, in particular SafetyAnalyst. This strategy should be presented to the TRCC for inclusion in the Strategic Plan for State Traffic Safety Information System Improvement.

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Significant progress

State Comments: MoDOT has enhanced and modified TMS to use the SafetyAnalyst software. MoDOT staff is currently being trained and becoming familiar with the tool. This comment was made by Jeremy Hodges on March 3, 2013

20. Recommendation Label: MOTRA11020

Recommendation: Provide access to the TMS to officials of Metropolitan Planning Organizations and Regional Planning Commissions for use in program planning and project development for the Transportation Improvement Plan (TIP).

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Some Progress

State Comments: The MoDOT Planning Division does provide data sets for groups to use in program planning and project development of the STIP and TIP. The Kansas City Metropolitan Planning Organization has been given access to TMS. This comment was made by Jeremy Hodges on March 3, 2013

21. Recommendation Label: MOTRA11021

Recommendation: Accelerate current efforts to include more roadway features data for local roads in the TMS.

Recommendation Type:

Major Recommendation?: No

Status: No Progress

State Comments: Members of the TRCC are currently looking at identifying the priority items to complete this recommendation. The next step will be to determine if the necessary data elements are available from other users and determine if access to that data can be acquired. This comment was made by Jeremy Hodges on March 4, 2013

22. Recommendation Label: MOTRA11022

Recommendation: Consider issuing a distinctive driver license to drivers required to operate Ignition Interlock equipped vehicles.

Recommendation Type:

Major Recommendation?: No

Status: Not Addressed - Concerns about Feasibility and / or Implementation

State Comments: We have not implemented this as we do not have statutory authority to do so. This comment was made by Hodges.9 on March 2, 2013

23. Recommendation Label: MOTRA11023

Recommendation: Encourage broader participation by courts to report disposition information electronically.

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Some Progress

State Comments: Driver License Bureau (Missouri) encourages courts to report disposition information electronically. Since the assessment, 15 more courts have begun reporting electronically. DLB is currently in the process of implementing the electronic process with four more courts. This comment was made by Hodges.9 on March 3, 2013

24. Recommendation Label: MOTRA11024

Recommendation: Consider reporting crash information on the driver histories of all drivers involved in a crash.

Recommendation Type:

Major Recommendation?: No

Status: Not Addressed - Concerns about Feasibility and / or Implementation

State Comments: We have not implemented this as we do not have statutory authority to do so. This comment was made by Hodges.9 on March 4, 2013

25. Recommendation Label: MOTRA11025

Recommendation: Consider including serious violation conviction or adverse information from previous states for newly licensed non-CDL drivers from other states.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Some Progress

State Comments: Missouri includes alcohol convictions from other states for newly licensed non-CDL drivers. Missouri also denies the issuance of a Missouri license to a driver for 5 years if a driver has two alcohol offenses within five years and for 10 years if the driver has three or more alcohol offenses, regardless of the state the convictions occurred in. The denial period is 5/10 years from the date of the last conviction. This comment was made by Hodges.9 on March 2, 2013

26. Recommendation Label: MOTRA11026

Recommendation: Driver License Bureau to actively participate in the Traffic Records Coordinating Committee as a participant and a stakeholder.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Completed

State Comments: Driver License Bureau is an active participant in the committee. This comment was made by Hodges.9 on March 3, 2013

27. Recommendation Label: MOTRA11027

Recommendation: Consider implementing an AAMVA standard barcode on registration documents to promote complete and accurate data transfer to other traffic records systems.

Recommendation Type:

Major Recommendation?: No

Status: Not Addressed - Insufficient Funding / Resources

State Comments: The Motor Vehicle Bureau would consider changes to the current vehicle registration receipt to include an AAMVA standard barcode to promote complete and accurate data transfer to other traffic records systems although the funding is not available at this time. This comment was made by Hodges.9 on March 6, 2013

28. Recommendation Label: MOTRA11028

Recommendation: Consider implementing a customer centric registration and titling system including the DL number and full legal name of the owner to allow linkage of driver and vehicle information.

Recommendation Type:

Major Recommendation?: Yes

Status: Not Addressed - Insufficient Funding / Resources

State Comments: The Motor Vehicle Bureau has not implemented as funding is not available. This comment was made by Hodges.9 on March 6, 2013

29. Recommendation Label: MOTRA11029

Recommendation: The motor vehicle division should actively participate in the Traffic Records Coordinating Committee.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Completed

State Comments: The Motor Vehicle Division actively participates in the TRCC. This comment was made by Hodges.9 on March 6, 2013

30. Recommendation Label: MOTRA11030

Recommendation: Encourage the adoption of JIS by those courts now using non-JIS case management systems which is essential to the creation of a comprehensive, statewide citation data repository.

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Some Progress

State Comments: This item is completed on a case by case basis. The focus has been placed on monitoring the court for compliance opposed to implementing. If a municipal court processes a large amount of tickets, we will decide on a case by case basis to implement JIS. This comment was made by Hodges.9 on February 4, 2013

31. Recommendation Label: MOTRA11031

Recommendation: Continue development of canned statistical reports in JIS.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Completed

State Comments: Canned statistical reports have been implemented into JIS This comment was made by Hodges.9 on February 4, 2013

32. Recommendation Label: MOTRA11032

Recommendation: Promote the expanded use of the LETS and FATPOT citation modules.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Some Progress

State Comments: The citation module for LETS has been designed to integrate with other RMS systems in order for departments to be able to utilize the e-citation software. The FATPOT system has not been expanded upon at this time. This comment was made by Jeremy Hodges on March 4, 2013

33. Recommendation Label: MOTRA11033

Recommendation: Encourage the electronic transfer of traffic citation information between LEAs, the Prosecutor's Office, and the Courts.

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Some Progress

State Comments: The Office of State Court Administrators is pushing this item as they implement eFiling with the state courts. This comment was made by Hodges.9 on February 4, 2013

34. Recommendation Label: MOTRA11034

Recommendation: Automate the results of the seven day reporting requirement within the Courts so that all compliance information is disseminated electronically.

Recommendation Type:

Major Recommendation?: Yes

Status: Addressed - Some Progress

State Comments: All state courts, municipal courts using JIS and other municipal courts using a system approved by the State Judicial Records Committee submits there result electronically. We will continue to encourage municipal courts to transmit their statistics electronically. This comment was made by Hodges.9 on February 4, 2013

35. Recommendation Label: MOTRA11035

Recommendation: Revise regulations to require ambulance services to report all EMS transports to the Bureau of Emergency Services.

Recommendation Type: Objective

Major Recommendation?: Yes

Status: Addressed - Pending Action

State Comments: 190.30-40 .375 has went through the State Advisory Council, it is now with the Board of Health, the fiscal note has been written. This regulation will be an update from EMS agencies reporting life threats to all calls that the ambulance agency will respond to. This comment was made by HALL.8 on April 4, 2012

36. Recommendation Label: MOTRA11036

Recommendation: Work directly with trauma centers to gain access to BAC results for inclusion into the FARS system.

Recommendation Type:

Major Recommendation?: No

Status: Not Addressed - Concerns about Feasibility and / or Implementation

State Comments: Currently Bureau of EMS does not have a data file that would allow this to occur. The bureau is now reviewing the options to create this data file. This comment was made by Jeremy Hodges on March 3, 2013

37. Recommendation Label: MOTRA11037

Recommendation: Continue the plan to distribute computers to Missouri ambulance services to assist with statewide reporting of ambulance transports.

Recommendation Type: Unknown

Major Recommendation?: No

Status: Addressed - Some Progress

State Comments: The Bureau of EMS has increased the data from the distributed computers, the increase is 86% of data. As of this date 12-12-12 out of the 43 ambulance services receiving the laptops 3 are not reporting due to 3rd party vendor problems, which is being addressed. The Bureau of EMS runs a report monthly to check on the import of data/and or direct entry. We are at this time completed a survey of the remaining Mo Ambulance Services and have established 24 services will receive hardware to assist in completing and sending Ambulance Data. The Bureau of EMS is working in a partnership with MODOT in purchasing the hardware, the Bureau of EMS has a plan to distribute the hardware within 30 days of arrival. This comment was made by HALL.8 on December 4, 2012

38. Recommendation Label: MOTRA11038

Recommendation: Integrate crash and MARS data for use by the Department of Health and Senior Services, the Highway Safety Division, and FARS.

Recommendation Type: Objective

Major Recommendation?: Yes

Status: Addressed - Pending Action

State Comments: The distribution of EMS computers has been completed, 43 agencies received computers, 24 out of 43 are now reporting direct entry, 11 are still in need of training, and 6 are current with 3rd party vendor submission. The integration is planned for summer of 2013, testing will start possibly August 2013 This comment was made by Hodges.9 on March 19, 2013.

39. Recommendation Label: MOTRA11039

Recommendation: Increase use of injury surveillance/CODES data to help provide a complete picture of motor vehicle injuries in the State.

Recommendation Type:

Major Recommendation?: Yes

Status: Not Addressed - Concerns about Feasibility and / or Implementation

State Comments: Department of Health and Senior Services was making available through their website a set of data elements individuals could use to get data. The website could not handle that amount of data and the function had to be removed. DHSS has decided to make available canned reports online for individuals to review. DHSS is currently evaluating other options to open this access back to end users. This comment was made by Jeremy Hodges on March 4, 2013

40. Recommendation Label: MOTRA11040

Recommendation: Support and expand the use of linked data for program evaluation activities.

Recommendation Type: Unknown

Major Recommendation?: No

Status: Addressed - Pending Action

State Comments: The Bureau of EMS has established a rapport with Missouri Highway Patrol Data surveillance and will begin to build a report from our Missouri Ambulance Report Data for the NHTSA Injury Matrix Surveillance that will be sent to the data collection of Missouri State Highway Patrol This comment was made by HALL.8 on December 4, 2012

41. Recommendation Label: MOTRA11041

Recommendation: Continue representation by the Bureau of Emergency Services on the TRCC.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Completed

State Comments: The Bureau of Emergency Medical Services BEMS is an active participant in the TRCC. This comment was made by Hodges.9 on March 2, 2013

42. Recommendation Label: MOTRA11042

Recommendation: Investigate ways to use the injury surveillance data to ensure complete reporting of fatalities to the FARS system.

Recommendation Type:

Major Recommendation?: No

Status: Addressed - Some Progress

State Comments: The Bureau of EMS is currently getting data from the Department of Health in order to help better ensure accurate data is submitted to FARS This comment was made by Jeremy Hodges on March 4, 2013

23 CFR 1200.23 MAP-21, Section 405(d)
Impaired Driving Countermeasure Grant
Appendix D Part 3
Mid-Range State

Introduction:

Under MAP-21 guidance, states that have an average alcohol-impaired driving fatality rate that is higher than 0.30 and lower than 0.60 are considered mid-range States. Missouri has an average alcohol-impaired driving fatality rate of 0.38 for 2011-2013 using data from the Fatality Analysis Reporting System provided by the National Highway Traffic Safety Administration.

Measurement and Data Collection in Missouri:

Crash data is collected by the Missouri State Highway Patrol and entered into the State Traffic Accident Record System. STARS automatically updates MoDOT's Traffic Management System. Crash data reports are available to law enforcement and traffic safety advocates for crash analysis through both databases. Preliminary results for the current year are reported quarterly.

Missouri Data:

According to 2013 data obtained from the Statewide Traffic Accident Records System (STARS), Missouri had a total of 139,293 traffic crashes. The estimated economic loss associated with these traffic crashes was estimated to be \$3,139,130,500. In these traffic crashes, 0.5% (683) involved one or more persons being killed in the incident. In addition, 24.5% (34,140) involved no one being killed but one or more persons being injured in the incident.

In 2013, a total of 757 people died in Missouri traffic crashes. One person was killed every 11.6 hours. The death rate (the number of deaths per 100 million miles of travel) was 1.09 in 2013. The death rate increased from 1.1 in 2011 to 1.2 in 2012 and decreased back to 1.09 for 2013.

Drinking involvement was a significant contributing factor in Missouri's serious traffic crash experience in 2013. Of all 2013 Missouri traffic crashes, 4.1% involved a person drinking. However, of all fatal crashes, 27.5% had a person drinking. A total of 219 persons were killed and 3,307 were injured in these crashes. In 2013, one person was killed or injured in drinking-involved crashes every 2.5 hours in the State. It should be noted that drinking involvement is being under-reported as a causal factor in traffic crashes and is an even greater problem than the above statistics indicate.

Much progress has been made in Missouri since the Special Management Review and subsequent Performance Enhancement Plan in 2007. Missouri has a solid and well established impaired driving program and statewide strategic plan. In fact, for the first time Missouri qualified under SAFETEA-LU, Section 410 as a low fatality rate state in federal fiscal year 2012. However, alcohol-related traffic crashes and deaths are still seriously high and the pain and suffering caused as a result of these totally preventable and senseless acts cannot be measured.

Missouri Statewide Impaired Driving Task Force:

Information on the Missouri Statewide Impaired Driving Task Force can be found in the HSP Attachment 405(d) #1. The task force meeting agendas, minutes and sign-in sheets can be found in the Supplemental Resources section towards the end of this document.

Missouri Statewide Impaired Driving Plan:

Accomplishing Missouri's goal of reducing alcohol-related traffic crashes will be through strategically planned, comprehensive, balanced public awareness campaigns; stepped up high visibility enforcement; education of law enforcement, the public and the judiciary; providing for

stiffer penalties for alcohol-impaired driving offenders, and utilizing a partnership approach that outlines strong opportunities to reduce fatal and serious injuries on Missouri roadways.

Missouri currently outlines efforts to improve traffic safety and reduce alcohol-impaired driving crashes through several statewide plans. These plans include the *Impaired Driving Strategic Plan*; *Missouri's Blueprint to Save More Lives*; the *Highway Safety Plan & Performance Plan*; and the Department's *Tracker*. Each of the plans are developed in different fashions yet builds upon the other.

Missouri followed guidance provided by the Federal Highway Administration and the American Association of State Highway and Transportation Officials in 2004 and established a coalition of safety advocates, The Missouri Coalition for Roadway Safety. The MCRS was charged with leading the statewide implementation of the first strategic highway safety plan (SHSP), *Missouri's Blueprint for Safer Roadways* which set a goal of 1,000 or fewer fatalities by 2008. Our current SHSP is the third edition of the Blueprint, *Missouri's Blueprint to Save More Lives* with a goal of 700 or fewer fatalities by 2016. The MCRS is now developing a team of safety advocates to plan and prepare the state's fourth edition of the Blueprint.

The significance of the MCRS is paramount to traffic safety and the reduction of alcohol-impaired driving in the state. The Coalition operates statewide with eleven subcommittees that are responsible for various areas of traffic safety. The Statewide Impaired Driving Subcommittee focuses on the area specific to reducing fatalities and serious injuries resulting from alcohol-impaired driving. The Statewide Impaired Driving Subcommittee was instrumental in hosting a strategic planning meeting in 2008 with partners across the state, resulting in development of the first impaired driving strategic plan in the state. Information gained from both the strategic planning meeting and the *Impaired Driving Strategic Plan* were utilized in updating both the second and third editions of the statewide strategic plans - *Missouri's Blueprint to Arrive Alive* and *Missouri's Blueprint to Save More Lives*.

The Statewide Impaired Driving Subcommittee hosted a second Summit on July 25 – 26, 2013 in Columbia, Missouri. The goal of the Summit was to bring together key stakeholders from around the state with a vested interest in reducing alcohol-impaired driving crashes in order to revise the Impaired Driving Strategic Plan originally developed in 2008. The Strategic Plan was completed in August 2013 and revised in April 2014. The Statewide Impaired Driving Subcommittee formally approved the April 2014 Strategic Plan during the subcommittee meeting held on July 25, 2014 and is reflected in the minutes. The Uniform Guidelines for State Highway Safety Programs, Guideline Number 8 – Impaired Driving was utilized during the planning process. The Impaired Driving Strategic Plan is included as Attachment 405(d) #2.

Several resources are provided to further clarify the purpose and procedural guidelines of the MCRS, Alcohol and Other Drug Section of the HSP, the Statewide Impaired Driving Subcommittee and the Public Information and Education Subcommittee. The resources can be found in Appendix A through D of this document.

Each of the plans mentioned above can be located on the internet at the locations listed below:

MoDOT's *Tracker* can be found at: www.modot.org/about/Tracker.htm

2014 *Highway Safety Plan & Performance Plan* – www.modot.org/safety/index.htm

Missouri's Blueprint to Save More Lives – www.savemolives.com/the-situation.html

Impaired Driving Strategic Plan (April 2014) – www.savemolives.com/impaired-driving.html

Goals, Performance Measures and Benchmarks:

The Governor's Highway Safety Program is outlined in an annual Highway Safety Plan (HSP) and Performance Plan. The HSP describes how Missouri's Section 402 Highway Safety Program and the new Section 405 National Priority Safety Program including the incentive grant funds and Section 154 transfer funds will be used to promote highway safety within the state. The 2016 HSP encompasses the federal fiscal year October 1, 2015 through September 30, 2016. The following goals, performance measures and benchmarks are outlined in the HSP for the Impaired Driving section:

Goal #1: To decrease fatalities involving drivers with .08 BAC or greater to 230 by 2016:

- 268 by 2013
- 255 by 2014
- 243 by 2015

Performance Measure:

- Number of fatalities involving drivers with .08 BAC or greater

Benchmarks:

- 2012 fatalities involving drivers with .08 BAC or greater = 280
 - 2013 Actual = 248

Goal #2: To increase substance-impaired driving arrests made during grant-funded enforcement activities and mobilizations by .25 percent annually based on a three-year rolling average of grant years 2011, 2012 2013 = 7,975

- 7,995 by 2014 (2012-2014)
- 8,015 by 2015 (2013-2015)
- 8,035 by 2016 (2014-2016)

Performance Measure:

- Number of substance-impaired driving arrests made during grant-funded enforcement activities and mobilizations

Benchmark:

- 2011-2013 substance-impaired driving arrests made during grant-funded enforcement activities and mobilizations = 7,975 (DWI)
 - 2012 – 2014 three year rolling average = 7,054

Goal #3: To decrease fatalities involving alcohol-impaired drivers under the age of 21 years to 14 by 2016:

- 16 by 2013
- 15 by 2014
- 15 by 2015

Performance Measure:

- Number of fatalities involving alcohol-impaired drivers under the age of 21 years

Benchmark:

- 2012 fatalities involving alcohol-impaired drivers under the age of 21 years = 17
 - 2013 Actual = 28

Missouri Statewide Impaired Driving Task Force (HSP Attachment 405(d) #1):

Governor Mel Carnahan signed Executive Order 94-19 on May 25, 1994 establishing the Governor's Commission on Driving While Intoxicated and Impaired Driving and appointing the Director of the Department of Public Safety as the chair. The Commission met for several years and term limits for the commissioners were allowed to expire. The Governors elected since the Carnahan administration did not appoint new members to the Commission and the Commission was not very active. In fact, many of the members were no longer serving on the Commission.

Staff of Missouri's current Governor Jay Nixon, have asked many questions about the Statewide Impaired Driving Subcommittee including structure and effectiveness. Governor Nixon has convened several special meetings to address specific issues of concern and has supported the structure of the Statewide Impaired Driving Subcommittee under the Missouri Coalition for Roadway Safety. A member of the Department of Public Safety serves on the Statewide Impaired Driving Subcommittee and reports to the Governor's Office on issues of concern.

The Missouri Coalition for Roadway Safety was established in 2004 and led the effort to reduce fatal and serious injuries resulting from traffic crashes through implementation of *Missouri's Blueprint for Safer Roadways* (now *Missouri's Blueprint to Save More Lives*). As a natural result of the Coalition efforts subcommittees were formed to work on specific areas of concern statewide such as impaired driving related traffic crashes. At that time, Charles Jackson, Director of the Department of Public Safety and Chair of the Governor's Commission on Impaired Driving, agreed to integrate the Commission into the structure and process of the MCRS efforts. Joyce Shaul, Director of Highway Safety and the Governor's Highway Safety Representative at the time, sent a letter to each member of the Governor's Commission on Driving While Intoxicated and Impaired Driving discussing this plan. Since that time the Statewide Impaired Driving Subcommittee has been very active and is now chaired by Dwight Scroggins, Buchanan County Prosecutor and Captain Norman Murphy, Missouri State Highway Patrol. Statewide Impaired Driving Subcommittee members include representation from law enforcement, the criminal justice system (e.g., prosecution, state courts), driver licensing, treatment and rehabilitation, ignition interlock, public health, Mothers Against Drunk Driving, public safety, and the Department of Transportation.

The Interim Director of the Missouri Department of Transportation, Roberta Broeker, serves as the Governor's Highway Safety Representative and is very supportive of both the Missouri Coalition for Roadway Safety and each of the Statewide Subcommittees. MoDOT staff and funding are utilized to support the activities and structure of the MCRS.

The Statewide Impaired Driving Subcommittee meets quarterly and works on issues such as legislation, DWI reporting, blood draws, updating breath alcohol instrumentation, BAC testing in fatal crashes and expansion of DWI courts in the state. **Statewide Impaired Driving Subcommittee meetings were held in 2014 on July 25 and October 17 and in 2015 they were held on January 30, and June 16.** In the Supplemental Resources section immediately following this document, you will find copies of agendas, sign-in sheets, meeting minutes and any handouts provided at those meetings.

Subcommittee members are very active and are always exploring ways to reduce impaired driving related crashes, improve reporting and establish more effective ways to deal with repeat offenders. The Subcommittee published the second edition of the impaired driving strategic plan in August 2013 and revised it again in April 2014. Subcommittee members are always looking

for gaps in subcommittee participation and follow guidance provided by NHTSA in *A Guide for Statewide Impaired Driving Task Forces*.

September 2, 2004

Mr. Charles Jackson
Missouri Department of Public Safety
Truman Building, Room 870
Jefferson City, MO 65101

Dear Charles:

Transportation Secretary Mineta has directed the Federal Highway Administration (FHWA), the National Highway Traffic Safety Administration (NHTSA) and the Federal Motor Carrier's Safety Administration (FMCSA) to join forces in an aggressive effort to reduce the number of people killed on the nation's highways.

In response to the national effort, a small working group of safety experts collected and analyzed data and contacted more than 150 additional advocates gaining ideas and input on how to best impact traffic safety problems in Missouri. The group compiled all of the information in "Missouri's Blueprint for Safer Roadways." The membership of the Missouri Coalition of Roadway Safety (MCRS) voted to support "Missouri's Blueprint for Safer Roadways" as a guidance document for the state. Attached is a copy of this document for your information.

Missouri has lost more than 2,400 people on our roadways over the past two years. The goal set forth in the blueprint is **"less than 1000 fatalities per year by 2008."** In order to reach this goal, we need the support and assistance of safety advocates across the state. At the MCRS meeting, an Executive Committee was appointed and a number of sub-committees are planned to help address specific tasks.

The Executive Committee saw no reason to appoint a DWI Committee when a Governor's Commission on DWI and Impaired Driving already exists. It is their desire to integrate the DWI Commission into the Blueprint process and touch on the expertise contained within this group. Your Chair, Mr. Charles Jackson has agreed to this plan.

Your name will be added to the list of MCRS members and mailings will be sent to you as information becomes available. I hope you will be willing to partner with other public and private safety advocates in reducing the number of people who die on our roadways each year.

Mr. Charles Jackson
September 3, 2004

Impaired Driving Subcommittee

On behalf of the Missouri Coalition for Roadway Safety's Impaired Driving Subcommittee, it is our privilege to present the second edition of Missouri's Impaired Driving Strategic Plan.

Despite impressive reductions in traffic-related fatalities and serious injuries in Missouri over the past several years, crashes involving impaired drivers continue to be a serious problem.

To address the issue of impaired driving, the Impaired Driving Subcommittee facilitated development of the strategic plan. The plan focuses on reducing impaired driving crashes by establishing key strategies in the area of program management and strategic planning, prevention, the criminal justice system, communication, alcohol and other drug misuse, and program evaluation and data.

In addition to drafting the plan, the Impaired Driving Subcommittee will oversee coordination and implementation of the Impaired Driving Strategic Plan.

We would like to extend a special thanks to all those who contributed to the development of this plan. We look forward to working with each of you over the coming months and years to carry out the vision outlined in the plan.

Mission

Improve traffic safety in Missouri by fostering effective communication, coordination and collaboration among public and private entities and thereby reduce the number of deaths and injuries resulting from impaired driving traffic crashes

Vision

Toward Zero Impaired Driving Deaths on Missouri Roadways

Overall Goal

Reduce fatalities involving drivers who are impaired by alcohol and/or other drugs by two percent annually and support the four percent reduction in overall fatalities as outlined in *Missouri's Blueprint to Save More Lives*

Benchmark

This goal will be measured by the number of fatalities involving at least one driver who had a BAC of .08 or above, or was impaired by drugs

The baseline established in 2011 of 234 alcohol- and drug-related fatalities will be used

Background

Amazing results best describe Missouri's effort to save more lives and reduce serious injuries occurring on our roadways. Over the last eight years, the State has experienced an overall reduction of 34.3 percent in fatalities and 36.2 percent in serious injuries. Between 2005 and 2012, Missouri's annual traffic fatalities fell from 1,257 to 826. This remarkable decrease is due in part to aggressive implementation of the strategic highway safety plans.

Much progress has also been made in the area of alcohol-impaired driving since 2005 when the yearly alcohol-related fatality rate per 100 million vehicle miles traveled in Missouri was 0.75 compared to 0.41 in 2012.

Alcohol-Impaired Driving Fatality Rate per 100 Million Vehicle Miles Traveled (VMT)

NOTE: Utilization of a new definition of the fatality rate began in 2007 and is based on the BAC of all involved drivers and motorcycle riders (operators)

Missouri followed guidance provided by the Federal Highway Administration and the American Association of State Highway and Transportation Officials in 2004 and established a coalition of safety advocates, The Missouri Coalition for Roadway Safety. The MCRS was charged with leading the statewide implementation of the first strategic highway safety plan, *Missouri's Blueprint for Safer Roadways* which set a goal of 1,000 or fewer fatalities by 2008. The MCRS is now working with the third edition of the Blueprint, *Missouri's Blueprint to Save More Lives* with a goal of 700 or fewer fatalities by 2016.

The significance of the MCRS is paramount to traffic safety and the reduction of alcohol-impaired driving in the state. The Coalition operates statewide with ten subcommittees that are

responsible for various areas of traffic safety. The Statewide Impaired Driving Subcommittee focuses on the area specific to reducing fatalities and serious injuries resulting from alcohol-impaired driving. The Statewide Impaired Driving Subcommittee was instrumental in hosting a strategic planning meeting in 2008 with partners across the state, resulting in development of the first impaired driving strategic plan in the state. Information gained from both the strategic planning meeting and the *Impaired Driving Strategic Plan* were utilized in updating both the second and third editions of the statewide strategic plans - *Missouri's Blueprint to Arrive Alive* and *Missouri's Blueprint to Save More Lives*.

Additional information about the purpose and procedural guidelines of the MCRS can be found in Appendix A.

Missouri currently outlines efforts to improve traffic safety and reduce alcohol-impaired driving crashes through several statewide plans. These plans include *Missouri's Impaired Driving Strategic Plan*; *Missouri's Blueprint to Save More Lives*; the *Highway Safety Plan & Performance Plan*; and the Department's *Tracker*. Each of the plans is developed in different fashions yet builds upon the other. The plans mentioned above can be located on the internet at the locations listed below:

Missouri's Blueprint to Save More Lives – www.savemolives.com/the-situation.html

2013 Highway Safety Plan & Performance Plan – www.modot.org/safety/index.htm

Impaired Driving Strategic Plan – www.savemolives.com/impaired-driving.html

MoDOT's *Tracker* can be found at: www.modot.org/about/Tracker.htm

Introduction

In 2012, a total of 826 people died in traffic crashes on Missouri's roadways. One person was killed every 10.6 hours. The death rate was 1.2 per 100 million vehicle miles of travel. The death rate has decreased from 1.2 in 2010 to 1.1 in 2011. Although these numbers are still too high, Missouri has seen a significant decline in overall traffic fatalities since 2005. One area where less improvement has been made is in crashes caused by drivers who are impaired by alcohol. These drivers are responsible for causing a substantial number of traffic crashes on Missouri roads, especially those resulting in death or serious injury.

Alcohol-impaired driving involvement, in particular, was a significant contributing factor in Missouri's serious traffic crash experience in 2012. Of all 2012 Missouri traffic crashes, 4.3 percent involved a person drinking. However, of all fatal crashes, 27 percent had a person drinking. A total of 214 persons were killed and 3,510 were injured in these crashes. In 2012, one person was killed or injured in alcohol-impaired driving-involved crashes every 2.4 hours in the State. It should be noted that alcohol-impaired driving involvement is being under-reported as a causal factor in traffic crashes and is an even greater problem than the above statistics indicate. As indicated in the graphs below, alcohol-impaired driving-related traffic crashes and deaths are still a serious problem in Missouri.

Alcohol-impaired drivers typically make more than one bad decision. Often times they also choose not to wear their safety belts. Of those alcohol-impaired drivers who were killed in 2012 traffic crashes, 85 percent were not wearing a safety belt and 72.5 percent of those seriously injured were unbelted.

Missouri's Impaired Driving Strategic Plan focuses on reducing impaired driving crashes by including components in the area of program management and strategic planning, prevention, the criminal justice system, communication, alcohol and other drug misuse, and program evaluation and data. Each of these components will be described in more detail throughout the plan with strategies

outlined in order to achieve the specific goals listed below. This plan will also support the goals outlined in the Highway Safety Plan & Performance Plan, Alcohol and Other Drugs section included in Appendix B.

Specific and Measureable Goals of the Impaired Driving Strategic Plan:

- Reduce the number of fatalities and serious injuries involving an impaired driver
- Reduce the number of fatal and serious injury crashes involving an impaired driver
- Reduce the number of fatalities involving an alcohol-impaired driver with .08 BAC or greater
- Reduce the number of fatalities and serious injuries involving a drug-impaired driver (other than alcohol)
- Decrease the number of fatalities involving impaired drivers under the age of 21
- Increase the number of limited driving privileges issued by DWI courts
- Increase the number of participants in DWI courts
- Increase the number of graduates of DWI courts
- Increase the graduation rate of DWI court participants
- Increase the number of DWI cases heard in state court
- Increase the number of law enforcement agencies and local prosecutors making entries in DWITS
- Decrease in the percentage of breath alcohol test refusals
- Increase the number of people attending SATOP classes by program type (including the serious and repeat offender program)
- Increase the number of drugged driving arrests
- Increase the number of convictions for DWI (1st, 2nd, 3rd offense, etc)
- Increase the number of ignition interlock devices installed

I. Program Management and Strategic Planning

Missouri's impaired driving program is based on strong leadership and sound policy development. Efforts are driven by data and focus on the most at-risk populations. Programs and activities carried out under the Strategic Plan are guided by problem identification and monitored for effectiveness.

➤ **Task Forces or Commissions:**

Governor Mel Carnahan signed Executive Order 94-19 on May 25, 1994 establishing the Governor's Commission on Driving While Intoxicated and Impaired Driving and appointing the Director of the Department of Public Safety as the chair. The Commission met for several years and term limits for the commissioners were allowed to expire. The Governors elected since the Carnahan administration did not appoint new members to the Commission and the Commission was not very active. In fact, many of the members were no longer serving on the Commission.

Staff of Missouri's current Governor, Jay Nixon, has asked many questions about the Statewide Impaired Driving Subcommittee including structure and effectiveness. Governor Nixon has convened several special meetings to address specific issues of concern and has supported the structure of the Statewide Impaired Driving Subcommittee under the Missouri Coalition for Roadway Safety. A member of the Department of Public Safety serves on the Statewide Impaired Driving Subcommittee and reports to the Governor's Office on issues of concern.

The Missouri Coalition for Roadway Safety was established in 2004 and led the effort to reduce fatal and serious injuries resulting from traffic crashes through implementation of *Missouri's Blueprint for Safer Roadways* (now *Missouri's Blueprint to Save More Lives*). As a natural result of the Coalition efforts, subcommittees were formed to work on specific areas of concern statewide such as impaired driving related traffic crashes. At that time, Charles Jackson, Director of the Department of Public Safety and Chair of the Governor's Commission on Impaired Driving, agreed to integrate the Commission into the structure and process of the MCRS efforts. Joyce Shaul, Director of Highway Safety and the Governor's Highway Safety Representative at the time, sent a letter to each member of the Governor's Commission on Driving While Intoxicated and Impaired Driving discussing this plan. Since that time the Statewide Impaired Driving Subcommittee has been very active and is now chaired by Dwight Scroggins, Buchanan County Prosecutor and Captain Greg Smith, Missouri State Highway Patrol. Statewide Impaired Driving Subcommittee members include representation from law enforcement, the criminal justice system (e.g., prosecution, state courts), driver licensing, treatment and rehabilitation, ignition interlock program management, public health, Mothers Against Drunk Driving, public safety, Alcohol and Tobacco Control, and the Department of Transportation.

The Director of the Missouri Department of Transportation, Dave Nichols, serves as the Governor's Highway Safety Representative and is very supportive of both the Missouri Coalition for Roadway Safety and each of the Statewide Subcommittees. MoDOT staff and funding are utilized to support the activities and structure of the MCRS.

The Statewide Impaired Driving Subcommittee meets quarterly and has most recently worked on issues such as legislation, DWI reporting, blood draws, updating breath alcohol instrumentation, BAC testing in fatal crashes and expansion of DWI courts in the state. The Impaired Driving Strategic Plan was created and endorsed by the Impaired Driving Subcommittee. The Impaired Driving Subcommittee will continue support of the Impaired Driving Strategic Plan by overseeing the implementation of strategies outlined in this document.

➤ **Strategic Planning:**

In July of 2013, the Impaired Driving Subcommittee and the Missouri Department of Transportation hosted a two-day Summit to update the current Impaired Driving Strategic plan utilizing the Uniform Guidelines for State Highway Safety Programs, Guideline Number 8. There were thirty-three participants in attendance at the summit who represented law enforcement, treatment, prosecution, courts, MADD, transportation, driver licensing, ignition interlock program management, NHTSA, Department of Health, and other traffic safety groups.

Utilizing the Uniform Guidelines and the existing Impaired Driving Strategic Plan, those attending the two-day summit were guided through a rough draft of a planning document to initiate discussion and prompt strategic planning and development. That working document was updated to reflect comments and concerns from the planning group at the Summit to create the second version of Missouri's Impaired Driving Strategic Plan. The Impaired Driving Subcommittee members have reviewed this plan for final approval before submission to NHTSA.

➤ **Program Management:**

The impaired driving program is coordinated by a staff person with MoDOT's Division of Traffic and Highway Safety, who serves as the impaired driving coordinator for the Department. The coordinator works with the co-chairs of the Impaired Driving Subcommittee to facilitate coordination, resource sharing, communication and strategic planning among those who serve on the subcommittee and other agencies and organizations. In addition, the State has a Traffic Safety Resource Prosecutor who is instrumental with coordination efforts as well.

The Subcommittee guides efforts outlined in the Impaired Driving Strategic Plan. Individual members are often asked to provide updates to the Impaired Driving Subcommittee on particular areas of interest or concern to measure or evaluate progress (e.g., DWI courts, blood testing, BAC reporting, etc). Subcommittee members are very active in the area of Impaired Driving and collectively bring a wealth of knowledge and experience to the table. A list of the Impaired Driving Subcommittee members can be found in Appendix C.

➤ **Resources:**

The structure of the MCRS and the ten subcommittees allows for enhanced communication and resource sharing among all agencies and organizations involved. Although there is currently a heavy reliance on grant funding, there are other resources utilized in the state. Many agencies and organizations have funding that covers some of the impaired driving programs. However, frequently agencies struggle with limited funding to support the programs they are tasked with or stretching the funding to meet the demands placed on the system.

One such resource is the Mental Health Earnings Fund which funds the Substance Abuse Traffic Offender Program (SATOP) established by Missouri legislation in 1993. SATOP contracts with and

certifies programs to provide assessment, education, and treatment interventions. SATOP is required by law for license reinstatement and is funded solely from fees paid by the SATOP participant.

Many of the costs associated with impaired driving programs or sanctions in the State are borne by the DWI offender. Recoupment of those costs are collected or recovered in many ways; e.g., recoupment funds, DWI court participant fees, SATOP fees and direct cost charged by the service provider.

➤ **Data and Records:**

Missouri currently uses data from multiple sources including the Fatality Analysis Reporting System, Crash Outcome Data Evaluation System, State Traffic Accident Record System, the Traffic Management System, Department of Revenue Driver License Bureau and General Counsel, Judicial Information System, and Department of Mental Health, among others. The State also has a Traffic Records Coordinating Committee to represent the interests of the stakeholders in the data collection and reporting process.

Great strides have been made toward the goal of ensuring accurate criminal records with the creation of the DWI Tracking System (DWITS). DWITS offers law enforcement officers, prosecutors and courts the ability to get real time information on the impaired driving record of anyone arrested for an impaired driving offense in this state. Unfortunately, reporting to DWITS is not currently mandatory and participation is not currently universal.

Missouri law currently requires an Alcohol Influence Report (AIR) to be filed any time someone is arrested for an intoxication related traffic offense and has a blood alcohol concentration of .08 (or .02 for minors) and above or refuses to submit to a chemical test. These reports are not always filed in a timely manner or filed at all. Also, unless there is a corresponding criminal conviction, a person who drives under the influence of a drug other than alcohol may avoid licensing sanctions.

While we have a thorough and comprehensive crash report, impaired driving tends to be underreported, particularly as it relates to drugs other than alcohol. This is often due to a failure to report alcohol or drug use as a causal factor and a failure to recognize the indicators of impairment in all cases.

➤ **Communication Program:**

Missouri currently has a very aggressive statewide communication program that is coordinated through the Public Information and Education Subcommittee of the MCRS. The chairs of the PI&E subcommittee are members of MoDOT staff and coordinate efforts of the PI&E Subcommittee. The PI&E Subcommittee coordinates all traffic safety related activities of the MCRS including the Impaired Driving Subcommittee. Members of the PI&E Subcommittee can be found in Appendix D.

Many of the statewide communication efforts can be found on the MCRS website at www.saveMOLives.com. Information about each of the traffic safety campaigns are on that site as well

as media releases, graphics, statistics and more. The website allows members of the coalition and public to access traffic safety information in one location and in a timely manner.

It is important to mention that many of the traffic safety partners also have their own campaigns as well. For example, MADD and the Missouri State Highway Patrol conduct very specific impaired driving campaigns while supporting the MCRS efforts as well. Participating agencies and organizations use the same ARRIVE ALIVE logo or message whenever possible to leverage campaign message, budgets and overall efforts.

The vast majority of PI&E efforts center around earned and paid media efforts in support of Missouri's high visibility enforcement. Those efforts are outlined more specifically in the criminal justice section of this plan with a heading titled "Publicizing High Visibility Enforcement."

Strategies in the Program Management and Strategic Planning Area:

1. Formalize activities of the Impaired Driving Subcommittee
 - a. Keep official minutes for each meeting
 - b. Expand membership to include key areas that are not currently represented (i.e. the defense bar, judges, hospitality industry)
 - c. Formalize the operational procedures for the subcommittee
 - d. Adopt parliamentary procedures to govern voting and other actions taken by the subcommittee
2. Develop short and long term objectives in order to meet the goals outlined in the strategic plan
3. Enact legislation that provides resources dedicated to impaired driving in the state
4. Educate state, county and local officials about the value of impaired driving initiatives
5. Educate law enforcement agencies about their ability to recoup the costs of impaired driving investigations and ensure that these funds are returned to the arresting agency for DWI enforcement efforts

II. Prevention

Missouri will seek to reduce the incidences of impaired driving through public health approaches, including altering social norms, changing risky and dangerous behaviors, and creating safer environments.

➤ **Promote Responsible Alcohol Service:**

Service to underage drinkers and over-service to those over 21 by bars and restaurants contributes to impaired driving crashes in this state. Missouri conducts a variety of programs that address this particular issue including online server training, a university based designated driver program, and an educational program geared for Missouri college student organizations to promote hosting responsible events and parties.

State budget cuts during the 2010 legislative session eliminated seventeen liquor control agents within the Division of Alcohol and Tobacco Control who participated in the underage drinking prevention program. The State of Missouri still has an underage drinking prevention program; however, this action forced different approaches to combat this issue and places more burden on local jurisdictions to fill the gap. The budget cuts to the Division of Alcohol and Tobacco Control limited the ability of their staff to continue at the same level of training for alcohol beverage retailers and servers.

In an effort to fill some of the gap created, The Wellness Resource Center at the University of Missouri–Columbia offers training to alcohol beverage retailers and servers free of charge. The State of Missouri Alcohol Responsibility Training (SMART) is sponsored by MoDOT and was created with the help of an advisory board of police, bar owners, the Division of Alcohol and Tobacco Control, Partners in Prevention, and Partners in Environmental Change coalitions (UMC based programs). The SMART program launched on December 1, 2004 and is proving to be a very successful program. The Wellness Resource Center promotes the SMART program statewide and works with the Missouri Petroleum Marketers and Convenience Store Association to publish articles in MPCA's newsletter, in addition to conducting other marketing and promotional activities.

SMART is an online responsible beverage service training program that covers the problems of serving underage patrons: how to spot a fake ID; and the laws and liability concerns related to serving underage customers. In addition, the second phase of the training covers the problem of over serving patrons: how to spot someone who's intoxicated; tips on how to keep someone from becoming intoxicated; tips on how to handle an intoxicated customer; and laws and liability concerns related to serving intoxicated customers. Servers and sellers of alcohol take a test upon completion of the program which provides them with certification for a two year period. The program allows managers of retail establishments to access information and check which employees have or have not passed the program. In the first year, over 1,200 servers had enrolled in the program with 885 servers completing certification. In 2007, three years after the launch of the program, 255 establishments were enrolled representing 18 counties. In 2008, the program was expanded to offer training services to employees of package liquor stores and grocery stores. By the fall of 2012, 1,658 businesses and groups had enrolled with 9,776 servers enrolled and 6,832 servers holding current certification.

The Division of Alcohol and Tobacco Control provides underage alcohol purchase compliance program training to law enforcement officers who are conducting compliance buy programs. The purpose of the training is to provide law enforcement agencies and retail liquor industry members and their employees with the basic understanding of State Liquor Laws. The training assists these entities in understanding the State Supervisor's permissive standards per Section 311.722, RSMo, for the use of minors in investigations by any state, county, municipal or other local law enforcement authority and to improve the successful administrative adjudication of alleged liquor law violations.

MoDOT's Division of Traffic and Highway Safety provides grant funding for high visibility enforcement during the National Labor Day crackdown and quarterly enforcement activities. The quarterly effort in May will focus on underage drinking during the graduation season through compliance checks and/or party dispersal activities. Underage drinking enforcement activities will focus on the twenty-two counties that rank within the top twenty with the highest incidence of fatal and disabling injury crashes where at least one driver was a drinking driver under 21. Those counties are: St. Louis, Jackson, St. Charles, Greene, Boone, Jefferson, Clay, Jasper, Franklin, St. Louis City, Buchanan, Johnson, Cass, Newton, Christian, Howell, St. Francois, Taney, Butler, Cape Girardeau, Pettis, and Phelps. More information on the HVE program can be found in the Criminal Justice Section of this plan.

Strategies for Promoting Responsible Alcohol Service:

1. Establish regulations to require server training and certification or licensing for individuals who will be serving alcohol in retail establishments
2. Promote and expand the approved server training program
3. Establish additional cooperative local partnerships between law enforcement agencies and bar and restaurant owners, their associations and representatives, and retailers or anyone who sells alcohol and drugs
4. Look at ways to prevent alcohol service to minors in retail establishments
5. Develop and promote model ordinances and best practices for responsible beverage serving, server training programs, and enforcement programs
6. Continue to improve youth alcohol impairment prevention programs such as PIRE training, TREND, SADD, Traffic Offenders Program, and MADD programs

➤ **Promote Transportation Alternatives:**

Missouri is a largely rural state which presents unique challenges for promoting transportation alternatives. Even in small communities, however, designated driver programs can be effective. In more urban areas, efforts can be directed at promoting designated driver and safe ride programs and in making the communities aware of public transportation options.

The Wellness Resource Center at the University of Missouri–Columbia coordinates the CHEERS program by educating college students in Missouri about the importance of using a designated driver who has had nothing to drink through programs and educational information. CHEERS was designed as a rewards program to increase the number of designated drivers throughout the state of Missouri. As an environmental approach to reducing irresponsible drinking and the number of impaired drivers, bars, restaurants and nightclubs participating in CHEERS provide free non-alcoholic beverages to designated drivers. This serves as an incentive for those being responsible for the safety of their friends and community, and reiterates in the community that drinking and driving is unacceptable. The CHEERS program is present on 25 individual campus or community chapters across the state and has over 300 establishments participating.

Strategies for Promoting Transportation Alternatives:

1. Encourage efforts to promote programs that allow drinkers 21 and older to reach their destinations without driving, especially in high risk communities during high risk times
2. Increase awareness of existing transportation alternatives in the state
3. Provide a link to cab information on SaveMOLives website
4. Explore ways to expand the awareness of the existing transportation alternatives
5. Communicate with bar owners and cab companies about existing transportation alternatives

➤ **Conduct Community Based Programs:**

Missouri seeks to prevent impaired driving fatalities by educating its citizens about the dangers it presents and the costs it can impose on the community, innocent victims, and offenders. Community-based programs presented through a variety of settings help in this effort. The Missouri State Highway Patrol, MADD, ThinkFirst Missouri, Missouri Youth Adult Alliance, local law enforcement agencies, Safety Councils, and many others provide educational programs and literature regarding the impact of impaired driving to schools, employers and community groups. In addition, the seven regional coalitions under the MCRS offer programs and materials to local community groups.

Below are a few examples of programs offered in Missouri:

- ThinkFirst Missouri is a program of the University of Missouri, School of Medicine, Department of Physical Medicine & Rehabilitation and serves as an affiliate chapter of the ThinkFirst National Injury Prevention Foundation. ThinkFirst Missouri offers a variety of programs in Missouri including: The Traffic Offenders Program; Community/Corporate Program; Youth Curriculum; and a Teen Program for schools.
- Missouri Partners in Prevention (PIP) is a statewide coalition of nineteen institutions of higher education in Missouri and relevant state agencies (Division of Alcohol and Tobacco Control, Division of Alcohol and Drug Abuse, Division of Traffic and Highway Safety) that collaboratively develop strategies for reducing and preventing high-risk drinking among Missouri college students. PIP's primary goals include enhancing the communication network among campus administrators, law enforcement and policy professionals, communicating with college students and their parents about underage alcohol use and high risk drinking, and improving universities' effectiveness at decreasing the abuse of alcohol and other drugs among Missouri college students. The heart of PIP's coalition is the collaboration that exists between prevention professionals in state agencies and on college and university campuses. At monthly meetings, PIP representatives discuss current prevention issues and trends and receive advice and suggestions from each other and from their colleagues in state agencies. During these monthly meetings, the representatives are trained on relevant prevention issues, including communication strategies related to underage alcohol use and high risk drinking.

Strategies for the Area of Conducting Community-Based Programs:

1. Expand screening and brief intervention programs in schools
2. Incorporate coalition/team training strategies using the structure of the community coalitions already in place
3. Continue to educate children, parents and the community about substance abuse issues
4. Develop model policies for schools to address underage drinking issues
5. Expand Drug Impairment Training for Educational Professionals
6. Expand the Safe and Sober program in schools
7. Explore the effectiveness and feasibility of random drug testing in schools (consult with DESE)
8. Work with employers to review their safety policies as they relate to the issue of impaired driving
9. Educate employers about the ignition interlock laws and requirements in the state
10. Increase communication between the Impaired Driving Subcommittee and the regional coalitions
11. Increase support of impaired driving mobilizations
12. Expand MADD's Power of Parents Program in Missouri

III. Criminal Justice System

All of the components of the criminal justice system in Missouri—law enforcement, prosecutors, courts, probation and parole, and our driver licensing authority—work together to achieve specific and general deterrence of impaired driving. Specific deterrence focuses on holding accountable those individuals who drive under the influence of alcohol and other drugs by imposing appropriate sanctions upon arrest which can include criminal penalties, driver license sanctions and assessment and treatment for substance abuse issues. General deterrence focuses on creating a perception that impaired drivers will be apprehended and prosecuted thereby discouraging people from driving under the influence. Efforts in each component of the criminal justice system are described in detail below.

➤ **Laws:**

Missouri currently has two separate criminal offenses that address impaired driving. The general driving while intoxicated statute (section 577.010, RSMo) makes it an offense to drive in an intoxicated or drugged condition. This includes being under the influence of alcohol, a controlled substance, a drug or a combination of any of these. There is a separate criminal offense for driving with excessive blood alcohol content (section 577.012, RSMo), which is defined as having a blood alcohol concentration of .08 or above. Although Missouri does not have a statute that specifically imposes additional license withdrawal for driving with a high BAC, additional criminal sentencing requirements are available for offenders who operate a motor vehicle with a BAC of .15 or above and for offenders who operate a motor vehicle with a BAC of .20 or above. Missouri does have laws regarding repeat offenders and

imposing harsher criminal sanctions for each subsequent offense, laws making it a crime to drive with a revoked or suspended license, laws making it a crime to drive impaired with a minor in the vehicle, and laws making it a crime to kill or injure another person while driving under the influence of alcohol or other drugs.

Under the provisions of sections 577.010 and 577.012, RSMo, an offender who pleads or is found guilty of a first impaired driving offense cannot be granted a suspended imposition of sentence (SIS) unless he or she is placed on a term of probation for a minimum of two years. If an offender has a blood alcohol concentration of .15 percent or greater, and a DWI court or other court-ordered treatment program is available in that judicial circuit, the person cannot be granted suspended imposition of sentence (SIS) until he or she successfully completes the treatment program. If a suspended imposition of sentence is not imposed under these provisions, then an offender who tests a .15 percent to .20 percent BAC must serve a minimum of 48 hours imprisonment and an offender who tests a .20 percent or above must serve a minimum of five days imprisonment. In addition, under several provisions of Missouri law, impaired driving offenders must complete an approved substance abuse traffic offender program (SATOP) for license reinstatement. A court-ordered waiver of the SATOP requirement is not permitted for offenders who have more than one alcohol offense or who test a .15 percent or above BAC.

Under section 577.023, RSMo, Missouri law enhances the criminal penalties for repeat impaired driving offenders. For an offender with a second offense within a five-year period, they are classified as a “prior offender,” a class A misdemeanor, subject to a fine of up to \$1,000, and a term of imprisonment not to exceed 1 year. For an offender with two prior offenses, they are classified as a “persistent” offender, a class D felony, punishable by a term of imprisonment up to four years, and a fine not to exceed \$5,000. An offender with three prior intoxication-related traffic offenses is classified as an “aggravated” offender, a class C felony, with a term of imprisonment of up to 7 years, and a fine up to \$5,000. A “chronic” offender is a person with four or more prior offenses, a class B felony, punishable by a term of imprisonment of a minimum of five years, and not more than 15 years.

Section 577.023 also restricts the circumstances in which an offender may be granted probation or parole by a court. An “aggravated” must serve a period of at least sixty days imprisonment, and a “chronic” offender a minimum of two years, prior to being eligible for probation or parole. For a “persistent” offender, he or she must either serve a minimum of thirty days of jail time, or perform at least 60 days of community service involving at least 480 hours, or successfully complete a DWI court or other court-approved and supervised treatment program. For an offender classified as a “prior” offender, he or she must serve a minimum period of imprisonment of ten days, or perform at least 30 days of community service involving a minimum of 240 hours, or successfully complete a DWI court or other court-approved treatment program.

Missouri law currently allows for law enforcement agencies to conduct sobriety checkpoints, utilize passive alcohol sensors, and obtain more than one evidential chemical test. Missouri law also provides that officers may administer a pre-arrest chemical test to any driver suspected of driving while intoxicated or with excessive blood alcohol content. Missouri law instructs law enforcement officers to

make all reasonable efforts to administer a chemical test to any person suspected of driving a motor vehicle that is involved in a collision resulting in death or serious physical injury.

With regard to penalties, Missouri imposes license sanctions for refusing to submit to a chemical test and for testing .08 or above for adult drivers, and .02 or above for minors. This sanction is a 90-day license suspension for testing over the statutory threshold for a first offense, and a one-year revocation for an offender with a prior alcohol offense within a five-year period. A one-year license revocation is imposed for those drivers refusing to submit to a chemical test. Missouri also has provisions requiring certain offenders to install an ignition interlock on vehicles they operate in order to get their driver license reinstated. In addition, Missouri has a Minor in Possession law, which makes it illegal for any person under 21 years of age to purchase, possess or consume ANY amount of alcohol (.02 percent or above). Under the law, their driver license will be suspended or revoked. Finally, Missouri has laws requiring impaired driving offenders to be assessed for substance abuse issues and to receive treatment, where appropriate. More information on assessment and treatment requirements can be found in that section of this plan.

Where a driver is operating a motor vehicle, and either tests over the statutory limit for alcohol concentration (adult or minor) or refuses to submit to a chemical test, the arresting officer is to forward an Alcohol Influence Report to the Department of Revenue. The report is used to determine whether a license suspension or revocation will be imposed. Department staff recently compiled statistics from these reports for a six-year period from 2009 through 2013. The statistics reveal that over this five-year period the number of reports filed with the Department by law enforcement officials statewide have decreased by nearly 26 percent. While the total number of offenders reported to the Department has declined, the number of drivers who refuse to submit to chemical testing have increased from 30 percent of the total to 32 percent, indicating that nearly one third of drivers arrested for an impaired driving offense refuse to submit to testing. During this same period, the average blood alcohol concentration for drivers who tested increased from a .150 percent average in 2009 to .153 percent in 2013.

Impaired drivers typically make more than one bad decision. Often times they also choose not to wear their safety belts. Of those impaired drivers who were killed in 2012 traffic crashes, 80 percent were not wearing a safety belt and 61 percent of those seriously injured were unbelted. Improvement in the area of safety belt use could dramatically impact the number of people killed and seriously injured in traffic crashes involving impaired drivers.

Missouri does not currently have laws criminalizing the refusal of a chemical test or the possession of an open container in the passenger compartment of a vehicle. This type of legislation has been filed in the past but has not passed through the legislature. Despite this fact, other laws could be adopted to improve the enforcement and prosecution of impaired drivers.

Strategies in the Area of Legislation:

1. Seek primary enforcement of Missouri's seat belt law
2. Make it a crime to refuse to submit to a chemical test upon arrest for an impaired driving offense
3. Seek legislation to amend the appeal process for chemical refusal license appeals removing them the Circuit Court and placing them in the Department of Revenue administrative process
4. Expand local primary seat belt ordinances
5. Seek legislation that would subject individuals who drive under the influence of a drug other than alcohol to civil licensing sanctions where there is a toxicology report that is positive for illicit drug use or prescription drug misuse or abuse
6. Seek legislation requiring mandatory input of all arrest and prosecution information on intoxication-related traffic offenses into the DWI Tracking System
7. Improve/enhance civil liability of dram shop law
8. Enact legislation that provides resources dedicated to impaired driving in the state
9. Modify current statutes to impose penalties on hospital staff who refuse a law enforcement officer's request or court order to draw blood from an impaired driving suspect

➤ **Enforcement:**

Missouri conducts frequent, highly visible, well publicized and fully coordinated impaired driving enforcement efforts throughout the state. These efforts are focused on those areas identified as having high incidences of alcohol or drug related crashes. These efforts include sobriety checkpoints and saturation patrols, often conducted on a multi-jurisdictional basis. When these efforts are funded with grants from the Division of Traffic and Highway Safety, they are publicized through a pre-event announcement, signage at the location, and a post-event news release detailing the number of vehicles stopped and arrests made. Investigating officers working these efforts are trained in the proper administration of the standardized field sobriety tests.

The Division of Traffic and Highway Safety works with the Law Enforcement Traffic Safety Advisory Council to establish quarterly enforcement periods and the annual Labor Day Crackdown. The enforcement efforts have been and continue to be coordinated through a grant with the Missouri Safety Center to cover overtime enforcement during the following timeframes:

- ☐ Labor Day Crackdown in August/September
- ☐ Holiday Campaign in December
- ☐ St. Patrick's Day in March

- ❑ Graduation Season in May
- ❑ Independence Holiday in July

The charts below represent data compiled from the law enforcement reports submitted to MoDOT's Traffic and Highway Safety Division after each of the quarterly and annual mobilizations mentioned above. This activity only represents the activity during those mobilizations and does not include other enforcement efforts such as those conducted through yearlong grants and/or normal enforcement activities conducted by law enforcement agencies.

Although law enforcement participation increased, the number of hours worked decreased in 2012 due to Hurricane Isaac which hit the southern gulf coast in late August of 2012. Missouri received a lot of rain which impacted enforcement efforts.

The number of DWI arrests decreased in 2012 due to Hurricane Isaac which hit the southern gulf coast in late August of 2012. Missouri received a lot of rain which impacted enforcement efforts.

The number of sobriety checkpoints and activity by the drug recognition experts decreased in 2012 due to Hurricane Isaac which hit the southern gulf coast in late August of 2012. Missouri received a lot of rain which impacted enforcement efforts.

The Division of Traffic and Highway Safety currently contracts with city, county and state law enforcement agencies that provide year round DWI enforcement activities in the major metropolitan areas of the state that include Jackson, St. Louis, St. Charles, Franklin, Jefferson, Greene, Boone Counties and the Cities of Columbia, Joplin, Springfield, Jefferson City and St. Louis. In addition, the division funds seven DWI units in counties of Greene, Boone, Jackson, Franklin, and Jefferson and the cities of Joplin and Columbia. The division also funds a traffic unit in St. Louis County and a traffic officer in Creve Coeur and Platte County.

Manpower is always a challenge in focusing law enforcement efforts to a specific area such as DWI enforcement. Some jurisdictions are working together to combat the issue of manpower. There are a number of DWI task forces in the state that work together conducting sobriety checkpoints and/or DWI saturation patrols. Those include but are not limited to: Southwest Missouri (Jasper, Newton, Lawrence, Barry, McDonald and Vernon counties); Jackson County; Clay/Platte Counties; Cass County; Northwest Missouri (Buchanan, Andrew, Holt, Atchison, Nodaway, Worth, Gentry, DeKalb and Clinton counties); Boone County; Howell County; Ozark Region (Greene, Christian, Taney, Stone, Webster and Polk counties); St. Charles County; and St. Louis County.

Missouri has established a Standardized Field Sobriety Testing/Drug Recognition Expert Advisory Board that is chaired by a member of the Missouri State Highway Patrol. The function of the Advisory Board is to provide guidance and recommendations to the State's SFST/DRE coordinator. In addition, members of the Advisory Board provide regional coordination of the SFST and DRE programs. The

Advisory Board has established state guidelines for the SFST program and oversees the DRE program guidelines set forth by NHTSA and the International Association of Chiefs of Police.

Missouri currently has a Sobriety Checkpoint Manual available to law enforcement agencies that includes information on legal aspects, guidelines, media, SFST and courtroom communications. In addition, Sobriety Checkpoint Supervisor Training is required to receive grant funding for sobriety checkpoint operations and is offered free of charge to law enforcement agencies in the state. Members of the DRE/SFST Advisory Board work to keep the training and manual up-to-date revising as needed.

Strategies to Enhance High Visibility Enforcement Efforts:

1. Increase the number of law enforcement agencies participating in national and state high visibility enforcement efforts
2. Increase the number of sobriety checkpoints
3. Increase participation of officers certified as drug recognition experts in overtime enforcement and checkpoint efforts
4. Continue utilization of specialized DWI units
5. Increase the number of officers who are trained on the detection of drivers impaired by drugs other than alcohol through Advanced Roadside Impaired Driving Education and Drug Recognition and Evaluation training
6. Continue to offer training to officers in the proper administration of Standardized Field Sobriety Tests
7. Increase the number of multi-jurisdictional task forces or working groups that coordinate efforts among state, county and municipal agencies
8. Continue to train officers in the proper operation of sobriety checkpoints
9. Increase the number of law enforcement agencies conducting checkpoints and incorporate them into their high visibility enforcement plan
10. Continue to investigate the utilization of the law enforcement phlebotomy program

➤ **Publicizing High Visibility Enforcement:**

Missouri publicizes its high visibility enforcement efforts through paid and earned media and uses messages consistent with national campaigns. Missouri participates in each of the national crackdowns on impaired driving and encourages all law enforcement agencies to increase their impaired driving efforts during these times. Missouri will continue these efforts and incorporate high visibility enforcement into its comprehensive communication plan as described above in the Program Management and Strategic Planning Section.

Paid media will continue to be the key component in reaching our target audience and creating the perception that enforcement is at an all-time high level. Press releases, radio interviews, press conferences and media interviews notifying the public of the **“Drive Sober or Get Pulled Over”** effort and will continue to be paramount in pushing the message to motorists who may be contemplating drinking and driving. With continued message saturation coupled with high-visibility enforcement, the motoring public will be bombarded with the message that drinking and driving is a lethal combination.

When enforcement activities are being conducted, the Traffic and Highway Safety grant funded agencies are strongly encouraged to provide press releases to their local media indicating the upcoming events with the tag line of **“Drive Sober or Get Pulled Over.”** They also send a news release after the activity to release results.

MoDOT’s Community Relations Division will continue to document all radio and television interviews, log the number of press conferences and maintain files of articles printed in newspapers. Newspaper articles will be tracked through a clipping service.

Missouri currently has budgeted \$475,000 for statewide paid media coverage in the impaired driving program area. These funds will be used to support impaired driving enforcement efforts during the August 2013 crackdown and to sustain media efforts for four quarterly impaired driving efforts from December 2013 through July 2014. In addition, the MCRS PI&E Subcommittee contributes \$75,000 to the youth alcohol campaign held in May of each year. This provides a combined total of \$550,000 for the statewide paid media effort that supports the high visibility enforcement efforts.

MoDOT’s Division of Traffic and Highway Safety currently has a contract with a media-purchasing firm that will purchase advertising utilizing current industry ratings to select the appropriate media outlets to reach the demographic and achieve a high level of gross rating points.

In order to continue to raise awareness and change driving attitudes and behaviors, the safe driving messages need to be perpetuated through traditional media vehicles (TV, radio, print, outdoor, digital and on line) as well as through social media throughout the year. Social media has become a key part of the highway safety campaigns, increasing awareness and conversation about safe driving, complementing PSA distributions and helping to spread campaign messages virally. Social media efforts will continue through mainstream platforms such as Facebook, Twitter and Instagram.

Through specific advertising the targeted audience is reached in various ways.

- Targeted geography through a high fatality/population county map allows more ad placements where the accidents are happening most frequently.
- “Indoor Domination” places ads in restrooms and on table drink coasters at hundreds of bars and restaurants across Missouri. This reaches people when they’re out and encourages them to find a safe ride home.
- Convenience store takeover and frozen billboards allow for better summer advertising for those seeking a quick stop for alcohol (advertisements as window clings on beer coolers and outdoor advertisements as wraps on ice chests), as well as pump topper ads and pump videos where available.
- Targeted on-line advertisements maximize awareness of impaired driving enforcement efforts by selecting targeted media placements to reach potential impaired drivers.

- Hashtag tracking allows for better reporting measures on target audience reached. Hashtags used include #ArriveAlive #saveMOLives #drivesoberMO.

The Show Me My Buzz BAC calculator smartphone app was modified from Colorado DOT to use to educate Missourians about the dangers of impaired driving. The app will calculate a person's estimated BAC, advise the person not to drive if they've had anything to drink and connect him/her to the nearest taxi.

Paid and earned media will publicize law enforcement activities before, during and after they take place, both during the national campaign and on a sustained basis at sobriety checkpoints and other high risk times throughout the year. Paid and earned media efforts for the current fiscal year will be continued and include:

- Press releases and events on the dangers of impaired driving
- Releases on enforcement activity
- Department-generated releases on checkpoints and DWI saturation patrols
- Quarterly checkpoints and saturation patrols are planned, and at least one week of paid advertising will complement the effort
- Releases on results of checkpoints and DWI saturation patrols
- Halloween press release on the dangers of impaired driving
- Special Thanksgiving press release warning public of holiday crash potential
- Special Christmas press release warning public of holiday crash potential
- Special New Year's Eve press release warning public of holiday crash potential
- Super Bowl party press releases notifying the public of DWI patrols around Super Bowl weekend
- St. Patrick's Day DWI enforcement press release
- Graduation season DWI enforcement press release
- July 4th holiday DWI enforcement press release
- Posters distributed statewide warning against impaired driving
- Internet banner ads, both purchased and as added value, on web sites that appeal to those most likely to drive impaired
- All creative material for the campaigns placed on saveMOLives.com for partners to access

MoDOT's Customer Relations department began tracking campaign costs and impressions during the second quarter of 2012. Specific campaign tracking indicates that the campaigns are performing very well in reaching our target audience. We will continue to track these numbers and make adjustments as necessary to maximize the advertising potential in reaching the target audience.

Strategies to Enhance Publicity of High Visibility Enforcement Efforts:

1. Continuing media support of quarterly and annual impaired driving efforts
2. Improving the timing of dynamic message signs for national and state mobilizations
3. Work more closely with MCRS regional coalitions to promote high visibility efforts

➤ **Prosecution:**

Missouri has a Traffic Safety Resource Prosecutor who provides training, technical assistance, reference materials, consultation and assistance with complex prosecutions, and other general guidance to Missouri prosecutors and law enforcement officers. In addition, the TSRP serves as a liaison with relevant committees, task forces and victim advocacy groups.

Strategies in the Area of Prosecution:

1. Develop impaired driving curriculums for law enforcement, prosecutors and judges
2. Develop an internet based forum where interested parties can discuss impaired driving issues
3. Develop on demand, web-based training and social media on specific topics related to the investigation and prosecution of impaired driving offenses that is accessible to law enforcement officers and prosecutors
4. Continue to seek opportunities to give presentations at various conferences where prosecutors, judges and other court personnel are in attendance
5. Expand training and the use of electronic search warrant processes
6. Require prosecutors to timely enter decisions involving impaired driving offense charges in the statewide repository

➤ **Adjudication:**

Missouri strives to impose effective, appropriate and research-based sanctions on DWI offenders. Missouri has a system of graduated penalties and civil sanctions based on the number of prior offenses committed and blood alcohol concentration. For example, section 577.023, RSMo, imposes different criminal penalties for prior, persistent, aggravated and chronic impaired driving offenders. Driving while intoxicated is a class B misdemeanor for a first offender and can become a class B felony for repeat offenders. Also, sections 577.010 and 577.012, RSMo, allow for enhanced penalties to be imposed for offenders with blood alcohol concentrations at or above .15 and .20.

There are two areas of particular interest as they relate to adjudication in the state and they are court monitoring and DWI courts.

Court Monitoring: Court monitoring in the state is conducted by both paid and volunteer staff with MADD. The goal of the court-monitoring program is to analyze the criminal justice system to determine where breakdowns are occurring in the trials and adjudications of impaired-driving defendants, and offer solutions. The MADD Missouri Court Monitoring project focuses on and monitors the counties with a conviction rate at or below 23 percent on Highway Patrol arrests which is an increase in 1.5 percent in previous years. MADD Missouri State utilizes the court monitoring training kit developed by MADD National to train volunteers how to monitor courts, relevant case information, and collect public record data. The kit consists of a CD-ROM, video, how-to manual, notebook, and forms.

DWI Courts: In 2010 the General Assembly passed legislation which reformed Missouri's DWI laws in an effort to reduce drunk driving. This statute (478.007 RSMo) authorized circuit courts to establish DWI courts and allowed DWI Court judges to grant participants and graduates a limited driving privilege (LDP). Since 2010 there has been an overwhelming response to the legislation with an increase of more than 169 percent in the DWI court population. Like drug courts, DWI courts effectively divert offenders from the state prison system and reduce recidivism among repeat and high-BAC offenders. This is accomplished by increased supervision with all criminal justice stakeholders along with mandated treatment to systematically instill long-term behavior change, reduce the incidence of DWIs and alcohol-related traffic fatalities.

As a result of the legislative changes, the Supreme Court of Missouri adopted Court Operating Rule (COR) 26 on August 27, 2010. This rule requires all courts that seek to establish a DWI court or docket to submit a plan of operation to the Drug Courts Coordinating Commission (DCCC) for approval.

In addition, the DCCC requested a set of DWI court program guidelines be developed for incorporation in individual plans of operation. The Missouri DWI Court Guidelines were subsequently created by a DWI Court Workgroup. Members of the workgroup are represented by: MODOT's Traffic and Highway Safety Division, Missouri Division of Probation and Parole, Missouri Department of Revenue, MADD, Missouri Department of Mental Health, Missouri Department of Public Safety, Missouri Safety Center, DWI court judges, DWI court administrators and the Supreme Court Committee on Alternative Treatment Courts (ATCC).

A requirement for DWI court team training was included in these guidelines. As of January 1, 2011, each court is required to attend three-day DWI court training before a plan of operation will be approved to grant LDPs. The DWI court training includes over 18 hours of instruction and six breakout sessions for each team to work on individual policy and procedure manuals and the Plan of Operation for their DWI court. In response to the guidelines, the National Center for DWI Courts (NCDC) and NHTSA agreed to provide DWI court training in Missouri. There have been 36 teams that participated in the training with 320 DWI court team members in attendance. The three-day training is also available through the Office of State Courts Administrator's Judicial Education Web Learning System (JEWELS) for any new team member who joins an existing DWI court team.

There are currently 18 stand-alone DWI court programs that all have an approved plan of operation for granting LDPs. In addition, there are another 38 counties with hybrid drug/DWI court programs that also have an approved plan of operation for granting LDPs. As of May 1, 2013, those courts have issued 457 LDPs.

DWI Court Ordered Limited Driving Privileges

	Number Issued	Number Revoked	Number Suspended
As of December 31, 2009	0	0	0
As of December 31, 2010	38	0	0
As of December 31, 2011	218	15	26

Since 2010, MODOT's Division of Traffic and Highway Safety has provided grant funding for the expansion of DWI courts for supervision, electronic monitoring, alcohol and drug testing and education services. DWI court expansion has been focused on counties with the highest incidence of fatal injury crashes and have included the following judicial circuits: 6th (Platte County), 12th (Audrain, Montgomery and Warren counties), 13th (Boone and Callaway County) , 17th (Cass County), 19th (Cole County), 20th (Franklin, Gasconade and Osage counties), 21st (St. Louis County), 31st (Greene County), 36th (Butler and Ripley County) and the 40th (McDonald and Newton counties).

The Greene County DWI court in Springfield, Missouri became operational in 2004 and serves as a DWI Academy Court. Greene County is recognized nationally by NCDC as using exemplary practices, serving as a model training court for newly created DWI court programs and serves as a research

platform for the development, identification and testing of improved DWI court practices. The presiding judge is Commissioner Peggy Davis.

The Missouri Office of State Courts Administrator's Office has been studying treatment court recidivism by following all participants who exited treatment court from October 1, 2008 through September 30, 2009. Recidivism is defined as any plea or finding of guilt for a new criminal case (felony or misdemeanor) filed after the end of the treatment court case. New cases where the actual criminal charge occurred before the start of the treatment court case are not counted as recidivism. The time to recidivate is based on the filing initiation date of the new criminal case. Data was extracted August 29, 2013.

Recidivism Rate for DWI Court Programs (105 Participants)

	Graduates (82)	Terminations (23)	Overall (105)
September 30, 2009 – no data available			
September 30, 2010 (within 12 months of exiting the program)	1.2%	21.7%	5.7%
September 30, 2011 (within 24 months of exiting the program)	3.7%	26.1%	8.6%

Strategies in the Area of Adjudication:

1. Increase the number of DWI courts in the state and ensure that all courts are following the Ten Guiding Principles of DWI Courts established by NCDC and the National Drug Court Institute (NDCI)
2. Offer presentations on DWI courts, standardized field sobriety testing, the drug evaluation and classification program, alternative sanctions and emerging technologies at the judicial conference, the prosecutor's conference and the Missouri Bar conference
3. Pursue efforts to increase the focus on high BAC first offenders including DWI court participation under existing statutes or laws
4. Encourage courts to order ignition interlock requirements for first time offenders under current law
5. Maintain evidence-based treatment and sanctions for first offenders, repeat offenders, minor offenders and high BAC offenders
6. Continue to educate the courts, prosecutors and judges on evidence-based practices

➤ **Administrative Sanctions and Driver Licensing Programs:**

Missouri uses administrative sanctions, including license revocation and suspension and ignition interlock devices, to prevent repeat impaired driving offenses.

Administrative License Revocation and Vehicle Sanctions: Missouri statutes authorize the imposition of administrative penalties by the Department of Revenue upon arrest for violations of the state's impaired driving laws. These include a license suspension or revocation if a person is arrested for driving while intoxicated and has a BAC of .08 or above, or .02 or above for offenders under 21 years of age; a license suspension, revocation or denial imposed after a conviction for an impaired driving offense for alcohol or drugs; and a license revocation for refusing to submit to a chemical test. In some cases, drivers are required to install an ignition interlock device on vehicles they operate as a condition of license reinstatement, restricted or limited driving privileges.

Programs: The Missouri Department of Revenue has implemented programs to reinforce and complement the state's overall program to deter and prevent impaired driving, including graduated driver licensing for novice drivers. Missouri also has procedures in place to ensure the security of its driver licenses (and non-driver licenses for minors) to prevent people from fraudulently obtaining a license or using an altered license. The Department also conducts annual training for law enforcement officers on impaired driving issues.

Strategies in the Area of Administrative Sanctions and Driver Licensing Programs:

1. Continue outreach efforts to courts regarding their duty to forward information on final disposition for impaired driving offenses and ignition interlock device orders to the Department of Revenue in a timely fashion to ensure that driving records are accurate and complete
2. Continue to offer annual law enforcement seminars on impaired driving issues
3. Conduct a future summit focusing on suspended and revoked driver issues
4. Conduct outreach efforts to law enforcement agencies to increase timely submission of alcohol influence reports (AIR) to the Department of Revenue

IV. Communication Program:

Missouri implements a statewide comprehensive communication plan that supports priority policies and program efforts. Campaign materials target at-risk groups who are identified through statewide traffic data and provide special emphasis during high-risk times including the national crackdown periods and quarterly high visibility enforcement efforts. Specific statewide communication goals and plans are discussed in the Publicizing High Visibility Enforcement section on page 22.

Each year the Missouri Department of Transportation conducts a Highway Safety Drivers Survey. The research project surveyed 2,510 adult Missouri drivers in March 2013 to capture their current attitudes and awareness of specific highway safety concerns such as seat belt usage, speeding, cell phone use while driving and impaired driving. Results are presented for the entire state and for each of the districts.

Special emphasis was placed on ensuring that the sample reflected Missouri's geographic, age, and gender diversity. People were surveyed from all of Missouri's counties as well as the independent city of St. Louis. Residents from 674 different zip codes are represented. The standard phone survey practice of alternatively asking for either the oldest or youngest adult was not employed. Instead, the call center was given specific goals for each age group and gender within various geographic areas to ensure the most representative sample possible.

In addition to the survey findings listed below, researchers also found that those most likely to drive under the influence of alcohol were males 50 to 64 years of age and older. Men were much more likely to drive after drinking than women. As was the case in 2012, men 18 to 29 stated they drove after drinking less than the other male segments, but this group was still more likely to drive under the influence than women 30 to 39 (the female age range most likely to drink and drive). Drivers of pickup trucks were more likely to drive under the influence than drivers of other vehicles followed by drivers of SUVs/crossovers. In a change from the previous year, drivers of other types of trucks were the least likely to drive after drinking. While awareness of DWI enforcement was not correlated with stated behavior, the expectation of being ticketed reduced the likelihood of driving under the influence similar to the results in 2011. Three of the 15 questions asked during the survey are about impaired driving. Results from those three questions are listed below:

- ***Question: In the past 60 days, how many times have you driven a motor vehicle within two (2) hours after drinking alcoholic beverages?***

The survey indicates 87.3 percent of Missouri drivers stated that they had not driven a vehicle within two hours of consuming an alcoholic beverage anytime in the last sixty days. This is significantly lower than the 2012 measurement, with most of the change coming from an increase in the number of people who refused to answer this question. 7.2 percent of Missouri drivers admitted to having done so at least once in the last sixty days, including a few who stated they did so every day. Another 5.5 percent refused to answer the question.

Researchers usually hesitate to draw conclusions from refusals, but after considering the implications for self-incrimination and the impressions of the survey operators, researchers concluded that approximately 12.7 percent of Missouri drivers have driven under the influence of alcohol in the last sixty days.

Out of those who admitted to drinking before driving, the average driver did so about four times in the last sixty days (average of 3.6 times). This is the lowest average recorded in the

last four years. It compares to an average of 5.5 times in 2012, 6.2 times in 2011 and an average of 5.2 times in 2010.

- **Question: In the past 30 days, have you read, seen or heard anything about alcohol impaired driving (or drunk driving) enforcement by police?**

Approximately half (52 percent) of Missouri drivers were aware of recent publicity regarding DWI enforcement. This was statistically similar to the findings of the previous three years. The timing of this survey made these results intriguing. In the past, this survey has been conducted in the summer (typically in June). This year the survey was conducted in March while the Coalition was conducting a “Buzzed Driving is Drunk Driving” campaign using St. Patrick themed posters, mirror clings, and coasters in Missouri restaurants and bars.

- **Question: What do you think the chances are of someone getting arrested if they drive after drinking?**

The survey indicates 72.2 percent of the respondents expected people who drove after drinking would be arrested at least half of the time, statistically identical to that of the last three measurements.

Strategies in the Area of Communication:

1. Continue to implement Missouri’s statewide comprehensive communications plan to educate the public regarding the problems of impaired driving and underage drinking
2. Work with the MCRS Public Information and Education Subcommittee to increase marketing to minority segments of the population
3. Utilize research to identify high-risk and over-represented groups
4. Utilize focus groups in the development of campaign materials, whenever possible

V. Alcohol and Other Drug Misuse: Screening, Assessment, Treatment and Rehabilitation

Impaired driving is frequently an indicator of a serious alcohol or substance abuse problem, which underlies the importance to assess impaired driving offenders for a substance use disorder and implement early treatment interventions. Often, the impaired driving behavior can be eliminated if the substance use disorder is recognized and treated in its early stages. Missouri has implemented a system to identify, intervene and refer individuals for appropriate treatment.

The Department of Mental Health, Division of Behavioral Health, certifies agencies to provide services to individuals who have had an alcohol or drug related traffic offense. The Substance Abuse Traffic Offenders' Program (SATOP) serves more than 30,000 DWI offenders annually who are referred as a result of an administrative suspension or revocation of their driver license, court order, condition of probation, or plea bargain. SATOP is, by law, a required element in driver license reinstatement by the Department of Revenue.

All SATOP consumers enter the system via an Offender Management Unit. Consumers receive a comprehensive assessment where a review of their driving record, breath alcohol concentration (BAC) at the time of their arrest, computer-interpreted assessment, and an interview with a Qualified Substance Abuse Professional is conducted. Based upon the information gathered during the assessment a referral is made to one of several types of SATOP service levels ranging from a ten-hour educational program to an intensive 75-hour (minimum 90-day) treatment program.

SATOP Service Levels

Offender Education Program (OEP) – Intended for low risk first time offenders

A 10-hour education course designed primarily for lower risk, first-time offenders in understanding the choices they made that led to their intoxication and arrest. Education is the key to helping first-time offenders take responsibility for their actions.

Adolescent Diversion Education Program (ADEP)

A 10-hour education program designed for individuals under the age of 21 who have been arrested or cited for alcohol/other drug-related offenses, such as Minor in Possession, Abuse and Lose, or Zero-Tolerance. The mission of ADEP is to reduce alcohol and other drug-related deaths and injuries by educating young offenders about the risks and consequences of alcohol and other drug use and abuse.

Weekend Intervention Program (WIP) – Intended for low risk first time minor offenders (Abuse/Lose, Minor in Possession, or Zero Tolerance offenses)

A level of service designed primarily for repeat offenders or "high risk" first-time offenders using intensive education and counseling intervention methods throughout a marathon weekend (48 continuous hours) of structured activities. Activities are designed to encourage offenders to confront their harmful behavior and take responsibility for their lives.

Clinical Intervention Program (CIP) – Intended for high-risk persistent offenders with a mild to moderate substance use disorder

A level of outpatient treatment service consisting of intensive outpatient counseling based on the needs of the persistent or "high risk" offender. Each offender participates in 50 total hours of treatment activity consisting of 10 hours of individual counseling, 20 hours of group counseling, and 20 hours of group education at a certified treatment facility. Ten hours of the required 50 hours must specifically address DWI/DUI issues.

Youth Clinical Intervention Program (YCIP) – Intended for high-risk persistent minor offenders with a mild to moderate substance use disorder

The Youth Clinical Intervention Program (YCIP) is a 25-hour program available for minors who are identified as “high risk.”

Serious and Repeat Offender Program (SROP) – Intended for serious and repeat offenders – high risk and high need offenders

This level is a comprehensive array of substance use disorder treatment services that is individualized to address the specific and unique needs of repeat offenders. The requirement to successfully complete an SROP is a minimum of 75 hours of treatment in no less than 90 days.

DWI offenders bear the costs of SATOP. These costs include a \$126 assessment screening fee and a \$249 supplemental fee, which is deposited into the Mental Health Earnings Fund. This fund is used by the Department of Mental Health to supplement the cost of treatment services for repeat offenders. A network of nearly 60 agencies with approximately 200 sites provides various levels and types of services locally.

Number Served In SATOP

SATOP	FY 2009	FY 2010	FY 2011	FY 2012	FY 10-11 Variance	FY 11-12 Variance
	27,734	26,508	22,158	23,463	 -4,350	 1,305

Demographics of SATOP Treatment Participants for 2012 (Does not include those referred to education only)

Gender				Age			
Male		Female		Adolescent < 18		Adult > 18	
#	%	#	%	#	%	#	%
8,019	75.4%	2,618	24.6%	26	0.2%	10,612	99.8%

Race/Ethnicity											
Caucasian		African-American		Hispanic		Native American		Asian Pacific		Other	
#	%	#	%	#	%	#	%	#	%	#	%
9,408	88.4%	725	6.8%	282	2.7%	26	0.2%	51	0.5%	146	1.4%

In an effort to meet the evolving challenges related to the occurrence of impaired driving across the state, the SATOP frequently conducts an analysis of its programs and incorporates efforts to enhance treatment services. As an example, a workgroup is being established that is comprised of key stakeholders to conduct an analysis of the program, to determine its effectiveness in meeting the needs of the impaired drivers, and develop recommendations to enhance the program. This group consists of judges, DWI court personnel, administrators of SATOP programs, probation and parole personnel, and SATOP program staff. Areas of focus will include the assessment process, best practices in education and therapeutic interventions, and an analysis of impaired driving programs nationally; all with the goal of reducing impaired driving recidivism rates.

As with the management of any chronic disease, early identification of a substance use disorder is critical to reduce the potential for impaired driving. Missouri is a national leader in initiating and implementing health care homes. Health care homes provide the opportunity for screening and treatment of substance use disorders. Services are provided through federally qualified health centers that provide a comprehensive “whole person” approach which includes health and education awareness, preventive and primary care services, in addition to addressing the behavioral healthcare needs of individuals, primarily via referral to specialty treatment providers.

Strategies in the Area of Treatment and Rehabilitation:

1. Continue to expand the health care coordination of individuals with substance use disorders through local community mental health centers and specialty substance use treatment programs
2. Continue efforts with the SATOP workgroup to improve programs and reduce recidivism rates among offenders entered in the program
3. Revise and update the Driver Risk Inventory II as an assessment screening tool to ensure appropriate placement criteria of offenders
4. Expand access to medication assisted treatment through the State’s contracted SATOP providers
5. Continue to expand the partnership with the DWI courts statewide to provide access to the Serious and Repeat Offender Program for persistent offenders
6. Transition the Serious and Repeat Offender programs across the State to Community Substance Abuse and Rehabilitation (CSTAR) to better utilize funding resources and increase access to treatment services for those individuals needing substance use treatment
7. Provide contracted SATOP providers training opportunities to enhance treatment practices and understanding of co-occurring disorders

➤ **Monitoring Impaired Drivers:**

Missouri closely monitors impaired drivers to ensure that appropriate services are made available and utilized through its driver licensing, judicial, corrections and treatment systems. As discussed above, offenders who plead guilty or are found guilty of certain offenses are required to take part in SATOP. If a person's license has been revoked or suspended after an arrest for an impaired driving offense, they are also required to participate in SATOP. Both of these requirements are set out in statute. Serious or repeat offenders receive more comprehensive services through DWI court programs.

DWI Court programs offer the highest degree of monitoring of high-risk DWI offenders and have proven to be successful in reducing recidivism rates of those offenders. More information on DWI Courts can be found in the Criminal Justice Section under Adjudication.

Another form of monitoring is through use of technology. Ignition interlock devices (IID) have been a requirement in the state of Missouri since 1995 for repeat offenders. The original ignition interlock law required courts to order the use of IIDs on any vehicle the offender operates. Since that time the Missouri General Assembly passed legislation in 2008 to also require IID use for a six month period when the offender applies for driver license reinstatement. Monitoring functions of ignition interlock use were only taking place if the offender was under court supervision, which in most cases they were not. However, during the 2013 legislative session a bill was passed that will now require offenders to be monitored for a six-month period. If the offender violates the IID during the required period of use, the IID requirement will be extended for an additional six months. Some repeat offenders will also be required to install an IID with photo identification and global positioning features prior to receiving a limited driving privilege or a court-ordered license reinstatement. Ignition interlock use will also be helpful with regard to court supervision for those offenders who are participating in DWI Court programs. Additionally, first- time offenders will have the option of installing an IID to obtain a restricted driving privilege (RDP) for the full 90-day suspension period. These offenders will be monitored during the RDP period and any violations will extend the IID requirement for an additional 30 days.

Strategies for Monitoring Impaired Drivers:

1. Strengthen ignition interlock requirements to require mandatory use for a minimum of 90 days for a first offender
2. Continue to educate treatment court teams on monitoring of ignition interlock reports
3. Develop and strengthen the monitoring of those offenders who have ignition interlock devices installed
4. Expand the availability of DWI or Treatment courts in the State

VI. Program Evaluation and Data

Missouri maintains comprehensive data regarding impaired driving offenders, impaired driving crashes and the injuries and fatalities resulting there from. We utilize data from multiple sources including the Fatality Analysis Reporting System, Crash Outcome Data Evaluation System, State Traffic Accident Record System, and the Transportation Management System, DWI Tracking System (DWITS), Missouri Driver License System, Justice Information System (JIS), among others, to support our impaired driving program. The State also has a Traffic Records Coordinating Committee (TRCC) to represent the interests of all stakeholders. The data from all sources is regularly evaluated to measure progress, determine program effectiveness, plan and implement new strategies, and ensure the appropriate allocation of resources. The TRCC is working with courts on timely electronic reporting of convictions, updating the statewide accident reporting system, and working with local municipalities to do electronic reporting of crash reports.

The Missouri Department of Revenue also maintains a system of records that enables the state to identify impaired drivers, maintain a complete and accurate driving history of impaired drivers, receive timely and accurate arrest and conviction data from law enforcement agencies and the courts, and provides timely and accurate driver history records to law enforcement and the courts.

Although our current system of records is robust, improvements can be made in the collection and analysis of data. The specific goals and plans to improve data systems are described above in the Program Management and Strategic Planning section of this plan.

Strategies in the Area of Program Evaluation and Data:

1. Explore the development of standardized electronic reporting of the Alcohol Influence Report for law enforcement agencies for more timely submission to DOR and to the court system
2. Develop a single query to pull impaired driving arrests and disposition information from all available sources (licensing records, criminal history and DWITS)
3. Consolidate computer systems to minimize duplicate data entry
4. Expand the availability of mobile data terminals, portable computers, or tablet devices for use by officers at roadside

VII. Performance Measures and Benchmarks

This section focuses on performance measures and benchmarks for evaluating effectiveness of the strategies outlined in this plan.

Performance Measures:

- Number of fatalities and serious injuries involving an impaired driver
- Number of fatal and serious injury crashes involving an impaired driver
- Number of fatalities involving an alcohol-impaired driving with .08 BAC or greater
- Number of fatalities and serious injuries involving a drug-impaired driver (other than alcohol)
- Number of fatalities involving impaired drivers under the age of 21
- Number of limited driving privileges issued by DWI courts
- Number of participants in DWI courts
- Number of graduates of DWI courts
- Graduation rates of DWI court participants
- Number of DWI cases heard in state court
- Number of law enforcement agencies and local prosecutors making entries in DWITS
- Percentage of breath alcohol test refusals
- Number of people attending SATOP classes by program type (including the serious and repeat offender program)
- Number of drugged driving arrests
- Number of convictions for DWI (1st, 2nd, 3rd offense, etc)
- Number of ignition interlock devices installed

Benchmarks:

Please note that benchmarks below are for Calendar Year 2011 and are based on information collected in state data systems unless otherwise noted

- Fatalities involving impaired (alcohol and/or drug) driver - 219
- Disabling injuries involving impaired (alcohol and/or drug) driver - 900
- Fatal crashes involving an impaired driver - 197
- Disabling injury crashes involving an impaired driver - 667
- Fatalities involving drivers with .08 BAC or greater - 258 (based FARS data)
- Fatalities involving drug impaired driver - 52
- Disabling injuries involving drug impaired driver - 158
- Fatalities involving impaired (alcohol and/or drug) driver less than 21 years of age - 35
- Disabling injuries involving impaired (alcohol and/or drug) driver less than 21 years of age - 129
- Fatalities involving drug impaired driver less than 21 years of age - 13
- Disabling injuries involving drug impaired driver less than 21 years of age – 29
- Number of limited driving privileges issued by DWI courts -218
- Number of participants in DWI courts – 479
- Number of graduates of DWI courts – 475
- Graduation rate of DWI court participants – 74.22%
- Percent of breath alcohol test refusals – 32%

- Number of people attending SATOP classes by program type (including the serious and repeat offender program) – see number of completions in table below

SATOP Programs	FY 2009	FY 2010	FY 2011	FY 2012
OEP	13,227	12,456	10,274	10,621
ADEP	1,570	1,409	802	802
WIP	8,357	7,297	5,628	5,587
CIP	4,517	5,181	5,057	5,011
YCIP	69	76	66	50
SROP	86	151	382	1,392

Note: Offenders may have entered in more than one SATOP program

- Number of ignition interlock devices installed – 7,299
- Number of DWI cases heard in state court – see Court Data section
- Number of convictions for DWI (1st, 2nd, 3rd offense, etc) – see Court Data section
- Number of drugged driving convictions – Court Data section

VIII. Conclusion

In adopting this strategic plan, Missouri hopes to continue its successes in reducing overall traffic fatalities by focusing on those fatalities caused by impaired drivers. The specific goals and plans outlined herein will assist in those efforts. When these strategies are fully implemented, we hope to meet our objective of reducing impaired driving fatalities by two percent annually.

APPENDIX A

Missouri Coalition for Roadway Safety

Purpose and Procedural Guidelines

Missouri Coalition for Roadway Safety

Purpose and Procedural Guidelines

Coalition Mission:

The Missouri Coalition for Roadway Safety is a partnership of local, state, federal, public, and private organizations committed to the common goal of making travel on Missouri's roadways safer.

Primary Goals:

- 700 or fewer fatalities by 2016;
- Develop and strengthen partnerships;
- Promote the use of crash data to identify problems and countermeasures;
- Coordinate intervention strategies to achieve crash reductions;
- Identify and share best practices within and throughout Missouri's safety community;
- Emphasize and implement safety measures throughout all operational processes;
- Identify and share safety programs and related efforts by other partners and coordinate as appropriate;
- Evaluate, assess, and adjust strategies as necessary; and
- Promote the enhancement of data collection procedures and processes.

Participation:

Participation shall be open to any national, regional, state, or local organization and any individual interested in promoting the purpose of the Missouri Coalition for Roadway Safety.

All participant organizations and individuals shall have equal status in all respects.

Leadership:

The affairs of the Missouri Coalition for Roadway Safety shall be directed by an Executive Committee consisting of representatives from the following organizations, agencies, or subcommittees:

- AAA – Auto Club of Missouri
- Department of Health and Senior Services
- Department of Public Safety
- Department of Revenue
- Division of Alcohol and Tobacco Control
- East-West Gateway Council of Governments

MCRS Purpose and Procedural Guidelines

- Federal Highway Administration
- Federal Motor Carrier Safety Administration
- Law Enforcement Traffic Safety Advisory Council
- Mid-America Regional Council
- Missouri Department of Transportation
- Missouri Motor Carriers Association
- Missouri Police Chiefs Association
- Missouri Safety Center
- Missouri Sheriff's Association
- Missouri State Highway Patrol
- National Highway Traffic Safety Administration
- Subcommittee Chairs
 - Commercial Motor Vehicle Subcommittee
 - Distracted Driving Subcommittee
 - Elder Mobility and Safety Subcommittee
 - Enforcement Subcommittee
 - Impaired Driving Subcommittee
 - Infrastructure Subcommittee
 - Legislative Subcommittee
 - Public Information Subcommittee
 - Strategic Planning and Implementation Subcommittee
 - Traffic Records Coordinating Subcommittee

The representatives of participant organizations, agencies, and subcommittees shall elect the Executive Committee Chair and Vice Chair. The term of office shall be for one year with an option of not more than two consecutive terms.

Vacancies for officers shall be filled by the majority vote of the Executive Committee to complete the unexpired term.

The Chair, with concurrence of the Executive Committee, shall name individuals and/or representatives of participating organizations and agencies to head subcommittees and special task forces.

Duties of the two officer positions are:

Chair

1. Preside at all meetings of the Missouri Coalition for Roadway Safety.
2. Monitor and assist Subcommittee Chairs in addressing tasks and activities.
3. Represent the Coalition at selected functions and meetings (or assign such responsibility to others when necessary).
4. Give presentations regarding Coalition efforts and activities (or assign such responsibility to others when necessary).

Vice Chair

1. Preside at meetings in the absence of the Chair.

MCRS Purpose and Procedural Guidelines

2. Assist the Chair with Missouri Coalition for Roadway Safety activities, strategic plans, and operations.

Subcommittees:

Subcommittees shall be established to effectively address the mission of the Coalition. Subcommittees shall be added or deleted upon the approval of the Executive Committee. Each Subcommittee shall have a Chair and Vice Chair.

Duties of the two officer positions are:

Chair

1. Preside at all meetings of the Subcommittee.
2. Guide the completion of Subcommittee activities and tasks.
3. Represent the Subcommittee at selected functions and meetings (or assign such responsibility to others when necessary).
4. Give presentations at Coalition meetings or selected functions reviewing Subcommittee efforts and activities (or assign such responsibility to others when necessary).

Vice Chair

1. Preside at meetings in the absence of the Chair.
2. Assist the Chair in helping the Subcommittee achieve the Coalition goals and assigned responsibilities.

Subcommittee Responsibilities:

CMV Subcommittee

- Reduce commercial motor vehicle accidents in Missouri
- Education public on commercial vehicles
 - Importance of industry to the economy
 - Sharing the road safely
- Improvement of public image
- Safety legislation for commercial motor vehicles

Distracted Driving Subcommittee

- Establish membership
- Encourage collaborative efforts with other subcommittees
- Develop strategies to address the distracted driving issue

Elder Mobility and Safety Subcommittee

- Establish membership
- Develop strategies to address elder driver safety and mobility
- Encourage collaborative efforts among stakeholders

MCRS Purpose and Procedural Guidelines

Enforcement Subcommittee

- Coordinate the statewide law enforcement initiatives
- Collect law enforcement activity data
- Identify training and equipment needs
- Identify and share innovative law enforcement programs and strategies
- Identify legislative initiatives
- Promote officer safety
- Promote key statewide law enforcement mobilizations
- Provide technical assistance to regional coalitions

Impaired Driving Subcommittee

- Identification and review of emerging issues
- Review of innovative programs
- Review of current programs
- Identification of training needs
- Identification of legislative initiatives

Infrastructure Subcommittee

- Promote the implementation of the infrastructure related targeted 10
- Promote road safety audits
- Review training needs in the infrastructure area
- Assist in coordinating efforts between the state and local engineering entities

Legislative Subcommittee

- Coordinate overall legislative effort with both the state and regional coalitions.
- Review public policy strategies in Blueprint
- Assist with drafting cleanup or new language for proposed legislation
- Track bill progress and communicate to the Coalition partners
- Assist in prioritizing legislation
- Assist in identifying MCRS members to testify
- Develop list of partners for testimony or capitol visits

Public Information Subcommittee

- Develop a statewide media plan
- Coordinate overall public information effort with both the state and regional coalitions
- Develop PI toolkits and distribute to the regional coalitions
- Distribute PI funding and monitor PI activity by the regional coalitions
- Draft press releases
- Coordinate events
- Provide technical assistance to regional coalitions

MCRS Purpose and Procedural Guidelines

Strategic Planning and Implementation Subcommittee

- Monitor the operation and membership of the MCRS and make recommendations as necessary
- Facilitate the development and implementation of regional coalition plans
- Assist in identification of funding availability and promote coordination of resources
- Encourage extensive coordination of highway safety activities throughout the state
- Coordinate the distribution of funds to the regional coalitions
- Monitor activities of the MCRS Subcommittees
- Monitor the membership on MCRS Subcommittees to assure balanced representation
- Assess the technical assistance needs of the regional coalitions
- Facilitate the revision of the Missouri's Blueprint

Traffic Records Coordinating Subcommittee

- Provide updates on fatal and serious injury crash data
- Collect and compile annual regional coalition activity reports
- Monitor the contributing factors associated with crashes
- Monitor progress toward the 2012 fatality goal
- Monitor the implementation of Targeted Ten
- Assist regional coalitions with data needs

Call of Meetings:

Meetings shall be held on a quarterly basis with the concurrence of the representatives and participants of the Coalition.

Regional Coalitions:

Regional coalitions are established in 7 locations throughout the state. These coalitions are charged with:

- assisting with the implementation of Missouri Blueprint;
- conducting regional data analysis to guide highway safety activities;
- expanding the regional safety network and partnerships by increasing coalition membership;
- actively participating in MCRS meetings, campaigns, and promotions;
- developing a localized safety plan for the region; and
- facilitating the expenditure of allocated funds.

The corresponding MoDOT district office and Missouri State Highway Patrol troop shall help facilitate the coalition meetings, expansion of coalition membership, development and implementation of regional strategic highway safety plans and distribution of funding. Representatives from each of the 7 regional coalitions shall be encouraged to

MCRS Purpose and Procedural Guidelines

attend the quarterly MCRS meetings and give updates on respective regional coalition activities. The regional coalitions shall be encouraged to elect a chair and vice chair and establish a set of operating procedures.

Each regional coalition shall identify:

- A member to serve as the liaison between the MCRS and their regional coalition.
- A member to serve on the MCRS Public Information Subcommittee. Their participation will help assure broad based input into the development and implementation of public information initiatives.
- A member to serve as the Advocacy Liaison to address legislative initiatives and promote the “Saved by the Belt” program.

Changing of These Guidelines:

These guidelines may be changed by a two-thirds vote of those representatives of participant organizations and individuals present at the meeting.

APPENDIX B

Highway Safety Plan & Performance Plan, Alcohol and Other Drugs

ALCOHOL AND OTHER DRUGS

Background

It is impossible to predict how alcohol will affect a person on any given occasion. Every drink influences both the body and mind and has a profound impact on the physical and mental skills needed to drive a motor vehicle. One drink could have serious consequences.

Alcohol and other drugs contribute substantially to traffic crashes on Missouri's roads, particularly those resulting in death or serious injury. In the 2010-2012 period, 431,780 traffic crashes occurred in the state. Of those, 0.5% resulted in a fatality and 3.1% involved someone being seriously injured. During the same time period, there were 20,598 traffic crashes where one or more drivers and/or pedestrians were under

the influence of intoxicants and in the opinion of the investigating officer their intoxicated condition was a contributing factor to the crash. In these crashes where drivers or pedestrians were impaired by alcohol or other drugs, 718 people were killed and another 2,821 were seriously injured. It also is important to note that substance-impaired driving is under-reported as a contributing factor in traffic crashes. This under-reporting is due to drivers undergoing injuries sustained from crashes without being tested for blood alcohol content. Also, some forms of drug impairment may not be apparent to officers on the scene. As a result, it is an even greater problem than these statistics would indicate. In addition, 87.3% of substance-impaired drivers killed also failed to wear a safety belt further compounding the problem of substance-impaired driving.

2010-2012 Missouri Alcohol and Other Drug Related Fatalities & Serious Injuries

A common misconception is that substance-impaired drivers are primarily injuring and killing themselves. While that is often true, a substantial number of people killed and seriously injured in these crashes were not intoxicated by alcohol or other drugs. Their actions in these incidents probably did not contribute

to the cause of the collision. Of the 718 people killed in alcohol and other drug-related traffic crashes, 70.6% were the substance-impaired driver/pedestrian and 29.4% were some other involved party. Of the 2,821 seriously injured, 60.3% were the substance-impaired drivers/pedestrians while 39.7% were other persons in the incidents.

2010-2012 Missouri Alcohol and Other Drug Related Fatalities & Serious Injuries (Person Involvement)

Young Impaired Drivers (Under Age 21)

Youth make up a significant proportion of alcohol-impaired drivers causing traffic crashes on Missouri roadways. Of the 17,946 alcohol-impaired drivers involved in traffic crashes during 2010-2012, 11.1% were under the age of 21 (in known cases). This is especially significant when you consider it is illegal for someone under 21 to possess or consume alcohol in Missouri.

In 2010-2012, a total of 574 alcohol-impaired drivers were involved in crashes where one or more persons were killed. In known cases, 10.5% of these drivers were under the age of 21. A total of 70 persons were killed in traffic crashes involving these young alcohol-impaired drivers. Of those persons killed, 48.6% were the underage alcohol-impaired driver and 51.4% were some other party in the crash.

2010-2012 Missouri Alcohol and Other Drug Related Fatalities & Serious Injuries (By Age)

NOTE: The data for persons killed and seriously injured involving an alcohol-impaired driver by age does not include data for those crashes where the driver's age was unknown or where the pedestrian was the impaired party. Also, one alcohol related crash has the potential of consisting of an alcohol-impaired driver younger than 21 and one 21 or older. In these cases, the persons killed and seriously injured will be counted in each chart shown above.

GOAL #1:

To decrease fatalities involving drivers with .08 BAC or greater to 230 by 2016:

2013	2014	2015
267	255	243

Performance Measure:

- Number of fatalities involving drivers with .08 BAC or greater

Benchmark:

- 2012 fatalities involving drivers with .08 BAC or greater = 280

GOAL #2:

To increase substance-impaired driving arrests made during grant funded enforcement activities and mobilizations by .25 percent annually based on a three-year rolling average of grant years 2011, 2012, 2013 = 7,989

2014	2015	2016
8,009	8,029	8,049

Performance Measure:

- Number of substance-impaired driving arrests made during grant-funded enforcement activities and mobilizations

Benchmark:

- 2011-2013 substance-impaired driving arrests made during grant-funded enforcement activities and mobilizations = 7,989

GOAL #3:

To decrease fatalities involving alcohol-impaired drivers under the age of 21 years to 14 by 2016:

2013	2014	2015
16	15	15

Performance Measure:

- Number of fatalities involving alcohol-impaired drivers under the age of 21 years

Benchmark:

- 2012 fatalities involving alcohol-impaired drivers under the age of 21 years = 17

STRATEGIES

Public Information and Education

1. Educate the public on the dangers of driving after drinking or using other drugs through public awareness campaigns such as *Drive Sober or Get Pulled Over*, through quarterly impaired driving mobilizations, and through the distribution of educational materials at traffic safety workshops, health and safety fairs, displays, on the website, and through public service announcements
2. Incorporate impaired driving educational programs into school systems and businesses
3. Continue statewide designated driver programs which stress alternatives to drinking and driving (CHEERS designated driver program)
4. Educate large numbers of alcohol servers in intervention techniques utilizing the Server Training program conducted by the Division of Alcohol and Tobacco Control and through the SMART Web-based server training program; continue to expand and promote the programs
5. Provide support for the MCRS Impaired Driving Subcommittee to address impaired driving crashes and underage impaired driving
6. Incorporate toxicology into Impaired Driving Subcommittee efforts
7. Checkpoint news releases mention that specially trained drug detection officers will be working the overtime enforcement effort and/or sobriety checkpoint
8. Encourage law enforcement and prosecutors to report the type(s) of drug involvement suspected in crashes to the media
9. Include drug arrest details in after-action enforcement reports to the media
10. Implement, as appropriate, recommendations identified in the 2008 Statewide Impaired Driving Assessment
11. Work with the MCRS Impaired Driving Subcommittee to implement strategies outlined in the Impaired Driving Strategic Plan
12. Continue support for youth and young adult prevention and education programs including Team Spirit Leadership Conference; Team Spirit Reunion; Think First Programs (School Assembly Programs, Elementary School Curriculum, Young Traffic Offenders Program); university level Partners in Prevention; local community educational programs; and Missouri Safe and Sober

13. Revise and reprint impaired driving educational materials as needed; expand partnerships to encourage use of these materials in their publications
14. Develop campaigns/materials to reach targeted high-risk groups
15. Participate in interagency committees to share ideas, avoid duplication of efforts, and maximize resources (MCRS and the MCRS Impaired Driving Subcommittee, Missouri Youth/Adult Alliance, Partners in Prevention)
16. Support local efforts to reduce drinking and driving – especially underage drinking – by providing technical assistance to develop programs such as DWI docudramas or Every 15 Minutes, loaning them collateral materials to enhance their efforts (fatal vision goggles, videos, community program guides), and providing speakers
17. Provide Drug Impairment Training for Educational Professionals across the state
18. Organize and/or participate in press events and work with media outlets across the state to promote highway safety initiatives

Enforcement

1. Provide funding for alcohol saturation enforcement teams, DWI Task Forces, sobriety checkpoints, quarterly impaired driving mobilizations, overtime salaries for Breath Alcohol Testing (BAT) van operations, and maintenance for BAT vans
2. Provide equipment to enhance enforcement efforts and appropriate training to ensure effective use of this equipment (e.g., breath alcohol testing instruments; enforcement vehicles; digital in-car video cameras; and sobriety checkpoint supplies)
3. Provide training on detection and apprehension of impaired drivers (e.g., standardized field sobriety testing (SFST), sobriety checkpoint supervisor training, courtroom testimony, drug recognition experts (DRE), ARIDE, and DWI crash investigation techniques)
4. Ensure access to DRE and/or ARIDE trained officers at sobriety checkpoints
5. Provide motivational and educational speakers for law enforcement personnel during training events such as the annual Law Enforcement Traffic Safety Advisory Council (LETSAC) conference
6. Provide supplies, support, and training for DREs and the DRE recertification training to ensure continuity of the program
7. Support a state SFST/DRE coordinator who will

work in cooperation with the Impaired Driving Subcommittee of the MCRS and the DRE/SFST Advisory Committee in order to maintain standardization of the program

8. Support projects designed to prevent underage alcohol purchase, apprehend minors attempting to purchase alcohol, and provide a physical enforcement/intervention presence (e.g., Server Training, Party Patrol, Underage Drinking LE Training, selective enforcement, compliance checks, and special events)

9. Incorporate, as appropriate, recommendations identified in the 2008 Impaired Driving Assessment

10. Increase participation in statewide multi-jurisdiction mobilization enforcement efforts

11. Support selective enforcement efforts to address young drinking drivers by funding statewide underage drinking enforcement projects and training

12. Support DWI traffic units with local law enforcement agencies

13. Update administrative rules for the ignition interlock program as needed to insure that DWI offenders cannot operate a vehicle while intoxicated

Prosecution/Adjudication

1. Provide training for judges, prosecutors and law enforcement personnel on local/national DWI issues utilizing the expertise of the Missouri Office of Prosecution Services, Department of Revenue, Office of State Courts Administrator, the National Traffic Law Center and the National Drug Court Institute

2. Provide continued funding for the statewide Traffic Safety Resource Prosecutor whose job it is to provide training and technical support for prosecutors in Missouri

3. Continue to provide funding for the MADD Court Monitoring project in selected counties and municipalities in order to increase conviction rates

4. Provide National Drug Court Institute training to DWI court teams from across the state

5. Incorporate topics on toxicology in law enforcement and prosecutor trainings

6. Provide equipment and training to enhance the DWI Tracking System (DWITS)

7. Provide motivational speakers for judicial personnel during training events such as their annual municipal judges and court clerks conference

8. Provide an integrated system, a web link and/or specifications to local law enforcement agencies that will allow them to access the DWITS and enter DWI arrest information that can be tracked through prosecution and sentencing

9. Continue expansion of DWI courts throughout the state

10. Provide funding for an additional transportation attorney at the Missouri Department of Revenue to provide legal representation for alcohol-related license appeals to Missouri appellate courts

11. Provide funding for a paralegal position in the legal counsel's office at the Missouri Department of Revenue whose dedicated function will be to serve as the ignition interlock coordinator

12. Work with local jurisdictions across the State to implement no-refusal policies for BAC testing

13. Work with local jurisdictions across the State to implement electronic warrant systems in order to reduce the amount of time it takes for law enforcement officers to obtain a warrant in DWI cases

14. Provide specimen kits to coroners and medical examiners in order to obtain BAC test results in fatal crashes

Technology

1. Continue to provide DWITS enhancements: design specifications for program linkages; develop reports as needed by the users; conduct training for users of the system

2. Support the efforts of the Missouri Safety Center Breath Alcohol Instrument Training and Repair Laboratory to calibrate and repair breath test instruments in order to improve their reliability, and reassign instruments as needed
3. Work with the Missouri Safety Center and the Missouri State Highway Patrol to purchase and place new breath testing technology around the state
4. Seek ways to expedite processing of DWI offenders
5. Improve the process of tracking DWI offenders who have been sanctioned to install ignition interlock devices
6. Monitor ignition interlock manufacturers/installers for adherence to the Breath Alcohol Ignition Interlock Device Program guidelines and administrative rules

Open Container (Section 154 Open Container Transfer Funds)

The open container transfer provision was initially authorized under TEA-21 and reauthorized under SAFETEA-LU and MAP-21. The provision requires states to pass and enforce a qualifying open container law or be subject to a 3% transfer of their federal aid highway funds until FY 2012 when it decreased to 2.5%. These funds were required to be diverted to either alcohol countermeasure safety programs (within the Highway Safety Office) or be utilized for qualifying hazard elimination projects. Some of the alcohol countermeasures identified within this plan are supported by Section 154 transfer funds. The remainder of the funding has been retained for hazard elimination efforts.

Historically Missouri has focused on the prevention of crossover fatalities through the installation of 3-strand median guard cable on major roadways – one of the most serious types of crashes occurring in Missouri. Because of our efforts using the Open Container Transfer funds to install the median guard cable, we have almost eliminated crossover fatalities on our divided roadways. Currently safety engineering efforts using this funding source involve the installation of rumble stripes focused on keeping vehicles on the roadway, systematically addressing horizontal curve crash locations, and the systematic improvement to numerous intersections with both low-cost and higher-cost initiatives.

Repeat Offender (Section 164 Repeat Offender Transfer Funds)

The repeat offender transfer provision was initially authorized under TEA-21 and reauthorized under SAFETEA-LU and MAP-21. The provision requires states to pass minimum penalties for repeat offenders for driving while intoxicated or driving under the influence laws or be subject to a 3% transfer of their federal aid highway funds and 2.5% in FY'2012. These funds are required to be diverted to either alcohol countermeasure safety programs

(within the Highway Safety Office) or be utilized for qualifying hazard elimination projects. Some of the alcohol countermeasures identified within in this plan are supported by Section 164 transfer funds. The remainder of the funding has been retained for hazard elimination efforts.

Missouri transferred funding under Section 164 in FY'2011 and FY'2012. The focus of this funding is on shoulder improvements on major and/or minor roads with a crash history. Safety engineering efforts using this funding source involve the installation of rumble stripes/strips focused on keeping vehicles on the roadway and improvements in horizontal curves.

Age	Fatalities	Percent of Total Fatalities
0-9	6	0.88%
10-19	62	9.08%
20-29	207	30.31%
30-39	122	17.86%
40-49	114	16.69%
50-59	116	16.98%
60-69	34	4.98%
>=70	22	3.22%
Total	683	100.00%

des everyone killed involving at least one
tance-Impaired (alcohol and/or drugs) driver

10-2012 Fatalities by Roadway Designation:

Roadway Desg.	Fatalities	Percent of Total Fatalities
Interstates	71	10.40%
Numbered Routes	81	11.86%
Unlettered Routes	151	22.11%
Numbered Routes	167	24.45%
Business	1	0.15%
City Street	4	0.59%
Ramp	87	12.74%
County Road	1	0.15%
Outer Road	109	15.96%
Private	7	1.02%
PVT	3	0.44%
Other	1	0.15%
Total	683	100.00%

See Appendix A on page 30.

0-2012 Substance-Impaired Driver Vehicle Types Involved in Fatal Crashes:

Vehicle Type	Substance-Impaired Drivers in Fatal Crashes	Percent of Total Fatalities
Passenger Car	250	39.37%
SUV	109	17.17%
Van	25	3.94%
Motorcycle	54	8.50%
ATV	19	2.99%
Farm Imp	1	0.16%
Other/Unknown	3	0.47%
Pick Up	173	27.24%
Large Trucks	1	0.16%
Total	635	100.00%

10-2012 Fatalities by Time of Day:

Time	Fatalities	Percent of Total Fatalities
Midnight - 5:59 am	234	34.26%
6:00 am - 11:59 am	49	7.17%
Noon - 5:59 pm	122	17.86%
6:00 pm - 11:59 pm	278	40.70%
Total	683	100.00%

HIGHWAY SAFETY DIVISION

MEETING TITLE: Missouri Coalition for Roadway Safety Impaired Driving Subcommittee

DATE: July 25, 2014

TIME: 9:00 a.m. – 12:00 p.m.

LOCATION: MoDOT, 830 MoDOT Drive, Purple Conference Room,
Jefferson City, Missouri

AGENDA TOPICS

- Introductions
- Approval of Minutes from March 28
- Presentation from OSCA on Data Found in Strategic Plan – Joseph Vradenburg & Donna Gaynor
- Secure Case.net System – Bud Balke & OSCA
- SATOP Screenings – Bud Balke & OSCA
- Official Approval of Strategic Plan – All Members
- Legislation
- Round Table – All Members
- Next Meeting

Missouri Coalition for Roadway Safety
Impaired Driving Subcommittee Meeting
 July 25, 2014 – 9:00 a.m. – 12:00 p.m.
 MoDOT, 830 MoDOT Drive, Purple Conference Room, Jefferson City, MO

KEY POINTS	

Welcome and Introductions:

Captain Greg Smith opened the meeting with introductions.

Approval of Minutes:

Bud Balke made a motion to approve the minutes of the last meeting on March 28th; Dwight Scroggins seconded and motion passed.

Court Data Collected:

Donna Gaynor distributed spreadsheets of Selected Alcohol Related Charges Filed and Disposed for the Circuit Level and Associate Level. The spreadsheet reflects all alcohol related charges - not just DWI. The charge of suspended imposition of sentencing (SIS) is included in the guilty charges. A separate report would need to be done in order to see the number of SIS charges. Also note that some of the charges filed in the associate division are bound-over/certified to the circuit division. Thus, those charges are counted as filed in both the associate and circuit levels.

All state courts and 68 municipal courts are reporting via JIS out of approximately 435 municipal courts that report monthly. Those courts also provide a report every six months to the court en banc. There are approximately 600 municipalities but not all have courts and about 100 of those send their cases to the associate circuit court. A chart was shown for FY'13 that reports 65 or 12% of the Municipal courts on JIS.

The report for Municipal Division Information can be found at <http://www.courts.mo.gov/page.jsp?id=68913> by scrolling down to that section. The 2013 Municipal Division Information will show active municipalities and how data are collected. Table 93 will show the number of cases filed, disposed and pending by municipality.

Dwight asked if there is any type of reconciliation done with municipal courts that do not report to JIS to compare the number of DWI tickets written by law enforcement and the number of DWIs reported by the courts. To date, there hasn't been much headway in this area unless the jurisdiction is audited. Captain Smith

will check to see if the number of tickets written by law enforcement agencies is captured in the Uniform Crime Reporting System and also which departments report.

Case.net:

Bud Balke applauded the efforts of Chief Justice Russell for going undercover to identify some issues with the courts. He also discussed issues with case.net. MADD is submitting 35 cases of offenders that they believe are missing DWI charges on Case.net. that are viewable to the public. It is MADD's belief that clerks in the courtroom hit the dispose event code either by accident or on purpose that impact the reporting of the person on case.net. Bud referenced a letter that has been submitted to OSCA outlining their concerns with Case.net and a desire for them to look into and resolve the disappearing records from Case.net system that are viewable by the public. There is a concern that some records are being placed at a secure level within Case.net and therefore are not being reported to the Missouri Victim Automated Notification System (MOVANS). Angie referred the committee to a letter dated July 1, 2014 addressed to Bud and written by Cathy Zacharias, Legal Counsel at OSCA. The letter outlined the confidential cases which are not open to the public. The letter also stated that judges have judicial discretion to seal cases or documents upon motion of a party and indicated there is case law which sets standards for sealing cases or documents.

Dwight suggested that the subcommittee take a look at the standards or case law for sealing a case (or placing it in a secure level within Case.net).

SATOP Screenings:

Bud Balke read a letter outlining MADD's concerns with specific counties in the State that reflect an increase in the number of SATOP judicial reviews over the past fiscal year. The concern focused on those instances when a judge has lowered the SATOP screening recommendations for program placement on cases regarding serious and repeat offenders. Mark Rembecki distributed a handout that reflects the number of judicial reviews and the amount of SATOP screenings lowered by county with the judicial review process. Mark stated that judges are allowed by state statute to change the level of program suggested in the SATOP assessment and hopes that a judge would take into consideration the ramification and potential consequences of choosing to alter the SATOP Assessment. He also reported that he will be doing a couple of presentations at the upcoming judicial colleges and plans to discuss the SATOP assessment process.

Formal Approval of Strategic Plan:

Bud motioned to approve final version of the Impaired Driving Strategic Plan for Missouri; Chuck Gooch seconded, motioned passed.

Legislation:

Some possible changes to ignition interlock requirements during next session. Ignition Interlock Coalition will possibly bring those changes forward.

Senate Bill 491 - Criminal Code Revision passed and is effective Jan 1, 2017.

Round Table Discussion:

Angie Plunkett mentioned that the DWI working group will be meeting to discuss Court Operating Rule #26 regarding the issuance of Limited Driving Privileges.

Action Items:	Responsible:
Check to see how many local law enforcement agencies report to UCR	Captain Smith
Check to see what it takes to get a municipal court reporting to JIS (computer, software, cost, etc) and who the contact person is at OSCA	Angie Plunkett
Presentation on how Case.net works and e-filing (levels and security)	Angie Plunkett
Provide copy of Statutes/Case Law regarding DWI cases and when they become confidential on Case.net	Angie Plunkett
Check to see if judicial reviews on SATOP assessments can be broken out to distinguish between waivers and reductions	Mark Rembecki

Next Meeting:

Next meeting is scheduled for Friday, October 17, 2014 from 9:00 a.m. – 12:00 p.m.

Missouri Case.net

Public versus Secured Case.net

I want to apologize for calling or inferring the secured case.net was a **phantom/judicial phantom/or magical case.net** system. I should have not called that system anything but a secured case.net system.

Please bear with me as I respond in a loose, historical, chronological term and stuttering stories. In 1996 OSCA became defensive and called MADD into question at a public Governor's DWI Task Force meeting in regards to judicial records. Our research into the situation resulted from a triple fatality involuntary manslaughter in Henry County and an involuntary manslaughter and 2nd degree assault in Laclede County. OSCA stated there were no cases involving missing "records of convictions" or "abstract of records" on any involuntary manslaughter convictions in the state and MADD should prove it. After two weeks of extensive research I showed them 20 sample victim cases in which 17 were missing the "records of convictions" or "abstract of records", thus resulting in no 5 year denials on those convicted drivers. One case involved a Corporal in the Missouri Highway Patrol killed in Jackson County with the offender not receiving the 5 year denial. This ultimately resulted in a Highway Safety funded audit which produced/discovered 19,000+ alcohol convictions being placed on offender's records all over the state of Missouri from 1998 cases going back to 1977. OSCA continued to deny the 17 cases until they had

made contact with every affected circuit and circuit clerk and found/discovered the information was correct. OSCA was very protective of the clerks and stated some of the clerks never resubmitted the "record of convictions" after the correction logs showed numerous requests for submission because they didn't understand. The debate was constant on why the affected clerks failed to correctly submit the proper "record of conviction" by a manual (paper) system. Subsequently OSCA then denied the 19,000+ number of unreported convictions and stated the new number was 6500+ records. They assigned a liaison, Anne Wilson, to contact me periodically to see if MADD was finding any other cases inadvertently. MADD did find other cases and they resulted in a second audit (clean-up), funded by Highway Safety again. Convictions were being placed on offender's records with no one from OSCA able to reveal how many records were actually cleaned up. The approximate number is still an unknown factor to MADD. Ultimately the first and second audits helped bring about or continue the implementation of the JIS system with certain counties selected as the pioneers of the electronic records.

Move forward in time and MADD turned over information to the Department of Revenue, Attorney General's office and other agencies involving information of a few, rare, isolated clerks taking money from defense attorneys to make the manual (paper) DWI tickets disappear. This process resulted in indictments in five+ counties of assistant clerks with final dispositions unknown. A number of defendants were issued administrative actions by DOR resulting in witnesses against their respective defense attorneys because their offense reappeared and their license was suspended. The total number of cases that were

destroyed is unknown at this time. Some defense attorneys were suspended by the MO Bar Association or disciplined by the Disciplinary Counsel with the discipline action noted on sixteenth page of the St. Louis Post and Kansas City Star.

Time passes and a Missouri Highway Patrolman is killed by a drunk driver in Texas County. Ultimately a circuit clerk refuses to send in a record of conviction on the involuntary manslaughter for many, many, many months. MADD and DOR personnel try every communication skill to persuade the clerk to send in the ROC but MADD ultimately has to buy a criminal history record from the Missouri Highway Patrol and hand-deliver it to DOR to get results from OSCA. This results in the Executive Director of OSCA calling me from Washington D.C. and an in-flight plane trip and ordering the Texas County clerk to send in the ROC. One single case with one single record submitted correctly.

Moving on in time the initial disappearance of 3400+ criminal cases from Missouri records from the Jefferson County Municipal Court resulted from a state agency asking MADD to look into individual DOR administrative hearings for that county. Again, one case of 2nd degree assault precipitated in having two other state agencies finding most of the 3400+ cases and determining it was approximately 1900+ cases and making sure they were properly annotated. Some of the responsible reporting officials are no longer employed.

Time passes and MADD discovers 67+ cases unreported, not sent in correctly, never corrected for submission in St. Francois County on alcohol offenses. The first case that had come to our attention was an

offender on a triple fatality involuntary manslaughter that ultimately made MADD look further into improper record policies or reporting issues. Those records were cleaned up as far as MADD knows.

Further time passes and MADD, with assistance, uncovers 560+ offenders with stay orders that were extended by one associate circuit judge, up to and including three years. Afterward the judge keeps victim advocates, volunteers and victim families outside the courtroom on the pretext the massive courtroom is too full. A coalition of folks in Jackson County became responsible for hearing those cases and closing them out with a final disposition. That was accomplished as far as MADD knows and we thank them for that effort.

Present time, just like the above mentioned Missouri Highway Patrol case in Texas County I have many individual cases on file. They have the same type of case annotations and resulting in the paper record of conviction or electronic record not submitted, not submitted correctly, the requested correction never resubmitted or finally after many months being submitted in a correct format by a clerk or judge.

Post case.net existence time span to present day. MADD Missouri has seen many cases in which felony DWI, involuntary manslaughter, 2nd degree assault, misdemeanor DWI, and other alcohol offenses have disappeared from public case.net for no apparent reason. I take responsibility for not being inquisitive enough or diligent enough when dealing with victim families or child endangerment cases. The thought was some type of computer glitch or program application error, overall program errors, etc. etc. etc.....

The MADD Missouri State organization would like to see the improper, possibly unethical disappearances cease for our victim families and callers on child endangerment situations. Many of these cases disappear shortly after being charged, they disappear before sentencing in which confidential information is not a reason, or they obviously disappear when a judge so orders to make it a "closed record" which obviously is sometimes legit. The MADD Missouri organization understands OSCA's definitions from a non-attorney standpoint. We understand an SIS upon completion of probation. And I have read the two page letter from Catherine Nelson Zacharias as the Legal Counsel of OSCA dated July 1, 2014.

A number of cases we have do not entail non-reporting municipalities to the JIS system although since OSCA (Ms. Zacharias) has raised the issue MADD will have a heightened awareness. Apparently folks at OSCA have a misbegotten assumption that MADD is referring to only cases on the massive clean-up of St. Louis municipal cases. That process began being reported better after Governor Nixon's DWI legislation was passed in 2009. Wrong, we are not talking of those cases!

A number of "closed record" cases have been issued by judges or (clerks) for preferential treatment or a myriad of improper reasons, justifications, or defense attorneys. MADD Missouri does not want a log-on capability for any of your three tiered security level systems, or confidential systems, or closed records. MADD is only asking for what the tax paying public should receive. MADD is asking that public felony and misdemeanor DWI records, public involuntary manslaughter

records, public 2nd degree assault records, public hit-and-run records, and public alcohol offenses not affiliated with "juvenile, paternity, adoption, mental health, treatment court records" be placed on case.net and not removed until judiciously and ethically appropriate.

Unfortunately, while recently speaking with other victim assistance agencies and coalition members a number of serious charges involving child abuse, sexual assault, domestic violence, etc. etc. have begun disappearing from case.net with no legal reason or policy protocols to justify their removal. I would not even venture into that area but am making you aware.

The above stories are true and factual to the best of my recollection and records on file. MADD has previously asked for improvements in reporting policies, updated training for clerks and judges, audits, and even human resource considerations to improve a problem. We are asking that OSCA representatives stay in contact with the Coalition for Roadway Safety and the Impaired Driving Sub-committee as these case.net concern solutions are discussed by the judiciary and the many fine clerks in the state of Missouri. We are sure they can produce a workable solution and stop many of these strange disappearances.

Thank you for your consideration, again.

Bud Balke
MADD Central Missouri
Court Monitor Coordinator

Also per the meeting with OSCA I was trying to see if my contact at the courts would be able to call you and explain a bit better how their secured case.net works because it is still confusing to me and I guess also because it is different in each county apparently, but I know she is in and out so I may not reach her before then. My first gripe with it was when I was checking cases with Judge [REDACTED]. I have always thought he was too lenient in sentences and laid back with the attorneys. Anyway, upon going back through the dockets that I printed from case.net sometimes before and sometimes after court they were no longer on there and I'm not talking one or two cases. It was a good chunk of them on any given occasion (DWI cases and perhaps others).

When you brought up [REDACTED] and him being able to have his cases removed, and me thinking about this the other day...granted I left the courts before they started the secured case net and e-filing but no one was allowed to just have something removed. The only thing that I can recall that was "private" or not public record was medical records that were sealed. There are actually 6-levels of security and I believe the court clerks only have access to the top 3. From 4 & up we don't know who, besides maybe the circuit clerk and the administrators, has access to these other levels or what is being put in there, hence as we discussed recently

1

the case you mentioned where there was a docket entry stating that a form was filed, would be a good place to start for everyone who is not making those notations in case.net.

And I'm sorry to say this but I think the victim advocate from the city was just being nice when she said they could have possibly been deleting things by accident. While it's certainly possible this is something as a court clerk you can't continue to do over and over again. I am trying to recall if you said the cases were completely gone or there was more of an issue with MOVANS not being able to get the notification because the case was gone. What would make sense is that the case was open then closed, the disposition code was put in ie DDPT (dismissed by parties) and then automatically the system by default removes it from the open calendar because it's done with and there are no more hearings to be scheduled. If that's what she's talking about then that's normal protocol.

I believe what she was conveying is that open cases (if they aren't being completely removed) are being given a disposition code before they are actually closed in which case is no crime either, but simply unfavorable for MOVANS purposes. Again if you see something in the docket text as in Hearing/Trial cancelled. The code entered is HRCAN. This means that the case is still open but for whatever reason they canceled the date and until there is a new hearing scheduled which may be an indefinite amount of time, it will also kick it off of the open schedule of cases. But either way they would still be showing up on case net.

Again, because I am grasping at theories here and have probably made this way too long, I am just trying to provide possible reasons for this. At the end of it if things are actually being completely removed/secured which was previously public that is obviously a big problem.

Good Luck at the meeting and don't do too much apologizing, you are not the issue. ☺

SATOP SCREENING CONCERNS

IT HAS BEEN REPORTED TO MADD THAT ONE ATTORNEY, IN CONCERT WITH ONE ASSOCIATE CIRCUIT JUDGE, IN THE 27TH JUDICIAL CIRCUIT, HAS MOTIONED FOR AND RECEIVED DOZENS OF ASSIGNMENT REDUCTIONS TO LEVEL 1 FOR SATOP PURPOSES. THESE HAVE INCLUDED PRIOR, PERSISTENT, CHRONIC, AND AGGRAVATED DWI OFFENDERS, OCCURRING OVER THE PAST SEVERAL MONTHS AND PREVIOUS YEAR. THESE INVOLVED DANGEROUS OFFENDERS AND THE SATOP PROVIDER APPEARS TO HAVE COMPLETED THE SECOND (SOME WERE THE ORIGINAL) ASSESSMENTS CORRECTLY, COMPETENTLY, ETHICALLY, AND WITHIN SATOP POLICIES. THIS APPEARS TO HAVE HAPPENED WITH DWI OFFENDERS IN CIRCUITS 15, 16, 17, 18, 27, 28, AND 30 AND EVEN POSSIBLY OTHER CIRCUITS.

AN ATTORNEY HAS TAKEN DWI (ALL THE ABOVE MULTI OFFENDERS AND SOME FIRST TIME OFFENDERS WITH VERY BAD/LOW ASSESSMENTS) CLIENTS FROM THE ABOVE LISTED CIRCUITS AND HAD THEM TAKE THE SATOP ASSESSMENT IN ONE PARTICULAR OFFICE IN THE 27TH JUDICIAL CIRCUIT. AFTER THE SATOP ASSESSMENT IS CORRECTLY DONE THE ATTORNEY ENTERS AN APPEARANCE IN FRONT OF ONE, PARTICULAR JUDGE AND REQUESTS A REDUCTION OF THE ASSESSMENT AND THE JUDGE REDUCES THEM. THIS CULMINATES IN HUGE, VERY LARGE SUMS OF ATTORNEY FEES BUT ULTIMATELY THESE DANGEROUS DWI OFFENDERS ARE RECEIVING AN INCORRECT ASSESSMENT BY THE UNTRAINED JUDGE AND BECOME ELIGIBLE FOR MANY FACETS OF UNDERMINING THE JUDICIAL AND CRIMINAL JUSTICE SYSTEM AND POSSIBLY RECEIVING THEIR DRIVING PRIVILEGES BACK.

THIS STABS THE SYSTEM IN THE BACK AND THIS SYSTEM OF SATOP ASSESSMENT REDUCTION ON DANGEROUS DWI OFFENDERS SHOULD BE STOPPED ASAP!

THE SATOP PROVIDER RECEIVES A SUMMONS FOR ASSIGNMENT REDUCTIONS AND THE ASSOCIATE CIRCUIT JUDGE REQUIRES THEM TO JUMP THROUGH MANY HOOPS INCLUDING REQUIRING THEIR ATTORNEY FROM JEFFERSON CITY ATTEND AND CONSISTENTLY RULES ON ASSESSMENT REDUCTIONS, AGAINST THE STRONG OBJECTIONS AND TESTIMONY OF THE SATOP ATTORNEY.

WHAT CAN THE IMPAIRED DRIVING SUBCOMMITTEE DO?

HIGHWAY SAFETY DIVISION

MEETING TITLE: Missouri Coalition for Roadway Safety Impaired Driving Subcommittee

DATE: October 17, 2014

TIME: 9:00 a.m. – 12:00 p.m.

LOCATION: MoDOT, 830 MoDOT Drive, Purple Conference Room,
Jefferson City, Missouri

AGENDA TOPICS

- Introductions
- Approval of Minutes from July 25th
- Presentation from OSCA on Case.net – Cathy Zacharias & Sherri Paschal
- No Refusal Policies & AIR Submission – Chuck Gooch
- SATOP Assessments (broken out between waivers and reductions) – Mark Rembecki
- Law Enforcement Agencies Reporting to UCR – Captain Smith
- Legislation
- Round Table – All Members
- Next Meeting

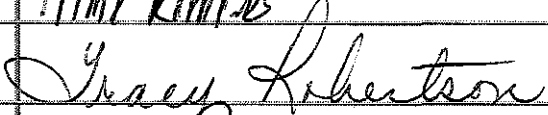

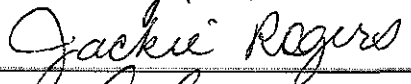

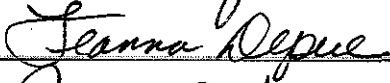

Missouri Coalition for Roadway Safety

Impaired Driving Subcommittee Meeting

October 17, 2014 – 9:00 a.m. – 12:00 p.m.

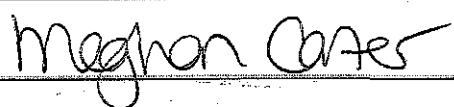

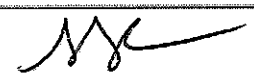

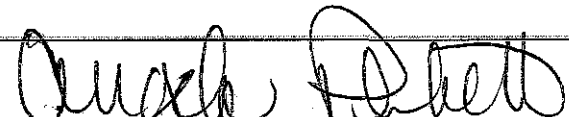

MoDOT, 830 MoDOT Drive, Purple Conference Room, Jefferson City, MO

KEY POINTS	

Welcome and Introductions:

Dwight welcomed everyone and introductions were made.

Approval of Minutes:

Chuck Gooch made a motion to approve the minutes of the last meeting on July 25th, Susan Glass seconded and motion passed.

Case.net:

Cathy Zacharias with the Office of State Courts Administrator was introduced. She provided an overview of Case.net. Case.net is the portal for viewing court case information with both public and private access. She described the levels of cases listed in case.net. Level 1- Public, Level 2-official court case, Level 3-confidential open to court staff only, Level 4-Confidential open to select court personnel, Level 5-Sealed, Level 6-sealed judge only, Level 9-expunged. (See attached)

Historically, public and secure case.net was available. Secure for LE, prosecutors, court personnel. Court allows access for prosecutors. E-filing-Lawyers can view electronic filings. Child support prosecutors can see specific cases. Law enforcement has access up to Level 3 cases. Final disposition is allowed to be given to public but no details. Levels 7 and 8 are not used.

Bud asked if an SIS would fall under the Level 1 while on probation, after successful completion the case moves to level 3. If there is a violation of probation the n the case remains at a Level 1.

Prosecutors do not count on Level 3 cases for DWI cases.

66 municipal courts are “stand alone” courts using JIS. 111 municipal courts where municipal ordinances are heard by Associate court and all those cases are on JIS. Municipal help screen on JIS will show which municipal courts are on JIS.

Dwight asked if there is a standard for when Judges move cases to Level 3? Cathy explained that there isn’t a standard, it is judicial discretion. To raise the case on case.net does not necessarily make the paper case confidential. Depends what they are asking for. Public would have to go to the court to view the file.

Dwight asked what the process is for the respondent to request removal of case. Cathy stated Court Operating Rule #2. No formal procedure. Sent to the court to request by motion to raise security level. All parties would receive copy of motion. Dwight-court, clerks office, request to see order of protection case, clerk shows.

Dwight asked if we can track which or how many judges close cases? Cathy stated that they could not unless there is a specific request to look into it.

No Refusal Policies & AIR Submission:

Refusal to breath test followed by warrant for blood. LE need to submit an AIR on each, typically a refusal AIR first, then the AD AIR when a blood result is received. These are separate reports, but the narrative and most all other parts, except p. 2, are the same, and the Lab report with the blood result attached. When the BAC AIR is filed with the DOR, DOR will mail notice to the driver. LE should not. We track this.

SATOP Assessments:

Mark Rembecki explained that the information management system that the Division of Behavioral Health uses to collect data on judicial reviews only allows for limited information on whether or not a SATOP recommendation is lowered. The system does not provide specific placement information based on the judicial review process. The judge can’t waive SATOP requirements in instances of a repeat or persistent offender and in those instances when the BAC at the time of arrest is .15 or above. Some counties are requiring the SATOP agency as a corporate entity to be represented by an attorney for judicial reviews. Many agencies cannot afford to retain an attorney. In these instances, it would be beneficial for the agency to comprise a one-page summary supporting their placement recommendation.

Bud asked if the judges are using solid reasoning for the reductions and Mark stated that it is improving.

A suggestion was made to revise the form to add language regarding lowering the SATOP level. The State Judicial Records Committee (SJRC) approves all of the court forms. Dr. Gowdy works with Michelle Fringer with OSCA.

Dwight asked how many waivers are issued statewide. Do not think they can get a number. DOR gets the waiver, but do not know if they can query the system. Can request the staff bring the waivers to Tracy in order to track them.

Dwight stated that his jurisdiction is developing a survey tool to look at several issues related to the SATOP assessment. He estimates that the final survey will be complete next week and he will distribute to the group. The survey will be sent all individuals who have participated in SATOP in Buchanan County area.

Law Enforcement Reporting to UCR:

Captain Smith had a report ran that shows how many law enforcement agencies are reporting the UCR. Majority of agencies are reporting or they have someone do it for them. List is over 600. No concerns. There are a few agencies that are behind but not extensive. Captain Smith will provide a copy of the spreadsheet that shows reporting for the law enforcement agencies.

Legislation:

Jackie and Tracy mentioned that there is speculation that some ignition interlock legislation may be filed. The legislation will eliminate the 30 day and 90 day hard walk and push all violators into ignition interlock use for first offenders. In addition, they may change the language in current statute to require a violation free period. Currently offenders can violate at any point (or multiple times) during ignition interlock use and will only receive one six month extension on use regardless of when the violation took place or the number of occurrences.

Catherine mentioned that there is legislation pending regarding municipal courts. A new legislative committee (Joint Committee on the Justice System) was created to review the courts. The committee is expected to review court costs. There are some court costs assessed in municipal court that may not have statutory authority.

Round Table Discussion:

Angie provided handouts titled: Approved DWI Courts as of September 26, 2014; and Approved DWI Courts and Graduation Requirements. Two more DWI courts were approved in September - Jasper, 29th circuit and Butler Co-veterans court. Boone County asked for approval for a DWI Court as part of the Veterans Treatment Court; however staff has not been trained. They will be attending the 3 ½ day training in November.

Dwight asked if costs associated with each court could be added to the spreadsheet. Angie will include that information on the next version. There is a minimum of \$30 per month required.

Leanna thanked all those who attended the Blueprint Conference. One of the topics covered at the conference was the issue of marijuana legalization in Colorado. Leanna wants to make sure that we are ready if legislation is proposed in the upcoming legislative session. Some of the issues are: knowing who the marijuana industry is made up of; ready to communicate the safety messages; have people prepared to speak on the issue; know what type of data we need to collect at a base line level on usage (crashes, lab impact, etc.). She also mentioned that in Colorado one-third of the people stopped refused all tests after the law was enacted.

Angie mentioned that the Missouri Association of Drug Court Professionals has a concern that all groups have the same message regarding marijuana legalization. Angie will send the contact information for the group. Dr. Kevin Sabet has been invited to speak at the MADCP conference in March.

Action Items:	Responsible:
Send a list of the Municipal courts for distribution to the subcommittee	Cathy Zacharias
Webinar/Article for Traffic Notes regarding no refusal policies and AIR submission	Chuck Gooch/Susan Glass
Check Highway Safety grantees for UCR compliance	Bill Whitfield
Send UCR reporting to subcommittee members	Captain Smith/Jackie Rogers

Court Operating Rule for DWI Courts forwarded to Subcommittee Members	Angie Plunkett/Jackie Rogers
Provide a column on report for DWI Courts to show the cost	Angie Plunkett

Next Meeting:

Next meeting is scheduled for Friday, January 30, 2015 from 9:00 a.m. – 12:00 p.m.

Security Levels for Case.net

Level 1 – Public

Level 2 – Official Court Use; may be opened to the public under certain circumstances (for example, a paternity case that has been disposed, but by statute, the judgment is made available). Only the case header, parties and judgment appear on Case.net.

Level 3 – Confidential; open to court staff only (for example, open paternity and some criminal).

Level 4 – Confidential; open to select court personnel (for example, Juvenile, Mental Health, Treatment and Confidential Appeals).

Level 5 to 9 – Sealed

Approved DWI Courts as of September 26, 2014										
Circuit	County	DWI Court Docket	Judge	Date Approved	LDP's Issued	LDP's Revoked	LDP's Suspended	Expired/DOR Reinstated	Surrendered Voluntarily	
1st	Clark/Scotland	Hybrid	Rick Roberts	1/13/2012	0	0	0	0	0	0

HIGHWAY SAFETY DIVISION

MEETING TITLE: Missouri Coalition for Roadway Safety Impaired Driving Subcommittee

DATE: January 30, 2015

TIME: 9:00 a.m. – 12:00 p.m.

LOCATION: MoDOT, 830 MoDOT Drive, Purple Conference Room,
Jefferson City, Missouri

AGENDA TOPICS

- Introductions
- Approval of Minutes from October 17, 2014
- Update on State v. Craig – Angie Plunkett
- DWI Court Programs Delaying Conviction – Angie Plunkett
- Criminal History Checks for LDPs – Angie Plunkett
- GHSA Impact Study – Leanna Depue
- Status of 'and/or' Cases – Jackie Rogers (info submitted by Chuck Gooch)
- Legislation
- Round Table – All Members
- Next Meeting

KEY POINTS	

Welcome and Introductions:

Meeting was called to order by Dwight Scroggins and self-introductions were done by each attendee.

Captain Greg Smith announced his promotion to Major of the Missouri State Highway Patrol Technical Services Bureau effective May 1st.

Leanna Depue announced her retirement effective March 1st. She thanked the committee for their leadership.

Approval of Minutes:

Dwight cited a correction and/or clarification needs to be made in the second paragraph of the legislation topic. Jackie will send the paragraph to Cathy Zacharias for clarification since she brought up the issues at the last meeting. With that exception, Bud Balke made a motion to approve the meeting minutes of October 17, 2014, Tracy Robertson seconded and the motion passed.

Update on State v. Craig:

OSCA is working with all agencies involved on the Record of Conviction and the charge code revisions. The uniform citation was revised to incorporate the new charge codes. Tracy Robertson has a copy of the changes and will scan/send to Angie Plunkett to ensure the guilty plea is included with the new technology.

DWI Court Programs Delaying Conviction:

A handout regarding the 12th Judicial Circuit DWI Programming Proposal was provided to the subcommittee members which is similar to the process St. Louis County currently follows. Discussion followed regarding St. Louis County's process of reduction of charges after successful completion of the DWI court program. Bud

stated that MADD is 100% against the process. Dwight commented that the subcommittee should be on record stating that we oppose any efforts at allowing reductions in pleas on DWIs to become the standard disposition upon completion of DWI courts anywhere outside the metropolitan areas where that is already occurring.

The Drug Court Coordinating Commission oversees the funding and guidelines for the DWI Courts which include guidelines developed by Highway Safety. The guidelines for the FY16 funding year were approved in January 2015.

Criminal History Checks for LDPs:

Criminal history checks for LDPs were established in 2012. The following year language requiring criminal history checks for LDP's was taken out of statute. LDPs are a civil matter and not a criminal matter. The DWI courts have been advised they can no longer run a criminal history prior to issuing a LDP. The participant can obtain a copy of their criminal history check and present it to the court as evidence. Angie stated the Treatment Court Committee has a meeting scheduled next Monday and this issue is an agenda item. Dwight Scroggins asked if the Impaired Driving Subcommittee should endorse language. Dwight asked that Angie let Jackie know if the language is introduced.

GHSa Impact Study:

Leanna stated that she is serving on a National Cooperative Highway Research Program through the Transportation Research Board that will look at the impact of marijuana on drivers. States are finding that they are ill-prepared for this issue and have no baseline data for comparison purposes once legislation is passed. The research study is to try to better prepare States for marijuana legislation. Medical marijuana legislation has been in place since 1998. How do we prepare our State to advocate against legalization of marijuana? Leanna is requesting that the committee look at the problems of marijuana use and driving. Leanna posed the question, "How many of our fatal drivers had marijuana in their system?" She then asked if we are educating our population regarding the dangers of marijuana and driving. Leanna is encouraging this committee to answer the questions and prepare information on the impact of marijuana on drivers. Mark Rembecki stated that the Division of Alcohol and Drug Abuse is working and focusing on establishing a baseline and information regarding the legalization of marijuana.

Tracey Durbin stated that we need to educate the public about the crisis in Colorado. He requested that the committee create a brochure, white sheet or PSA. Mark Rembecki will check to see if his office is developing a brochure or something to put out to the public. Tracy also mentioned the four (4) bills in the Missouri Legislature which are HS166; HS490; HJR15; and SB255 that pertain to marijuana.

Julie Seymore, Missouri Association of Drug Court Professionals, is putting together an advocacy group to discuss and support educational efforts on the impact of marijuana. They plan to host statewide town hall meetings. Jackie will follow up with Julie regarding the meetings.

Bud stated that MADD is not taking a stance until they have research on Drugged Driving.

Dwight stated that priorities for this subcommittee regarding legalized marijuana and driving should be focused in the following areas:

- Support primary safety belt law
- Oppose medical marijuana - it has been the first step in the legalization process in every other state
- Primary argument is the damaging effects on the brain - particularly the adolescent brain
- Smoking marijuana is thought to be the primary way it is used but edibles is more far reaching marketing tool. Particularly effective recruiting the next generation of users which are the children of today. That is the reason for marketing edibles in the form of candy.

- The idea that legalization will stop the illegal market has not shown to be true. The tax revenue has driven up prices which in turn mean the street dealers are still operating and selling at 1/3 the price.

Dwight made a motion that this committee solicits the Missouri Coalition for Roadway Safety Blueprint PIE subcommittee to develop an impaired drugged driving PSA for the next legislative year. This would be funded starting in July 2015.

Status of 'and/or' Simulator Cases:

Jackie reported for Chuck Gooch on the status of two different cases: *Steirs* in the Eastern District and *Riggins* in the Southern District with an oral argument on the same issue in the Western District on January 28th. Of course the Ruling in the Southern District is more favorable; however, it looks like the issue regarding the use of all three simulator standards each time a monthly calibration check is conducted will likely go up on a request for transfer to the Supreme Court as there is a conflict between the districts.

Legislation:

The main areas of legislative concern are: legalization of marijuana; repeal of motorcycle helmet law; cell phone texting ban; and a primary seat belt SB 275. Dwight requested that Jackie provide a list of all municipalities that have primary seat belt ordinances to the subcommittee members.

Round Table Discussion:

Mark provided an update on the Substance Abuse Traffic Offender Program (SATOP) budget specific to the Serious and Repeat Offender Program (SROP). SATOP does not receive federal funding and operates from the offender fees that are paid into the program. Since having a fee increase in 2009, the service package amount for DWI court participants had been increased from \$1500 to \$3000 per participant in an episode of care. The most recent fiscal analysis of SATOP reveals year-to-date expenditures exceeding revenues in the amount of \$398,030,33 and are looking on how to curtail those expenditures. Also, Mark spoke on SATOP's part in the Division of Behavioral Health's State Plan for the FY 2016-2017 Substance Abuse Prevention and Treatment Block Grant. The strategies include:

- Requiring additional interview questions outside of the Driver Risk Inventory (DRI-2) to ensure assessment consistency;
- Implement SATOP specific continuing education training for SATOP Qualified Professionals;
- Evaluate the feasibility of lowering the Blood Alcohol Content (BAC) placement criteria for levels I and II; and
- Continue to educate judiciary and prosecutors on the SATOP screening and referral process.

In addition, the SATOP manual for all the contracted agencies has been revised. Bud requested that Mark bring data on the number of participants that complete the level II Weekend Intervention Program (WIP) to the next meeting.

Angie handed out information on the approved DWI courts and graduation requirements.

Bud stated that MADD national will not be adding to the Court Monitoring Program. No major changes.

Action Items:	Responsible:
Address the issue of the ticket and give a report at the next meeting.	Tracy Robertson and Angie Plunkett
Angie will let Jackie know the language decided for Criminal History Checks.	Angie Plunkett and Jackie Rogers
Bring back any information regarding marijuana/driving studies.	All
Send OSCA's conference information to the committee members.	Jackie Rogers
Angie will send Jackie a position paper from NADCP to send to all committee members.	Angie Plunkett and Jackie Rogers
Jackie will send the committee a list of the municipalities that have a Primary Seat Belt Ordinance.	Jackie Rogers
Jackie will send the committee a list of bills currently in the Missouri House and Senate.	Jackie Rogers
Mark send the SATOP revised manual to Jackie for distribution to the committee members	Mark Rembecki and Jackie Rogers
Mark bring report on the WIP at the next meeting	Mark Rembecki

Next Meeting: 9:00 am to 12:00 noon on April 24, 2015.

Original Class D Felony DWI offer:

Prior to plea, complete 10 days shock in the County Jail

Plead guilty to the Class D Felony and enter the DWI Treatment Court Program

CASENET disposition at this time will be SUSPENDED

If individual **SUCCESSFULLY** completes the program, the Felony Guilty Plea is withdrawn, an amended information is filed and they plead guilty to Class A Misdemeanor.

CASENET disposition at this time will be GUILTY PLEA; Costs Ordered SES 2 YEAR Supervised Probation Term; 1 year Jail

The individual will then be placed on a self-pay two year supervised probation where they will continue to report to a probation officer, submit to drug and alcohol testing and complete any other special conditions ordered by the court and will have already completed the mandatory 10 days shock.

If individual is **TERMINATED** from the DWI program, then they will be able to be sentenced under the full range of sentencing guidelines of the Class D Felony and will be given credit for the 10 days they have served prior to plea.

Original Class C Felony DWI offer:

Prior to plea, complete 10 or 30 days shock in the County Jail depending upon plea offer

Plead guilty to the Class C Felony and enter the DWI Treatment Court Program

CASENET disposition at this time will be SUSPENDED

If individual **SUCCESSFULLY** completes the program, the Felony Guilty Plea is withdrawn, an amended information is filed and they plead guilty to either Class D Felony or Class A Misdemeanor as determined by plea agreement

CASENET disposition at this time **for Misdemeanor GUILTY PLEA**; Costs Ordered SES 2 YEAR Supervised Probation Term; 1 year Jail

The individual will then be placed on a self-pay two year supervised probation where they will continue to report to a probation officer, submit to drug and alcohol testing and complete any other special conditions ordered by the court and will have already completed the mandatory 10 days shock.

CASENET disposition at this time for **Class D Felony GUILTY PLEA**; Costs Ordered SES 4 YEAR Supervised Probation Term; 4 year

The individual will then be placed on supervised probation with MBPP where they will continue to report to a probation officer, submit to drug and alcohol testing and complete any other special conditions ordered by the court and will have already completed the mandatory 30 days shock. With ECC, the individual has the opportunity to complete probation term within two years as well.

If individual is **TERMINATED** from the DWI program, then they will be able to be sentenced under the full range of sentencing guidelines of the Class C Felony and will be given credit for the 10/30 days they have served prior to plea.

Questions we have:

At what point does the Record of Traffic Disposition get issued and will the individual get hit with this twice by DOR; once at the initial plea and then again at the time of withdrawal and new guilty plea? In other words, will they get suspended twice due to the two separate guilty pleas?

How does this impact the LDP, if at all?

Do you see any other issues that might impact reporting on a department of revenue report?

New/Current Issue

Under current law, by statute, when an individual is terminated from our current DWI Program, the PO can only recommend CODS and it is being interpreted that the Court must as a continuation of supervision sentence them to CODS, regardless of what their sentence is **UNLESS**, the individual does not object to the revocation.

Are any other courts discussing/having issues with this?

Missouri Court of Appeals

Southern District

Division Two

JIMMY KENT RIGGINS,

Petitioner-Respondent,

v.

DIRECTOR OF REVENUE,

Respondent-Appellant.

)
)
)

No. SD33368

Filed: Jan. 27, 2015

APPEAL FROM THE CIRCUIT COURT OF GREENE COUNTY

Honorable Jason R. Brown, Associate Circuit Judge

REVERSED AND REMANDED

The Director of Revenue ("Director") revoked the driver's license of Jimmy Kent Riggins ("Driver") for operating a motor vehicle in June 2013 with a blood-alcohol content that exceeded the legal limit. *See* sections 302.505 and 302.525.¹ Driver petitioned for and received a trial *de novo* pursuant to section 302.535.² The trial court sustained Driver's

¹ Unless otherwise indicated, all statutory references are to RSMo Cum. Supp. 2009. All references to the Code of State Regulations ("CSR") are to Mo. Code Regs. Ann. (2014).

² No transcript has been filed in the instant appeal. The docket entries concerning the hearings held on March 21 and June 6, 2014 do not state what exhibit(s) were offered or admitted. The amended judgment discussed, *infra*, does not identify exhibits or recite facts about the breath test or the machine used to obtain it. Director's statement of facts relies upon docket entries and pleadings in the legal file, as well as "Exhibit A" purporting to be records from the Director's department that they have deposited with this court. Generally, "[t]his court will not convict the trial court of error when we do not know what evidence was before it." *In re Carl McDonald Revocable Trust Dated Oct. 1, 1979*, 942 S.W.2d 926, 933 (Mo. App. S.D. 1997). We do so here because Driver makes no objection to Director's deposit of Exhibit A and presumably cites it himself as he refers to "exhibits" with no specification of something different than that cited by the Director. Driver also affirmatively states that the statement of facts in Director's brief is correct regarding the probable cause statement and the officer's report related to the case. Finally, Driver agrees with Director's

objection to admission of Driver's breath-test results, ruled in its amended judgment ("the amended judgment") that Director "failed to establish that [Driver's] BAC [blood-alcohol content] was .08% or more by weight[.]" and ordered Director "to remove the revocation" and "reinstate [Driver's] driving privileges to the extent he is otherwise eligible."

Director contends the trial court erred in excluding the breath test for two reasons: (1) "the breath analyzer used to administer [Driver's] breath test had been properly verified and calibrated according to applicable regulations of the Department of Health and Senior Services [("DHSS")] as only "a single concentration level" was necessary "when performing a calibration check"; and (2) the trial "court applied the wrong version of the [DHSS] regulation governing the verification and calibration of breath test devices" because "the regulation is procedural and is to be given retroactive application[.]" and "the version . . . in effect at the time of [Driver's] trial clearly stated that only a single concentration level of the standard simulator solution" was necessary in checking the breath analyzer's calibration.

Finding merit in Director's first point, we reverse the judgment and remand the case for further proceedings consistent with this opinion.³

summary of "[t]he procedural aspects of the case[.]" While the utilization of Rule 81.13 -- which provides for an "Agreed Statement as the Record on Appeal" -- would have made the underlying facts more readily apparent, we will review the appeal based upon the facts that may be gleaned from the admissions made by Driver in his brief, and a maintenance report included in Exhibit A. Cf. *C.S., Jr. v. L.K.M.*, 73 S.W.3d 852, 854 (Mo. App. S.D. 2002) (where no transcript was filed, but the legal file included pleadings with exhibits, and the briefs contained statements of fact, the court "glean[ed] the facts from admissions found in or resulting from" those materials), and *In re Trust of Nitsche*, 46 S.W.3d 682, 684 (Mo. App. S.D. 2001) (documents not a part of the record are not considered on review but, "a statement of fact asserted in one party's brief and conceded as true in the opposing party's brief may be considered as though it appears in the record"). All rule references are to Missouri Court Rules (2014).

³ Because our resolution of Director's first point is dispositive of this appeal, we need not address the question of retroactivity.

Applicable Principles of Review and Governing Law

We will affirm a judgment reinstating driving privileges "unless it is not supported by substantial evidence, it is against the weight of the evidence, or it erroneously declares or applies the law." *Gannon v. Dir. of Revenue*, 411 S.W.3d 394, 397 (Mo. App. E.D. 2013). "The nature of our review is directed by whether the particular issue is a question of fact or law." *Cortner v. Dir. of Revenue*, 408 S.W.3d 789, 792 (Mo. App. E.D. 2013). The question at issue in this case is the appropriate interpretation of an administrative regulation -- a question of law. "[Q]uestions of law decided in court-tried cases" are reviewed *de novo*. *Pearson v. Koster*, 367 S.W.3d 36, 43 (Mo. banc 2012). "We apply the same *de novo* review to regulations as to statutes[.]" *Turner v. Mo. Dept. of Conservation*, 349 S.W.3d 434, 442 (Mo. App. S.D. 2011), and "[i]n interpreting administrative rules, we rely on the same principles of construction as those used in interpreting statutes." *Tate v. Dir. of Revenue*, 982 S.W.2d 724, 728 (Mo. App. E.D. 1998).

Facts and Procedural Background

On June 14, 2013, Driver was approached by a Greene County Sheriff's Deputy at a "DWI checkpoint[.]" The officer, who smelled intoxicants emanating from Driver's vehicle, administered a field sobriety test to Driver, and Driver agreed to provide a breath sample. Driver's breath sample registered a blood alcohol concentration by weight of .169 % on an "ALCO-SENSOR IV WITH PRINTER" machine ("the breath analyzer").

At Driver's March 21, 2014 trial *de novo*, Director's counsel offered records that included Driver's breath test result. Driver's counsel objected to its admission, but the basis for his objection is not recorded in the docket entry related to the trial. The trial court did not make an immediate ruling on Driver's objection. Instead, it directed Director to file

a brief concerning that objection and permitted Driver to file a brief thereafter. Director's trial brief maintained that Driver's position was that the version of 19 CSR 25-30.051 "in effect from December 30, 2012 to February 28, 2014 required Type II permit holders to use all three simulator standards each time they conducted a monthly maintenance check."⁴ Driver's subsequent trial brief confirmed that Director had stated Driver's position correctly.

The officer's report contained in Exhibit A indicated that it included a "[c]opy of [the] most recent Maintenance Report prior to test." A form dated June 7, 2013 -- "ALCO-SENSOR IV WITH PRINTER MAINTENANCE REPORT" ("the maintenance report") -- reflected the same serial number noted in the officer's report as the breath analyzer used on Driver, and the maintenance report was also included in Exhibit A. The relevant portion of the maintenance report is reproduced below:

BREATH ALCOHOL ACCURACY STANDARDS

TEST 1 .098	TEST 2 .098	TEST 3 .098

After the parties filed their trial briefs, the trial court entered its initial "JUDGMENT" in April 2014. That document stated "that the subject regulation unambiguously requires vapor concentrations at all three (3) of the delineated values.

⁴ "Maintenance checks are the standardized and prescribed procedures used to determine that a breath analyzer is functioning properly and is operating in accordance with the operational procedures established by [DHSS.]" 19 CSR 25-30.011(2)(F).

[Director's] argument of retrospective application despite the plainly stated limitation in the 'savings clause', is circular. [Driver's] objection to the breathalyzer results is sustained."

The trial court's subsequent amended judgment provided the same ruling on the admissibility of the breath test results as stated in the April 2014 ruling, added that "[b]ecause there was an insufficient foundation for admission of the breath test result, [Director] failed to establish that [Driver's] BAC was .08% or more by weight[.]" and ordered a reversal of Director's revocation as noted above.

Analysis

Point I asserts that the breath analyzer "had been properly verified and calibrated according to applicable regulations[.]" arguing, in part, that 19 CSR 25-30.051 does not exist in isolation and must be interpreted in the context of related rules, particularly 19 CSR 25-30.031.

Director's brief, relying on 19 CSR 25-30.031, then presents the following cogent argument:

The rule defines when maintenance checks must be performed and requires that records of those maintenance checks be kept. 19 CSR 25-30.031(3) (Nov. 30, 2012). The rule also requires that maintenance checks be recorded on "the appropriate maintenance report form for the specific instrument being checked[.]" 19 CSR 25-30.031(7) (Nov. 30, 2012). Those approved forms were included with the rule in the Code of State Regulations and provide further insight into the intent behind the rules.

The approved form for the [breath analyzer] contained a section for recording the calibration check. That section contained the admonition, "Only one standard is to be used per maintenance report." It also provided the following directions: "Run three tests using a standard solution. All three tests must be within $\pm 5\%$ of the standard value and must have a spread of .005 or less. Mark the box corresponding to the standard solution being used." Below those instructions were three boxes: one for a ten-percent standard solution, one for an eight-percent standard solution, and one for a four-percent standard solution.

If the regulations required three calibration checks to be performed using three different standard solutions, DHSS would have included space

on the maintenance reports for the results of calibration checks at all three vapor concentration percentages. Instead, DHSS included one box for one standard, and emphatically stated that only one standard value is to be used when performing a maintenance check.

Nor can the rule be reasonably construed to require that three separate maintenance reports -- one each for the four-percent, eight-percent, and ten-percent solutions -- be filled out by the Type II permit holder. To the contrary, 19 CSR 25-30.031 mandates that a permittee "shall retain the *original report* of the maintenance check and submit a copy of *the report*" to [DHSS]. 19 CSR 25-30.031(3) (Nov. 30, 2012) (emphasis added). The use of the singular "report" rather than the plural "reports" shows that the permit holder is only required to fill out one maintenance report reflecting the performance of one calibration check using one of the listed vapor concentration levels.

(Record citations omitted.)

Based upon this reasoning, Director asserts that 19 CSR 25-30.051 cannot be interpreted to require the use of three standard solutions for each calibration check. We agree.

Director is to "revoke the license of any person upon its determination that the person was arrested upon probable cause to believe such person was driving a motor vehicle while the alcohol concentration in the person's blood, breath or urine was [.08 %] or more by weight," section 302.505.1; such a driver may then request an administrative hearing, *see* section 302.530.1;⁵ and thereafter the driver may "petition for trial de novo by the circuit court." Section 302.535.1. Director "has the burden of demonstrating, by a preponderance of the evidence, that (1) there was probable cause for arresting the driver for driving while under the influence, and (2) the blood alcohol concentration level in the driver's blood exceeded the legal limit[.]" *Blazier v. Vincent*, 204 S.W.3d 658, 661 (Mo. App. W.D. 2006). "To establish a prima facie foundation for the admission into evidence of the results of a breathalyzer test, [Director] must establish the test was performed: (1)

⁵ RSMo Cum. Supp. 2012.

following the approved techniques and methods of [DHSS], (2) by an operator holding a valid permit, (3) on equipment and devices approved by [DHSS]." *Irwin v. Dir. of Revenue*, 365 S.W.3d 266, 269 (Mo. App. E.D. 2012) (quotations omitted); *see also* section 577.037.1 and .3. "Compliance with the regulations [concerning the testing equipment] is mandatory." *Blazier*, 204 S.W.3d at 663.

Driver is correct that 19 CSR 25-30.051 addresses standard simulator solutions to be used in verifying and calibrating breath analyzers, but Driver is incorrect in assuming that this section also requires that "all the standard simulator solutions" must have been used at "each of the three (3) levels" in order to perform the maintenance check on the breath analyzer. The relevant portions of the version of 19 CSR 25-30.051 in effect in December 2012 stated:

PURPOSE: This rule defines the standard simulator solutions . . . to be used in verifying and calibrating breath analyzers

- (1) Standards used for the purpose of verifying and calibrating breath analyzers shall consist of standard simulator solutions
- (2) Standard simulator solutions, used to verify and calibrate evidential breath analyzers shall be solutions from approved suppliers. The standard simulator solutions used shall have a vapor concentration within five percent (5%) of the following values:
 - (A) 0.10%;
 - (B) 0.08%; *and*
 - (C) 0.04%.

See 37 Mo. Reg. 1027-1029 (July 2, 2012) and 37 Mo. Reg. 1613 (Nov. 1, 2012)

(emphasis added, revision marks removed). This version came about as a result of an amendment to 19 CSR 25-30.051 filed in May 2012. The regulation had previously provided in separate subsections that standard simulator solutions at the percent levels of .10% and .04% must be "from approved suppliers[.]" and it made no mention of a .08%

solution. 37 Mo. Reg. at 1028. The stated purposes of the amendment included that it "add[ed] 0.08% as another concentration level **available** for performing accuracy checks and instrument recalibrations." *Id.* (emphasis by bolding ours).

When this rule was amended again in September 2013 (to become effective in February 2014) -- a date after Driver's breath test was administered but before his trial *de novo* occurred -- subsection (2) was reworded to change the "and" to an "or" as follows:

- (2) Standard simulation solutions, used to verify and calibrate evidential breath analyzers shall be solutions from approved suppliers. The standard simulator solutions used shall have a vapor concentration within five percent (5%) of the following values:

- (A) 0.10%;
- (B) 0.08%; *or*
- (C) 0.04%.

19 CSR 25-30.051(2) (emphasis added). The purpose section of this additional amendment stated: "*This amendment clarifies which standard simulator solutions of the listed concentrations may be used in verifying and calibrating breath analyzers, as well as the annual checks required on simulators used in conjunction with the standard simulator solution.*" 38 Mo. Reg. 1625 (Oct. 15, 2013).

Driver argues -- without citation to any supporting authority -- that this regulation "is a separate rule dealing with the accuracy of the breath analyzers and is not contingent on any other rule." Yet, regardless of which of the two versions applied at Driver's March 2014 trial, 19 CSR 25-30.051 does not regulate how breath analyzers are to be verified or calibrated apart from specifying the standards to be used. Subsection (8) of this regulation addresses previous "[m]aintenance reports . . . considered valid under this rule if the maintenance report was completed in compliance with the rules in effect at the time the maintenance was conducted" without otherwise specifying how a maintenance check is to

be performed or the resulting maintenance report is to be prepared. 19 CSR 25-30.051(8). Thus, it is necessary to consult other regulations to determine whether a maintenance check is in compliance with the appropriate regulations.

The obligation of "perform[ing] maintenance checks on breath analyzers as required by [DHSS]" is addressed in 19 CSR 25-30.031(1), and this regulation also specifies who is qualified to perform a maintenance check -- "[a] Type II permittee[.]" (hereinafter "permittee"), how often such checks must be performed, and the form to be used to report the maintenance check of a specific breath analyzer. 19 CSR 25-30.031(1), (3), (4) and (7).⁶ This regulation provides that "[f]or the maintenance checks referred to in sections (3)-(5) of this rule, the appropriate maintenance report form for the specific instrument being checked shall be used[.]" 19 CSR 25-30.031(7). Specifically, "[w]hen performing a maintenance check on the Alco-Sensor IV with printer, Report No. 7 included herein shall be used." 19 CSR 25-30.031(7)(F); *see also* 37 Mo. Reg. at 1015 (revision marks removed).

We have previously looked to the requirements of a form included in 19 CSR 25-30.031 in determining whether the requirements of that particular regulation applied to an actual test of an individual's breath where a blank test performed as a part of that procedure registered a result of .001. *See Vernon v. Dir. of Revenue*, 142 S.W.3d 905, 910 (Mo. App. S.D. 2004). In *Vernon*, we found that "[p]ursuant to" this regulation, the form specified the calibration check to be performed on a specific breath analyzer "during periodic maintenance checks of the instrument only" and permitted a variance for purposes of the maintenance check, but it did not specify any variance permitted during a blank test

⁶ The stated purpose of this regulation is: "This rule establishes the qualifications, duties and responsibilities of [permittee] and establishes a maintenance report to be used for each of the approved breath analyzers in 19 CSR 20-30.050," 19 CSR 25-30.031.

that was part of the breath test of an individual. *Id.* 910-11. While the issue of whether *both* standard simulator solutions referenced on the form had to be used was not raised there, we considered the provisions of the form in interpreting the provisions of the regulation. *Id.* at 910. *Cf. Poage v. Dir. of Revenue*, 948 S.W.2d 194, 196 (Mo. App. E.D. 1997) (stating without further analysis that "[a]ccording to the form, only one standard is to be used per maintenance report").

When Report No. 7 is included as a part of the regulation itself, as 19 CSR 25-30.031(7) specifically provides, it is clear that only one standard simulator solution, and not three, must be used in the maintenance check of the breath analyzer. A copy of "Report #7" is reproduced below:

Thus, the form refers to a single standard solution and, in directing that three tests are to be performed, it references a single "standard value . . . corresponding to the standard solution being used." 19 CSR 25-30.031 Report #7 and 37 Mo. Reg. at 1023. Report #7 provides one box for the identification of the standard supplier, lot number, and expiration date.⁷ *Id.* According to the form, permittee is to record the results of the three tests performed with a single standard simulator solution in the three boxes for test results. *Id.* There is no indication on Report #7 that the maintenance report is to be one of a series of three maintenance reports to be completed for the same inspection, nor is there any place to link a given report with other reports so as to certify that all three standard simulator solutions were used for a single inspection. *Id.* Rather, the form directs that the report -- singular -- is to be duplicated, with one copy submitted to DHSS and one copy retained as a record.

"[S]tatutes are not read in isolation." *Mercy Hosps. E. Communities v. Mo. Health Facilities Review Comm.*, 362 S.W.3d 415, 419 (Mo. banc 2012). Statutory provisions addressing the same subject are treated *in pari materia* so that they are construed together. *EBG Health Care III, Inc. v. Mo. Health Facilities Review Comm.*, 12 S.W.3d 354, 360 (Mo. App. W.D. 2000). "If possible, a statute will not be interpreted so as to directly conflict with another applicable statute or otherwise lead to an absurd result." *Mercy Hospitals*, 362 S.W.3d at 419-20. The same rules of construction apply to regulations. *Tate*, 982 S.W.2d at 728.

⁷ All of the forms specified by 19 CSR 25-30.031(A)-(F) include the direction that "**ONLY ONE STANDARD IS TO BE USED PER MAINTENANCE REPORT**" and boxes to check indicating the value of the standard used, with the exception of Report No. 2 concerning a "CMI Intoxilyzer 8000[.]" 19 CSR 25-30.031(B). However, this particular form includes one box, only, for the value of the standard to be stated and, like the other forms, it included a single area for a standard lot number and supplier to be recorded. 19 CSR 25-30.031(B), Report No. 2.

To give 19 CSR 25-30.051 the meaning the trial court apparently adopted would be inconsistent with the mandatory form provided by 19 CSR 25-30.031(7)(F), which specifies that "**ONLY ONE STANDARD IS TO BE USED PER MAINTENANCE REPORT[.]**" We are to avoid such a result, if possible. *Mercy Hosps.*, 362 S.W.3d at 419-20; *Tate*, 982 S.W.2d at 728. The purpose of the May 2012 amendment of 19 CSR 25-30.051 that added a standard simulator solution of .08% with the word "and" between it and the provision of the .04% standard was to make "*another concentration level available for performing accuracy checks and instrument recalibrations.*" 37 Mo. Reg. at 1028 (emphasis by bolding added). It was not to mandate an additional concentration level. Thus, the appropriate construction of these two regulations allows the permit holder a choice of three standard simulator solutions to use in verifying and calibrating the breath analyzer, and the use of any one of the three would satisfy the requirements for the maintenance check.

Point I is granted, rendering any analysis of Point II moot. The amended judgment is reversed, and the matter is remanded to the trial court for further proceedings consistent with this opinion.

)	of St. Charles County
vs.)	1311-CC01180
)	
DIRECTOR OF REVENUE,)	
STATE OF MISSOURI)	Honorable Matthew E.P. Thornhill
)	
Appellant.)	FILED: January 27, 2015

OPINION

The Director of Revenue of the State of Missouri (the Director) appeals from the trial court's entry of judgment reinstating the driving privileges of Kristin Nicole Stiers (Driver) after her privileges were revoked by the Director. We affirm.

Factual and Procedural Background

In July 2013, Lake St. Louis Police Officer Gerald Crowley (Officer Crowley) arrested Driver for driving while intoxicated and transported her to the police department. There, Officer Crowley informed Driver of the Missouri Implied Consent Law and of her Miranda¹ rights. Driver then provided a breath sample on an Alco Sensor IV Machine (the breath analyzer), which resulted in a measurement of .172 percent alcohol concentration (BAC). Officer Crowley subsequently issued Driver a notice of suspension/revocation of her driving privileges.

¹ Miranda v. Arizona, 384 U.S. 436 (1966).

Driver timely filed a request for an administrative hearing to contest the suspension/revocation of her driving privileges. Following the hearing, the Director issued its final order revoking Driver's driving privileges. Driver timely filed her petition for trial *de novo* with the trial court.

At the trial *de novo*, the Director offered several exhibits into evidence, including Exhibit A, which contained the result of Driver's breath test, and Exhibit B, a Simulator Calibration Report for the breath analyzer used to measure Driver's BAC. Driver objected to the admission of the breath test result on the ground that the breath analyzer had not been maintained in accordance with the version of 19 CSR 25-30.051(2) that had been in effect at the time of her arrest. Driver argued that the version of 19 CSR 25-30.051(2) in effect at the time of her arrest contained the word "and," which required calibration checks of the breath analyzer using three standard solutions.

The Director maintained that the emergency version of 19 CSR 25-30.051(2) that became effective February 28, 2014, and was in effect at the time of Driver's trial *de novo*, applied retroactively and made the result of the breath test admissible. The latter version of 19 CSR 25-30.051(2) amended the version of the regulation in effect at the time of Driver's arrest in 2013 and changed the word "and" to "or" and required calibration checks of the breath analyzer using one standard solution. The Director argued that the version of 19 CSR 25-30.051(2) in effect at the time of Driver's trial *de novo* was a procedural regulation, not a substantive regulation, and should be applied retroactively because the amended version of the regulation was intended to "clear up any confusion" caused by the use of the word "and." The Director further explained that the reason for the change of the word "and" to "or" was because the version of 19 CSR 25-30.051(2) in effect at the time of Driver's arrest was "being argued by the defense bar" to

1

exclude the results of breath tests and “was changed so that it wouldn’t continue to be a problem.”

Following argument, the trial court ruled that it would admit the exhibit containing the result of Driver’s breath test but it was not automatically admitting the result of the breath test itself and would take the issue with the case. Driver then testified on her own behalf and was cross-examined by the Director. No other witnesses testified. Both parties later submitted post-trial briefs.

The trial court thereafter entered its findings of fact, conclusions of law, and judgment sustaining Driver’s objection to the admission of the result of her breath test because the Director “failed to lay a proper foundation for the admission of the breath test under the regulations in effect at the time of the arrest.” The trial court concluded that, considering all the evidence before it, the Director had failed to meet its burden of providing sufficient credible evidence that Driver drove with a BAC at or above .08 percent. Given these findings and conclusions, the trial court also found that it did not need to address the Director’s evidence regarding the Simulator Calibration Report for the breath analyzer used to measure Driver’s BAC and did not need to address whether the Director had proved that Officer Crowley had probable cause to arrest Driver on reasonable suspicion that she was driving under the influence. The trial court reinstated Driver’s driving privileges.

This appeal followed.

Standard of Review

In an appeal of a court-tried case regarding a driver license revocation, we will affirm the judgment unless it is not supported by substantial evidence, it is against the weight of the evidence, or it erroneously declares or applies the law. White v. Director of Revenue, 321

S.W.3d 298, 307-08 (Mo. banc 2010); O'Rourke v. Director of Revenue, 409 S.W.3d 443, 446 (Mo. App. E.D. 2013). "Declarations of law are reviewed *de novo*." O'Rourke, 409 S.W.3d at 446. We view the evidence and all reasonable inferences therefrom in the light most favorable to the judgment and disregard all evidence and inferences to the contrary. Id.

Regulation Regarding Use of Three Standard Simulator Solutions

In its first point on appeal, the Director claims the trial court erred in excluding the result of the breath test and reinstating Driver's driving privileges because the breath analyzer used to administer the test had been verified and calibrated according to 19 CSR 25-30.051(2). The Director argues that the version of the regulation in effect at the time of Driver's arrest and when the maintenance report on the breath analyzer was completed did not change the requirement that only a single concentration could be used when performing a calibration check. Essentially, the Director argues that the version of 19 CSR 25-30.051(2) requiring only a single concentration of a simulator solution in effect at the time of the trial *de novo* should have been applied rather than the version of the regulation in effect at the time of Driver's arrest.

In contrast, Driver argues that the result of her breath test was inadmissible at trial because the calibration of the breath test did not comply with the approved techniques and methods prescribed in the versions of 19 CSR 25-30.051(2) and (4) in effect at the time of her arrest.

To establish a *prima facie* case for suspension of a driver's license, the Director must present evidence that, at the time of the arrest, the driver was arrested on probable cause for violating an alcohol-related offense and the alcohol concentration level in the driver's blood, breath, or urine exceeded the legal limit of .08 percent. Section 302.505.1; O'Rourke, 409

S.W.3d at 447. The Director bears the burden of establishing grounds for the revocation by a preponderance of the evidence. O'Rourke, 409 S.W.3d at 447.

For purposes of Missouri's Implied Consent law, chemical analysis of a person's breath, blood, saliva, or urine, to be considered valid pursuant to the provisions of Sections 577.019 to 577.041, shall be performed according to methods approved by the state department of health and senior services (DHSS) by licensed medical personnel or by a person possessing a valid permit issued by the state department of health and senior services for this purpose. Section 577.020.3.²

"[The] Director may introduce evidence of a breathalyzer test to establish that the driver's BAC exceeded the legal limit." O'Rourke, 409 S.W.3d at 447. "To establish a *prima facie* foundation for admission of breathalyzer test results, [the] Director must demonstrate the test was performed: (1) by following the approved techniques and methods of DHSS; (2) by an operator holding a valid permit; and (3) on equipment and devices approved by DHSS." Id. The calibration and accuracy verification standards of breath analyzers must be followed to satisfy these foundational requirements and are set forth in 19 CSR 25-30.051. Id.

Standards used for the purpose of verifying and calibrating breath analyzers shall consist of standard simulator solutions or compressed ethanol-gas standard mixtures. 19 CSR 25-30.051(1). The standard simulator solutions must be provided by approved suppliers as named in the regulation. 19 CSR 25-30.051(3). Maintenance reports completed prior to the effective date of the rule shall be considered valid under the rule if the maintenance report was completed in compliance with the rules in effect at the time the maintenance was conducted. 19 CSR 25-30.051(8).

² All statutory references are to RSMo 2000, as amended, unless otherwise indicated.

The version of 19 CSR 25-30.051(2) in effect at the time of Driver's arrest in July 2013 and when the maintenance report on the breathalyzer was completed stated, in pertinent part:

(2) Standard simulator solutions, used to verify and calibrate evidential breath analyzers shall be solutions from approved suppliers. The standard simulator solutions used shall have a vapor concentration within five percent (5%) of the following values:

- (A) 0.10%;
- (B) 0.08%; *and* (emphasis added)
- (C) 0.04%.

The version of 19 CSR 25-30.051(2) in effect at the time of Driver's trial *de novo* in April 2014, stated, in pertinent part:

(2) Standard simulator solutions, used to verify and calibrate evidential breath analyzers shall be solutions from approved suppliers. The standard simulator solutions used shall have a vapor concentration within five percent (5%) of the following values:

- (A) 0.10%;
- (B) 0.08%; *or* (emphasis added)
- (C) 0.04%.

The difference between the two versions of 19 CSR 25-30.051(2) is a single word: "and" versus "or." "The same principles of construction are used in interpreting regulations as in interpreting statutes." Teague v. Missouri Gaming Com'n, 127 S.W.3d 679, 686 (Mo. App. W.D. 2003). In the absence of a definition in the regulation, the words will be given their plain and ordinary meaning as derived from a dictionary." Teague, 127 S.W.3d at 686. "The plain and ordinary sense of a word is generally found in the dictionary." EBG Health Care III, Inc., v. Missouri Health Facilities Review Committee, 12 S.W.3d 354, 358 (Mo. App. W.D. 2000). The word "and" is a conjunction used to join words or groups of words and means "added to" or "plus." Merriam-Webster Online Dictionary, at www.merriam-webster.com/and (last visited January 12, 2015). The word "or" also is a conjunction; however, "or" is used to indicate an alternative, the equivalent or substitutive character of two words or phrases, or approximation or

uncertainty. Merriam-Webster Online, at www.merriam-webster.com/or (last visited January 12, 2015).

Here, the trial court properly excluded the results of Driver's breath test because three standard simulator solutions were not used for conducting a maintenance check of the breath analyzer, as required by the version of 19 CSR 25-30.051(2) in effect at the time of Driver's arrest. Driver provided a breath sample in July 2013 on a breath analyzer that had been maintained in June 2013 using only a 0.100 percent standard simulator solution rather than all three standards required by the regulation. From December 30, 2012, when the version of 19 CSR 25-30.051(2) in effect at the time of Driver's arrest was enacted, until February 28, 2014, when 19 CSR 25-30.051(2) was amended, the regulation did not allow a choice between alternative standard simulator solutions. A plain reading of the version of 19 CSR 25-30.051(2) in effect at the time of Driver's arrest included the word "and" to unambiguously indicate that all three standards should be used to calibrate the breath analyzer. Because the language of 19 CSR 25-30.051(2) was unambiguous, we will not look past the plain and ordinary meaning of the regulation. See EBG Health Care III, Inc., 12 S.W.3d at 358. Given the plain language of the regulation, it was the Director's burden to show that the calibration and accuracy verification standards set forth in 19 CSR 25-30.051(2) in effect at the time of Driver's arrest were followed. We find it difficult to understand how the two versions of the regulation are not in conflict or, as the Director urges this Court, how they can be viewed to require the same thing. To view the two versions of this regulation as the Director argues and conclude that "and" and "or" have the same meaning would require us to ignore the plain difference between the words.³

³ On appeal, the Director's brief also included an argument referencing Form 7 to encourage this Court to reach the opposite conclusion. Form 7 is a report form required for the recording of calibration checks performed on the breath analyzer. See 19 CSR 25-30.031(7)(F). However,

Consequently, because only one standard was used, in violation of the version of 19 CSR 25-30.051(2) in force at the time the maintenance report and the breath test administered to Driver were performed, the result of the breath test was inadmissible. The trial court did not err in excluding the results of Driver's breath test. Point denied.

Application of Regulation Governing Verification and Calibration of Breath Test Devices

In its second point on appeal, the Director claims the trial court erred in excluding the results of the breath test and reinstating Driver's driving privileges because the court applied the wrong version of 19 CSR 25-30.051(2) governing the verification and calibration of breath test devices in that the regulation is procedural; thus, the version of the regulation in effect at the time of Driver's trial *de novo* should have applied retroactively.

A retroactive law is a legislative act that looks backward or contemplates the past, affecting acts or facts that existed before the act came into effect. Black's Law Dictionary (9th ed. 2009). The terms "retroactive law" and "retrospective law" are used synonymously. See Black's Law Dictionary (9th ed. 2009). "Generally, statutes and administrative rules operate prospectively because the Missouri Constitution forbids enactment of a retrospective law impairing a vested right." DeClue v. Director of Revenue, 945 S.W.2d 684, 686 (Mo. App. 1997). "Substantive laws define the rights and duties giving rise to the cause of action by impairing vested rights acquired under existing law, creating new obligations, or imposing new duties." DeClue, 945 S.W.2d at 686. "In contrast, procedural regulations establish the method of enforcing rights and carrying on the suit." Id. "[P]rocedural statutes and administrative rules apply retrospectively *unless the enactment reveals a contrary intent.*" Id. (emphasis added).

because we find the language of 19 CSR 25-30.051(2) so plain, we are not addressing Form 7 as suggested by the Director. Furthermore, it is our view that the language of 19 CSR 25-30.051(2), on its face, overrides the use of Form 7 to resolve the issues presented in this case.

In this case, the trial court correctly applied the version of 19 CSR 25-30.051(2) that was in effect at the time of Driver's arrest because the amended version of 19 CSR 25-30.051 that was in effect at the time of her trial *de novo* contained the following language:

(8) Maintenance reports completed prior to the effective date of this rule shall be considered valid under this rule *if the maintenance report was completed in compliance with the rules in effect at the time the maintenance was conducted.*

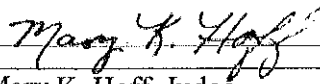

(Emphasis added.)

Therefore, even if the trial court had applied the version of 19 CSR 25-30.051(2) that became effective February 28, 2014, retroactively to Driver's case, the result of the breath test still would have been excluded since the language of 19 CSR 25-30.051(8) indicates "a contrary intent." DeClue, 945 S.W.2 at 686. Here, the maintenance report at issue was completed prior to the effective date of the regulation but was not completed in compliance with the regulation in effect at the time the maintenance was conducted, which required utilizing all three standard simulator solutions.

Consequently, the trial court did not err in excluding the results of the breath test and reinstating Driver's driving privileges because the court applied the correct version of 19 CSR 25-30.051(2). Point denied.

Conclusion

The trial court's judgment is affirmed.

Mary K. Hoff, Judge

Sherri B. Sullivan, Presiding Judge and Philip M. Hess, Judge, concur.

23 CFR 1200.25 MAP-21, Section 405(f)
Motorcyclists Safety Grants
Appendix D Part 5

The State of Missouri is applying for MAP-21 Section 405(f) Motorcyclists Safety Grants under Motorcycle Rider Training Courses and Use of Fees Collected from Motorcyclists for Motorcycle Programs criteria. Missouri has applied for and received funding using these two criteria within the SAFETEA-LU Section 2010 Motorcyclist Safety Grant Program from 2006 to 2012 and MAP-21 Section 405(f) since 2013.

Motorcycle riding training course:

- Copy of official State document (e.g., law, regulation, binding policy directive, letter from the Governor) identifying the designated State authority over motorcyclist safety issues is provided as HSP Attachments 1, 2 and 3.
- Document(s) showing the designated State authority approving the training curriculum that includes instruction in crash avoidance and other safety-oriented operational skills for both in-class and on-the-motorcycle is provided as HSP Attachment 3.
- Document(s) regarding locations of the motorcycle rider training course being offered in the State is provided as HSP Attachment 4.
- Document showing that certified motorcycle rider training instructors teach the motorcycle riding training course is provided as HSP Attachment 3.
- Description of the quality control procedures to assess motorcycle rider training courses and instructor training courses and actions taken to improve courses is provided as HSP Attachments 3 and 5.

Use of fees collected from motorcyclists for motorcycle programs:

- ☐ Applying as a Law State –
- The State law or regulation requires all fees collected by the State from motorcyclists for the purpose of funding motorcycle training and safety programs are to be used for motorcycle training and safety programs.
Legal citation - Mo. Rev. Stat. § 302.137.1 (HSP Attachment 6)

AND

- The State's law appropriating funds for FY16 requires all fees collected by the State from motorcyclists for the purpose of funding motorcycle training and safety programs be spent on motorcycle training and safety programs.

Missouri Revised Statutes

Chapter 302 Drivers' and Commercial Drivers' Licenses Section 302.133

August 28, 2012

Definitions.

302.133. As used in sections 302.133 to 302.138, the following terms mean:

- (1) "Department", the department of public safety;
- (2) "Director", the director of the department of public safety;
- (3) "Instructor", a licensed motorcycle operator who meets the standards established by the department to teach the motorcycle rider training course;
- (4) "Motorcycle", a motorcycle or motortricycle as those terms are defined by section 301.010;
- (5) "Motorcycle rider training course", a motorcycle rider education curriculum and delivery system approved by the department as meeting standards designed to develop and instill the knowledge, attitudes, habits, and skills necessary for the safe operation of a motorcycle.

Missouri General Assembly

Missouri Revised Statutes

Chapter 302 **Drivers' and Commercial Drivers' Licenses** **Section 302.134**

August 28, 2012

Motorcycle safety education program, department to establish and set standards, program to include certain subjects--authority to adopt rules, procedure to adopt, suspend and revoke.

302.134. 1. The department shall establish standards for and shall administer the motorcycle safety education program. The program shall include, but is not limited to, motorcycle rider training and instructor training courses. The department may expand the program to include components relating to the effect of alcohol and drugs on motorcycle operation, public awareness of motorcycles on the highways, driver improvement for motorcyclists, motorcycle operator licensing improvement, program promotion, and other motorcycle safety efforts.

2. Standards adopted by the department for the motorcycle safety education program, including standards for instructor qualification and standards for the motorcycle rider training and instructor training courses, shall, at a minimum, comply with the applicable standards of the Motorcycle Safety Foundation.

3. The department shall promulgate rules and regulations necessary to administer the provisions of sections 302.133 to 302.138.

4. No rule or portion of a rule promulgated under the authority of this chapter shall become effective until it has been approved by the joint committee on administrative rules in accordance with the procedures provided in this section, and the delegation of the legislative authority to enact law by the adoption of such rules is dependent upon the power of the joint committee on administrative rules to review and suspend rules pending ratification by the senate and the house of representatives as provided in this section.

5. Upon filing any proposed rule with the secretary of state, the department shall concurrently submit such proposed rule to the committee, which may hold hearings upon any proposed rule or portion thereof at any time.

6. A final order of rulemaking shall not be filed with the secretary of state until thirty days after such final order of rulemaking has been received by the committee. The committee may hold one or more hearings upon such final order of rulemaking during the thirty-day period. If the committee does not disapprove such order of rulemaking within the thirty-day period, the department may file such order of rulemaking with the secretary of state and the order of rulemaking shall be deemed approved.

7. The committee may, by majority vote of the members, suspend the order of rulemaking or portion thereof by action taken prior to the filing of the final order of rulemaking only for one or more of the following grounds:

- (1) An absence of statutory authority for the proposed rule;
- (2) An emergency relating to public health, safety or welfare;
- (3) The proposed rule is in conflict with state law;
- (4) A substantial change in circumstance since enactment of the law upon which the proposed rule is based.

8. If the committee disapproves any rule or portion thereof, the department shall not file such disapproved portion of any rule with the secretary of state and the secretary of state shall not publish in the Missouri Register any final order of rulemaking containing the disapproved portion.

9. If the committee disapproves any rule or portion thereof, the committee shall report its findings to the senate and the house of representatives. No rule or portion thereof disapproved by the committee shall take effect so long as the senate and the house of representatives ratify the act of the joint committee by resolution adopted in each house within thirty legislative days after such rule or portion thereof has been disapproved by the joint committee.

10. Upon adoption of a rule as provided in this section, any such rule or portion thereof may be suspended or revoked by the general assembly either by bill or, pursuant to section 8, article IV of the Constitution of Missouri, by concurrent resolution upon recommendation of the joint committee on administrative rules. The committee shall be authorized to hold hearings and make recommendations pursuant to the provisions of section 536.037. The secretary of state shall publish in the Missouri Register, as soon as practicable, notice of the suspension or revocation.

Executive Order 03-05

February 2003

Governor Bob Holden

Copy of official State documents identifying the designated State
authority over motorcyclist safety issues

This executive order moved the Division of Highway Safety from
the Missouri Department of Public Safety to the Missouri
Department of Transportation.

FEB 05 2003

EXECUTIVE ORDER NO.
03-05M. B. Holden
SECRETARY OF STATE

WHEREAS, the Department of Public Safety is created pursuant to Article IV, Section 12, of the Missouri Constitution and Chapter 650, RSMo; and

WHEREAS, the Division of Highway Safety is assigned to the Department of Public Safety pursuant to Section 650.005, RSMo; and

WHEREAS, the Missouri Department of Transportation is created pursuant to Article IV, Section 12, of the Missouri Constitution and Chapter 226, RSMo; and

WHEREAS, the Division of Highway Safety works to promote the safe operation of vehicles on or about the highways, roads, and streets of this state; and

WHEREAS, the Department of Transportation is tasked with supervision of the construction, maintenance, and operation of the state highway system; and

WHEREAS, the Division of Highway Safety and the Department of Transportation both engage in activities related to the state highway system and its safe operation; and

WHEREAS, the consolidation of these activities would increase efficiencies and eliminate duplication of efforts; and

WHEREAS, I am committed to integrating executive branch operations to improve the way the state delivers services; and

WHEREAS, the transfer of the functions of the Division of Highway Safety to the Department of Transportation is a component of the Governor's Reorganization Plan of 2003, which is designed to streamline state government and make it as efficient as possible.

NOW, THEREFORE, I, BOB HOLDEN, GOVERNOR OF THE STATE OF MISSOURI, by virtue of the authority vested in me by the Constitution and the Laws of the State of Missouri, do hereby order the Missouri Department of Public Safety, the Division of Highway Safety, and the Missouri Department of Transportation to cooperate to:

1. Develop mechanisms and processes necessary to effectively transfer the functions of the Division of Highway Safety to the Department of Transportation;
2. Transfer all authority, powers, duties, functions, records, personnel, property, contracts, budgets, matters pending, and other pertinent vestiges of the Division of Highway Safety to the Department of Transportation, by Type I transfer, as defined under the Reorganization Act of 1974; and
3. Take the steps necessary to maintain compliance with federal requirements, such as filing a state plan amendment, so as not to jeopardize federal financial participation with this consolidation.

This Order shall become effective no sooner than August 28, 2003 unless disapproved within sixty days of its submission to the First Regular Session of the 92nd General Assembly.

IN WITNESS WHEREOF, I have hereunto set
my hand and caused to be affixed the Great
Seal of the State of Missouri, in the City of
Jefferson on this 5th day of February, 2003

A handwritten signature in cursive script, reading "Bob Holden".

Bob Holden
Governor

Title 7—DEPARTMENT OF TRANSPORTATION

Division 60—Highway Safety Division Chapter 1—Motorcycle Safety Education Program

7 CSR 60-1.010 Definitions

PURPOSE: *This rule defines terms used in the rules which pertain to the administration and operations of the Motorcycle Safety Education Program.*

(1) Department—Missouri Department of Public Safety. The department is the state agency designated by the governor to establish and administer the motorcycle rider training and safety program.

(2) Division—Division of Highway Safety. A division within the department assigned with the responsibility for establishing and administering the motorcycle rider training course and safety program per Motorcycle Safety Foundation (MSF) guidelines.

(3) Experienced rider course—A current approved Motorcycle Safety Foundation course of instruction designed to provide experienced motorcyclists with additional skills and knowledge found to be lacking in accident-involved motorcyclists.

(4) Instructor—An individual certified by MSF and approved to teach the motorcycle rider training courses in Missouri. This individual, unless directly employed by the department as a motorcycle safety instructor, is not an agent, servant, or employee of the department or state of Missouri.

(5) Minor—Any person fifteen and one-half (15 1/2) years (15 years and 182 days) old the day the course begins but less than eighteen (18) years old.

(6) Mobile site sponsor—A public or private entity bound by a letter of agreement to advertise for and enroll students, pay for insurance, and provide a facility for the riding portion of the course. The department provides the remaining equipment, material, and instructional staff for the course. In its role as a mobile site sponsor, this entity is not an agent, servant, or employee of the department or the state of Missouri.

(7) Motorcycle rider course—A current approved Motorcycle Safety Foundation rider course of instruction designed to teach new or inexperienced motorcyclists basic riding skills and defensive street riding strategies.

(8) Motorcycle rider training program—The motorcycle rider training and safety program provides information and courses in knowledge, skills, and safety relating to the operation of motorcycles to all motorcyclists in this state. It also provides information to the general public on sharing the roadway with motorcycles.

(9) Motorcycle Safety Foundation (MSF)—A national, nonprofit organization whose purpose is to improve the safety of motorcyclists on the nation's streets and highways. The MSF provides programs in rider education, licensing improvement, public information, and research.

(10) Permanent site sponsor—A public or private entity contracted by the department to provide motorcycle rider training on a regular basis. In its role as a permanent site sponsor, this entity is not an agent, servant, or employee of the department or the state of Missouri.

AUTHORITY: *section 302.134, RSMo 2000. * This rule originally filed as 11 CSR 60-1.010. Original rule filed March 20, 1996, effective Sept. 30, 1996. Amended: Filed Nov. 15, 2001, effective June 30, 2002. Moved to 7 CSR 60-1.010, effective Aug. 28, 2003.*

**Original authority: 302.134, RSMo 1995.*

7 CSR 60-1.020 Program Sponsor

PURPOSE: *This rule outlines the standards for an approved motorcycle rider training program sponsor.*

(1) No individual, association, partnership, corporation, or educational or governmental agency may sponsor or offer training in motorcycle operation to the public for tuition, consideration, or fee without authorization from the division. To qualify for authorization, a sponsor must be approved by the division through a current contract for a permanent site sponsor or letter of agreement for a mobile site sponsor. Approval will be denied unless a sponsor applicant meets the following requirements. The applicant must demonstrate the capacity to register students, collect and account for tuition as appropriate, arrange public notice of courses, provide required insurance coverage and make all necessary insurance premium payments, submit and maintain all required records, and contract with, schedule, and compensate authorized instructors as appropriate.

(A) All applicants must have access to a riding area for on-cycle training that is—

1. A paved surface, including asphalt, concrete, or other all-weather surface of suitable traction; and

2. Large enough to safely accommodate any motorcycle training range approved by the department, per Motorcycle Safety Foundation (MSF) guidelines, as flat as possible, secure from vehicular and pedestrian traffic, and free of surface hazards and obstacles.

(B) Applicants for permanent sites must also have access to—

1. A secure storage area to physically and environmentally protect training motorcycles and other course equipment;

2. A classroom, not located in a private residence, that is large enough to seat all students and instructors comfortably and that contains at least one (1) adequate desk or equivalent seating and writing surface for each student, and at least one (1) instructor's desk, table, or podium;

3. Audiovisual presentation equipment for the classroom, including a chalkboard or equivalent; and

4. A first-aid kit and at least one (1) five pound (5 lb.) Class ABC Occupational Safety and Health Administration (OSHA)-approved fire extinguisher, or equivalent, for the riding area.

(2) Approval as a sponsor may be suspended if the sponsor, an instructor under contract with the sponsor, or a member of the sponsoring organization with supervisory or executive duties involving the training program—

(A) Fails to continue to meet the requirements of MSF;

(B) Has been convicted or placed on probation for—

1. Any felony;

2. Any offense involving moral turpitude within the previous ten (10) years from the date of approval or renewal except as provided hereinafter; or

3. Any offense involving tampering with a government record, or any of the following offenses involving the operation of a motor vehicle within the previous five (5) years:

A. Criminally negligent homicide;

B. Driving while intoxicated; or

C. Driving under the influence of drugs;

(C) Cannot provide sufficient information and documentation to enable the department to evaluate or reevaluate the applicant's request for approval;

(D) Knowingly presents or allows to be presented to the department any false or misleading information relating to a request for approval;

(E) Permits or engages in any fraud or fraudulent practice concerning an application or, in any action between the applicant or licensee and the public, induces or countenances any fraud or fraudulent practice on the part of an applicant for a driver's license or permit;

(F) Knowingly or recklessly disregards or fails to comply with any departmental rule, written policy, or written procedure regarding the motorcycle operator training program; or

(G) Knowingly allows an instructor to give, or a student to receive, classroom or riding instruction if either exhibits any evidence of or effects from an alcoholic beverage, controlled substance, or drug as defined in section 195.010(7), RSMo.

(3) The division may construe any probation or conviction which is for a criminal offense arising from a penal provision from another state, federal, military, or foreign jurisdiction to be its closest equivalent under the penal provisions of this state.

(4) Approval may be canceled if—

(A) It was based on false or incorrect information or mistake, such as clerical or other nonsubstantive errors by either party; or

(B) If the discrepancy causing the suspension under these administrative rules has not been corrected within the time limit prescribed by a suspension.

(5) Each sponsor must designate a chief school official to be responsible for signing contracts with the department, instructors, or students and for signing any forms required of the sponsor. The chief school official must also be designated by the sponsor to be the custodian of all records, which shall be kept for a period of at least three (3) years from the date of the final performance report under the contract.

(6) If the sponsor is an organization, that organization shall designate one (1) of its members as the chief school official. If the sponsor is an individual, that person shall also be the chief school official.

(7) The control of the sponsor is considered to have changed if—

(A) In the case of sole proprietorship, more than fifty percent (50%) of the controlling interest has been sold or transferred;

(B) In the case of a partnership or a corporation, more than fifty percent (50%) of the controlling interest has been sold or transferred; or

(C) The board of directors, officers, shareholders, or similar governing body has been

changed to such an extent as to significantly alter the management and control of the sponsor.

(8) When control of the sponsor has changed, as outlined in section (7) of this rule, the contract will be canceled and renegotiated through the appropriate rules and regulations.

AUTHORITY: section 302.134, RSMo Supp. 1995. This rule originally filed as 11 CSR 60-1.020. Original rule filed March 20, 1996, effective Sept. 30, 1996. Moved to 7 CSR 60-1.020, effective Aug. 28, 2003.*

**Original authority: 302.134, RSMo 1995.*

7 CSR 60-1.030 Motorcycle Instructor

PURPOSE: This rule outlines the standards for an approved motorcycle rider training program instructor.

(1) No individual may instruct or offer instruction in motorcycle operation to the public for tuition, consideration, or fee without authorization from the division. To qualify for authorization, an instructor must be approved by the division. Approval will be denied unless an instructor applicant meets the following requirements. The applicant must agree to teach the training courses in accordance with the division's rules, policies, procedures, and approved curricula and must—

(A) Hold a current National Certification from the Motorcycle Safety Foundation (MSF);

(B) Be a high school graduate or possess a valid general educational development (GED);

(C) Possess a valid driver's license that allows the operation of a motorcycle;

(D) Be a licensed driver for at least five (5) years;

(E) Meet the current driving record evaluation standards established by the Missouri Department of Revenue for school bus drivers pursuant to *Revised Statutes of Missouri*;

(F) Be free from addiction to the use of alcoholic beverages or drugs; and

(G) Be physically and mentally competent to conduct classroom and on-cycle instruction, including technically correct riding demonstrations.

(2) An applicant for approval to instruct an advanced motorcycle rider training course must meet all the requirements to instruct as identified in section (1) of this rule, plus attend a department approved curriculum update, and be able to perform technically

correct riding demonstrations on his/her personal motorcycle.

(3) Approval as an instructor may be suspended if the instructor fails to continue to meet the requirements of sections (1) and (2) of this rule.

(4) Approval may be canceled if—

(A) It was based on false or incorrect information or mistake; or

(B) The discrepancy causing the suspension under 11 CSR 60-1.020 (relating to program sponsor), 11 CSR 60-1.030 (relating to motorcycle instructor), 11 CSR 60-1.040 (relating to student admission requirements), 11 CSR 60-1.050 (relating to verification of course completion by a minor), 11 CSR 60-1.060 (relating to approved motorcycle training courses), and 11 CSR 60-1.070 (relating to motorcycle requirements) has not been corrected within the time limit prescribed by a suspension.

(5) A motorcycle instructor approved by the division may teach both the classroom and on-cycle phases of the courses for which the approval was granted.

(6) Motorcycle instructors approved by the division may not—

(A) Give instruction or allow a student to receive instruction in motorcycle safety if either the instructor or student is using or exhibits any evidence of effect from an alcoholic beverage, controlled substance, or drug as defined in *Revised Statutes of Missouri*; or

(B) Complete, issue, or validate a certificate of course completion to a person who has not successfully completed the course. A period of absence for any portion of scheduled course instruction will require that student repeat that portion of instruction prior to issuance of the certificate of completion. Course of instruction must be completed within one (1) calendar year.

AUTHORITY: section 302.134, RSMo Supp. 1995. This rule originally filed as 11 CSR 60-1.030. Original rule filed March 20, 1996, effective Sept. 30, 1996. Moved to 7 CSR 60-1.030, effective Aug. 28, 2003.*

**Original authority: 302.134, RSMo 1995.*

7 CSR 60-1.040 Student Admission Requirements

PURPOSE: This rule outlines the standards for admission into the motorcycle rider training program.

(1) Motorcycle Rider Courses, are open to any person who is—

(A) Physically and mentally capable of being licensed in Missouri as a motorcycle operator; and

(B) At least fifteen and one-half (15 1/2) years (15 years and 182 days) old on the day the course begins.

(2) The experienced rider course is restricted to individuals with a current motorcycle (Class M) driver's license or motorcycle endorsement on their driver's license. Each student must provide his/her own motorcycle that meets the requirements of 11 CSR 60-1.070 (relating to motorcycle requirements).

AUTHORITY: section 302.134, RSMo 2000.* This rule originally filed as 11 CSR 60-1.040. Original rule filed March 20, 1996, effective Sept. 30, 1996. Amended: Filed Nov. 15, 2001, effective June 30, 2002. Moved to 7 CSR 60-1.040, effective Aug. 28, 2003.

*Original authority: 302.134, RSMo 1995.

7 CSR 60-1.050 Verification of Course Completion

PURPOSE: This rule outlines the standards for verification of completion in an approved motorcycle rider training program.

(1) The sponsor will issue a Missouri Motorcycle Training Certificate to a student who is at least fifteen and one-half (15 1/2) years (15 years and 182 days) of age and who has successfully completed the approved Motorcycle Rider Course. A completion certificate is issued to verify that the student has met the educational and training requirements for a Missouri motorcycle operator's permit or license. A Department of Public Safety serialized completion certificate will be issued by the course sponsor to every student completing the approved Motorcycle Rider Course. A copy of the completion certificate can be obtained from the Department of Public Safety.

(2) The division will accept an original signature or the written, stamped, or typed name or signature of the chief school official on the form. The signature of the instructor on the form must be an original signature. If the chief school official is also the instructor, that person must sign both spaces on the form.

AUTHORITY: section 302.134, RSMo 2000.* This rule originally filed as 11 CSR 60-1.050. Original rule filed March 20, 1996, effective

Sept. 30, 1996. Amended: Filed Nov. 15, 2001, effective June 30, 2002. Moved to 7 CSR 60-1.050, effective Aug. 28, 2003.

*Original authority: 302.134, RSMo 1995.

7 CSR 60-1.060 Approved Motorcycle Training Courses

PURPOSE: This rule outlines the standards for an approved motorcycle rider training program.

PUBLISHER'S NOTE: The secretary of state has determined that the publication of the entire text of the material which is incorporated by reference as a portion of this rule would be unduly cumbersome or expensive. Therefore, the material which is so incorporated is on file with the agency who filed this rule, and with the Office of the Secretary of State. Any interested person may view this material at either agency's headquarters or the same will be made available at the Office of the Secretary of State at a cost not to exceed actual cost of copy reproduction. The entire text of the rule is printed here. This note refers only to the incorporated by reference material.

(1) The division adopts the educational, safety, and instructor standards, by reference, of the most current versions of the following Motorcycle Safety Foundation (MSF) courses:

(A) The current approved Motorcycle Safety Foundation Motorcycle Rider Course, or as amended;

(B) The current approved experienced rider course. The choice of curricula is determined by the size of the riding area. The skill and knowledge tests for the experienced curricula are not required but may be used at the sponsor's discretion; and

(C) The approved instructor preparation course is MSF instructor preparation course curriculum.

(2) Approved course curricula are available for inspection at the division's Jefferson City offices.

AUTHORITY: section 302.134, RSMo 2000.* This rule originally filed as 11 CSR 60-1.060. Original rule filed March 20, 1996, effective Sept. 30, 1996. Amended: Filed Nov. 15, 2001, effective June 30, 2002. Moved to 7 CSR 60-1.060, effective Aug. 28, 2003.

*Original authority: 302.134, RSMo 1995.

7 CSR 60-1.070 Motorcycle Requirements

PURPOSE: This rule outlines the standards for motorcycles used in an approved motorcycle rider training program.

(1) A motorcycle must be rejected for use by the lead course instructor if it fails to meet the requirements of this section or if, in the discretion of the instructor, the motorcycle is unsafe for the rider, an instructor, another student, or any other person permitted in the riding area. A motorcycle may be deemed unsafe because of modification, damage, lack of maintenance, nonstandard configuration, or any other substantial safety reason.

(2) Any student-owned motorcycle must—

(A) Meet all the requirements for operation on public highways;

(B) Have proof of adequate insurance coverage available for inspection by the lead course instructor; and

(C) Meet all other requirements of this rule.

(3) A student may use a borrowed motorcycle if the student can show written permission from the owner to use the motorcycle in the course and if it meets all other requirements of this rule.

(4) A moped, no-ped, motor scooter, motor-assisted bicycle, or a motorcycle with an engine displacement of over 500cc—

(A) May not be used in the basic course; and

(B) May be used in the advanced course only if it meets all other requirements of this rule.

(5) No sponsor may provide a motorcycle to a student for use in the advanced course. If a sponsor provides a motorcycle to a student for use in the basic course, the motorcycle—

(A) Must meet the safety requirements of section (1) of this rule;

(B) Must not be prohibited by section (4) of this rule; and

(C) May, but is not required to, be registered, inspected, or insured for operation on public highways.

AUTHORITY: section 302.134, RSMo Supp. 1999.* This rule originally filed as 11 CSR 60-1.070. Original rule filed March 20, 1996, effective Sept. 30, 1996. Amended: Filed Nov. 22, 1999, effective May 30, 2000. Moved to 7 CSR 60-1.070, effective Aug. 28, 2003.

*Original authority: 302.134, RSMo 1995.

**7 CSR 60-1.080 Notice and Hearing Requirements**

PURPOSE: This rule outlines the notice and hearing requirements for an approved motorcycle rider training program sponsor.

(1) If the division intends to deny, suspend, or cancel approval of a program sponsor or instructor, notice and opportunity for hearing must be given as provided by *Revised Statutes of Missouri*.

AUTHORITY: section 302.134, *RSMo Supp. 1995*. * This rule originally filed as 11 CSR 60-1.080. Original rule filed March 20, 1996, effective Sept. 30, 1996. Moved to 7 CSR 60-1.080, effective Aug. 28, 2003.

*Original authority: 302.134, *RSMo 1995*.

7 CSR 60-1.090 Sponsor Suspension

PURPOSE: This rule outlines the terms of suspension of a motorcycle rider training program sponsor.

(1) The term of suspension under 11 CSR 60-1.020 (relating to program sponsor) and 11 CSR 60-1.030 (relating to motorcycle instructor) may not exceed one (1) year. The term of suspension may be reduced by the motorcycle rider training program manager of the division on the recommendation of the program director for motorcycle rider training if corrective actions have been taken and the reason for suspension no longer exists. If the reason for suspension still exists at the end of the suspension period, the suspension automatically elevates to disapproval. To again become approved, a disapproved sponsor or instructor must reapply and meet all current requirements for approval.

AUTHORITY: section 302.134, *RSMo Supp. 1995*. * This rule originally filed as 11 CSR 60-1.090. Original rule filed March 20, 1996, effective Sept. 30, 1996. Moved to 7 CSR 60-1.090, effective Aug. 28, 2003.

*Original authority: 302.134, *RSMo 1995*.

7 CSR 60-1.100 Quality Assurance Visits

PURPOSE: This rule outlines the rules for quality assurance visits for motorcycle rider training program sponsors and instructors.

(1) Quality assurance visits (QAVs) will be conducted at each of the motorcycle rider training program sites, at least once per cal-

endar year. During the QAV, the focus will be on the adherence to requirements outlined in 11 CSR 60-1.020 (relating to program sponsor), 11 CSR 60-1.030 (relating to motorcycle instructor), 11 CSR 60-1.040 (relating to student admission requirements), 11 CSR 60-1.050 (relating to verification of course), 11 CSR 60-1.060 (relating to approved motorcycle training courses), and 11 CSR 60-1.070 (relating to motorcycle requirements).

(2) The QAVs will be conducted by division personnel or by persons contracted by the division to perform them.

(3) While conducting the QAV, the evaluator will utilize the same pass/fail criteria as is utilized to evaluate the student teaching portion of the approved motorcycle safety instructor training course. The QAV shall be conducted at least once per certification period (two (2) years). Instructor(s) not meeting the approved criteria will be suspended as outlined in 11 CSR 60-1.030 (relating to motorcycle instructor). Remedial actions necessary to remove the suspension will be determined by the motorcycle rider training program manager of the division, on the recommendation of the program director for motorcycle operator training and may include, but is not limited to:

(A) Attending a department-sponsored instructor curriculum refresher course;

(B) Attending all or portions of a department-sponsored instructor training course; or

(C) Teaching an entire course under the supervision of a division staff member, an approved chief instructor, or other individual(s) expressly designated by the division to perform such duties.

AUTHORITY: section 302.134, *RSMo 2000*. * This rule originally filed as 11 CSR 60-1.100. Original rule filed March 20, 1996, effective Sept. 30, 1996. Amended: Filed Nov. 15, 2001, effective June 30, 2002. Moved to 7 CSR 60-1.100, effective Aug. 28, 2003.

*Original authority: 302.134, *RSMo 1995*.

7 CSR 60-1.110 Sponsor Pre-Suspension Notification

PURPOSE: This rule outlines when a sponsor should notify the division of impending legal action.

(1) All sponsors shall notify in writing the division with the details of any legal action which has been filed against the sponsor, its officers, or its contracted instructors within thirty (30) days of such action.

AUTHORITY: section 302.134, *RSMo Supp. 1995*. * This rule originally filed as 11 CSR 60-1.110. Original rule filed March 20, 1996, effective Sept. 30, 1996. Moved to 7 CSR 60-1.110, effective Aug. 28, 2003.

*Original authority: 302.134, *RSMo 1995*.

The motorcycle rider training course is conducted in 57.4% of Missouri counties or political subdivisions which account for a majority of the State's registered motorcycles.

Motorcycle Riding Training Course Criteria

Attachment 5:

Description of the quality control procedures to assess motorcycle rider training courses and instructor training courses and actions taken to improve courses.

Missouri Motorcycle Safety Program Memo explaining quality control procedures

MEMORANDUM

DATE: March 11, 2015

TO: Bill Whitfield, MoDOT, Highway Safety Division

FROM: Raymond Pierce

Missouri Motorcycle Safety Program

RE: Missouri Motorcycle Safety Program Quality Assurance Procedures

The MMSP conducts ongoing and comprehensive quality control on all aspects of the program including at least one visit for every training site annually. Q.A. visits last a minimum of three hours and consists of observations by a trained Quality Assurance specialist who evaluates every aspect of the training including instructor performance and training site compliance with state and national performance standards. Also, every training motorcycle used in MMSP courses is evaluated for compliance with training and safety standards at each visit.

Additionally, quality assurance personnel receive ongoing training in evaluation techniques and protocols. As MMSP State Coordinator I seek ongoing opportunities for training and updated information to ensure our standards and techniques are the most current available.

Finally, we actively solicit course feedback from our students in the form of surveys conducted after course completion. All training sites and instructors around Missouri are also encouraged to provide their students with direct contact information to the office of the state coordinator in the event they would like to provide praise or register a complaint with our office.

Don't hesitate to contact me if you have any questions or need additional information.

Raymond Pierce, State Coordinator

Missouri Motorcycle Safety Program

Use of Fees Collected from Motorcyclists for Motorcycle Programs Criteria

Attachment 6:

☐ Applying as a Law State –

The State law or regulation requires all fees collected by the State from motorcyclists for the purpose of funding motorcycle training and safety programs are to be used for motorcycle training and safety programs.

Mo. Rev. Stat. § 302.137.1

Missouri Revised Statutes

Chapter 302 Drivers' and Commercial Drivers' Licenses Section 302.137

August 28, 2011

Motorcycle safety trust fund established, purpose--operators of motorcycles or motortricycles in violation of laws or ordinances to be assessed surcharge, collection, distribution.

302.137. 1. There is hereby created in the state treasury for use by the department of public safety a fund to be known as the "Motorcycle Safety Trust Fund". All judgments collected pursuant to this section, appropriations of the general assembly, federal grants, private donations and any other moneys designated for the motorcycle safety education program established pursuant to sections 302.133 to 302.138 shall be deposited in the fund. Moneys deposited in the fund shall, upon appropriation by the general assembly to the department of public safety, be received and expended by the department of public safety for the purpose of funding the motorcycle safety education program established under sections 302.133 to 302.138. Notwithstanding the provisions of section 33.080 to the contrary, any unexpended balance in the motorcycle safety trust fund at the end of any biennium shall not be transferred to the general revenue fund.

2. In all criminal cases, including violations of any county ordinance or any violation of criminal or traffic laws of this state, including an infraction, there shall be assessed as costs a surcharge in the amount of one dollar. No such surcharge shall be collected in any proceeding involving a violation of an ordinance or state law when the proceeding or defendant has been dismissed by the court or when costs are to be paid by the state, county or municipality.

3. Such surcharge shall be collected and distributed by the clerk of the court as provided in sections 488.010 to 488.020. The surcharge collected pursuant to this section shall be paid to the state treasury to the credit of the motorcycle safety trust fund established in this section.

2014

AN ACT

To appropriate money for the expenses, grants, refunds, and distributions of the Department of Revenue, the Department of Transportation, and the several divisions and programs thereof to be expended only as provided in Article IV, Section 28 of the Constitution of Missouri, and to transfer money among certain funds for the period beginning July 1, 2014 and ending June 30, 2015; provided that no funds from these sections shall be expended for the purpose of costs associated with the offices of the Governor, Lieutenant Governor, Secretary of State, State Auditor, State Treasurer, or Attorney General, and further provided that the Department of Revenue shall employ no more than 939.04 full-time equivalent employees (FTE) from the General Revenue Fund, and further provided that no funds shall be used to pay the costs of conferences or meetings held by AAMVA, travel to attend such conferences or meetings, participation with boards, committees, or administration of AAMVA, or for the collection or retention of individual data by AAMVA that violates any state law.

Be it enacted by the General Assembly of the state of Missouri, as follows:

There is appropriated out of the State Treasury, to be expended only as provided in
2 Article IV, Section 28 of the Constitution of Missouri, for the purpose of funding each
3 department, division, agency, and program enumerated in each section for the item or items
4 stated, and for no other purpose whatsoever chargeable to the fund designated for the period
5 beginning July 1, 2014 and ending June 30, 2015, as follows:

Organizational Structure

(Rev. 2/09)

Missouri Motorcycle Safety Program Executive Summary

Located at the Missouri Safety Center on the campus of the University of Central Missouri in Warrensburg, the Missouri Motorcycle Safety Program (MMSP) is an ongoing program designed to offer motorcycle safety training and awareness programs to the citizens of Missouri. The State Motorcycle Program Coordinator oversees the Missouri Motorcycle Safety Program by coordinating and implementing education programs with a statewide network of certified training sites and instructors.

The goal of the Missouri Motorcycle Safety Program (MMSP) is to increase public safety among motorcyclists and motorists by reducing motorcycle crashes and injuries through rider education and public information. The MMSP shares the vision of Missouri Department of Transportation – Traffic and Highway Safety Division to reduce the number and severity of traffic crashes in the State of Missouri.

MMSP accomplishments for 2014 include:

- Trained 4,634 people in Beginning Rider Program (BRP) and Advanced Rider Program (ARP)
- Provided professional development training to 135 Instructors/RiderCoaches
- Purchased 4 new training units (motorcycles) for training sites throughout Missouri, bringing the total number of training units to 240.
- Continued operations and oversight of thirty-one training sites.
- PI&E efforts reached approximately 375,000 people.

The MMSP is funded through the Motorcycle Safety Trust Fund in partnership with the Traffic and Highway Safety Division at the Missouri Department of Transportation. \$425,000 is appropriated to the MMSP for motorcycle safety training and awareness. Approximately \$5,400 is paid annually to the Missouri Office of Administration in support of the state's central services. Other than those expenses, no Motorcycle Safety Trust Fund money is used for purposes other than motorcycle training and public awareness of motorcyclists. A full description of how the Motorcycle Safety Trust Fund money is used can be found in the proceeding pages.

Missouri Motorcycle Safety Program Budget: 2013 -Present

Approximately \$325,000 to \$375,000 is collected annually through the Motorcycle Safety Trust Fund to support the Missouri Motorcycle Safety Program (MMSP). From 2011 to 2012 the annual budget was set at the annual appropriations amount of \$425,000 and \$375,000, respectively. In 2014 - 2016 the annual budget was reduced to \$350,000, due to a reduction in Trust Fund revenues.

No Motorcycle Safety Trust Funds are used for purposes other than training motorcyclists and public awareness of motorcyclists.
